Empiricism and the Philosophy of Mind Wilfrid Sellars 1997-03-25 The most important work by one of America's greatest twentieth-century philosophers, *Empiricism and the Philosophy of Mind* is both the epitome of Wilfrid Sellars' entire philosophical system and a key document in the history of philosophy. First published in essay form in 1956, it helped bring about a sea change in analytic philosophy. It broke the link, which had bound Russell and Ayer to Locke and Hume--the doctrine of "knowledge by acquaintance." Sellars' attack on the Myth of the Given in *Empiricism and the Philosophy of Mind* was a decisive move in turning analytic philosophy away from the foundationalist motives of the logical empiricists and raised doubts about the very idea of "epistemology." With an introduction by Richard Rorty to situate the work within the history of recent philosophy, and with a study guide by Robert Brandom, this publication of *Empiricism and the Philosophy of Mind* makes a difficult but indisputably significant figure in the development of analytic philosophy clear and comprehensible to anyone who would understand that philosophy or its history.

English Literature, Volume 1 Louis A. Landa 2015-12-08 This is the first of two volumes which will make available in convenient form the annual bibliographies of 18th century scholarship published for the past 25 years in the *Philological Quarterly*. Volume 1 includes the years 1926-1938. By means of lithography the original issues are exactly reproduced with retention of all critical annotations. Originally published in 1950. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Metaphysical Society (1869-1880) Catherine Marshall 2019-08-13 The Metaphysical Society was founded in 1869 at the instigation of James Knowles (editor of the *Contemporary Review* and then of the *Nineteenth Century*) with a view to 'collect, arrange, and diffuse Knowledge (whether objective or subjective) of mental and moral phenomena' (first resolution of the society in April 1869). The Society was a private dining and debate club that gathered together a latter-day clerisy. Building on the tradition of the Cambridge Apostles, they elected talented members from across the Victorian intellectual spectrum: Bishops, one Cardinal, philosophers, men of science, literary figures, and politicians. The Society included in its 62 members prominent figures such as T. H. Huxley, William Gladstone, Walter Bagehot, Henry Edward Manning, John Ruskin, and Alfred Lord Tennyson. The *Metaphysical Society (1869-1880)* moves beyond Alan Willard Brown's 1947 pioneering study of the Metaphysical Society by offering a more detailed analysis of its inner dynamics and its larger impact outside the dining room at the Grosvenor Hotel. The contributors shed light on many of the colourful figures that joined the Society as well as the alliances that they formed with fellow members. The collection also examines the major concepts that informed the papers presented at Society meetings. By discussing groups, important individuals, and underlying concepts, the volume contributes to a rich, new picture of Victorian intellectual life during the 1870's, a period when intellectuals were wondering how, and what, to believe in a time of social change, spiritual crisis, and scientific progress.

The Political Economy of Sentiment Jose R Torre 2015-09-30 Situates changes in the nature of money and the rise of sophisticated financial structures at the centre of the Enlightenment. This work argues that paper credit instruments were causal - critical to the larger epistemological and psychological changes associated with the Enlightenment's reconstruction of value.

Memory in Historical Perspective Douglas J. Herrmann 2012-12-06 In 1885 Herman Ebbinghaus showed the world how the scientific method could be applied to the elusive phenomena of memory. But what of work on memory before Ebbinghaus? The long ascendance of the Ebbinghaus tradition has eclipsed the contributions of scholars before Ebbinghaus. *Memory in Historical Perspective* draws together for the first time a

collection of writings that figured prominently in scholarly thought about memory from the 8th century B. C. until the scientific investigation of memory began in the late 19th century. *Memory in Historical Perspective* will be of value to students, researchers, teachers, and writers who wish to place the study of memory in its historical context. The writings are thought-provoking; they deal with a wide range of basic issues in memory in a direct and refreshing way. A study of these writings will stimulate insights into current issues about memory in psychology, philosophy, artificial intelligence, anthropology, and education.

