A Cannabis Reader European Monitoring Centre for Drugs and Drug Addiction 2008 In Volume 1 we can read an autobiographical article on events in the United Kingdom in the late 1960s, recent cannabis developments in the EU's new Member States, the cannabis resin trade linking Morocco to northern Europe, the closure of Pusher Street in the Copenhagen commune of Christiania, and information on how coffee shops developed in the Netherlands. While these articles focus only on smaller pieces of the cannabis puzzle, they provide insights into the many different ways Europe has dealt with cannabis

World Drug Report 2005 United Nations Office on Drugs and Crime 2005-08-09 The World Drug Report 2005 provides one of the most comprehensive overviews of illicit drug trends at the international level. In addition, this year it presents the work of UNODC in two new areas of research: an estimate of the financial value of the world drug market, and the preliminary steps towards the creation of an illicit drug index. The analysis of trends, some going back 10 years or more, is presented in Volume 1. Detailed statistics are presented in Volume 2. Taken together these volumes provide the most up to date view of today's illicit drug situation.

World Drug Report 2009 2009-07 The World Drug Report 2009 presents comprehensive information on the illicit drug situation. It provides detailed estimates and trends on production, trafficking and consumption in the opium/heroin, coca/cocaine, cannabis and amphetamine-type stimulants markets. This year, for the first time, the Report includes special feature sections on the quality of drug data available to the United Nations Office on Drugs and Crime (UNODC), trends in drug use among young people and police-recorded drug offences. It also discusses one the most formidable unintended consequences of drug control 'the black market for drugs' and how the international community best can tackle it

The State of the World's Cities 2004/2005 2004 As towns and cities expand at unprecedented rates, sustainable urban development is one of the most pressing challenges facing the international community in the 21st century. This publication examines the realities faced by urban populations around the world, focusing on the impact of globalisation and the way cities are governed and planned, on the make-up and density of their population, and on their cultures and economies. Issues considered include: the impact of globalisation on urban culture; urban renewal and cultural strategies; the concept of metropolitanization; socio-economic and cultural impacts of international migration; urban poverty and homelessness, social inequality and exclusion; urban governance, safety and crime trends; contemporary planning strategies and the role of civil society; progress towards attainment of the Millennium Development Goals targets for sanitation and housing. The report highlights the need for a new culture of planning to establish multicultural and inclusive cities, involving civil society as well as public authorities.

An Industrial Geography of Cocaine Christian M. Allen 2013-10-14 Latin American cocaine trafficking organizations comprise an indigenous, globally competitive, multinational industry. Their business operations are deeply ingrained within the economic and political systems of countries throughout the region. While criminal enterprises operate in a more complex and uncertain setting than licit firms, their competitive success is determined in fundamentally similar ways. Models developed by geographers to explain the spatial behavior of licit multinational firms are profitably applied here to the operations of drug trafficking operations.

cocaine production and trafficking what do we know? Carlos Esteban Posada 2007 Abstract: The main purpose of this paper is to summarize the information currently available on cocaine production and trafficking. The paper starts by describing the available data on cocaine production and trade, the collection methodologies (if available) used by different sources, the main biases in the data, and the accuracy of different data sources. Next, it states some of the key empirical questions and hypotheses regarding cocaine production and trade and takes a first look at how well the data match these hypotheses. The paper states some of the main puzzles in the cocaine market and studies some of the possible explanations. These puzzles and empirical questions should guide future research on the key determinants of illicit drug production and trafficking. Finally, the paper studies the different policies that producer countries have adopted to fight against cocaine production and the role consumer countries play in the implementation of anti-drug policies.

World Drug Report 2009 United Nations Office on Drugs and Crime 2009-08-17 The World Drug Report aims to enhance Member States' understanding of global illicit drug trends, and to sensitize all Governments about the need for more systematic collection and reporting of data related to illicit drugs. UNODC relies on Member States to provide data, primarily through the annual reports questionnaire (ARQ). This year, out of some 200 distributed questionnaires, UNODC received 118 replies to the drug abuse section and 116 replies to the illicit supply of drugs section. In general, the ability of Member States to provide information on illicit drug supply is significantly better than their ability to provide demand-related data. Despite commendable progress, for example in the area of prevalence estimates, far more remains to be done to provide a solid, reliable basis for trend and policy analysis.

