

European Asiapacific Political Security And Economic Perspectives

Pacific Cooperation Andrew Mack 1995-03-29
This volume brings together distinguished scholars to assess the literature on international regimes and to explore the relevance of organizations such as NAFTA, GATT, CSCE, and the EU for the Asia-Pacific region. The contributors also evaluate whether lessons for promoting cooperation in the security field can be drawn from the recent successes in regional economic cooperation. *Pacific Cooperation* will be essential reading for policymakers, academics, and anyone with an interest in understanding the prospects for promoting stability and prosperity.

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." - *Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021)*, released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The EU-Thailand Relations Chaiyakorn Kiatpongsan 2011 Een studie over het 'nieuw

bilateralisme' aan de hand van de ontwikkeling van de relatie tussen de EU en Thailand.
Asian-European Relations Jurgen Ruland 2008-02-29 Interregional Relations are a novel field within international relations which have increasingly been attracting scholarly interest. Thus, over the last five years or so, Interregional Relations has firmly established itself as a research field, initially within political science, and gradually in economics. This volume assesses interregional relations between Asia and Europe. It contributes to the most recent developments in research by providing impressively rich studies to test existing theoretical frameworks. Featured in this volume are conceptual contributions, in particular, theoretically inspired studies which conduct in-depth investigation of a broad variety of interregional interactions, such as the political management of globalisation through interregional co-operation, regional security, human rights and finally, the dialogue between Asian and European NGOs. The economic contributions likewise undertake an extensive assessment of areas such as interregional trade and investment flows, the Asian Development Bank and interregional mergers. Applying established theories to concrete phenomena, *Asian-European Relations* provides a comprehensive understanding of interregionalism and how co-operation between Asia and Europe should be fashioned in the new millennium. The integration of political and economic research in this book will be of interest to graduates and researchers in the fields of international relations, international economics, regional integration, and interregionalism.

Linking Trade and Security Vinod K. Aggarwal 2012-10-10 The connections between trade and security are hardly new. Analysts and practitioners have clearly recognized this interrelationship since the mercantilist arguments of the 16th and 17th centuries. Despite wishful economic liberal thinking that might prefer to separate the political from the

economic, it is widely recognized that trade and security are fundamentally interconnected in the foreign policy of states. Over time, as new forms of trade policy have come into being and the international security environment has evolved, the nexus of these two spheres has grown more complex and scholars have struggled to understand their interconnection. This edited volume addresses linkages between trade and security by examining the influence of security factors in driving trade policy measures and the corresponding implications of different types of trade arrangements for international security. Ultimately, the project shows that several elements—traditional economic factors, traditional security factors, and human security factors—can affect the development of trade agreements and unilateral policies, and that trade policies may have both a direct and an indirect effect on traditional and human security. The project focuses on Asia, a region where economics is increasingly important but many security issues still linger unresolved, as a primary setting to test trade linkage theories. It also provides a comparative perspective through examination of how the EU and US have used their trade policies to achieve non-economic goals and how these policies have influenced their security environment. Case studies in this project cover key trade institutions and agreements including the World Trade Organization, the Association of Southeast Asian Nations, ASEAN Plus Three, the East Asia Summit, the Asia-Pacific Economic Cooperation forum, the Shanghai Cooperation Organization, and bilateral preferential trade agreements.

Asia-Pacific in the New World Order

Christopher Brook 2013-11-05 Asia-Pacific in the New World Order critically explores the notion that a distinctive regional power bloc is developing linking countries bordering the Pacific, with East Asia at its core. This student-friendly volume sheds light on the complex interplay between global, regional and national forces which have transformed the Asia-Pacific area into one of the most vibrant and economically successful regions in the world. Historical narratives alongside geopolitical and geoeconomic perspectives are deployed to examine the shifting pattern of power relations and security structures across the region, set

within a wider world context. Key issues addressed include: * what are the primary security problems of the region and how are they being resolved? * does the dynamic growth of the region, and particularly the rise of China, pose a challenge to existing structures of world order? The text has a strong interdisciplinary flavour drawing on analytical approaches from the international relations, political economy and political geography literature. Authors have been drawn from the Asia-Pacific region and the UK and all are established scholars in their specialist fields.

