

Eu Trade Strategies Regionalism And Globalism

Globalism and the New Regionalism Osvaldo Sunkel 2016-07-27 This is the first of five volumes reporting on the UNU-WIDER study on New Regionalism. It deals with the conceptions and meanings of two processes which probably will have a crucial influence on the shape of the 'new world order' - globalization and regionalization. These studies relate to each other as challenge to response, globalization being the challenge of economic and cultural homogenization of the world and regionalization being a social and political reaction. The leading writers in the field contribute thought-provoking and fascinating articles to this volume.

Interregionalism and International Relations Jürgen Rüländ 2006-01-16 Interregionalism, the institutionalized relations

between world regions, is a new phenomenon in international relations. It also a new layer of development in an increasingly differentiated global order. This volume examines the structure of this phenomenon and the scholarly discourse it is generating. It takes stock of empirical facts and theoretical explanations, bringing together with clarity and concision the latest research on this key area. This essential new book: * traces the emergence of interregionalism and reviews the latest literature * provides a conceptual and theoretical framework for study * includes case studies of inter-regional relations between: Asia and America; Asia and Europe; Europe and America; and Europe and Africa. * delivers comparative analyses and special cases such as continental summits and interregional

relationships beyond the Triad. * summarizes and evaluates the findings of each chapter, providing a basis for further research. This is a key reference book for students and researchers of regionalism, global governance and international relations.

The EU in International Negotiations

Magdalena Frennhoff Larsén 2023-02-24 This book, which is aimed at scholars, practitioners, advanced under-graduate and post-graduate students, seeks to contribute to the understanding of the EU as an international negotiator by analysing a number of external policy areas where the EU to a great extent engages internationally through negotiations, including development, trade, enlargement, and withdrawal.

Regionalism and the Geography of Trade Policies in EU-ASEAN Trade

Erja Kettunen 2004

Europe and Globalization H. Kierzkowski

2002-06-14 Globalization has provoked

passionate debate and street demonstrations reminiscent of May 1968. The central question of Europe and Globalization is 'what did Europe do for globalization in the past, and what is globalization doing for Europe today?' The contributors to the volume assess this complex process, and Europe's role within it. Bringing together a team of leading international scholars from different disciplinary backgrounds, this is a valuable and wide-ranging contribution to the debate.

Europe and the Management of Globalization

Wade Jacoby 2013-09-13 European politicians often speak of their efforts to 'manage globalization.' At one level, this is merely a rhetorical device to make globalization more palatable to citizens and prove that policy-makers are still firmly in control of their country's fate. This volume argues that the advocacy of managed globalization goes beyond rhetoric and actually has been a primary driver of major European Union (EU) policies in the

past twenty years. The EU has indeed tried to manage globalization through the use of five major mechanisms: 1) expanding policy scope 2) exercising regulatory influence 3) empowering international institutions 4) enlarging the territorial sphere of EU influence, and 5) redistributing the costs of globalization. These mechanisms are neither entirely novel, nor are they always effective but they provide the contours of an approach to globalization that is neither ad hoc deregulation, nor old-style economic protectionism. The recent financial crisis may have seemed initially to vindicate the European efforts to manage globalization, but it also represented the limits of such efforts without the full participation of the US and China. The EU cannot rig the game of globalization, but it can try to provide predictability, oversight, and regularity with rules that accommodate European interests. This book was based on a special issue of Journal of European Public Policy.

The End of Globalization Alan M. Rugman
2001 Globalization has been both lauded as a glorious solution to economic disparities and criticized as the malign cause of financial upheavals in developing nations. But, according to the noted economist and scholar Alan Rugman, globalization was never more than a myth, and the controversies it has spurred are based on the fictions of a homogeneous marketplace. Instead, Rugman argues, international economic activity has been driven by just 500 multinational enterprises operating in the triad of North America, the European Union, and Japan. Neither globally monolithic nor politically powerful, these companies produce and distribute goods for highly competitive regional markets (for example, 90% of cars produced in Europe are sold in Europe). Scholarly and researched-based, yet eminently readable, *The End of Globalization* explores this new concept of multinational enterprises as regionally based and locally

