African Music John Gray 1991-04-04 African Music is devoted to ethnographic, anthropological, musicological, and popular studies of sub-Saharan African music from the 1890s to the present. The bibliography is organized into six basic sections. Section one covers works on cultural policy and the performing arts in sub-Saharan Africa, while section two provides a selected guide to works on ethnomusicology. Section three, the largest, deals with general works and regional/country studies of traditional sub-Saharan musics, defined most simply as the local village or rural musics of West, Central, Southern, and East Africa. General and regional/country studies of African pop music as well as biographical and

critical studies of 275 popular musicians and groups are covered in section four. Section five focuses on the acculturated or art music traditions of Africa's Westernized elite, citing both general works and biographical/critical studies on African composers and performers. The sixth, and final, music section covers general studies on African church, or liturgical music. The items cited in these six sections range from books, dissertations, unpublished papers, and periodical and newspaper articles, to films, videotapes, and audiotapes in all of the major Western languages as well as several African ones. The three appendixes deal, respectively, with reference works on African music and culture; archives and research centers; and a selected discography listing both

traditional and popular music recordings and outlets where they may be found. Four indexes-- ethnic group, subject, artist and author-- complete the work and provide a key to its 5,800 entries. By covering works from 1732 to the present, African Music offers not only the most up-to-date scholarship on the subject, but also the most comprehensive coverage currently available. It offers a much-needed, and long overdue resource for students, scholars, and librarians seeking to understand the musics of sub-Saharan Africa.

The Oxford Handbook of Ethiopian

Languages Ronny Meyer 2023-05-04 This handbook provides a comprehensive account of the languages spoken in Ethiopia, exploring both their structures and features and their function and use in society. The first part of the volume provides background and general information relating to Ethiopian languages, including their demographic distribution and classification, language policy, scripts and writing, and language endangerment. Subsequent parts are dedicated to the four major language families in Ethiopia - Cushitic, Ethiosemitic, Nilo-Saharan, and Omotic - and contain studies of individual languages, with an initial introductory overview chapter in each part. Both major and less-documented languages are included, ranging from Amharic and Oromo to Zay, Gawwada, and Yemsa. The final part explores languages that are outside of those four families, namely

Ethiopian Sign Language, Ethiopian English, and Arabic. With its international team of senior researchers and junior scholars, The Oxford Handbook of Ethiopian Languages will appeal to anyone interested in the languages of the region and in African linguistics more broadly.

Ethiopian Music. An Introduction. A Survey of Ecclesiastical and Secular Ethiopian Music and Instruments. [With Plates and Musical Illustrations.] Michael Powne 1968

Citizen Azmari Ilana Webster-Kogen 2018-11-20

In the thirty years since their immigration from Ethiopia to the State of Israel, Ethiopian-Israelis have put music at the center of communal and public life, using it alternately as a mechanism of protest and as appeal for integration.

Ethiopian music develops in quiet corners of urban Israel as the most prominent advocate for equality, and the Israeli-born generation is creating new musical styles that negotiate the terms of blackness outside of Africa. For the first time, this book examines in detail those new genres of Ethiopian-Israeli music, including Ethiopian-Israeli hip-hop, Ethio-soul performed

across Europe, and eskesta dance projects at the center of national festivals. This book argues that in a climate where Ethiopian-Israelis fight for recognition of their contribution to society, musical style often takes the place of political speech, and musicians take on outside roles as cultural critics. From their perch in Tel Aviv, Ethiopian-Israeli musicians use musical style to critique a social hierarchy that affects life for everyone in Israel/Palestine.

Ethnomusicology Helen Myers 1993

Complementing Ethnomusicology: An Introduction, this volume of studies, written by world-acknowledged authorities, places the subject of ethnomusicology in historical and geographical perspective. Part I deals with the intellectual trends that contributed to the birth of the discipline in the period before World War II. Organized by national schools of scholarship, the influence of 19th-century anthropological theories on the new field of "comparative

musicology" is described. In the second half of the book, regional experts provide detailed reviews by geographical areas of the current state of ethnomusicological research.

Living Ethnomusicology Margaret Sarkissian 2019-06-16 Ethnomusicologists have journeyed from Bali to Morocco to the depths of Amazonia to chronicle humanity's relationship with music. Margaret Sarkissian and Ted Solís guide us into the field's last great undiscovered country: ethnomusicology itself. Drawing on fieldwork based on person-to-person interaction, the authors provide a first-ever ethnography of the discipline. The unique collaborations produce an ambitious exploration of ethnomusicology's formation, evolution, practice, and unique identity. In particular, the subjects discuss their early lives and influences and trace their varied career trajectories. They also draw on their own

experiences to offer reflections on all aspects of the field. Pursuing practitioners not only from diverse backgrounds and specialties but from different eras, Sarkissian and Solís illuminate the many trails ethnomusicologists have blazed in the pursuit of knowledge. A bountiful resource on history and practice, *Living Ethnomusicology* is an enlightening intellectual exploration of an exotic academic culture.

The Traditional Teaching of the Ethiopian Orthodox Täwahedo Church Christine Chaillot

Christine Chaillot's new book, *The Traditional Teaching of the Ethiopian Orthodox Täwahedo Church: Faith and Spirituality*, presents a topic that is little - if at all - known outside Ethiopia,

even in Christian circles. Moreover, it is a much neglected field in the wider study of African education. It is a teaching based on ancient texts and books, taught orally to the students who will become the future clergy and who will then share their knowledge with the faithful in Church life. The studies of the different disciplines are pursued at different schools and at different levels, in liturgy, theology with commentaries of books (Old and New Testaments, books of the Church fathers and monks) as well as composition of poems (genes) and iconography. All this teaching presented in the present volume is deeply related to the faith and spirituality of the Ethiopian Orthodox Church. This teaching is a unique intangible cultural heritage. One wonders, however, what its future will be in the context of the modern educational methods and social attitudes that have evolved in Ethiopia over the last half-century.

To Whom Does Christianity Belong? Dyron B. Daugherty 2015 To Whom Does Christianity Belong? is a question that is asked throughout the world today. In this exciting volume, an anchor to the Understanding World Christianity series, Dyron B. Daugherty helps readers map out the major changes that have taken place in recent years in the worlds largest religion. By comparing trends, analyzing global Christian movements, and tracing the impact of Pentecostalism, interreligious dialogue, global missions, sexuality, birth rates, women, secularization, and migratory trends, Daugherty sketches a picture of a changing religion and gives the tools needed to understand it.

Africa's Lost Classics Lizelle Bisschoff 2017-07-05 Until recently, the story of African film was marked by a series of truncated histories: many outstanding films from earlier

~~decades were virtually inaccessible and thus~~ often excluded from critical accounts. However, various conservation projects since the turn of the century have now begun to make many of these films available to critics and audiences in a way that was unimaginable just a decade ago. In this accessible and lively collection of essays, Lizelle Bisschoff and David Murphy draw together the best scholarship on the diverse and fragmented strands of African film history. Their volume recovers over 30 'lost' African classic films from 1920-2010 in order to provide a more complex genealogy and begin to trace new histories of African filmmaking: from 1920s Egyptian melodramas through lost gems from apartheid South Africa to neglected works by great Francophone directors, the full diversity of African cinema will be revealed.