Asia-Europe Cooperation After the

1997-1998 Asian Turbulence

Chyungly Lee 2017-11-01 This title was first published in 2000: When the second Asia-Europe meeting took place in London in April 1998, the EU's economic motivation of building strong links with Asia was challenged by the ongoing Asian economic crises that broke out in mid-1997. The political and social turmoil that ensued in many East Asian economies not only urges the re-examination of the East Asian economic miracle, but also reprioritizes the regional agenda and thus embarks on a new environment for Asia-Europe co-operation. The impact of this Asian turbulence on the establishment of the long-term Asia-Europe equal partnership in general and the ASEM process in particular are addressed in this book, based on the conclusions of the 1998 Asia-Europe Co-operation Forum. The aim of this book is to examine the background causes, responses, prospects and lessons of the first wave of financial crisis in Southeast Asia, and to then move on to an analysis of developments in Asia-Europe co-operative relations after the onset of the crisis. It examines the importance of continued interregional economic co-operation between ASEAN and the EU, looks at the economic impact of the 1997/98 East Asian financial crisis on the EU and analyzes the economic fabric of ASEM. In the final chapter, the book explores how the ASEM process has furthered the development of interregionalism in world affairs and discusses how the crisis has led to uncertainty for the organization's future

development.

The New Global Politics of the Asia Pacific

Michael K. Connors 2011-07-18 The new, fully updated second edition of *The New Global Politics of the Asia Pacific* builds on its coherent framework for understanding the complex international and global politics of the Asia Pacific. The textbook provides an introductory guide for the main frameworks needed to understand the region (realism, liberalism, critical theory), which is reader-friendly while still offering sophisticated competing interpretations. Key content includes: the US in the Asia Pacific; China and Japan in the Asia Pacific; Southeast Asia in the Asia Pacific; India in the Asia Pacific; Russia in the Asia Pacific; Australia in the Asia Pacific; Europe in the Asia Pacific; globalization, regionalism and political economy; Asian values, democracy and human rights; transnational actors; region security order and the impact of terrorism on the region. A highly topical account, which provides an overview of the main actors, institutions and contemporary issues such as security, terrorism and transnational actors, the book is required reading for undergraduate students of Asian studies, international politics, and anyone interested in the region.

European and Asia-Pacific Integration Yu-ming Shaw 1998

Integration in Asia and Europe

Paul J.J. Welfens 2010-02-12 Broadening and deepening of economic and political integration are hallmarks of the EU and ASEAN. This book critically analyses the economic and institutional changes in both Europe and Asia. There is considerable potential for instability, but one also finds regional growth opportunities. Comparative policy analysis and evaluation of various cooperation strategies are presented. Emphasis is on banking, financial market dynamics, ICT, and macroeconomic policies as well as trade, energy, and environmental issues. Legal aspects are combined with historical and economic perspectives. Due emphasis also is on the impact of China and the role of international organisations. The comparative analysis of EU and ASEAN integration suggests important policy choices, including those at the multilateral level.

Cruising in the Global Economy

N. Chin 2008 Interdisciplinary in nature, this analysis elicits an examination of states' relationship to the maritime regulatory structure governing ship ownership, management and operations, cruise lines' business strategies, development of port communities to capture cruise-related revenue, changing leisure consumption patterns and meanings, and the employment of foreign migrant workers as seafarers.

Asia-Pacific Regional Security Assessment

2020 The International Institute for Strategic Studies (IISS) 2020-06-03 The Asia-Pacific Regional Security Assessment provides insight into key regional strategic, geopolitical, economic, military and security topics. Among the topics explored are: the deteriorating US-China relationship and great-power competition; US alliances and security partnerships; the collapse of the Intermediate-range Nuclear Forces Treaty; diplomatic gridlock on the Korean Peninsula; Japan's role in Indo-Pacific security; the breakdown in Japan-South Korea relations; Indonesian policy towards the South China Sea; Australia's defence and security outlook; the European security role in Asia. Authors include leading regional analysts and academics Douglas Barrie, William Choong, Aaron Connelly, Andrew Davies, Michael Elleman, Bonnie S. Glaser, Euan Graham, Christopher W. Hughes, Meia Nouwens, Brendan Taylor and William Tow.

Asia-Pacific Security Stuart Harris 1997-01-01 This volume addresses the relationship between economics and security and its application to the Asia-Pacific region.

Climate Change and the Energy Problem

David Goodstein 2017-03-14 This important compendium deals with the primary world problems of global warming and the coming energy crisis. In alternating chapters, it lays out the nature of the two interrelated problems, and specifies the various economic considerations. Thus, it describes the coming shortfall of fossil fuel energy in detail and then presents the economic factors governing possible solutions. Written by two world renowned academics — a physicist who writes about the nature of the problem, and an economist who discusses various scenarios and solutions, this unique must-have book highlights the problem from the

point of view of a scientist and an economist.