operated. And the book helps managers and executives develop successful "regional/triad" strategies that are responsive to local consumers -- complete with concise summaries of 20 strategies from major multinational companies. *European Union and New Regionalism* Mario Telò 2018-02-06 This title was first published in 2001. This is a collection of papers that look at the structure of the global economy, and its changing paradigms over the years. The contributors look at how the classic concept of state - autonomous, sovereign and freed of all constraint - never really reflected the reality of the international scene, despite the role it has played in realist and neo-realist theory for many decades. Instead, they consider that the political, social and economic characteristics originally attributed to states seem increasingly to be expressed through regional constructs. The papers in this volume show that even within regionalism there are a variety of different models that exist, and examine five of those

models: the European Union; Mercosul-Mercosur; the North American Free Trade Area (NAFTA); the Association of South East Asian Nations (ASEAN); and the South African Development Community (SADC).

Regional Contexts and Citizenship Education in Asia and Europe Kerry J. Kennedy 2015-10-05

This book is concerned with the social and political aspects of regional groupings, particularly how citizenship education fares in regional contexts. The European Union (EU) has revolutionised its political and economic aims into more encompassing social and political goals. The Association of Southeast Asian Nations (ASEAN), on the other hand, is still moving towards fuller integration in social and economic terms as South East Asian nations seek a greater role on the global stage and particularly in the global economy. Both the EU and ASEAN have drawn up educational frameworks that collectively work to harness educational achievements which in turn work to

fulfill social and economic objectives at the regional level. This book portrays citizenship issues affecting the two regions and describes the way citizenship education can reflect and address these issues. Case studies on EU and ASEAN member countries make up the book's two parts which analyse, among other issues: The Changing Landscape of Citizenship Education in England Political Didactics and Political Education in Germany Rethinking a Conceptual Framework for Citizenship Education in ASEAN Countries Education for ASEANness: A tool to build an ASEAN community This book explores new ideas on citizenship and comparative education in regional contexts and will be of interest to researchers concerned with the impact of regionalism on social development and to citizenship educators studying the influence of contexts on the construction of citizenship education.

New Asian Regionalism in International

Economic Law Pasha L. Hsieh 2021-12-16 This book provides the first systematic analysis of new Asian regionalism as a paradigm shift in international economic law. It argues that new Asian regionalism has emerged amid the Third Regionalism and contributed to the New Regional Economic Order, which reinvigorates the role of developing countries in shaping international trade norms. To substantiate the claims, the book introduces theoretical debates and evaluates major regional economic initiatives and institutions, including the ASEAN+6 framework, APEC, the CPTPP and the RCEP. It also sheds light on legal issues involving the US-China trade war and the COVID-19 pandemic, as well as trade policies of Asian powers, the European Union and the United States. Hence, the legal analysis and case studies offer a fresh perspective of Asian integration and bridge the gap between academia and practice.

The European Union and Europe's New

Regionalism Boyka M. Stefanova 2017-10-24 This book presents a new approach to studying the European Union's regional and global relevance. It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project: its enlargement, neighborhood, and mega-regional policies. The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward-looking process of region building to an open, selective system of global interactions.

Global Politics and EU Trade Policy Wolfgang Weiß 2020-02-24 This book explores how the European Union designs its trade policy to face the most recent challenges and to influence global policy issues. It provides with an interdisciplinary perspective, by combining legal, political, and economic approaches. It studies a broad set of trade instruments that are used by the EU in its trade policy, such as: trade agreements, multilateral initiatives, unilateral

trade policies, as well as, internal market tools. Therefore, the contributions to this volume present the EU's Trade Policy through different lenses providing a complex view of it.

