Technology Transfer and the EU Competition Rules Steven Anderman 2027-11-25 This work examines the revised Technology Transfer Block Exemption Regulation and its accompanying guidelines. The new edition has been fully updated to analyze the changes that the new Guidelines have introduced to existing competition laws, including bilateral licensing. The text reflects on the application of the Technology Transfer Block Exemption Regulation since it was brought into force in 2004, and presents a number of significant developments and judgements in the application of Article 102 to technology licensing. The book includes a chapter on the application of Article 102 to patent agreements and the "patent wars." The new cases analyzed include the "pay for delay" cases such as Lundbeck and the cases where owners of Standard Essential Patents have attempted to obtain a higher than FRAND return by various means. Written by two leading authorities in the field, the work offers a timely examination of the revised EU competition law regime for intellectual property licensing.

EU Communications Law Sebastian Farr 2002 Timed for publication when the new directives are adopted is written by members of Oftel's legal department. They have tracked the legislation through all its drafting and committee stages and are uniquely placed to write this expert and succinct commentary on what the new law means, how it relates to the old legal regime and how it will integrate with other initiatives in the communications sector.

Competition James Flynn 1999 This text provides a clear analysis of the 1998 Act, including full references to the OFT guidelines and relevant case law. The book follows the structure of the Act and looks at its most important provisions in detail. It includes the text of the Act.

International Licensing Agreements Michala Meiselles 2018-10-02 Like any contract, an international licensing agreement spells out the rights and obligations of the contracting parties, manages potential risks and supplies a contingency plan for each party in the event the contractual relationship breaks down. However, international licensing of intellectual property, software or technology confronts the contracting parties with its own distinct challenges. When planning, drafting and negotiating such agreements, it is imperative to know exactly what core issues need to be addressed. This book provides this know-how in an easy-to-use, clear and concise fashion. This expert guide to the complex world of international licensing agreements brings together all the essential materials needed when dealing with such agreements and covers the following: • business models that may be used by the contracting parties; • standard provisions encountered in an array of international licensing agreements; • analysis of the key clauses in various international licensing agreements inter alia trademark, software, franchise and technology licences with provisions as affected by jurisdiction; • effect of competition law in a variety of jurisdictions; • ensuring trademark protection at both national and international levels; • clear explanation of key franchising terminology and disclosure rules; and • effect of international dispute resolution rules in a range of jurisdictions. Alongside detailed contract analysis, the book details numerous case studies from an array of industries, with detailed commentary. Practitioners operating within or representing medium to large firms who normally have to prepare or provide advice on international licence arrangements will quickly find this reference material indispensable. The book's thorough analysis of this complex area will also be welcomed by professionals working for universities, industry, interest groups, government departments and international organisations.

General Principles of EU Law and the EU Digital Order Ulf Bernitz 2020 General Principles of EU Law and the EU Digital Order' addresses the role of general principles in the era of digitalization and the

(potential) impact of digitalization on the theory of general principles of union law. Digitalization of societies has important ramifications for citizens and businesses. The digital landscape is rapidly changing, whereas at the same time there are growing concerns about how market access in the European Union's (EU's) digital market as well as fundamental rights can be sufficiently safeguarded in the shadow of 'big data' and algorithms. This book presents expert analyses of how digitalization raises questions of the future role for general principles of EU law, including the foundational principles of the EU's fundamental economic freedoms and EU competition rules.

Journal of Research of the National Institute of Standards and Technology 1993 Reports NIST research and development in the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Emphasis on measurement methodology and the basic technology underlying standardization.

Copyright in the EU Digital Single Market Giuseppe Mazziotti 2011 The scope and enforcement of copyright in the digital environment have been among the most complex and controversial subjects tackled by lawmakers all over the world for the last decade. Due to the ubiquitous use of digital technology, modern regulation of copyright inherently touches on numerous areas of law and social and economic policy, including communications privacy and Internet governance. Modernising the EU's copyright framework is considered a key step towards achieving the goal of an EU Digital Single Market in the context of the 'Digital Agenda for Europe', an initiative launched by the European Commission in May 2010. How can the EU make copyright fit for purpose in the Internet age? What are the most suitable and realistic policy options to achieve the objective of a Digital Single Market in the creative content sectors? To give comprehensive answers to these questions, the CEPS Digital Forum formed a Task Force on Copyright in the EU Digital Single Market to foster a multi-stakeholder dialogue on the major challenges for copyright law in the online content sector today. Drawing on the discussions and input gathered by the Task Force, this report contains the conclusions and policy recommendations organised around three main themes: licensing rules and practices in the online music and film sectors, the definition and implementation of copyright exceptions in the digital environment and the present and future of online copyright enforcement in Europe.