The European Union in the Asia-Pacific Weiqing Song 2019-02-20 Since the mid-1990s, the European Union has defined the Asia Pacific as one of its key strategic targets on its ambitious road towards a global power. Over the past decades, big changes have taken place on both sides and the wider world. It's high time to evaluate the EU's performance in its Asian policy. In fact, the EU is at crossroads with its Asia Pacific policy. On several aspects, the EU is compelled to redefine its interests and roles, and rethink its strategies and policies towards the dynamic and ever important Asia Pacific region. This volume addresses this theme, by elaborating the general context, major issues and countries in the EU's Asia Pacific policy. It covers issue areas of traditional security, economy and trade, public diplomacy, and human security and focuses on the EU's relations with China, Japan, the ASEAN countries, and Australasia.

International Security in the Asia-Pacific Alan Chong 2017-09-13 This volume argues that international security in the Asia-Pacific lends itself to contradictory analyses of centrifugal and centripetal trends. Transitional polycentrism is intrinsically awkward as a description of the security of states and their populations; it implies the loosening of state control and the emergence of newly asserted authority by mixed constellations of intergovernmental organizations and non-state actors. It implies a competition of agendas: threats to the integrity of borders and human security threats such as natural disasters, airliner crashes, and displacement by man-made pollution and food scarcity. Conversely, polycentrism could also imply a return to a more neo-realist oriented international order where great powers ignore ASEAN and steer regional order according to their perceived interests and relative military superiority. This book embraces these contradictory trends as a foundation of analysis and accepts that disorder can also be re-described from the perspective of studied detachment as polycentric order.

Europe and the Asia-Pacific Hanns Maull 2005-08-04 Europe and the Asia-Pacific is the most wide-ranging and accessible book currently

available on the increasingly important relationship between these two regions.

Compiled by leading experts, it covers the historical background, contemporary political setting and the vitally important economic aspects of this relationship. Moving on to deal with security considerations and policy decisions it provides valuable insights into the developing partnership between Europe and the Asia-Pacific. Rigorous and up-to-date, it is born out of the work of the Council for Asia-Europe cooperation (CAEC), a body of think tanks that supports the Asia-Europe Summit Meeting (ASEM) process.

The European Union's Security Relations with Asian Partners Thomas Christiansen 2021-05-11 This wide-ranging book analyses EU-Asia security relations in a systematic, substantive and comparative manner. The contributions assess similarities and differences between the EU and its Asian partners with respect to levels of threat perception, policy response and security cooperation in the context of historical, institutional and external factors – such as the influence of the United States. The book presents original empirical research organised in four parts: a number of contributions providing discussions of the global context in which EU-Asia security relations develop; a series of chapters covering the range of dimensions of EU-Asian security, including both traditional and non-military aspects of security; chapters addressing the specific issues touching on bilateral relations between the EU and its partners in the Asia-Pacific region; and a final part presenting the overall findings across the various contributions together with the future outlook for EU-Asia security relations.

From Asia-Pacific to Indo-Pacific Robert G. Patman 2021-11-24 This book brings together a unique team of academics and practitioners to analyse interests, institutions, and issues affecting and affected by the transition from Asia-Pacific to Indo-Pacific. The Indo-Pacific has emerged as the world's economic and strategic centre of gravity, in which established and rising powers compete with each other. As a strategic space, the Indo-Pacific reflects the rise of geo-political and geo-economic designs and dynamics which have come to shape the region in the early twenty-first century. These new

dynamics contrast with the (neo-)liberal ideas and the seemingly increasing globalisation for which the once dominant 'Asia-Pacific' regional label stood.

Responding to China's Rise Vinod K.

Aggarwal 2015-06-11 In this edited volume, a set of issue and country experts tackle questions regarding China's current rise to power within the current international economic and political order. The current international system is governed by a "Western" conception of order and based on the primacy of post-World War II rules, drawn from liberal models of capitalism and democracy practiced in the US and in Western Europe. In this context, the most important and most uncertain questions facing the West over the next decade concern how the EU and the US will respond to China's rapid growth. Will the transatlantic relationship hold and become stronger, faced with this new economic and geopolitical challenge? Or will the US and the EU—an increasingly prominent global player—compete for economic and political advantage? After a brief introduction laying out the circumstances of China's economic and political rise and the challenges that this poses to the existing international order, the book proceeds in three sections. The first section provides competing theoretical perspectives on China's rise in a historical context. The second section provides a distinctly Chinese perspective on China's current rise. The third section looks at responses from the United States and the European Union, focusing on both economic and security issues as well as the implications of China's rise for US-EU relations. This book is relevant to both scholars and policymakers concerned with Chinese domestic politics and foreign policy, US foreign policy, EU foreign policy, China-US relations, China-EU relations, international security, international political economy and emerging markets.

