Classroom Assessment in Multiple Languages Margo Gottlieb 2020-12-09 What if multilingual learners had the freedom to interact in more than one language with their peers during classroom assessment? What if multilingual learners and their teachers in dual language settings had opportunities to use assessment data in multiple languages to make decisions? Just imagine the rich linguistic, academic, and cultural reservoirs we could tap as we determine what our multilingual learners know and can do. Thankfully, Margo Gottlieb is here to provide concrete and actionable guidance on how to create assessment systems that enable understanding of the whole student, not just that fraction of the student who is only visible as an English learner. With *Classroom Assessment in Multiple Languages* as your guide, you'll: Better understand the rationale for and evidence on the value and advantages of classroom assessment in multiple languages Add to your toolkit of classroom assessment practices in one or multiple languages Be more precise and effective in your assessment of multilingual learners by embedding assessment as, for, and of learning into your instructional repertoire Recognize how social-emotional, content, and language learning are all tied to classroom assessment Guide multilingual learners in having voice and choice in the assessment process Despite the urgent need, assessment for multilingual learners is generally tucked into a remote chapter, if touched upon at all in a book; the number of resources narrows even more when multiple languages are brought into play. Here at last is that single resource on how educators and multilingual learners can mutually value languages and cultures in instruction and assessment throughout the school day and over time. We encourage you to get started right away. "Margo Gottlieb has demonstrated why the field, particularly the field as it involves the teaching of multilingual learners, needs another assessment book, particularly a book like this. . . . *Classroom Assessment in Multiple Languages* quite likely could serve as a catalyst toward the beginning of an enlightened discourse around assessment that will benefit multilingual learners." ~Kathy Escamilla

Spanish Cinema in the Global Context Samuel Amago 2013-09-11 Across a broad spectrum of media, markets, and national contexts, self-reflexivity continues to be a favored narrative mode with wide ranging functions. In this book Amago argues that, in addition to making visible industry and production concerns within the film text, reflexive aesthetics have a cartographic function that serves to map the place of a film (geographic and cultural) within the global cinemascape, and thus to bring into sharper relief images of the national. Focusing on films in the contemporary Spanish context that in some way reflect back on themselves and the processes of their own production, that purposefully blur the distinction between reality and fiction, or that draw attention to the various modes of cinematic exhibition and reception, Amago proposes ways in which these movies can be employed to understand Spanish national cinemas today as imbedded within a dynamic global system.

Digital Resources, Creativity and Innovative Methodologies in Language Teaching and Learning Adriana Teresa Damascelli 2017-06-20 The concept of university language centres has changed in recent decades. Initially conceived as laboratories for practical and autonomous language-learning, they are now considered as places with more specific and complex functions in language teaching and learning. University language centres now constitute networks for exchanging knowledge and know-how in order to respond to ever-changing, multilingual and multicultural contexts. At the same time, the availability and acquisition of new technologies is contributing to the creation of new tools for the provision of appropriate services and training. This collection covers a wide range of topics related to the activities, experiences and applied research carried out in Italian university language centres. It provides further evidence of the important role university language centres play in promoting language expertise, developing tools and adopting digital resources, and providing support and training for language teaching. Technology, creativity, methodologies and plurilingualism are key topics in the book as they constitute the essential ingredients for effective and successful language teaching and learning. The volume's thirty-three chapters provide multi-perspective approaches, showing how the real contexts of current language education need the integration of theoretical backgrounds with the best practices resulting from practical experience.

Wilhelm von Humboldt and Early American Linguistics Emanuel J. Drechsel 2024-02 Wilhelm von Humboldt (1767-1835), an early pioneer in the philosophy of language, linguistic and educational theory, was not only one of the first European linguists to identify human language as a rule-governed system -the foundational premise of Noam Chomsky's generative theory - or to reflect on cognition in studying language; he was also a major scholar of Indigenous American languages. However, with his famous naturalist brother Alexander 'stealing the show,' Humboldt's contributions to linguistics and anthropology have remained understudied in English until today. Drechsel's unique book addresses this gap by uncovering and examining Humboldt's influences on diverse issues in nineteenth-century American linguistics, from Peter S. Duponceau to the early Boasians, including Edward Sapir. This study shows how Humboldt's ideas have shaped the field in multiple ways.

Shining a light on one of the early innovators of linguistics, it is essential reading for anyone interested in the history of the field.

What We Remember Mariana Achugar 2008 This interdisciplinary monograph explores the discursive manifestations of the conflict over how to remember and interpret the actions of the military during the last dictatorship in Uruguay (1973-1985). Through the exploration of the discursive ways in which this powerful group represents past events and participants, we can trace the ideological struggle over how to reconstruct a traumatic past. By looking at memory as a social and discursive practice, the analysis identifies particular semiotic practices and linguistic patterns deployed in the construction of memory. The discursive description of what is remembered, how it is remembered, and who remembers serves to explain how the institution's construction of the past is transformed and maintained to respond to outside criticism and create an institutional identity as a lawful state apparatus. This book should interest discourse analysts, historians, sociologists and researchers in the field of transitional justice.

Women in Mexican Folk Art Eli Bartra 2013-12-15 The aim of this book is to engender Mexican folk art and locate women at its centre by studying the processes of creation, distribution, and consumption, as well as examining iconographic aspects, and elements of class and ethnicity, from the perspective of gender. The author will demonstrate that the topic provides unique insights into Mexican culture, and has enormous relevance within and without the country, given the fact that much folk art is made for the United States and Europe, either in terms of the tourists who buy it on coming to Mexico, or that which is exported.

Represented Discourse, Resonance and Stance in Joking

Interaction in Mexican Spanish Minerva Oropeza Escobar 2011 The book provides a new angle for the study of otherwise amply discussed discourse and interactional phenomena. The new perspective consists in addressing the interconnections between resonance, stance, represented discourse and joking in Mexican conversational discourse. In so doing, it contributes to a better understanding of the interplay between collaboration, intersubjectivity and emergence, among other relevant issues. Scholars and advanced students concerned with dialogic syntax theory, stance theory and Spanish, will find the present analysis interesting and innovative. However, the writing and methodology, based on clearly discussed and presented examples from selected conversational excerpts, including graphic representations of linguistic and discourse data, makes the analysis easy to follow also to non-specialists. The book is thus interesting to a broad circle of readers, whether they are concerned with any of the issues dealt with or with their mutual connections, whether they are specialists or not.