World Drug Report 2021 (Set of 5 Booklets) United Nations Office on Drugs and Crime 2022-01-19 As in previous reports, the 2021 World Drug Report (WDR) aims to improve the understanding of the world's drug problem and to contribute towards fostering greater international cooperation for countering its impact on health, governance and security. Also, to the extent possible, the WDR contributes to the monitoring and reporting of SDGs. This edition includes an updated overview of recent trends on production, trafficking and consumption for non-medical purposes of key controlled substances. It further maintains a global overview of the baseline data and estimates on drug demand and supply and provides an analysis of the market for the different drugs.

Measuring the Deterrent Effect of Enforcement Operations on Drug Smuggling, 1991-1999 Mary Layne 2001 This study takes a mixed qualitative-quantitative approach to studying the deterrent effects of drug enforce. DE operations are done through cocaine trafficking. A DE operation has a deterrent effect if drug smugglers are displaced from a previously preferred route into a less desirable smuggling route/method, thereby increasing their risk of being caught and other costs associated with smuggling (e.g., transportation fees). The qualitative portion of the study is based on the expectation that interviewing smugglers can tell us much about what factors -- especially DE -- affect their decision making process. The report shows how specific counterdrug operations undertaken between 1991 to 1999 impacted cocaine prices (both retail and wholesale) and trafficker behavior.

World Drug Report 2007 United Nations Office on Drugs and Crime 2007-06-27 This report offers one of the most comprehensive insights into global trends in international culture, production, seizure and price of illicit drugs. It examines trends in the world's four major markets: opium and heroin, coca and cocaine, cannabis, and amphetamine-type stimulants. This edition provides an in-depth examination of the link

between transnational organized crime and drug trafficking. A detailed statistical appendix on production, prices and consumption completes this book, which gives the reader a comprehensive picture of the world's drug problem.

World Drug Report 2016 United Nations Office on Drugs and Crime 2016-06-23 The World Drug Report provides a comprehensive overview of recent developments in the world's illicit drug markets. Chapter one of the World Drug Report 2016 provides a global overview of the latest statistics, trends and developments with respect to opiates, cocaine, cannabis and synthetic drugs, ranging from production to trafficking as well as consumption and the health consequences of drug use. Chapter two utilizes the Sustainable Development Goals framework to examine the interplay between the drugs phenomenon and the broader development context.

World Drug Report 2010 United Nations Office on Drugs and Crime 2010-06-28 In order to prepare the World Drug Report, UNODC relies on Member States to provide data, primarily through the Annual Reports Questionnaire (ARQ). The ARQ was distributed to 192 Member States, and UNODC received 110 replies to the drug abuse section and 114 replies to the illicit supply of drugs section from Member States (and territories). In general, most countries' ability to provide information on illicit drug supply is significantly better than their ability to provide demand-related data. Despite commendable progress, for example in the area of prevalence estimates, far more remains to be done to provide a solid, reliable basis for trend and policy analysis. The report includes in-depth and cross-sectoral analyses of transnational drug markets (chapter 1) as well as the latest statistical data and trends regarding the world drug situation (chapter 2). This year, the report also discusses the impact of transnational drug trafficking on transit countries (chapter 3).

Is Drug Use Up Or Down? What are the Implications? United States. Congress. House. Committee on Government Reform. Subcommittee on Criminal Justice, Drug Policy, and Human Resources 2001

World Drug Report 2008 United Nations Office on Drugs and Crime 2008-06-26 The Report continues to provide in depth trend analysis of the four main drug markets in its first section. In addition, to mark the one hundred year anniversary of the Shanghai Opium Commission, and one hundred years of international drug control, the Report contains an in-depth look at the development of the international drug control system. The Report also contains a small statistical annex which provides a detailed look at production, prices and consumption. As in previous years, the present Report is based on data obtained primarily from the annual reports questionnaire (ARQ) sent by Governments to UNODC in 2007, supplemented by other sources when necessary and where available. Two of the main limitations herein are: (i) that ARQ reporting is not systematic enough, both in terms of number of countries responding and of content, and (ii) that most countries lack the adequate monitoring systems required to produce reliable, comprehensive and internationally comparable data. National monitoring systems are, however, improving and UNODC has contributed to this process.

