

En El Oceano En La Naturaleza

Océanos Mia Cassany 2019 Después del éxito de Junglas, publicado en 9 idiomas, Marcos y Mia abordan otro de los temas candentes y especialmente sensibles: el mundo submarino. En esta ocasión presentan los 16 escenarios más bellos, delicados y sensibles que podemos aún encontrar sobre la Tierra, y que tenemos obligación de mantener para las generaciones futuras. Antártida, Isla Coco, Azores, La gran barrera de coral australiana o las aguas del Mediterráneo son zonas que hay que conocer y conservar, puesto que como se sabe, los océanos proporcionan más del 70% del oxígeno que respiramos.

Fire In The Turtle House Osha Gray Davidson 2008-11-05 Sea turtles have existed since the time of the dinosaurs. But now, suddenly, the turtles are dying, ravaged by a mysterious plague that some biologists consider the most serious epidemic now raging in the natural world. Perhaps most important, sea turtles aren't the only marine creatures falling prey to deadly epidemics. Over the last few decades diseases have been burning through nearshore waters around the world with unprecedented lethality. What is happening to the sea turtle, and how can it be stopped? In this fascinating scientific detective story, Osha Gray Davidson tracks the fervent efforts of the extraordinary and often quirky scientists, marine biologists, veterinarians, and others racing against the clock to unravel a complicated biological and environmental puzzle and keep the turtles from extinction. He follows the fates of particular turtles, revealing their surprisingly distinct personalities and why they inspire an almost spiritual devotion in the humans who come to know them. He also explores through vivid historical anecdotes and examples the history of

man's relationship to the sea, opening a window onto the role played by humans in the increasing number of marine die-offs and extinctions.

Beautifully written, intellectually provocative, Fire in the Turtle House reveals how emerging diseases wreaking havoc in the global ocean pose an enormous, direct threat to humanity.

This is science journalism at its best.

La tormenta perfecta Sebastian Junger 2023-06-12 Un clásico moderno: la historia de la tormenta del siglo. En octubre de 1991 tuvo lugar lo que los meteorólogos denominaron «la tormenta del siglo», un fenómeno imprevisto que azotó la costa este de Norteamérica fruto de una insólita combinación de factores. Con olas de más de treinta metros de altura y vientos de 180 kilómetros por hora, la tormenta sacudió el mar con una violencia extraordinaria. En La tormenta perfecta, Junger describe las condiciones que dieron lugar a este hecho sin precedentes y reconstruye minuciosamente tres emocionantes historias, la de los seis tripulantes del pesquero Andrea Gail -que desaparecieron a cientos de kilómetros de su hogar en Gloucester, Massachusetts-, la de un velero atrapado en plena tormenta y la del rescate de los tripulantes de un helicóptero de salvamento que cayó al mar. A partir de una extensa serie de fuentes, que van de comunicaciones por radio a relatos de testigos, Junger recrea con impresionante tensión narrativa la lucha de estos hombres por su supervivencia y traza un magnífico retrato de la gente de mar. Convertida en un bestseller desde su aparición en 1997, esta crónica sobrecogedora está considerada ya un clásico del género. «Trepidante. Aunque nunca hayas estado en una tormenta en alta mar, el relato de Junger te hará sentir el mismo terror.» Anthony Bailey (The New York Times Book Review) «Una historia que se lee con enorme interés, inquietud y concentración; y si uno conoce un poco la vida en alta mar, siente la gigantesca fuerza de los vientos huracanados y el volumen inconcebible de las olas de más de treinta metros.» Patrick O'Brian «No hay nada inventado en el libro de Junger. Todo lo que se cuenta es terrorífica y horriblemente real.» Los Angeles Times «Una

crónica apasionante, una auténtica historia de aventuras.» Newsweek «Soberbio. Está narrado con autoridad, brío y una profunda simpatía por todos los que se enfrentan a los peligros del mar.» Jonathan Yardley (The Washington Post)

Cómo leer el agua Tristan Gooley 2020-04-17

Un fascinante viaje por el lenguaje de la naturaleza y los secretos del agua. Desde Sussex hasta Omán, a través de los helados misterios de la Antártida y la exótica Polinesia, el aventurero y explorador Tristan Gooley nos revela los secretos de lagos, ríos y océanos que ha descubierto durante sus expediciones pioneras, y nos invita a acompañarlo en un viaje deslumbrante por los secretos del "oro azul". El agua nos rodea y nos da la vida, y forma parte de nosotros. En parte libro de aventuras y en parte ensayo literario y filosófico, **Cómo leer el agua** es una increíble guía moderna para conectar con la naturaleza y una celebración de la curiosidad y el conocimiento. El lector tiene en sus manos una feliz mezcla de viajes, ciencia y cultura. Una obra, en suma, imprescindible para todos los amantes de la naturaleza. "El placer contagioso que Gooley siente al explorar el mundo se traduce en una escritura vital y alegre que hará

las delicias de los lectores. De lectura obligada." The Sunday Times "Gooley nos enseña en esta fascinante guía a observar e interpretar el agua, desde el lago de un parque hasta los mares del Pacífico." The Telegraph "Un libro delicioso, repleto de curiosidades y de historias sobre el agua [...] Empieza con humildad, arrojando guijarros a un charco, y termina a lo grande, en los confines de la Antártida. Si adoran el líquido elemento, aprenderán y disfrutarán lo indecible." The Wall Street Journal "Un libro fascinante y sumamente accesible, perfecto para los amantes del agua y la naturaleza." Urbanismo Regenerativo Landlab 2024-01-23

We are living in a critical moment, a reality marked by environmental and socio-economic limits that requires innovative and realistic forms of action and planning. This is what regenerative urbanism proposes, a new approach based on utopian pragmatism that seeks to restore balance to the urban territory by designing systems that allow it to adapt and transform. It is a methodology that defines models that do not consume available resources, but rather generate new ones that ensure compatibility between economic and social prosperity and nature. Santander, Hábitat Futuro (Santander, Future Habitat) is the city model created from this methodology, a proposal for the transformation of this city for the year 2055. It is an open model based on innovation and citizen participation that prepares and adapts the territory for the different scenarios to come. Santander, Habitat Futuro is a guide that directs the commitment of the different social, economic and political agents towards a common goal: to achieve a circular, sustainable, resilient, vertebrate, prosperous, vital and inclusive city. A model that, due to its innovative nature, can serve as an example to other intermediate cities around the world.

