

Ethics And The Urban Ethos An Essay In Social Theory And Theological Reconstruction

Interconnectivity, Subversion, and Healing in World Christianity Afe Adogame 2023-07-13 The rise of Christianity around the world has been the impetus for much religious and social change. The interconnectivity of religious centers has resulted in theological dialogue and innovation. The subversion of long-held categories of culture, gender, race, spirituality, theology, and politics has naturally occurred along with the transgressing of borders and boundaries. Yet at the same time, there has been occasion for healing through intercultural experiences of forgiveness, peacemaking, and reconciliation. Stimulated by the work and mentorship of Joel Carpenter, who has done much to expand the study of world Christianity less through focusing on his own research and writing, and more through amplifying the voices of others, the international contributors to this volume from all six continents promote a deeper understanding of World Christianity through the exploration of such related themes. Whether discussing primal spirituality in northeast India, white supremacy in South Africa, evangelical women and civic engagement in Kenya, or Calvinism in Mexico, the contributors draw upon ethnographic case studies to more deeply understand interconnectivity, subversion, and healing in World Christianity. Their essays provoke a reorientation of Christian thought within the study of World Christianity, enriching the current discourse and promoting vistas for further interdisciplinary studies.

The Latent World of Architecture Dalibor Vesely 2022-09-30 This book features thirteen essays by the late architect, philosopher and teacher Dalibor Vesely (1934-2015). Vesely was a leading authority on philosophical hermeneutics and phenomenology in relation to architecture worldwide, and influenced a generation of thinkers, teachers and practitioners. This collection presents the full range of his writing, drawing primarily from the history of art and architecture, as well as philosophy, theology, anthropology and ecology, and spanning from early antiquity to modernism. It composes a multifaceted and globally relevant argument about the enduring cultural role of architecture and the significance of its history. The book, edited and introduced by Vesely’s teaching partner at Cambridge Peter Carl and former student Alexandra Stara, and with a foreword by David Leatherbarrow, brings to light new and hard-to-access material for those familiar with Vesely’s thought and, at the same time, offers a compelling introduction to his writing and its profound relevance for architecture and culture today.

A Practical Guide to Clinical Ethics Consulting Christopher Meyers 2007 A Practical Guide to Clinical Ethics Consulting reasserts the philosophical method as foundational to ethics consulting. It does so in response to extensive attacks from social scientists, lawyers, theologians, and especially practitioners, all of whom disparage philosophy’s reliance on abstract theory and conceptual analysis. Using clinical ethics consulting as an exemplar, Christopher Meyers argues that while many of the attacks are well founded, they are only partly so and not in the most important respects. Ethics consulting that relies too heavily on abstract analysis is of little use to practitioners; consultants must have adequate grounding in, and appreciation of, the concrete reality of working professionals. They must also be experienced enough to have

the practical wisdom necessary to assist with real-world problems. Skills of philosophical analysis, when combined with instruction in empirical investigation, political awareness and appropriate character traits, are vital to ethics consulting. Ethicists need the theoretical and conceptual analysis skills that are a standard part of a philosophical education and mindset. The book provides both a defense of this central thesis and a detailed description of the empirical tools--and of the critical independence--necessary to effective consulting.

Higher Education as a Moral Enterprise Edward LeRoy Long Jr. 1992-07-01 Long argues that higher education is a moral enterprise and that, as such, it must be guided by a commitments to what is morally right and fundamentally good, not just by what is necessary in intellectual or financial endeavors.

Shaping Public Theology Max L. Stackhouse 2014-01-30 Max L. Stackhouse is one of the most prolific and influential American theologians of the last half century, and he has been widely recognized for his contributions to the emerging field of public theology. This volume compiles some of Stackhouse's most significant shorter writings. These selections make clear his central role in the development of public theology as a distinct disciplinary perspective in the fields of Christian theology and theological ethics. *Shaping Public Theology* serves as an introduction to Stackhouse's extensive corpus; readers will see the depth and breadth of his comprehensive public theology while also gaining

insight into his singular importance for the field.

Christianity Outside the Church Jae Yang 2024 "Jae Yang develops a Pannenbergian public theology by correlating Pannenberg's theological methods (postfoundational, eschatological, and trinitarian) with the aims and methods of public theology. He argues that Pannenberg's public theology engages not just the academic world, but also the political, economic, familial, religious, and cultural ones"--

Piety and Plurality Glenn Thomas Miller 2014-06-09 I began studying American theological education in the 1970s, and *Piety and Plurality* is the third of three studies. In *Piety and Intellect*, I examined the colonial and nineteenth-century search for a form of theological education that was true to the church's confessional traditions and responsible to the intellectual demands of the age. In *Piety and Profession*, I described how that model was modified under the impact of the new biblical criticism and by the American belief in professionalism. In this volume, I have tried to bring the story up to date. Unfortunately, I did not find one unifying theme for the period. Rather, theological education seemed to move forward on a number of different levels, each with its own story. Here I have tried to capture some of the dynamics of this movement and to indicate how theological educators have struggled with the plurality in their midst. In the process, theological education has learned to live with its contradictions and problems. As important as the stories are, however, there is also the story of the schools' struggles to live in the midst of a constant financial crisis that checked development at every stage.