The U.S.-Singapore Free Trade Agreement

Eul-Soo Pang 2011 Free trade has become the mantra of development strategy for many countries in the world, especially those in the Asia Pacific. This book delves into the American side of the story. It is about how Singapore and the United States came to sign the agreement in 2003 (taking effect from 1 January 2004). The United States - Singapore Free Trade Agreement

(USSFTA) is the first FTA that America signed with an Asian country and the second such agreement with a fully developed country, after Canada. The city-state has used a free trade agreement as both a national survival and a growth strategy, first forging such FTA ties with its major trading partners and then expanding its strategic link to such extra-regional great powers as the United States, Japan, Australia, China, India, and the European Union. Both Singapore and the United States saw in FTAs something more than just merchandise trade.

China's Quiet Rise Baogang Guo 2011-05-12

Despite China's desire to make its rapid ascendance in the 21st century as non provocative as possible, the key to ensure China's peaceful rise lies in two-way integration and engagement. A closely integrated China with the rest of the world and China's acceptance of existing international norms and rules may compel China to behave in a more predictable and responsive way. This co-edited book examines China's rising military capacity and the complex feelings its neighbors, such as Taiwan, South Korea and India, have toward the increasingly powerful China. The focus of this book is on the efforts made by China to brand her non-aggressive image through promoting public diplomacy and expanding regional free trade and cooperation in Asia and Latin America. It uses the cross-Taiwan-strait relations as a testing ground for the prospect of peace between the two former adversaries. China's Quiet Rise will help readers understand why integration, instead of isolation and containment, may be the most effective way to facilitate China's peaceful rise.

The Politics of the Asia-Pacific Mark S. Williams

2022-01-10 This book introduces readers to the deep political tensions in the Asia-Pacific and offers classroom simulations designed to encourage students to delve deeper into the issues and dynamics of the region.

Europe-Asia Interregional Relations Bart

Gaens 2016-04-29 This book examines the interregional relations of the European Union with East Asia through the prism of the Asia-Europe Meeting (ASEM). ASEM currently brings together 16 Asian countries, the 27 member states of the European Union, as well as the ASEAN Secretariat and the European

Commission. ASEM's ten-year anniversary and the Sixth Summit in Helsinki prompted reflection on the forum's accomplishments in three dimensions of interaction, its working methods, democratic involvement, public awareness and global strategic potential. The volume provides an in-depth evaluation of ASEM's first decade from a European perspective, including the achievements of the ASEM6 Summit and its implications for the future of the process. It also analyzes the role of interregional interaction as a tool for EU foreign policy.

Asia and Europe in the 21st Century Rahul Mishra 2021-05-25 How are the rising mutual concerns of Asian and European countries shaping their approaches to the international order? Contributors to this volume discuss emerging critical issues in International relations, including the Indo-Pacific constructs, China's Belt and Road Initiative (BRI), and the progress of established regional security mechanisms like the Shanghai Cooperation Organisation. They also compare western and non-western approaches to these issues, with a holistic perspective on the origins and evolutions of these approaches. Both the Indo-Pacific constructs and BRI present a remarkable set of opportunities for Europe as well as Asia. This book presents key implications of the changing politico-security dynamics in the two regions from the perspectives of both Asian and European scholars and theoretical traditions. A must-read for scholars of International Relations with a focus on relations between Asia and Europe.

The Common Security and Defence Policy: National Perspectives Daniel Fiott 2015-05-19 Given the Ukraine crisis, Russia's resurgence and the burning crises in the South there has never been a better time to discuss European defence. From November 2014 to March 2015, the online magazine European Geostrategy published a number of excellent essays on the European Union's Common Security and Defence Policy (CSDP), all from a national perspective. You can now read all of the essays in this one neat publication. Indeed, in this essay collection jointly published by European Geostrategy, the Egmont Institute and the Institute for European Studies, a host of leading

experts give their national perspectives on the present state and future of the EU's CSDP. Each of the thirty-four essays focuses on the continued relevance of the CSDP when compared to the security challenges facing Europe today. Some essays give a bleak picture of the future, whereas others see grounds for optimism. Either way the essays are bound to provoke reactions of all kinds.