The Prediction and Control of Organized Crime Jennifer Schrock 2017-10-24 Like most former Soviet republics, Ukraine has experienced a formidable proliferation of crime and corruption as it struggles with economic reform and the establishment of democracy. During the early 90s, Ukraine became one of the primary recipients of foreign assistance from the United States and its crime and corruption situation was increasingly seen as an impediment to economic transition and achieving a more democratic way of life. Thus in 1998, as part of a larger U.S. law enforcement assistance effort in Ukraine, the idea for a research partnership between criminologists and legal scholars in the two countries was born in this volume. The original research papers contained are the products of this ambitious research project. The realities of crime in post-Soviet Ukraine, as well as divergent methodological approaches and communication problems, presented the research partners with enormous challenges. This volume represents the culmination of that collaborative effort, and provides a singular look into the current crime situation in Ukraine, and into the potential global threat presented by Ukrainian organized crime. Contributions include analyses of the prediction and control of organized crime, trafficking in women and children for sexual exploitation, international money laundering, the transnational political criminal nexus of trafficking in women, countermeasures against economic crime and corruption, heroin trafficking, business victimization by organized crime, and understanding and combating organized crime. The Prediction and Control of Organized Crime will be critical reading for security planners, policymakers, and criminal justice officials, as well as comparative criminologists, legal scholars, and political scientists interested in organized crime and political corruption.

Lies, Damned Lies, and Drug War Statistics, Second Edition Matthew B. Robinson 2014-01-01 Revised and updated edition that analyses how the Office of National Drug Control Policy employs statistics to misleadingly claim the War on Drugs is a success. First published in 2007, Lies, Damned Lies, and Drug War Statistics critically analyzed claims made by the Office of National Drug Control Policy (ONDCP), the White House agency of accountability in the nation's drug war since 1989, as found in the six editions of the annual National Drug Control Strategy between 2000 and 2005. In this revised and updated second edition of their critically acclaimed work, Matthew B. Robinson and Renee G. Scherlen examine seven more recent editions (2006-2012) to once again determine if ONDCP accurately and honestly presents information or intentionally distorts evidence to justify continuing the drug war. They uncover the many ways in which ONDCP manipulates statistics and visually presents that information to the public. Their analysis demonstrates a drug war that consistently fails to reduce drug use, drug fatalities, or illnesses associated with drug use; fails to provide treatment for drug-dependent users; and drives up the prices of drugs. They conclude with policy recommendations for reforming ONDCP's use of statistics, as well as how the nation fights the war on drugs. Praise for the First Edition "Lies, Damned Lies, and Drug War Statistics is surprisingly easy to read, and Robinson and Scherlen have done a huge favor not only to critics of current drug policy by compiling this damning critique of ONDCP claims, but also to anyone interested in how data is compiled, presented, and misused by bureaucrats attempting to guard their domains. It should be required reading for members of Congress." "Drug War Chronicle Book Review "The authors have performed a valuable service to our democracy with their meticulous analysis of the White House ONDCP public statements and reports. They have pulled the sheet off what appears to be an official policy of deception using clever and sometimes clumsy attempts at statistical manipulation. This document, at last, gives us a map of the truth." "Mike Gray, author of Drug Crazy: How We Got into This Mess and How We Can Get Out "Robinson and Scherlen make a valuable contribution to documenting how ONDCP fails to live up to basic standards of accountability and consistency." "Ethan Nadelmann, Executive Director, Drug Policy Alliance

Innocent Bystanders Philip Keefer 2010-03-24 This book presents evidence that drug policies impose high costs on poor transit and producer countries. It argues that, in the face of great uncertainty about the benefits of alternative drug policies, those with lower social costs should receive greater emphasis.