Thomas Reid's Inquiry and Essays Thomas Reid 1983-01-01 Reid's previously published writings are substantial, both in quantity and quality. This edition attempts to make these writings more readily available in a single volume. Based upon Hamilton's definitive two volume 6th edition, this edition is suitable for both students and scholars. Beanblossom and Lehrer have included a wide range of topics addressed by Reid. These topics include Reid's views on the role of common sense, scepticism, the theory of ideas, perception, memory and identity, as well as his views on moral liberty, duties, and principles. Historical as well as topical considerations guided the selection process. Thus, Reid's responses to Descartes, Locke, Berkeley, and Hume are included. Through the resulting selections Reid's influence and impact upon subsequent philosophers is manifested.

The Oxford Handbook of Philosophy of Religion William Wainwright 2004-12-16 The *Oxford Handbook of Philosophy of Religion* contains newly commissioned chapters by 21 prominent experts who cover the field in a comprehensive but accessible manner. Each chapter is expository, critical, and representative of a distinctive viewpoint.

The Cambridge History of Philosophy in the Nineteenth Century (1790-1870) Allen W. Wood 2012-09-10 The latest volume in the Cambridge Histories of Philosophy series, the *Cambridge History of Philosophy in the Nineteenth Century* brings together twenty-nine leading experts in the field and covers the years 1790-1870. Their twenty-eight chapters provide a comprehensive survey of the period, organising the material topically. After a brief editor's introduction, it begins with three chapters surveying the background of nineteenth-century philosophy: followed by two on logic and mathematics, two on nature and natural science, five on mind and language (including psychology, the human sciences and aesthetics), four on ethics, three on religion, seven on society (including chapters on the French Revolution, the decline of natural right, political economy and social discontent), and three on history, which deal with historical method, speculative theories of history and the history of philosophy.

Henry Longueville Mansel Francesca Norman 2023-09-25 Henry Longueville Mansel (1820-1871), Anglican theologian and philosopher, has wrongly been remembered as a Kantian agnostic whose ideas led to those of Herbert Spencer. Francesca Norman's book provides a thorough revisioning of Mansel's theology in context and reveals the personal basis of Spencer's animus towards Mansel. Mansel is revealed as an orthodox Anglican theistic personalist whose ideas inspired Newman to write his *Grammar of Assent*. Located in context, Mansel's personal connections with leading Tory figures such as Lord Carnarvon and Benjamin Disraeli are explored. Key controversies with Frederick Denison Maurice and John Stuart Mill are interpreted with reference to the party political elections of 1859 and 1865. Norman offers a vital vision of nineteenth-century theology, philosophy, and politics.

John Witherspoon and the Founding of the American Republic Jeffrey H. Morrison 2003-01-27 Jeffrey H. Morrison offers readers the first comprehensive look at the political thought and career of John Witherspoon—a Scottish Presbyterian minister and one of America's most influential and overlooked founding fathers. Witherspoon was an active member of the Continental Congress and was the only clergyman both to sign the Declaration of Independence and to ratify the federal Constitution. During his tenure as president of the College of New Jersey at Princeton, Witherspoon became a mentor to James Madison and

influenced many leaders and thinkers of the founding period. He was uniquely positioned at the crossroads of politics, religion, and education during the crucial first decades of the new republic. Morrison locates Witherspoon in the context of early American political thought and charts the various influences on his thinking. This impressive work of scholarship offers a broad treatment of Witherspoon's constitutionalism, including his contributions to the mediating institutions of religion and education, and to political institutions from the colonial through the early federal periods. This book will be appreciated by anyone with an interest in American political history and thought and in the relation of religion to American politics.

Charles Peirce's Empiricism Justus Buchler 2017-07-28 This is Volume I of six in a series on the Nineteenth and Twentieth Century Anglo-American Philosophy. Originally published in 1939, this study looks Charles Peirce, who characterized himself as a mere table of contents, so abstract, a very snarl of twine. The purpose of the following pages is to clarify Peirce in some measure, partly by restatement, partly by filling the lacunae in his thought with what the author thinks are its implications.

