The Information Revolution in Early Modern Europe Paul M. Dover 2021-10-14 This provocative new history of early modern Europe argues that changes in the generation, preservation and circulation of information, chiefly on newly available and affordable paper, constituted an 'information revolution'. In commerce, finance, statecraft, scholarly life, science, and communication, early modern Europeans were compelled to place a new premium on information management. These developments had a profound and transformative impact on European life. The huge expansion in paper records and the accompanying efforts to store, share, organize and taxonomize them are intertwined with many of the essential developments in the early modern period, including the rise of the state, the Print Revolution, the Scientific Revolution, and the Republic of Letters. Engaging with historical questions across many fields of human activity, Paul M. Dover interprets the historical significance of this 'information revolution' for the present day, and suggests thought-provoking parallels with the informational challenges of the digital age.

Why Did Europe Conquer the World? Philip T. Hoffman 2017-01-24 The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914, Europeans conquered 84 percent of the globe. But why did Europe establish global dominance, when for centuries the Chinese, Japanese, Ottomans, and South Asians were far more advanced? In *Why Did Europe Conquer the World?*, Philip Hoffman demonstrates that conventional explanations—such as geography, epidemic disease, and the Industrial Revolution—fail to provide answers. Arguing instead for the pivotal role of economic and political history, Hoffman shows that if certain variables had been different, Europe would have been eclipsed, and another power could have become master of the world. Hoffman sheds light on the two millennia of economic, political, and historical changes that set European states on a distinctive path of development, military rivalry, and war. This resulted in astonishingly rapid growth in Europe's military sector, and

produced an insurmountable lead in gunpowder technology. The consequences determined which states established colonial empires or ran the slave trade, and even which economies were the first to industrialize. Debunking traditional arguments, *Why Did Europe Conquer the World?* reveals the startling reasons behind Europe's historic global supremacy.

Longman Handbook of Twentieth Century Europe Chris Cook 2014-09-19 The twentieth century was one of constant upheaval across Europe. The continent saw wars, revolutions and the collapse of empires and a range of leading figures from Stolypin and Stalin to Chirac, Schroder and Putin. This book provides a detailed yet wide-ranging guide to the turbulent events of twentieth century Europe. Covering the whole period from Tsarist Russia and Imperial Germany to the Balkan Wars of the 1990's and the final birth of the Euro in 2002, it provides a convenient user-friendly compendium of key fact and figures for the whole of Europe - from the Atlantic to the Urals.

A Brief History of Islam in Europe Maurits S. Berger 2014 This book gives an overall presentation and discussion of the interaction between Europe and Islam ever since Islam appeared on the European stage thirteen centuries ago. The events and stories presented are to serve the understanding of present debates on, and notions of, Islam and Muslims in Europe. The leading questions in discussing the role of Islam in Europe are: how and in what ways did Europeans and Muslims interact and, for those Europeans who had never met a Muslim, what was their image of Islam, and how did they study the Muslim? Notions of religion, (in)tolerance and Othering are guiding themes. This book shows that in the course of thirteen centuries the Muslim as well as Islam has undergone many metamorphoses. The Muslim in Europe has been a conqueror, antichrist, scholar, benign ruler, corsair, tradesman and fellow citizen. The image of Islam has meandered accordingly, as a religion that was feared as an enemy or embraced as a partner against heretic Christians, despised as an abomination or admired as a civilization, and studied for missionary, academic, colonial or security purposes.

Europe in the Modern World Edward Berenson 2020-07 "Europe in the Modern World: A New Narrative History Since 1500 is an unusually engaging narrative history of Europe since 1500. Written by an award-winning teacher and scholar, the narrative highlights the major episodes of the European past and vividly connects those episodes to major international events"--

Europeana Patrik Ouředník 2005 Told in an informal, mesmerizing voice, Ouredn'k represents the twentieth century in all its contradictions and grand illusions, demonstrating that nothing substantial has changed between 1900 and 1999--humanity is still hopeful for the future and still mired in age-old conflicts. As he demonstrates that nothing can be reduced to a single, true viewpoint, Ouredn'k mixes hard facts and idiosyncratic observations, highlighting the horror and absurdity of the twentieth century and the further absurdity of attempting to narrate this history.

The Shortest History of Europe John Hirst 2009 Chinese civilisation was for a long period more advanced than European. From China, Europe acquired printing, paper-making, the compass, gunpowder and locks for canals. Yet it was in Europe that steady economic growth first occurred and then the Industrial Revolution. And it was in Europe that representative government and individual rights, those

other hallmarks of modernity, first developed. What is it about Europe? Celebrated historian John Hirst offers a fascinating exploration of the qualities that made Europe a world-changing civilisation. The Shortest History of Europe begins with a rapid overview of European civilisation, describing its birth from an unlikely mixture of three elements: classical learning, Christianity and German warrior culture. Over the centuries, this unstable blend produced highly distinctive characters - pious knights and belligerent popes, romantics spouting folklore and revolutionaries imitating Rome - and its coming apart provided the dynamic of European history in modern times. Meanwhile the common people were tilling the soil, until they became the first to enjoy the prosperity of an industrialised urban society. The Shortest History of Europe is a clear, humorous and thought-provoking account of a remarkable civilisation.