Building Ocean Science Partnerships National Research Council 1999-11-26 Building Ocean Science Partnerships describes a set of potential ocean science projects for cooperative research between scientists from the United States and Mexico, particularly focused on the Pacific Coast of California and Baja California, the Gulf of California, and the Gulf of Mexico. Barriers to cooperation between scientists of the two nations are identified, and methods to overcome such barriers are recommended. The book describes how interactions can be promoted by enhancing opportunities for education and training, building and sharing scientific infrastructure, participating together in large-scale marine research programs and regional ocean observing systems, planning joint science events and publications, and developing sources of binational funding. Building Ocean Science Partnerships will be published in English and Spanish to make its contents widely accessible in the United States and Mexico.

Chasing Science at Sea Ellen Prager 2009-05-15

To the average office-dweller, marine scientists seem to have the good life: cruising at sea for weeks at a time, swimming in warm coastal waters, living in tropical paradises. But ocean scientists who go to sea will tell you that it is no vacation. Creature comforts are few and the obstacles seemingly insurmountable, yet an abundance of wonder and discovery still awaits those who take to the ocean. *Chasing Science at Sea* immerses readers in the world of those who regularly go to sea—aquanuts living underwater, marine biologists seeking unseen life in the deep ocean, and the tall-ship captains at the helm, among others—and tells the fascinating tale of what life—and science—is like at the mercy of Mother Nature. With passion and wit, well-known marine scientist Ellen Prager shares her stories as well as those of her colleagues, revealing that in the field ingenuity and a good sense of humor are as essential as water, sunblock, and GPS. Serendipity is invaluable, and while collecting data is the goal, sometimes just getting back to shore means success. But despite the physical hardship and emotional duress that come with the work, optimism and adventure prompt a particularly hardy species of scientist to return again and again to the sea. Filled with firsthand accounts of the challenges and triumphs of dealing with the extreme forces of nature and the unpredictable world of the ocean, *Chasing Science at Sea* is a unique glimpse below the water line at what it is like and why it is important to study, explore, and spend time in one of our planet's most fascinating and foreign environments.

Yoga del agua Carmelo H. Ríos 2006-06-01
Asistimos al despertar de una nueva conciencia ecológica y espiritual que nos conduce a una renovada comprensión de la relación del hombre con el agua y la naturaleza. Extraordinarios descubrimientos y hechos contemporáneos nos hablan de la necesidad de volver a vincularnos con el agua y sus infinitas posibilidades energéticas, terapéuticas y espirituales, y nos

llevan a abrir un sendero diferente de evolución de la mente en el planeta Tierra, una nueva vía espiritual que enlaza con todos y cada uno de los preceptos percibidos hace ya muchos siglos por los sabios y que podríamos llamar "Yoga del agua". Esta obra es una invitación para sumergirnos en ese mundo infinito; pero sobre todo alberga la razón para una mayor y más íntima unión del ser humano con el agua y el universo. «Yoga del agua nos brinda un punto de apoyo para mover el mundo de las ideas y de los sentimientos; es una red que enlaza las razones, devolviendo el encanto a la Vida que la humanidad necesita perentoriamente para dar sentido a la existencia. Es una nueva forma de "religión", una nueva manera de volver a unirnos en un pensamiento global frente a la depredación global, y es una propuesta de acción urgente ("piensa en global y actúa en local") para salvar la vida, proteger a Gaia y salvarnos con el mundo. Presiento que estamos descubriendo y abriendo un nuevo camino: un yoga del agua o del mar. "En resumen -nos dice el autor-, una nueva forma de volver a casa, al universo, a la naturaleza..., y a nosotros mismos."» Doctor Pedro Enguix «Como amante del mar y de los delfines, Carmelo Ríos sintoniza con la afinidad natural que existe entre ellos, el ser humano y el poder conductivo del agua. En su libro *Yoga del agua: volver al océano* refleja este sagrado vínculo junto al poder vivificante del agua en el hombre y en el universo en el que vivimos. Su monumental trabajo es el resultado de muchos años de investigación, escribiendo y viajando a través del mundo.» Jean-Jacques Mayol CARMELO RÍOS Escritor, investigador y orientalista, es un enamorado de la naturaleza, del agua y del mar, buceador de gran profundidad e instructor de buceo. Es también un viajero infatigable que ha realizado numerosos viajes a India, África Central, Oriente Medio, Tíbet y Japón, entre otros países, recibiendo enseñanzas de grandes maestros en numerosos campos del saber humano. No duda en viajar donde su búsqueda le guíe para encontrar a hombres y a mujeres insólitos, artistas, buscadores, personajes de leyenda y genios que parecen extraídos de la época renacentista. Sabe armonizar las ideas de las más antiguas filosofías de Oriente y Occidente con los paradigmas de los nuevos profetas de la

ciencia. Maestro de aikido y de otras disciplinas orientales, en su obra persigue el fluir armonioso y acuático, así como el movimiento circular, evolutivo y ascendente de los pensamientos, de los sentimientos y de los ideales, sobre el lienzo luminoso de un profundo respeto por la Vida.