The European Union and Developing Countries Carol Cosgrove-Sacks 1999 The European Union (EU) is a vital focus for developing countries. Not only is it the largest source of aid and technical cooperation, but it is also the world's largest market for their exports. EU policies are therefore of immediate concern for the countries of Africa, Asia, Latin America and the Mediterranean. Traditionally the EU has organized its relations with developing countries on a regional basis, reflecting the origins of the European Community in the 1950s as essentially a regionalist western European organizations. However, the late 1990s are the era of globalization and the rules of the World Trade Organization (WTO) increasingly threaten the regional trade preferences on which the EU's patchwork of regional arrangements rest. This

book examines the EU response to these major strategic shifts in world economic relations following the end of the Cold War and the technological innovation which have made globalization a reality. It analyzes the patchwork of relationships between the 15 member states and more than 140 countries throughout Africa, Asia, Latin America and the Mediterranean, examining the recent evolution and prospects for the future from a multidisciplinary perspective.

Judicial institutionalization of integration processes

Ricardo Caichiolo 2016-09-07 The focus of this book is the judicial institutionalization of integration processes through the development of dispute settlement mechanisms, more specifically in the Common Market of the South (MERCOSUR), to date, the most important regional bloc in Latin America. The bloc has been in existence since 1991 and has positioned itself as one of the potential regional blocs for trade and investment, while becoming one of the important actors in the

international community. However, its achievements have been tainted by the gaps and problems attached to the core foundation of the regional bloc. MERCOSUR has been suffering or experiencing internal disputes and disunity due to its complex and low institutionalization, a situation which can be seen as being paradoxical. Its current Dispute Settlement Mechanism is subject to uncertainty and doubt, since its own framework is also under internal and external criticism. There has been a series of protocols made in order to tackle the problems of the DSM and to further fix the problems that hinder the cooperation as well as the productivity of MERCOSUR's intra-organisation, all guided by intergovernmental decision-making. As such, this book seeks to tackle the concept of regionalism and the possible models which have been used or have influenced the establishment of MERCOSUR, while discussing the different aspects and developments of each intra-organisation. This is

done in order to evaluate the nature of the problem, and future developments that could take place. The book also focuses on the prevalence of politicization in MERCOSUR and the pre-eminence of Presidential Diplomacy over the path of regional integration, which influence the DSM of MERCOSUR and possible developments that might occur in the near future.

Regional Trade and Development Strategies in the Era of Globalization Prabhakar,

Akhilesh Chandra 2019-12-27 Despite three decades of continuous globalization, transitional economies in many countries remain marginalized. In order to maximize the positive growth of employment creation opportunities in various sectors, including agriculture, existing patterns of long-run sustainable equilibrium relationships, technology transfers, and trade to promote export-led economic growth must be examined and identified. Regional Trade and Development Strategies in the Era of

Globalization provides a comprehensive overview of globalization and regional initiative trends of trade and development through the examination of theoretical and practical experiences of their underpinning principles through approaches to overcome the obstacles of globalization and its positive and negative impacts on global trade and economic development. The content within this publication examines economic integration, foreign investment, and financial risk. It is designed for trade specialists, government officials, students, researchers, policymakers, business professionals, academicians, and economists. Multilateralism Or Regionalism? Guido Glania 2005 This new book highlights the multifaceted effects of regional trade agreements and outlines the strategic options for EU trade policy. It points out what is new about this most recent phase of regionalism and analyzes the effects on economic welfare and trade transaction costs. The authors draw upon

elements of game theory to explore a self-reinforcing mechanism that is resulting in a potentially damaging race for markets. They focus in particular on the multiple impacts of regionalism on the WTO and the multilateral trading order. The book arrives at an opportune time, as the Doha Round is reaching a critical phase.

Globalization and Regionalization David B. Audretsch 2012-12-06 In this volume, David B. Audretsch and Charles F. Bonser present a view of Globalization and Regionalization that holds that the interaction between a more open trading system and the new telecommunications and computer technology has substantially increased productivity and facilitated the fragmentation of the production process. The fragmentation of the production process has resulted in a new international organization of production. It has accelerated the globalization of national economies and has allowed firms to take advantage of low wages, wherever they are