Europe and the People Without History Eric R. Wolf 2010-08-22 'The intention of this work is to show that European expansion not only transformed the historical trajectory of non-European societies but also reconstituted the historical accounts of these societies before European intervention. It asserts that anthropology must pay more attention to history.' (AMAZON)

Streetlife Leif Jerram 2011-02-24 The twentieth century in Europe was an urban century: it was shaped by life in, and the view from, the street. Women were not liberated in legislatures, but liberated themselves in factories, homes, nightclubs, and shops. Lenin, Hitler, and Mussolini made themselves powerful by making cities ungovernable with riots rampaging through streets, bars occupied one-by-one. New forms of privacy and isolation were not simply a by-product of prosperity, but because people planned new ways of living, new forms of housing in suburbs and estates across the continent. Our proudest cultural achievements lie not in our galleries or state theatres, but in our suburban TV sets, the dance halls, pop music played in garages, and hip hop sung on our estates. In Streetlife, Leif Jerram presents a totally new history of the twentieth century, with the city at its heart, showing how everything distinctive about the century, from revolution and dictatorship to sexual liberation, was fundamentally shaped by the great urban centres which defined it.

The Birth of a New Europe Theodore S. Hamerow 2016-08-01 Between the conclusion of the Napoleonic Wars and the outbreak of the First World War, Europe underwent a transformation unparalleled in its history. No comparable degree of change had occurred on the Continent since the New Stone Age.

Theodore Hamerow examines the innovations that challenged nineteenth-century Europe, using a perspective that transcends events that occurred within national boundaries. He brings together political, social, diplomatic, and national developments to demonstrate how they relate to the profound transformations brought about by the industrial revolution. Using a wealth of statistics and other documentation to buttress insightful generalizations, Hamerow broadly appraises the implications of the shift in Europe from an agricultural to an industrial society. Among the subjects he considers are the rise of the middle and working classes, the spread of literacy and the enfranchisement of the masses, the growth of urban centers of manufacture and trade, the acquisition of colonies, the spread of military technologies, and the changes in the functions of governments.

A Short History of Europe Simon Jenkins 2018-11-08 The first short, single-volume history of the continent - from the Dark Ages to present day - by the author of the bestselling A Short History of England Europe is an astonishingly successful place. In one concise book for the very first time, Jenkins brings together the

transformative forces and dominant eras into one chronological tale - all with his insight, colour and authority. PRAISE FOR SIMON JENKINS: 'Full of stand-out facts . . . absolutely fascinating' Richard Bacon, BBC Radio 2, on A Short History of England 'Masterly, perhaps a masterpiece' Independent, Books of the Year on England's Thousand Best Churches 'Jenkins is, like all good guides, more than simply informative: he can be courteous and rude, nostalgic and funny, elegant' Adam Nicolson on England's Thousand Best Houses, Evening Standard 'Full of the good judgements one might hope for from such a sensible and readable commentator, and they alone are worth perusing for pleasure and food for thought' Michael Wood on A Short History of England, New Statesman 'Any passably cultured inhabitant of the British Isles should ask for, say, three or four copies of this book' Max Hastings on England's Thousand Best Houses, Sunday Telegraph

Dark Continent Mark Mazower 2009-05-20 An unflinching and intelligent alternative history of the twentieth century that provides a provocative vision of Europe's past, present, and future. "[A] splendid book." —The New York Times Book Review *Dark Continent* provides an alternative history of the twentieth century, one in which the triumph of democracy was anything but a forgone conclusion and fascism and communism provided rival political solutions that battled and sometimes triumphed in an effort to determine the course the continent would take. Mark Mazower strips away myths that have comforted us since World War II, revealing Europe as an entity constantly engaged in a bloody project of self-invention. Here is a history not of inevitable victories and forward marches, but of narrow squeaks and unexpected twists, where townships boast a bronze of Mussolini on horseback one moment, only to melt it down and recast it as a pair of noble partisans the next.

Europe in Retrospect Raymond F. Betts 1979

The Pursuit of Power Richard J. Evans 2016-09-01 ECONOMIST BOOKS OF THE YEAR 2016 'A scintillating, encyclopaedic history, rich in detail from the arcane to the familiar... a veritable tour de force' Richard Overy, New Statesman 'Transnational history at its finest social, political and cultural themes swirl together in one great canvas of immense detail and beauty' Gerard DeGroot, The Times 'Dazzlingly erudite and entertaining' Dominic Sandbrook, The Sunday Times A masterpiece which brings to life an extraordinarily turbulent and dramatic era of revolutionary change. The Pursuit of Power draws on a lifetime of thinking about nineteenth-century Europe to create an extraordinarily rich, surprising and entertaining panorama of a continent undergoing drastic transformation. The book aims to reignite the sense of wonder that permeated this remarkable era, as rulers and ruled navigated overwhelming cultural, political and technological changes. It was a time where what was seen as modern with amazing speed appeared old-fashioned, where huge cities sprang up in a generation, new European countries were created and where, for the first time, humans could communicate almost instantly over thousands of miles. In the

period bounded by the Battle of Waterloo and the outbreak of World War I, Europe dominated the rest of the world as never before or since: this book breaks new ground by showing how the continent shaped, and was shaped by, its interactions with other parts of the globe. Richard Evans explores fully the revolutions, empire-building and wars that marked the nineteenth century, but the book is about so much more, whether it is illness, serfdom, religion or philosophy. The Pursuit of Power is a work by a historian at the height of his powers: essential for anyone trying to understand Europe, then or now.