EU Technology Licensing Stephen Kinsella 1998 This is a guide to the EC Technology Transfer Block Exemption Regulation. The approach is practical; the author guides the reader through the answers to questions such as: does a licensing agreement raise competition issues?, and does it benefit under the terms of the Block Exemption?

Telecommunications Christopher Watson 1999 The EU legal framework for telecommunications is found in a variety of treaty articles, directives, communications, notices and decisions. This is a practical sourcebook of texts with commentary with all relevant EU telecoms legislation amended and updated, and introductions to key elements.

Technology Transfer and the New EU Competition Rules Steven D. Anderman 2006 The new Technology Transfer Block Exemption Regulation (in force from May 1, 2004) signals a profound change in the nature of the regulatory framework for technology licensing under EU competition law. This book examines the new Regulation in detail, placing it in the wider context of: (i) the modernisation reforms of EC competition law; and (ii) the treatment of IP rights over technology more generally. The book also considers the approach to assessment of IP issues set out in the Guidelines that accompany the Regulation; the authors discuss their legal basis and, where appropriate, criticise the approach taken by the Guidelines where the legal basis is unsure.

Chambers Guide to the Legal Profession 2001

Competition Law, Technology Transfer and the TRIPS Agreement Tu Thanh Nguyen 2010-01-01 The book deals with a difficult subject with an assured touch and will be a valuable text for postgraduate

students, policy-makers and practitioners. *European Intellectual Property Review* This is the first ever book that addresses the important issue of the competition law, intellectual property and trade interface in a developing world context. The book's unique contribution is a set of comparative case studies on this complex interface. D. Daniel Sokol, University of Florida Levin College of Law, US The book investigates competition law and international technology transfer in the light of the TRIPS Agreement and the experience of both developed and developing countries. On that basis, it draws relevant implications for developing countries. Tu Thanh Nguyen argues that technology transfer-related competition law should be globalized appropriately for the needs of local contexts, while intellectual property rights (IPR) are globalized. The book reveals that developing countries, according to the TRIPS Agreement, have the right to use domestic competition law to promote access to technology in order to protect national interests and consumer welfare. However, competition law is antitrust. It is neither anti-IPR nor anti-trade. The author finds that developing countries with limited competition law resources should set realistic priorities for the control of technology transfer-related anti-competitive practices. They can reasonably apply and adapt relevant regulations, decisions and judgments from developed country jurisdictions to their own circumstances. *Competition Law, Technology Transfer and the TRIPs Agreement* is a timely resource for postgraduate students, practitioners, and scholars in international competition law, IPR, and technology transfer. Policymakers in the field of technology transfer-related competition law/policy, especially in developing countries, will also find this book invaluable.

EU Internet Law Andrej Savin 2017-04-28 This comprehensive book provides a detailed overview of EU internet regulation in all its key areas, as well as giving a critical evaluation of EU policymaking and governance. This thoroughly revised second edition includes latest developments in the case law of the Court of Justice. It also discusses pending proposals in telecommunications, copyright and privacy laws as well as the new directions in internet regulation resulting from the Commission's 2015 strategy document. **EU-Mediterranean and Gulf Trade Agreements** Fadi S. Hakura 1999 Agreements between the EU and countries around the Mediterranean and in the Gulf area set up a free trade zone, extend barrier-free entry to EU products and harmonize Mediterranean and Gulf rules on competition and state aids with EU standards. This book looks at this complex subject.