Epistemology and Logic in the New Testament Douglas W. Kennard 2016-11-30 Biblical contributors express an oral stage engaging Christianity within a properly basic communal worldview similar to Alvin Plantinga advocates. This approach includes a communal Christian application of common sense realism within a worldview and rhetoric similar to Hillite Pharisaism. Each biblical contributor provided vivid testimony using rabbinic language and thought forms. For example, Jewish-Christian midrash re-appropriates Old Testament quotes and narrative in a new performative peshar manner to present Jesus as the Christ. Moving beyond the word studies of biblical epistemologists, Pharisaic-rabbinic Judaism use of biblical revelation, mystical vision, dream, or audible divine voice frame mystical empiricism similar to William Alston. Non-foundational realism facilitates a communal resilient oral tradition similar to the rabbinics. Additionally, Luke-Acts extensively engages Hellenistic historiographic method and the concept of "witness." When multiple interpretations occur concerning miracles, epistemic dualistic non-foundational Lockean epistemology emerges to contribute to the authority of communal kingdom testimony. Occasionally, this Lockean approach adds an internal transformation much as Jonathan Edwards modified Locke to set forth his religious affections as a divine virtue epistemology confirming the authentic narrow way through Peircean pragmatism. This internal knowledge provides self-referential confirmation for a personal relationship and filial knowledge. Each of these expressions of knowledge fosters an ultimate Kierkegaardian commitment to the Trinitarian Christian God.

An Inquiry into the Human Mind, on the Principles of Common Sense Thomas Reid 2014-03-21 The philosopher Thomas Reid (1710 - 1796), the founder of the Scottish School of Common Sense and, was with his contemporary David Hume, played an integral role in the Scottish Enlightenment. Reid's classic treatise on phenomenology includes the following chapters: Chapter I. Introduction I. The importance of the subject, and the means of prosecuting it II. The impediments to our knowledge of the mind III. The present state of this part of philosophy—of Des Cartes, Nalebranche, and Locke IV. Apology for those philosophers V. Of Bishop Berkeley—the "Treatise of Human Nature"—and of scepticism VII. The system of all these authors is the same and leads to scepticism VIII. We ought not to despair of a better Chapter II. Of Smelling I. The order of proceeding. II. The sensation considered abstractly III. Sensation and its remembrance natural principles of belief IV. Judgment and belief in some cases precede simple apprehension V. Two theories of the nature of belief refuted. Conclusions from what hath been said VI. Apology for metaphysical absurdities. Sensation without a sentient, a consequence of the theory of ideas.

Consequences of this strange opinion VII. The conception and belief of a sentient being or mind, is suggested by our constitution. The notion of relations not always got by comparing the related ideas VIII. There is a quality or virtue in bodies, which we call their smell. How this is connected in the imagination with the sensation IX. That there is a principle in human nature, from which the notion of this, as well as all other natural virtues or causes, is derived X. Whether in sensations the mind is active or passive Chapter III. Of Tasting Chapter IV. Of Hearing I. Variety of sounds. Their place and distance learned by custom, without reasoning II. Of natural language Chapter V. Of Touch I. Of heat and cold II. Of hardness and softness III. Of natural signs IV. Of hardness, and other primary qualities VI. Of extension VII. Of extension VIII. Of the existence of a material world IX. Of the systems of philosophers concerning the senses Chapter VI. Of Seeing I. The excellence and dignity of this faculty II. Sight discovers almost nothing which the blind may not comprehend. The reason of this III. Of the visible appearances of objects IV. That colour is a quality of bodies, not a sensation of the mind V. First inference from the preceding VI. Second. That none of our sensations are resemblances of any of the qualities of bodies VII. Of visible figure and extension VIII. Some queries concerning visible figure answered IX. Of the geometry of visibles X. Of the parallel motion of the eyes XI. Of our seeing objects erect by inverted images XII. The same subject continued XIII. Of seeing objects single with two eyes XIV. Of the laws of vision in brute animals XV. The phenomena of squinting considered hypothetically XVI. Facts relating to squinting XVII. Of the effect of custom in seeing objects single XVIII. Of Dr. Porterfield's account of single and double vision XIX. Of Dr. Briggs's theory, and Sir Isaac Newton's conjecture on this subject XX. Of perception in general XXI. Of the process of nature in perception XXII. Of the signs by which we learn to perceive distance from, the eye XXIII. Of the signs used in these acquired perceptions Chapter VII. Conclusion

In Defense of Intuitions A. Chapman 2013-10-06 A reply to contemporary skepticism about intuitions and a priori knowledge, and a defense of neo-rationalism from a contemporary Kantian standpoint, focusing on the theory of rational intuitions and on solving the two core problems of justifying and explaining them.