Europe since 1945 James Robert Wegs 1986

Mason 2011-01-16 Highlighting the most important events, ideas, and individuals that shaped modern Europe, *A Concise History of Modern Europe* provides a readable, succinct history of the continent from the Enlightenment and the French Revolution to the present day. The Book That Changed Europe Lynn Hunt 2010-03-31 Two French Protestant refugees in eighteenth-century Amsterdam gave the world an extraordinary work that intrigued and outraged readers across Europe. In this captivating account, Lynn Hunt, Margaret Jacob, and Wijnand Mijnhardt take us to the vibrant Dutch Republic and its flourishing book trade to explore the work that sowed the radical idea that religions could be considered on equal terms. Famed engraver Bernard Picart and author and publisher Jean Frederic Bernard produced *The Religious Ceremonies and Customs of All the Peoples of the World*, which appeared in the first of seven folio volumes in 1723. They put religion in comparative perspective, offering images and analysis of Jews, Catholics, Muslims, the peoples of the Orient and the Americas, Protestants, deists, freemasons, and assorted sects. Despite condemnation by the Catholic Church, the work was a resounding success. For the next century it was copied or adapted, but without the context of its original radicalism and its debt to clandestine literature, English deists, and the philosophy of Spinoza. *Ceremonies and Customs* prepared the ground for religious toleration amid seemingly unending religious conflict, and demonstrated the impact of the global on Western consciousness. In this beautifully illustrated book, Hunt, Jacob, and Mijnhardt cast new light on the profound insight found in one book as it shaped the development of a modern, secular understanding of religion.

The History of Europe in Bite-sized Chunks Jacob F. Field 2019-03-07 An accessible and succinct account of the story of Europe from its ancient foundations to the twenty-first century European Union.

The History of Civilization François Guizot 1887

Europe on the Brink, 1914 John E. Moser 2020-05-15 The assassination of Archduke Franz Ferdinand on June 28, 1914 by a Serbian nationalist has set off a crisis in Europe. Since the Congress of Vienna in 1815, peace had largely prevailed among the Great Powers, preserved through international conferences and a delicate balance of power. Now, however, interlocking alliances are threatening to plunge Europe into war, as Austria-Hungary is threatening war against Serbia. Germany is allied with Austria-Hungary, while Russia views itself as the protector of Serbia. Britain is torn between fear of a German victory and a Russian one. France supports Russia but also needs Britain on its side. Can war be avoided one more time? *Europe on the Brink* plunges students into the July Crisis as representatives of the European powers. What choices will they make?

Europe Norman Davies 1996 From the Ice Age to the Cold War and beyond, from Reykjavik to Riga, from Archimedes to Einstein, Alexander to Yeltsin, here between the covers of a single volume Norman Davies tells the story of Europe, East and West, from prehistory to the present day. The book's absorbing narrative lays down the chronological and geographical grid on which the dramas of European history have been played out. It zooms in from the distant focus of Chapter One, which explores the first five million years of the continent's evolution, to the close focus of the last two chapters, which cover the twentieth century at

roughly one page per year. In between, Norman Davies presents a huge and sweeping canvas packed with fascinating detail, analysis, and anecdote. Alongside Europe's better-known stories - human, national, and continental - he brings into focus areas often ignored or misunderstood, remembering the stateless nation as well as the nation-state. Minority communities, from heretics and lepers to Jews, Romanies, and Muslims have not been forgotten. This masterly history reveals not only the rich variety of Europe's past but also the many and rewarding prisms through which it can be viewed. Each chapter contains a selection of telephoto 'capsules', illustrating narrower themes and topics that cut across the chronological flow. Davies then concludes with a wide-angle 'snapshot' of the whole continent as seen from one particular vantage point. The overall effect is stunning: a kind of historical picture album, with panoramic tableaux interspersed by detailed insets and close-ups. Never before has such an ambitious history of Europe been attempted. In range and ambition, the originality of its structure and glittering style, Norman Davies's Europe represents one of the most important and illuminating history books to be published by Oxford. Time Capsules 201 fascinating articles interspersed throughout the narrative focus on incidents or topics as various as The Iceman of the Alps, Erotic Graffiti at Pompeii, Stradivarius, and Psychoanalysing Hitler. Each capsule can be tasted as a separate self-contained morsel; or can be read in conjunction with the narrative into which it is inserted. Snapshots 12 panoramic overviews across the changing map of Europe freeze the frames of the chronological narrative at moments of symbolic importance, such as Knossos 1628 BC, Constantinople AD 330, and Nuremberg 1945. A fully illustrated history Incorporates over 100 superbly detailed maps and diagrams, and 32 pages of black and white plates.