Intellectual Property, Free Trade Agreements and the United Kingdom Phillip Johnson 2021-10-28 Examining how trade agreements are interpreted both in trade tribunals and in the United Kingdom, this innovative book provides a well-rounded exploration of the numerous UK free trade agreements, including the UK-EU Trade and Cooperation Agreement, and their legal and policy implications for intellectual property. Providing a detailed assessment of the continuing role of EU standards in the UK, Phillip Johnson highlights how the UK has played an active role in shaping EU intellectual property law and policy. He explores the extent to which the UK's "new" trade agreements are tied to existing EU law and how this will preserve those standards in the UK, and how this might be received both nationally and globally. An extensive range of critical issues is covered, including copyright, patents, designs, trade marks, border control and technology transfer as well as featuring a calendar of EU laws which are replicated in the UK's current free trade agreements. This authoritative book will be an important source of reference for academics and practitioners seeking to understand the role of intellectual property law in UK and EU free trade agreements, as well as scholars and students of intellectual property, trade laws, and European Law.

EU Copyright Law Morten Rosenmeier 2019-03-25 EU Copyright Law Subsistence, Exploitation and Protection of Rights Morten Rosenmeier, Kacper Szkalej and Sanna Wolk Against a background in which technology continues to change the ways we create, use, distribute and consume cultural content - and where there has been a noticeable increase in the body of case law of Court of Justice of the European Union (CJEU) relating to copyright - copyright protection has become an essential component of the knowledge-based economy and the information society. This book, structured around the various rights and issues rather than the legislative instruments, greatly facilitates an understanding of the complex legal area of European Union (EU) copyright law and provides for a more conscious application of these rules. Among the issues and topics covered are the following: the CJEU's interpretation of EU copyright law and application of fundamental rights; authorship and ownership of copyright; protection of computer programs

and databases; scope of exclusive rights, such as communication to the public and distribution, including rental and lending; application of limitations and exceptions; cross-border access to online content services; digital exhaustion of copyright; and enforcement of copyright and cross-border issues; With its practical approach to the substance of the various legal rules and principles both at EU level and in the various EU Member States, the book clearly describes in detail how copyright law functions throughout the EU. Professionals, business entities and academics who must be familiar with this dynamic legal area, especially in the digital environment, will benefit greatly from the book's clear consideration of legal questions that arise in connection with copyright issues.

European Economics & Law John Grayston 1999 Understanding the policies of EC competition and trade is fundamental to knowing how European law is applied and the basis for challenging EC decisions. This book gives practical advice for lawyers on a range of topics where economics and policy affect the application of the law.

Cross-Border Copyright Licensing Carlo Scollo Lavizzari 2018 Copyright Licensing can no longer be considered purely from the perspective of the licensor's home territory. This practical and wide-ranging reference work provides comprehensive coverage of the law and practice of cross-border licensing in a number of major territories, including China, the EU, India, Mexico, Russia, Singapore, South Africa, and the USA. The book, written by expert authors with insight from practice and from their home jurisdictions, focuses on both copyright licensing and competition law and, specifically, the inter-relation between these legal fields. The book is uniquely structured to provide both thematic coverage and detailed analysis of each territory's applicable laws and regulations, highlighting and addressing the legal issues that are most critical in and relevant to licensing practice. *Cross-Border Copyright Licensing* is an essential starting point for anyone considering or advising on the implementation or enforcement of a copyright licensing program, in either developed and emerging markets.

Chambers UK. 2003

New Technologies and EU Law Marise Cremona 2017 What is the nature of the relationship between the fields of new technology and EU law? What challenges do new technologies pose for the internal market and the fundamental principles of the EU? The first part of the collection explores the EU's approach to the regulation of scientific and technological risk, and the link between the regulation of technology and the internal market. In detail, the chapters analyse the interaction between EU law, bioethics and medical and health technologies. The second part of the collection enhances on this, and the chapters scrutinize specific policy areas in order to explain the alternate ways in which EU policy and technology cooperate.

EU Internet Law Andrej Savin 2020-12-25 This extensively revised and updated third edition of EU Internet Law offers a state of the art overview of the key areas of EU Internet regulation, as well as a critical evaluation of EU policy-making and governance in the field. It provides an in-depth analysis of the ways in which relevant legal instruments interact, as well as comparative discussions contrasting EU and US solutions.

The EC Competition Law on Technology Licensing Frank L. Fine 2006 Examining the general principles of liability and focusing on the concept of duty, this book provides reference for practitioners and academics. It considers key developments in legislation, including the Human Rights Act. It contains an analysis of case law with footnotes, and also considers legislative developments and their implications

Licensing and Access to Content in the European Union Sebastian Felix Schwemer 2019-05-23 Explores the complex European regulatory landscape for multi-territorial access to and licensing of copyrighted works such as music and audiovisual works.