to be found, and, where important, to locate production facilities close to their customers. This expansion in international trade and production mobility has resulted in new sources of gain that contribute to the new economy. In the second chapter of this volume, Alfred C. Aman, Jr. examines whether globalization dictates new approaches to governance. The process by which public policy in England has incorporated regional government is the focus of Kenneth Spencer in Chapter 3. In the fourth chapter Lawrence S. Davidson provides an analysis of the impact of globalization on manufacturing in the US Midwest. In Chapter 5, John W. Ryan shows how there is a dual role of universities in the global economy. On the one hand, universities serve as institutions that foster globalization and reduce the isolation of regions. On the other hand, universities themselves are shaped and influenced by globalization. David B. Audretsch and A. Roy Thurik, in Chapter 6, show how globalization has

led to the emergence of the strategic management of regions. In Chapter 7, Jean-Pierre van Aubel and Frans van Nispen examine the links between federalization and globalization in the European context. The impact of globalization on regulatory institutions is the focus of Montserrat Cuchillo in Chapter 8. Finally, in Chapter 9, David Eaton examines the relationship between global trade sovereignty and sub-national autonomy. Taken together, these chapters provide a compelling view that public policy must be considered in a new light in the global economy. Not only does policy have to consider global implications, but also the importance of local characteristics and regional strengths.

Europe-Asia Interregional Relations Bart Gaens 2016-04-29 This book examines the interregional relations of the European Union with East Asia through the prism of the Asia-Europe Meeting (ASEM). ASEM currently brings together 16 Asian countries, the 27 member

states of the European Union, as well as the ASEAN Secretariat and the European Commission. ASEM's ten-year anniversary and the Sixth Summit in Helsinki prompted reflection on the forum's accomplishments in three dimensions of interaction, its working methods, democratic involvement, public awareness and global strategic potential. The volume provides an in-depth evaluation of ASEM's first decade from a European perspective, including the achievements of the ASEM6 Summit and its implications for the future of the process. It also analyzes the role of interregional interaction as a tool for EU foreign policy.

European Union and New Regionalism Mario Telò 2016-04-22 Stemming from an international and multidisciplinary network of leading specialists, this best-selling text is fully updated with new chapter additions. With the first edition prepared at the end of the last century and the second edition adding inter-regional

relations, this new edition focuses on competing models of regional cooperation within a multipolar world and the role of European Union. This new edition offers: - A comparative analysis of regional cooperation and of both US-centred and EU-centred interregionalism. - A fresh exploration of key issues of regionalism versus globalization and the potential for world economic and political governance through regional cooperation, notably in hard times. - A vigorous response to conventional wisdom on the controversial EU international identity - An appendix on regional and interregional organizations. - A key resource for postgraduate or undergraduate study and research of international relations, European integration studies, comparative politics and international political economy. Taking into account both the expanded European Union and regional cooperation in every continent, this multidisciplinary volume comprises contributions from established scholars in the

field: A. Gamble, P. Padoan, G. Joffé, G. Therborn, Th. Meyer, R. Higgott, B. Hettne / F. Ponjaert, F. Soederbaum, Ch. Deblock, K. Eliassen / A. Arnottir, S. Keukeleire / I. Petrova, S. Santander and M. Telò (editor).

The European Union and Global Governance

Dr Jens-Uwe Wunderlich 2010-12-14 The European Union and Global Governance: A Handbook aims to analyse contemporary debates in European Studies in order to provide lessons for the development, design and normative evaluation of global governance. It brings together scholars of European studies and international relations, where much of the literature on regional and global governance is located, thereby providing interdisciplinary lessons from the study of European Union and its governance that can be used to re-evaluate processes of global governance. Each chapter examines methodological, theoretical or empirical discussions within European studies in order to draw insights for current developments

in global governance.

New Regionalism in the Global Political Economy Shaun Breslin 2002-08-22 Following the financial crisis at the end of the twentieth century, regionalisms in the global political economy have evolved in a number of ways. This informative book brings together the leading scholars in the field to provide cutting edge analyses of contemporary regions and regionalist projects. Providing an innovative integration of theoretical issues with sophisticated analyses of a wide range of international case studies, the chapters systematically consider the relationship between globalization, financial crisis, and regional projects. In combination, the contributions to this volume provide the widest possible base within the literature for a truly comparative study of contemporary regionalism.

