Outliers Malcolm Gladwell 2008-11-18 From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Cook's Camden Mark Swenarton 2017 "The housing projects built in Camden in the 1960s and 1970s when Sydney Cook was borough architect are widely regarded as the most important urban housing built in the UK in the past 100 years. Cook recruited some of the brightest talent available in London at the time and the schemes, which included

Alexandra Road, Branch Hill, Fleet Road, Highgate New Town and Maiden Lane, set out a model of housing that continues to command interest and admiration from architects to this day. The Camden projects represented a new type of urban housing based on a return to streets with front doors. In place of tower blocks, the Camden architects showed how the required densities could be achieved without building high, creating a new kind of urbanism that integrated with, rather than broke from, its cultural and physical context. This book examines how Cook and his team created this new kind of housing, what it comprised, and what lessons it offers for today. New colour photographs combine with original black and white photography to give a fascinating 'then and now' portrayal not just of the buildings but also of the homes within and the people who live there."--Site web de l'éditeur.

Experiencing Architecture, second edition Steen Eiler Rasmussen 1964-03-15 A classic examination of superb design through the centuries. Widely regarded as a classic in the field, *Experiencing Architecture* explores the history and promise of good design. Generously illustrated with historical examples of designing excellence—ranging from teacups, riding boots, and golf balls to the villas of Palladio and the fish-feeding pavilion of Beijing's Winter Palace—Rasmussen's accessible guide invites us to appreciate architecture not only as a profession, but as an art that shapes everyday experience. In the past, Rasmussen argues, architecture was not just an individual pursuit, but a community undertaking. Dwellings were built with a natural feeling for place, materials and use, resulting in “a remarkably suitable comeliness.” While we cannot return to a former age, Rasmussen notes, we can still design spaces that are beautiful and useful by seeking to understand architecture as an art form that must be experienced. An understanding of good design comes not only from one's professional experience of architecture as an abstract, individual pursuit,

but also from one's shared, everyday experience of architecture in real time—its particular use of light, color, shape, scale, texture, rhythm and sound. Experiencing Architecture reminds us of what good architectural design has accomplished over time, what it can accomplish still, and why it is worth pursuing. Wide-ranging and approachable, it is for anyone who has ever wondered “what instrument the architect plays on.”

Spearhead of Logistics Benjamin King 2016-02-25 Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the

Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

American Sheikhs Brian VanDeMark 2012-01-31 American Sheikhs is the story of a great institution—the American University of Beirut (AUB)—and the families who created and fostered it for almost 150 years. Author Brian VanDeMark's vivid narrative includes not only the colorful history of AUB and many memorable episodes in a family saga, but also larger and more important themes. In the story of the efforts of these two families to build a great school with alternating audacity, arrogance, generosity, paternalism, and vision, the author clearly sees an allegory for the larger history of the United States in the Middle East. Before 1945, AUB's history is largely positive. Despite American nationalism and presumptions of Manifest Destiny, Middle Easterners generally viewed the school as an engine of constructive change and the United States as a benign force in the region. But in the post-World War II era, with the rise of America as a world power, AUB found itself buffeted by the strong winds of nationalist frustration, Zionism and anti-

Zionism, and—eventually—Islamic extremism. Middle Easterners became more ambivalent about America's purposes and began to see the university not just as a cradle of learning but also as an agent of undesirable Western interests. This story is full of meaning today. By revealing how and why the Blisses and Dodges both succeeded and failed in their attempts to influence the Middle East, VanDeMark shows how America's outreach to the Middle East can be improved and the vital importance of maintaining good relations between Americans and the Arab world in the new century.

MAKE IT FABULOUS: The Architecture and Designs of William T.

Georgis William T. Georgis 2013-06-04 Sumptuous and scrupulous in equal measure, the work of William T. Georgis is a glamorous blend of high-style architecture and expressive, innovative applications of the traditions of the decorative arts. In the twenty years since he founded his namesake firm, Georgis has created a dazzling portfolio consisting primarily of houses and apartments; other projects include restaurants, commercial interiors, and galleries. Georgis melds elegant architecture, imaginative furniture and fixtures (often custom-designed), and a layered assembly of art and objects with what he terms "a bit of magic." A thoughtful eclecticism, informed by an extensive knowledge of art, architecture, and the decorative arts, characterizes all his work. The first monograph on Georgis, *Make It Fabulous* presents sixteen houses and apartments in New York City, Long Island, Florida, Montana, and California. All the residences were designed around important art collections and often include specially commissioned pieces. Among the projects showcased are Georgis's own homes, a smoked-glass townhouse in New York and a vacation house that hangs over the bay in La Jolla, California. Also included in the volume are Chinatown Brasserie, a theatrical eatery in lower Manhattan, and the interiors of historic Lever House, a respectful restoration of a modern masterpiece. Along with lavish, large-scale photography, each project features the architect's trenchant commentary on the architecture, the decoration, and the process. Perceptive essays by design historians Donald Albrecht and

Natalie Shivers illuminate Georgis's relationships with his clients, or "patrons," and the creation of narratives in his work. Multifaceted and multilayered, just like the work, this inventive volume is a virtuoso tutorial in the world of fabulous.

How Asia Works Joe Studwell 2013-07-02 "A good read for anyone who wants to understand what actually determines whether a developing economy will succeed." —Bill Gates, "Top 5 Books of the Year" An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who the Financial Times said "should be named chief myth-buster for Asian business." In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill. "Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist [Financial Mail](#) 1984

American Airpower Comes Of Age—General Henry H. "Hap" Arnold's World War II Diaries Vol. II [Illustrated Edition] Gen. Henry H. "Hap." Arnold 2015-11-06 Includes the Aerial Warfare In Europe During World War II illustrations pack with over 180 maps, plans, and photos. Gen Henry H. "Hap." Arnold, US Army Air Forces (AAF) Chief of Staff during World War II, maintained diaries for his several journeys to various meetings and conferences throughout the conflict. Volume 1 introduces Hap Arnold, the setting for five of his journeys, the diaries he kept, and evaluations of those journeys and their consequences. General Arnold's travels brought him into strategy meetings and personal conversations with virtually all leaders of Allied forces as well as many AAF troops around the world. He recorded his impressions, feelings, and expectations in his diaries. Maj Gen John W. Huston, USAF, retired, has captured the essence of Henry H. Hap Arnold—the man, the officer, the AAF chief, and his mission. Volume 2 encompasses General Arnold's final seven journeys and the diaries he kept therein.