EU Copyright Law Irini Stamatoudi 2021-03-26 This significantly revised and updated second edition addresses the rapid development of EU copyright law in relation to the advancement of new technologies, the need for a borderless digital market and the considerable number of EU legal instruments enacted as a result. Taking a comparative approach, the Commentary provides comprehensive coverage and in-depth commentary on each of the EU legal instruments and policies, both from an EU and an international

perspective. Alongside full legislative analysis and article-by-article commentary, the Commentary illustrates the underlying basic principles of free movement and non-discrimination and provides insights into the influence of copyright on other areas of EU policy, including telecoms and bilateral trade agreements.

Technology Transfer Mark Anderson 2020-03-20 Covers the laws surrounding commercial transactions that involve the development, use of commercialisation of technology and associate intellectual property rights. Types of transactions that fall within this category are research and development contracts and intellectual property licences and these form the main focus of the book. Written by experts and describing the many different areas of law that affect technology agreements such as IP, contract law, competition law and tax, this is the leading guide to this complex area of law. The new Fourth Edition has been brought completely up to date including: - Coverage of EU Horizon 2020 replacing Framework 7 funding scheme - General Data Protection Regulation (GDPR) - Updates in line with the Charities Act 2011 - New section on different types of standard agreements available (Lambert, NIHR, EU consortium agreements) - New material dealing with variety of relevant patent legislation: Unitary Patent and Unified Patents Court, the Intellectual Property Act 2014, Legislative Reform (Patents) Order 2014, Patents (Supplementary Protection Certificates) Regulations) 2014 - New material on the EU Trade Secrets Directive - Coverage of Regulations No 536/2014 of the European Parliament and of the Council of 16 April 2014 on clinical trials on medicinal products for human use, and repealing Directive 2001/20/EC - Addition of research exception (new section 22A) from freedom of information from 1 October 2014 (Freedom of Information Act 2014) - Coverage of Technology Transfer Regulation, 316/2014 and related guidelines

The Rise of Open Source Licensing Mikko Välimäki 2005

Intellectual Property Licences and Technology Transfer Duncan Curley 2004-09-30 This essential guide vital new changes by the European Commission to the law governing the enforceability of intellectual property licences in Europe. Agreements which contain the grant of a licence by one party to another of intellectual property rights are subject to European competition (anti-trust) laws. In particular, many agreements containing licences of patent rights and rights in confidential information and technical know-how are caught by Article 81(1) of the EC Treaty, which prohibits agreements between undertakings which prevent, restrict or distort competition in the Common Market. However, because licences of intellectual property rights usually facilitate the transfer of technology from one undertaking to another, and the licensor and licensee will often operate at different levels of the market, many licences of intellectual property rights may benefit from an automatic exemption under Article 81(3) of the EC Treaty. On 1 May 2004, this exemption is being radically overhauled, as part of the European Commission's drive to modernise European competition law. This book examines the changes in that legislation. The legislation is completely new and there is therefore no existing book on the market The change in the law will require an entirely new approach to the drafting of IP licences The change in the law will require existing IP licences to be re-examined and possibly re-negotiated

International Technology Transfers Harry Rubin 1995-03-22 International Technology Transfers: Legal Aspects provides businesspersons and legal practitioners with a practical conceptual framework for the analysis and implementation of cross-border technology transactions, as well as alerting potential parties to technology transfers to the salient issues they should systematically confront and resolve as they seek to structure and implement their transaction. Particular attention is devoted to the identification of traps in the path of successful international technology transfer. The term 'technology' is used in this book in its broadest possible sense, including what in some countries is referred to as 'industrial property' and encompassing all legal categories of intellectual property, such as copyrights, trademarks, patents, know-how and trade secrets. The book applies an interdisciplinary approach to a complex and interdisciplinary subject and seeks to harmonize the frequently divergent perspectives that businesspersons and attorneys bring to technology transactions. A conscious effort was made to focus on those fields of law and business that are particular germane to international technology transfers and, most importantly, discuss the manner in which they interact with one another. Some of the topics covered: Intellectual property regimes and how to safeguard one's proprietary rights in technology; contractual provisions; tax structures and tax implications of technology transfer transactions; conflicts of law, choice of law and dispute resolution in the international technology transfer context.