Walking to New Orleans Robert R. N. Ross 2008-09-22 Two and a half years after the devastation of Hurricanes Katrina and Rita, New Orleans and south Louisiana continue to struggle in an unsettled gumbo of environmental, social, and rebuilding chaos. Citizens await the fruition of four successive recovery and reconstruction planning processes and the realization of essential infrastructure repairs. Repopulation in Orleans

Parish has slowed considerably; the parish remains at best two-thirds of its former size; thousands of former residents who wish to return face barriers of many kinds. Heroic efforts at rebuilding have occurred through the efforts of individual neighborhood associations and voluntary associations who have attempted to address serious losses in affordable housing and health care services. *Walking to New Orleans* traces how a dominant but paradoxical model of the relation between the human and natural worlds in Western culture has informed many environmental and engineering dilemmas and has contributed to the history of social inequities and injustice that anteceded the disasters of the hurricanes and subsequent flooding. It proposes a model for collaborative recovery that links principles of ethics and engineering, in which citizens become active, ongoing participants in the process of the reconstruction and redesign of their unique locus of habitation. Equally important, it gives voice to the citizens and associations who are desperately working to rebuild their homes and lives both in urban New Orleans and in the villages of coastal Louisiana.

Pluralisms and Horizons Richard J. Mouw 1993 The authors say that it is not necessary for Christians to view pluralism in purely negative terms. By seriously wrestling with the types of pluralities that pervade contemporary society, Christians can better understand and appreciate the genuine challenges that pluralism poses to human social life. Mouw and Griffioen also critique the leading contributors to the pluralism debate.

Postcolonial Public Theology Paul S Chung 2017-07-27 Postcolonial Public Theology is a tour de force, a study in theological reflection in conversation with the most compelling intellectual discourses of our time that offers prophetic challenge to the hegemony of economic globalisation. While evolutionary science searches for an ethically responsible practice of rationality, and inter-religious engagement forces Christians to grapple with the realities of cultural hybridity, Postcolonial Public Theology makes the case for public theology to turn toward postcolonial imagination, demonstrating a fresh rethinking of the public and global issues that continue to emerge in the aftermath of colonialism. Paul S. Chung provides students and scholars with a fascinating framework for imagining a polycentric Christianity as well as for discussing the continuing importance of Christian theology in the public arena.

Seeking a City with Foundations David W. Smith 2019-03-31 More than half the people in the world live in cities, including a growing number of megacities with populations exceeding ten million people. This trend means that an understanding of urbanization must be an urgent priority for Christian theology and mission across the globe. This updated edition of *Seeking a City with Foundations*, with an additional chapter, explores Christian responses to the city, ranging from rejecting the urban as evil, to embracing it as being central to God's redemptive purposes. Drawing from a wide range of disciplines, including history, social science, urban planning, and the history of art, readers are given a detailed text which confronts the challenges that contemporary urbanization presents to world Christianity. Looking at urbanism as a theme throughout Scripture, culminating with the great vision of the New Jerusalem, David Smith explains that God's own future is revealed as urban, highlighting the need to identify modern-day idols as we share the gospel in cities and acknowledge the impact of global economic forces. The book also explores the causes of what has been called the divided city and traces the urban theme through the Bible to present an alternative vision of the

urban future - a future in which the injustices in ever-growing slums and a crisis of meaning among the privileged might be overcome through the power of the reconciling message of the cross. This timely book proposes a way forward for urban mission, highlighting that transformation of our cities must be the focal point of Christian mission and hope.

Living in the Lamplight Hans Boersma 2001-01-08 In recent decades many fundamental Christian assumptions about the nature of God and the world have come under attack. No longer can one assume even in many church circles that historic Christian beliefs about the Trinity and providence are generally accepted or understood. Scientific knowledge and new technologies have also presented challenges for the church. How, for example, should Christians understand the ecological crisis? And how should the opening chapters of Genesis be understood in an age of genetic research and evolutionary science? This collection of essays attempts to chart a faithful path for postmodern Christians, exploring the foundational ideas and concepts of a Christian worldview and suggesting their implications for Christian living today. Community Visioning Programs Norman Walzer 2017-10-02 Communities have practiced strategic planning for decades using a variety of tools and programs based on the initial Take Charge programs of the early 1990s. These efforts generated a large amount of research regarding their effectiveness, as well as ways to measure long-term outcomes and other related issues, in efforts to better understand the process of community change. This book provides contributions written by researchers and practitioners describing both visioning and other strategic planning efforts. The Great Recession challenged the future of many small and medium sized cities, especially in non-metropolitan areas, renewing the interests of community leaders and elected officials in finding innovative ways to revitalize their local employment base and economic opportunities. Having access to a collection of best practices and successful approaches can greatly assist these practitioners in

selecting strategies and techniques for use in their community efforts. The material in this book is especially useful because it includes both methodologies as well as case studies of how and why various approaches used in alternative cultural settings have succeeded. This book was originally published as a special issue of *Community Development*.