Scottish Common Sense in Germany, 1768-1800 Manfred Kuehn 2004-03-15 Proponents of Scottish common-sense philosophy, especially Thomas Reid, James Oswald, and James Beattie, had substantial influence on late enlightenment German philosophy. Kuehn explores the nature and extent of that influence.

Perception and Illusion N.J. Wade 2006-03-30 Our contact with the world is through perception, and therefore the study of the process is of obvious importance and significance. For much of its long history, the study of perception has been confined to naturalistic observation. Nonetheless, the phenomena considered worthy of note have not been those that nurture our survival—the veridical features of perception—but the oddities or departures from the common and commonplace accuracies of perception. With the move from the natural world to the laboratory the oddities of perception multiplied, and they received ever more detailed scrutiny. My general intention is to examine the interpretations of the perceptual process and its errors throughout history. The emphasis on errors of perception might appear to be a narrow approach, but in fact it encompasses virtually all perceptual research from the ancients until the present. The constancies of perception have been taken for granted whereas - partures from constancies (errors or illusions) have fostered fascination.

Claude Buffier and Thomas Reid Louise Marcil-Lacoste 1982-09-01 Claude Buffier (1661-1737) was a French Jesuit whose philosophy earned Voltaire's praise. Thomas Reid (1710-96) was the one Scottish philosopher whose response to David Hume is still taken seriously. In this comparative study Professor Marcil-Lacoste not only refutes common assumptions, but also shows that, despite their similar concerns and the unfounded charge that Reid plagiarized from Buffier, a comparison of Reid and Buffier illuminates a range of significant epistemological issues. Further, she demonstrates that common-sense philosophies can be varied, subtle, and original. This book also includes

an edited and annotated version of Reid's hitherto unpublished curâ primâ on common sense prepared by David Fate Norton.

John Grote, Cambridge University and the Development of

Victorian Thought John Richard Gibbins 2013-10-07 John Grote struggled to construct an intelligible account of philosophy at a time when radical change and sectarian conflict made understanding and clarity a rarity. This book answers three questions: * How did John Grote develop and contribute to modern Cambridge and British philosophy? * What is the significance of these contributions to modern philosophy in general and British Idealism and language philosophy in particular? * How were his ideas and his idealism incorporated into the modern philosophical tradition? Grote influenced his contemporaries, such as his students Henry Sidgwick and John Venn, in both style and content; he forged a brilliantly original philosophy of knowledge, ethics, politics and language, from a synthesis of the major British and European philosophies of his day; his social and political theory provide the origins of the 'new liberal' ideas later to reach their zenith in the writings of Green, Sidgwick, and Collingwood; he founded the 'Cambridge style' associated with Moore, Russell, Broad, McTaggart and Wittgenstein; and he was also a major influence on Oakeshott.

Romantic Empiricism Gavin Budge 2007 "Romantic Empiricism is a collection of essays by established and emerging scholars, which represents a paradigm shift for the study of British Romanticism. The volume challenges the received view that German Idealist philosophy constitutes the main intellectual reference point for British Romantic writers, arguing instead that the tradition of Scottish Common Sense philosophy, largely overlooked by literary scholars, is a significant influence on Romantic thought. The essays in the collection examine a variety of canonical and non-canonical Romantic authors in the light of this fresh interpretative context, ranging from Charlotte Smith and Elizabeth Hamilton to Robert Burns and S. T. Coleridge. The volume is prefaced by a substantial theoretical introduction, which sets out the historical and interpretative case for the relevance of Common Sense philosophy for the study of British Romanticism."--BOOK JACKET.