EU Trade Strategies Vinod K. Aggarwal 2004-06-19 All is not well in the World Trade Organization. Does a global economy require

global institutions? One possible alternative is interregionalism: economic integration between two distinct regions. This book explores the logic of interregionalism by focusing on the European Union, which has pursued agreements with Latin America, East Asia, and the Southern Mediterranean, among others. Why has the EU pursued this strategy? Based on a novel theoretical framework, the authors in this book explore EU interregionalism to provide us with insight into this new emerging face of the international political economy.

Globalization and Regional Integration in Europe and Asia Nam-Kook Kim 2009 "This volume discusses the current trend of globalization and the main characteristics of world order, focusing specifically on the destiny of the nation state, the threat against human rights, and conflicts between unilateral hegemony of the USA and Europe. It examines the contemporary European experience and compares it with Asian reality with a view to

implications for the future development of Asia. It also discusses regional integration as a framework for bringing stable peace, exploring detailed principles and specific forms of a regional community in Asia. Contributors from Europe and Asia critically review previous literature on this topic and suggest new theoretical and empirical grounds of regional community in Asia. The book takes the viewpoint of comparative civilization and experiences of European integration to offer meaningful lessons for the future of nation states and the possibility of building regional communities in Asia." -- Book cover.

Europe, Canada and the Comprehensive Economic Partnership Agreement Kurt Hübner
2011-04 The Great Recession and the turn towards all forms of protectionism stress the relevance of international trade policy. With the global economy undergoing deep structural changes, the negotiations between Canada and the EU on a Comprehensive Economic and Trade

Agreement (CETA) present a real-time experiment that sheds light on the direction that the relationships between two economic units of the G8 will take. For Canada, an agreement with the EU would end its current dependency on the US; for the EU, an agreement with Canada would be a first with a G8-economy and indicate how its new trade strategy 'Global Europe' will look like. This book is the first to simultaneously analyze the undercurrents of this project and introduce the main topics at hand. CETA is much more than a simple free trade agreement, its breadth covers regulatory aspects in goods, services, and finance; the opening of public procurement markets; attitudes and policies of Canadian provinces towards liberalization; climate policies and international leadership claims of the EU in comparison to Canadian policy attempts; the challenges of the Euro project and the reform efforts; and the challenges of the Euro as a international reserve currency. CETA is a challenging project that will

kick-start enormous changes in trade policy-making as well as in market openness in Canada. It will mark the EU's efforts to re-make the Atlantic Economy. This book provides deep insights into the ambiguity of the project and addresses the implications of a rapidly changing global economy for trade policy. Offering analysis of the financial industry, banking, trade policy, climate change strategy, and the Euro exchange rate, this book should be of interest to students and policy-makers alike.

European Responses to Globalization Janet Laible 2006-07-21 Explores the institutional, economic and ideational factors that shaped the way in which Europe adapted to, resisted, and responded to the challenges of globalization. This book reveals 3 main strategies adopted by European political actors in their response: resistance, adaptation, and the production of alternatives to global norms and practices.

Regionalism across the North/South Divide
Jean Grugel 2003-12-16 In contrast to most

studies of regionalism, Grugel and Hout focus on countries not currently at the core of the global economy, including Brazil and Mercosur, Chile, South East Asia, China, South Africa, the Maghreb, Turkey and Australia. What seems clear from this original analysis is that far from being peripheral, these countries are forming regional power blocs of their own, which could go on to hold the balance of power in the new world order.

EU Trade Strategies V. Aggarwal 2004-04-14 All is not well in the World Trade Organization. Does a global economy require global institutions? One possible alternative is interregionalism: Economic integration between two distinct regions. This book explores the logic of interregionalism by focusing on the European Union, which has pursued agreements with Latin America, East Asia, and the Southern Mediterranean, among others. Why has the EU pursued this strategy? Based on a novel theoretical framework, the authors in this book

explore EU interregionalism to provide us with insight into this new emerging face of the international political economy.