Accounting and Money for Ministerial Leadership Nimi Wariboko 2013-05-22 This book will help seminary students and ministers with no training in accounting to expand their core management competency and church leadership skills to include basic issues of finance and accounting. It will also provide pastors/ministers with financial management orientation to become better leaders/managers of their churches and organizations. Specifically, this book is designed to bring pastors, ministers, and seminary students up to speed in the language of accounting and money in contemporary American society. It gives them practical resources for effective (not hands-on) management of church finances. Among others, it will offer training on basic accounting and budgeting, reading of financial reports, and elementary tax and legal issues in order to develop pastors'/students' core competency in stewardship leadership. After going through this book, most students and pastors should be able to read, exegete, and make sense of the financial reports that will be given to them by church accountants (treasurers, finance committees). This book helps pastors to understand and interpret the accounting and monetary issues of their ministries in a professional and theologically sound way.

The God who Commands Richard J. Mouw 1990 In this book, Richard Mouw probes, from a Calvinist tradition, the place of obedience to a divine command. He suggests that a Calvinist perspective on moral theology can profit from an openness to some contemporary developments, particularly narrativist ethics and feminist thought. *The Philosophical Review* Jacob Gould Schurman 1972 An international journal of general philosophy.

Theology and Globalisation Rowan Gill 2005 This book is a critique and commentary on globalisation from a theological perspective.

Drawing on the works of theologians such as Augustine, Rahner, Luther, Newbigin, Moe-Lobeda, McFague, Jesnon, Wainwright, de Chardin, McCaughey, and Kung, the author critiques globalisation and those who espouse it, defend and promote it. For Gill, globalisation 'is an economic phenomenon with political ramifications whereby economic and political aspects of the world become predicated of the whole world itself. Central to it is a spirit of competition, by which the world is globalised and results in a sense of one globe.' For the author, following Milbank, the response to globalisation needs to be a theological one based on the new city of God; the Kingdom of God. The author is a Minister of the Word in the Uniting Church in Australia who studied theology in Melbourne and undertook post-graduate studies in Boston, USA

The Charismatic City and the Public Resurgence of Religion N. Wariboko 2014-09-11 Two powerful and interrelated transnational cultural expressions mark our epoch, Charismatic spirituality and global city. This book demonstrates how these two forces can be used to inform ethical design of cities and their common social lives to best support human flourishing, spirituality, and social and ecological wellbeing of their residents.

Cricket's Changing Ethos Jon Gemmell 2018-04-28 This book examines historically how cricket was codified out of its variant folk-forms and then marketed with certain lessons sought to reinforce the values of a declining landed interest. It goes on to show how such values were then adapted as part of the imperial experiment and were eventually rejected and replaced with an ethos that better reflected the interests of new dominant elites. The work examines the impact of globalisation and marketization on cricket and analyses the shift from an English dominance, on a sport that is ever-increasingly being shaped by Asian forces. The book's distinctiveness lies in trying to decode the spirit of the game, outlining a set of actual characteristics rather than a vague sense of values. An historical analysis shows how imperialism, nationalism, commercialism and globalisation have shaped and adapted these characteristics. As such it will be of interest to students and scholars of

sport sociology, post-colonialism, globalisation as well as those with an interest in the game of cricket and sport more generally.

Public Theology for a Global Society Deidre King Hainsworth 2010 In these essays honoring ethicist Max Stackhouse, leading Christian scholars consider the historical roots and ongoing resources of public theology as a vital element in the church's engagement with global issues. / Public Theology for a Global Society explores the concept of public theology and the challenge of relating theological claims to a larger social and political context. The range of essays included here allows readers to understand public theology as both theological practice and public speech, and to consider the potential and limits of public theology in ecumenical and international networks. / The essays begin by introducing the reader to the development of public theology as an area of study and to the historical interrelationship of religious, legal, and professional categories. The later essays engage the reader with emerging problems in public theology, as religious communities encounter shifting publics that are being transformed by globalization and sweeping political and technological changes. / The breadth and scholarship of Public Theology for a Global Society make this volume a fitting tribute to Stackhouse a central figure in Christian ethics and pioneer in the church's study of globalization.
