Should you be more worried about finding a source of uncontaminated water or about a bear that might be in the area? Neither, says Les Stroud. Your bigger worry should be shelter—the daytime might be nice, but it's likely going to be cold at night. And that's just the beginning. The concept of *Survivorman* is simple: left in a remote location, Les must survive for seven days on his own without food, water or equipment. Now, he shares his expert knowledge in *Survive!*, a fully illustrated guide based on his experiences on six continents and filled with field-tested advice. Many books on survival are culled from Second World War-era training techniques that are out-of-date or just plain wrong. *Survive!* debunks these dated myths, exploring basic and advanced tactics that show you how to cope in any survival situation. Brought to life with Les's own anecdotes and the tales of others, *Survive!* is the perfect manual for anyone -- from beginner to armchair traveller to seasoned explorer -- who wants to meet nature's dangers with confidence. As Les writes, "If you believe you can make it through the bad times, and you are not intimidated by the forces of nature, you will markedly increase your chances of survival." *SURVIVE!* includes detailed information on the following: preparing for survival, mentally and physically fire-making techniques basic survival kit components finding, collecting and making water sources of food types of shelter

98. 6 Degrees Cody Lundin 2011-05-16 If you breathe and have a pulse, you NEED this book. -Cody Lundin Cody Lundin, director of the Aboriginal Living Skills School in Prescott, Arizona, shares his own brand of wilderness wisdom in this highly anticipated new book on commonsense, modern survival skills for the backcountry, the backyard, or the highway. It is the ultimate book on how to stay alive-based on the principal of keeping the body's core temperature at a lively 98.6 degrees. In his entertaining and informative style, Cody stresses that a human can live without food for weeks, and without water for about three days or so. But if the body's core temperature dips much below or above the 98.6 degree mark, a person can literally die within hours. It is a concept that many don't take seriously or even consider, but knowing what to do to maintain a safe core temperature when lost in a blizzard or in the desert could save your life. Lundin delivers the message with wit, rebellious humor, and plenty of backcountry expertise. Cody Lundin and his Aboriginal Living Skills School have been featured in dozens of national and international media sources, including Dateline NBC, CBS News, USA Today, The Donny and Marie Show, and CBC Radio One in Canada, as well as on the cover of Backpacker magazine. When not teaching for his own school, he is an adjunct faculty member at Yavapai College and a faculty member at the Ecosa Institute. Cody is the only person in Arizona licensed to catch fish with his hands, and lives in a passive solar earth home sixty miles from Prescott, Arizona.