The Ashgate Research Companion to

Regionalisms J. Andrew Grant 2016-03-23 EU studies increasingly recognize the salience of new regional insights. Hence, this collection of original essays provides a broad overview of regionalism, together with detailed analyses on the construction, activities, and implications of both established and emerging examples of formal political and economic organizations as well as informal regional entities and networks. Aimed at scholars and students interested in the continuing growth of regionalism, The Ashgate Research Companion to Regionalisms is a key resource to understanding the major debates in the field. Organized into three main sections, this volume deals with a wide range of issues covering the following important research areas: -Section one covers theoretical and methodological approaches to the study of

established and formal regionalism, emerging and informal regionalism, inter-regionalism, and levels of regionalism. -Section two provides detailed case-studies of established and formal regionalisms: EU, NAFTA, ASEAN, SAARC, OAS, MERCOSUR, AU, ECOWAS, and SADC. -Section three offers case-studies that investigate emerging and informal regionalisms in Oceania, the Arab League, BRICSAM, and the Commonwealth(s) as well as thought-provoking chapters on micro-regional processes evident in spatial development initiatives, transnational gangs, transfrontier conservation areas, and the migration-conflict nexus in natural resource sectors. With the study of regionalism becoming an increasingly important part of politics, international relations, development, and global studies courses, this comprehensive volume is a valuable addition for classroom use.

Globalization and Regionalization Peter J. Buckley 1998 *Globalization and Regionalization: Strategies, Policies, and Their Economic*

Environment puts you on top of the world, with the big picture of global trade and rapid business internationalization at your feet. You™ll see how the two opposing market forces, globalization and regionalization, have created a new international trade environment. In addition, you™ll see how the recent upsurge in preferential trading arrangements, the new technologies adapted by firms, and the foreign direct investment (FDI) and trade policies of countries and blocs have combined to dramatically change how and why international business is conducted. Globalization and Regionalization is just what it says it is--a guide to understanding the strategies and policies that countries and firms employ to prosper in an international business environment in which globalization and regionalization seem to act as opposing forces. In this unique volume, you™ll discover how some of the top competing business scholars in the world see the way that regionalization and globalization can function as

complements to each other, actually becoming the building blocks that lead to global strategies. Specifically, this book gives you world-class information about: how to evaluate trade creation and trade diversion at the country level the dynamics of optimal entry strategy for multinational enterprises (MNEs) the effects of differences between countries' competition policies on cross border mergers and acquisitions the internationalization of services through international banking strategy how an open door policy allows China to play an important role in the recrudescence of globalization Vietnam as host to foreign business activity Globalization and Regionalization is the collective and international result of the World Conference on Globalization and Regionalization at the University of Paris I Pantheon-Sorbonne. If you™re an educator, international business director, scholar of international studies, or entrepreneur, you™ll definitely want to get the information that was presented at this

important international venue. Overall, this collection will give you a clearer picture of the current direction of international trade in today's rapidly shifting and progressive global trade environment.

Globalization and the New Regionalism

Stefan Schirm 2002-07-19 The European Single Market, NAFTA and Mercosur powerfully shape international relations and economic development; they also symbolize a shift in economic policy towards a world market-oriented and liberalizing strategy. Schirm argues that this new regionalism is essentially a result of the impact of globalization on domestic politics. The increasing transnational mobility of private economic actors alters the costs and benefits of economic policy options for governments as well as the interests of domestic groups.

Globalization stimulates economic reforms whose economic efficiency and political acceptability are increased through regional cooperation. Globalization and the New

Regionalism is innovative in three aspects: it offers a new theoretical approach to integration theory; it develops a distinct interpretative model for the impact of globalization on states; and it compares systematically the influence of globalization and the preferences for cooperation cross-regionally in Europe and the Americas. Case studies include the industrialized countries France, Germany, Great Britain and the United States, as well as the newly industrializing countries Argentina, Brazil and Mexico. This book is a timely contribution to the debate on the consequences of globalization and the foundations of regionalism, and has far-reaching implications for theories of international relations and political economy.

Regionalization and Globalization in the Modern World Economy Alex E. Fernández Jilberto 2017-03-16 Originally published in 1998. This collection of outstanding essays explores the importance of regionalization and globalization to the world economy.