The Architecture of Security in the Asia-Pacific Ronald Huisken 2009-10-01 We cannot expect in East Asia over the foreseeable future to see the sort of conflation of sovereign states that has occurred in Europe. We must anticipate that, for the foreseeable future, the requirement will be for the sensible management and containment of competitive instincts. The establishment of a multilateral security body in East Asia that includes all the key players, and which the major powers invest with the authority to tackle the shaping of the regional security order, remains a critical piece of unfinished business.

Europe and the Asia-Pacific Stephanie Lawson 2003 The many points of contact and conflict about culture and identity that exist between Europe and the Asia Pacific are highlighted in this book. This work surveys a variety of issues relating to culture, identity and representation from an interdisciplinary perspective, with contributions from sociology, economics, history, politics, international relations, security studies, museum studies, translation studies and literary and cultural studies. Each brings a different perspective to bear on questions of culture and identity in the contemporary period, and how these relate to the politics of representation.

Perspectives for a European Security Strategy Towards Asia Gustaaf Geeraerts 2011 As the geopolitical point of gravity moves to the east, the European Union (EU) faces the challenge of ongoing global power shifts, and this study addresses the options, opportunities, and obstacles that lie ahead as the EU becomes a security actor in Asia and Africa. Contributors address a number of key issues, including the EU's soft power, overall strategic planning, European interests in Asia, and the role of Russia in Asia's security climate.

Asia-Pacific Regional Security Assessment 2021 The International Institute for Strategic Studies (IISS) 2021-06-07 The Asia-Pacific Regional

Security Assessment 2021 provides insight into key regional strategic, geopolitical, economic, military and security topics. Among the topics explored are: US–China decoupling and its regional security implications; Japan’s security policy and China; India’s emerging grand strategy; Southeast Asia amid rising great-power rivalry; Australia’s new regional security posture; NATO’s evolving approach to China; The United Kingdom’s ‘tilt’ to the Indo-Pacific; and Emerging technologies and future conflict in the Asia-Pacific. Authors include leading regional analysts and academics Kanti Bajpai, Gordon Flake, Franz-Stefan Gady, Prashanth Parameswaran, Alessio Patalano, Samir Puri, Sarah Raine, Tan See Seng, Drew Thompson, Ashley Townshend, Joanne Wallis and Robert Ward.

Chinese (Taiwan) Yearbook of International Law and Affairs, Volume 27 (2009) 2020-02-03 The Chinese (Taiwan) Yearbook of International Law and Affairs includes articles and international law materials relating to Asia-Pacific and the Republic of China on Taiwan.

Governing Regional Integration for

Development Antoni Estevadeordal 2016-04-22 Developing countries have joined the rapidly growing global system of regional trade agreements (RTAs) over the past years. The drive towards regional integration has advanced with the formation of new markets and groups in Latin America, Africa, Asia, the Middle East and Oceania with few developing countries remaining outside these regional schemes. This volume looks at how 'getting governance right' is a central element for successful RTA implementation, taking stock of the quality and effectiveness of the monitoring of development country RTAs around the world. Organized by the main world regions and primarily focusing on developing country RTAs, the book also includes two case studies focused on monitoring in developed country regional agreements by way of comparison. The contributors operationalize governance in the context of RTA implementation with a more narrow and technical term of 'monitoring' and provide eight important lessons for assessing monitoring around the world.

Beyond Regionalism? Matteo Legrenzi 2016-04-15 Regional cooperation, regionalism

and regionalization in the Middle East are usually considered to be weak and rather ceremonial. However, since September 11, 2001, a new regional order is emerging and the impact of geostrategic changes in the international environment has yet to be satisfactorily studied. With older regional organizations suffering from weaknesses, new forms appear to be developing and flourishing, due either to European support or growing sub-regional identities. This volume offers refined theoretical models and approaches which are attuned to the new dynamics and contradictions of a wide range of regionalist projects in the contemporary Middle East. Case studies of the most important regional organizations in different policy fields offer comprehensive overviews of the main actors, institutions, historical development and current issues.

