Historical Dictionary of the Peoples of the Southeast Asian Massif Jean Michaud

2016-10-14 Dwelling in the highland areas of Northeast India, Bangladesh, Southwest China, Taiwan, Burma (Myanmar), Thailand, Cambodia, Vietnam, Laos, and Peninsular Malaysia are hundreds of "peoples". Together their population adds up to 100 million, more than most of the countries they live in. Yet in each of these countries, they are regarded as minorities. This

second edition of Historical Dictionary of the Peoples of the Southeast Asian Massif contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on about 300 groups, the ten countries they live in, their historical figures, and their salient political, economic, social, cultural and religious aspects. This book is an excellent access point for students, researchers, and anyone wanting to know more.

Threads of globalization Melia Belli Bose 2024-02-06 Threads of globalization is an interdisciplinary volume that brings fashion-specific garments, motifs, materials, and methods of production into dialogue with gender and identity in various cultures throughout Asia during the long twentieth century. It examines how the shift from artisanal production to 'fast fashion' over the past 150 years has devalued

women's textile labour and how skilled textile/garment makers and the organizations that support them are preserving and reviving heritage traditions. It also offers examples of how socially engaged artists in Asia and the diaspora use their work to criticize labour and environmental abuses in the global fashion industry.

The Kam People of China D. Norman Geary 2003 The Kam are still essentially a 'hidden people' - very little has been published in English

about them. This book aims to fill a gap in the English literature, by providing a comprehensive introduction to Kam culture. The conclusion looks to the future for the Kam people and their culture.

Historical Archaeology of Early Modern

Colonialism in Asia-Pacific Maria Cruz

Berrocal 2017-12-19 "The essential source for scholarly reassessment of the Asia-Pacific region's diverse and significant archaeology and history."--James P. Delgado, coauthor of The Maritime Landscape of the Isthmus of Panama "Underpins a nuanced picture of Asia-Pacific that shows how the activities of the Chinese and Japanese in East Asia, the spread of Islam from South Asia, and the efforts of the Iberians and especially the Spanish from southern Europe

ushered in a world of complex interaction and rapid and often profound change in local, regional, and wider cultural patterns."--Jan Lilley, editor of Archaeology of Oceania: Australia and the Pacific Islands The history of Asia-Pacific since 1500 has traditionally been told with Europe as the main player ushering in a globalized, capitalist world. But these volumes help decentralize that global history, revealing that preexisting trade networks and local authorities influenced the region before and long after Europeans arrived. In the volume The Southwest Pacific and Oceanian Regions, case studies from Alofi, Vanuatu, the Marianas, Hawaii, Guam, and Taiwan compare the development of colonialism across different islands. Contributors discuss human settlement before the arrival of Dutch, French, British, and Spanish explorers, tracing major exchange routes that were active as early as the tenth century. They highlight rarely examined sixteenth- and seventeenth-century encounters

between indigenous populations and Europeans and draw attention to how cross-cultural interaction impacted the local peoples of Oceania. The volume *The Asia-Pacific Region* looks at colonialism in the Philippines, China, Japan, and Vietnam, emphasizing the robust trans-regional networks that existed before European contact. Southeast Asia had long been influenced by Buddhist, Hindu, and Muslim traders in ways that helped build the region's ethnic and political divisions. Essays show the complexity and significance of maritime trade during European colonization by investigating galleon wrecks in Manila, Japan's porcelain exports, and Spanish coins discovered off China's coast. Packed with archaeological and historical evidence from both land and underwater sites, impressive in geographical scope, and featuring perspectives of scholars from many different countries and traditions, these volumes illuminate the often misunderstood nature of early colonialism in

Asia-Pacific.