International contributions explore the process of regionalization in the Pacific Area, The Americas, Africa and Europe, and question whether the world economy is characterized by increasing regionalization, rather than globalization. The book is an excellent contribution to debate on development economics. It investigates how the processes of globalization and regionalization, driven by liberalization of trade and capital markets, weaken nationally established monopolies and protected industries and it looks at the challenge to Third World nations and the countries of the former socialist bloc.

The European Fund for Strategic Investments: The Legacy European Investment Bank
2021-01-07 The inside story of the European Fund for Strategic Investments from 2015 to 2020 told through interviews with the Managing Director, Deputy Managing Director, members of the Investment Committee and final beneficiaries across Europe. The architects of

this €500 billion-plus programme, the head of the EU bank and the president of the European Commission, describe the genesis of this financial pillar of the Investment Plan for Europe. Then the people who ran one of the biggest economic stimulus programmes in history detail how they did it—and what the lessons are for policymakers responding to new crises, including the economic shock caused by the COVID-19 pandemic. The European Fund for Strategic Investments has been one of the good news stories to emerge in a decade of economic uncertainty. It has gone well beyond its highly ambitious target of €500 billion in mobilised investments. The Juncker Plan has made a strong contribution to the 14 million jobs created in the EU between 2015 and 2020. It has become a success in co-financing projects that otherwise might not have been carried through. It has also charted the path towards new ways of financing. This is not only the case in relatively conventional areas, such as infrastructure, but

also in sectors like research and innovation or the contribution to climate change mitigation. This is exactly what makes EFSI so groundbreaking: responding to the needs of the market through continuous financial innovation. The principle of the European Fund for Strategic Investments is here to stay. It has paved the way for its successor, the InvestEU programme, which is to be deployed under the 2021-2027 multiannual financial framework. This publication details why the programme was such a success.

From Here to Free Trade Ernest H. Preeg
1998-05-13 In his new book, Ernest Preeg analyzes international trade and investment in the 1990s and lays out a comprehensive U.S. trade strategy for the uncertain period ahead. He examines the influence of the World Trade Organization (WTO) and argues that economic globalization is beneficial to the U.S. economy in the short- to medium-term while raising important questions about national sovereignty

and security over the longer term. Preeg believes regional free trade agreements will soon encompass the majority of world trade, but they can conflict with the WTO's multilateral objectives. The central challenge for U.S. trade strategy, then, is to integrate the now largely separate multilateral and regional tracks of the world trading system. The first essay assesses U.S. interests in economic globalization, the second examines recent steps toward free trade at the multilateral and regional levels, and the next three offer an in-depth critique of U.S. regional free trade objectives in the Americas, across the Pacific, and possibly with Europe. The final essay presents a multilateral/regional synthesis for going from here to free trade over the coming decade.

The Political Economy of Regionalism

Edward D. Mansfield 1997-01 French rule in Syria and Lebanon coincided with the rise of colonial resistance around the world and with profound social trauma after World War I. In this

tightly argued study, Elizabeth Thompson shows how Syrians and Lebanese mobilized, like other colonized peoples, to claim the terms of citizenship enjoyed in the European metropole. The negotiations between the French and citizens of the Mandate set the terms of politics for decades after Syria and Lebanon achieved independence in 1946. *Colonial Citizens* highlights gender as a central battlefield upon which the relative rights and obligations of states and citizens were established. The participants in this struggle included not only elite nationalists and French rulers, but also new mass movements of women, workers, youth, and Islamic populists. The author examines the "gendered battles" fought over France's paternalistic policies in health, education, labor, and the press. Two important and enduring political structures issued from these conflicts: • First, a colonial welfare state emerged by World War II that recognized social rights of citizens to health, education, and labor protection. •

Second, tacit gender pacts were forged first by the French and then reaffirmed by the nationalist rulers of the independent states. These gender pacts represented a compromise among male political rivals, who agreed to exclude and marginalize female citizens in public life. This study provides a major contribution to the social construction of gender in nationalist and postcolonial discourse. Returning workers, low-ranking religious figures, and most of all, women to the narrative history of the region -- figures usually omitted -- *Colonial Citizens* enhances our understanding of the interwar period in the Middle East, providing needed context for a better understanding of statebuilding, nationalism, Islam, and gender since World War II.