Economic Interdependence and

International Conflict Edward Deering Mansfield 2009-09-15 The claim that open trade promotes peace has sparked heated debate among scholars and policymakers for centuries. Until recently, however, this claim remained untested and largely unexplored. Economic Interdependence and International Conflict clarifies the state of current knowledge about the effects of foreign commerce on political-military relations and identifies the avenues of new research needed to improve our understanding of this relationship. The contributions to this volume offer crucial insights into the political economy of national security, the causes of war, and the politics of global economic relations. Edward D. Mansfield is Hum Rosen Professor of Political Science and Co-Director of the Christopher H. Browne Center for International Politics at the University of Pennsylvania. Brian M. Pollins is Associate Professor of Political Science at Ohio State University and a Research Fellow at the Mershon Center.

Critical Security in the Asia-Pacific Anthony Burke 2007-11-15 In the wake of 9/11, the Asian crisis and the 2004 Tsunami, traditional analytical frameworks appear increasingly unable to explain the ways in which individuals and communities are rendered insecure, or to advance individual, global or environmental security. This innovative new book challenges

these limitations and addresses the missing problems, people and vulnerabilities of the Asia-Pacific region, while also turning a new, critical eye on traditional inter-state strategic dynamics.

Europe and the Challenge of the Asia

Pacific Brian Bridges 1999 Bridges (politics and sociology, Lingnan College, Hong Kong) analyzes the contemporary economic, political, and security relations between western Europe and the Asia Pacific regions. After surveying the historical legacies of colonialism and de-colonization, he describes the successive economic challenges, first from Japan, then the newly industrializing economies of Asia, and most recently southeastern Asia and China. He concludes that the future of relations between the two regions will be shaped by moves toward greater European integration, how Asia responds to the current financial crisis, and the development of new dialogue between them. Security Politics in the Asia-Pacific William T. Tow 2009-10-15 Asia is experiencing major changes in its security relations. This book brings together respected experts to assess both the theoretical and empirical dimensions of the Asian security debate. Building on the latest research on Asia's regional security politics, it focuses on the 'regional-global nexus' as a way to understand the dynamics of Asian security politics and its intersection with global security. Contributors to the volume offer diverse but complementary perspectives on which issues and factors are most important in explaining how security politics in Asia can be interpreted at both the regional and global levels of analysis. Issues addressed include power balancing and alliances, governance and democracy, maritime and energy security, the relationship between economics and security, 'human security', terrorism, nuclear non-proliferation, climate change and pandemics. This work will serve as a standard reference on the evolution of key issues in Asian security.

The Nexus of Economics, Security, and

International Relations in East Asia Avery Goldstein 2012-08-29 While, over the last 30 years, the global economy's center of gravity has shifted to East Asia, the region has remained surprisingly free of interstate military conflict.

Yet this era of peace and growth has been punctuated by periodic reminders of enduring security problems in the region—from China's military modernization, to unresolved territorial disputes, to persistent tensions on the Korean peninsula. This volume is one of the first to treat these issues of economics and security as interconnected rather than separate. Its authors—leading scholars from the U.S. and China—shed new light on this important nexus by applying insights from a rich variety of approaches to explore and explain the dynamics of a region whose importance for students of both international political economy and international security has grown dramatically. They show that both economic and security 'fundamentals' matter if one is to understand the reasons for, and evaluate the durability of, East Asia's recent peace and prosperity.

Strategy and Security in the Asia-Pacific

Desmond Ball 2020-07-25 From the war on terror to the rise of China, this book unlocks the major strategic themes and security challenges of the early twenty-first century. Strategy and Security in the Asia-Pacific provides the analytical frameworks needed to make sense of this complex but exciting strategic universe. Offering a unique mix of global strategic thinking and Asia-Pacific security analysis, this book is for readers from Sydney to Seoul who want to put their own local security challenges in a wider regional and global context. It is also for North American and European readers requiring an understanding of the dynamic security developments in the Asia-Pacific region around which so much of global strategy is increasingly based. The really vital questions facing the international community are dealt with here: Why do governments and groups still use armed force? Has warfare really changed in the information age? Why should we be concerned about non-traditional security challenges such as water shortages and the spread of infectious disease? Is a great clash imminent between the United States and China? What are the prospects for peace on the Korean peninsula and between India and Pakistan? Can Southeast Asia survive the challenges of transnational terrorism? What does security mean for the Pacific island countries and for Australia and New Zealand? With contributions

from leading commentators and analysts, Strategy and Security in the Asia-Pacific offers a comprehensive and authoritative introduction to the field.