Global Power Europe - Vol. 2 Astrid Boening
2013-03-27 This two-volume project provides a multi-sectoral perspective over the EU's external projections from traditional as well as critical theoretical and institutional perspectives, and is

supported by numerous case studies covering the whole extent of the EU's external relations. The aim is to strive to present new approaches as well as detailed background studies in analyzing the EU as a global actor. Volume 1: The first volume "Theoretical and Institutional Approaches to the EU's External Relations" addresses the EU's overall external post-Lisbon Treaty presence both globally and regionally (e.g. in its "neighborhood"), with a special emphasis on the EU's institutional framework. It also offers fresh and innovative theoretical approaches to understanding the EU's international position. - With a preface by Alvaro de Vasoncelos (former Director European Union Institute for Security Studies) Volume 2: The second volume "Policies, Actions and Influence of the EU's External Relations", examines in both quantitative and qualitative contributions the EU's international efficacy from a political, economic and social perspective based on a plethora of its engagements.

Globalization, Trade, and Economic Development R. Bernal 2013-12-18 This is the most in-depth study of the economic partnership between the European Union and the CARIFORUM countries, a group of fifteen small developing economies in the Caribbean. The CARIFORUM-EU Economic Partnership Agreement (EPA) is the first trade agreement of its kind, as it is a new type of WTO-compatible trade agreement between a group of developed countries and a group of developing countries. As a principal negotiator for CARIFORUM, Bernal's qualifications allow him to provide a unique perspective on the increasingly important topic of trade and economic development in the midst of globalization. Globalization, Trade, and Economic Development comprehensively explores the components of the EPA from all angles, explains how the agreement provides opportunities to strengthen and accelerate economic development, and outlines the policies which can

allow the CARIFORUM countries to seize these opportunities. Bernal's explanation of the institutional arrangements for the conduct of the negotiations by CARIFORUM is invaluable to governments and regional organizations in developing countries for coordinating groups to advance common and joint positions in international negotiations.

Region-building Ludger Kühnhardt 2010-07-30

After two centuries of nation-building, the world has entered an era of region-building in search of political stability, cultural cohesion, and socio-economic development. Nations involved in the regional structures and integration schemes that are emerging in most regions of the world are deepening their ambitions, with Europe's integration experience often used as an experimental template or theoretical model.

Volume I provides a political-analytical framework for recognizing the central role of the European Union not only as a conceptual model but also a normative engine in the global

proliferation of regional integration. It also gives a comprehensive treatment of the focus, motives, and objectives of non-European integration efforts. Volume II offers a unique collection of documents that give the best available overview of the legal and political evolution of region-building based on official documents and stated objectives of the relevant regional groupings across all continents.

Together, these volumes are important contributions for understanding the evolution of global affairs in an age when power shifts provide new challenges and opportunities for transatlantic partners and the world community. European Union and New Regionalism Mario Telò 2001 A collection of papers that look at the structure of the global economy, and its changing paradigms over the years. The papers look at how the classic concept of state never really reflected the reality of the international scene, but instead seem to be expressed through regional constructs.

EU Trade Strategies Vinod K. Aggarwal 2004
Globalisation and European Integration Petros Nousios 2012 This book explores the links between European integration and globalisation, and examines the potential for social transformation in the context of the global economic crisis and the resulting EU reforms. Divided into three parts, this book offers both empirical and theoretical analyses of social integration, supranationality and global competition. Drawing on Critical Political Economy research, Neo-Gramscian, Open Marxist, Regulationist and Post-structuralist scholars subject a wide range of European flagship policies in matters of competition, trade and security to critical scrutiny and relate them to global political economy dynamics. Contributors examine the ways in which current global economic turbulence has affected the European Union, its membership and its adjacent areas, and determine the potential for economic and political transformation in light of

the global economic crisis and Europe's 2020 Strategy. In the emerging multi-polar world, in which the EU and the US are expected to share global policymaking with new powers, this book argues for a revised conceptualisation of European integration and its relationship with globalisation. Globalisation and European Integration will be of interest to students, scholars and researchers of globalisation, political economy, international relations, and European Union politics.
