*Central Office of Information Reference Pamphlet* 1955

*Public Communication in the European Union* Giorgia Nesti 2010-01-08

This book is a collection of essays that analyse and discuss EU information and communication policies and activities towards, with, by different publics developed both by the EU institutions at the European, national and local levels and by public organizations and civil society actors. Throughout six thematic parts, the authors examine from different theoretical perspectives (political communication, journalism, public relations and public diplomacy, political science, and cultural studies) and reflect on what it means for the European Union to communicate in multi-national and multi-cultural settings. The originality and strength of this book stand on the capacity to discuss EU communication policies, strategies and actions in their diverse features and, at the same time, to have a clear general picture of the role and function that communication has within the European Union's governance. The combination of different theoretical frameworks with the latest empirical research findings makes this book a fresh and fascinating collection of insights of what the European Union can achieve with strategic communications.

**British Librarianship and Information Work 1991-2000** J.H.

Bowman 2017-07-28 This important reference volume covers developments in almost every aspect of British library and information work during the ten-year period 1991-2000. Some forty contributors, all of whom are experts in their subject, provide a robust overview of their specialities along with extensive further references which act as a starting point for further research. The book provides a comprehensive record of what took place in library and information management during a decade of considerable change and challenges. It is an essential reference resource for librarians and information professionals.

*Future Financing of the European Union* Great Britain. Parliament. House of Lords. European Union Committee 2005 Negotiations are underway to agree the details of the European Union budget for the period of 2007 to 2013 (known as the Financial Perspective), covering the newly enlarged EU of 25 member states. Further enlargement is likely, with Bulgaria and Romania due to join in 2007 and the possible accession of Croatia and Turkey being considered. The Committee's report considers a range of issues in relation to the current budget debate, including the merits of the Commission's proposals within the framework of recent and future EU enlargement; the Common Agricultural Policy; Structural and Cohesion Funds; the Lisbon Agenda; other spending categories; the functioning of the 'Own Resources' and a EU tax; UK abatement and the Commission's proposal for a Generalised Corrective Mechanism. Conclusions reached include support for the UK Government's insistence that the UK rebate is non-negotiable, given the inadequate reforms of the CAP; however, if real reform of the budget was offered, then the UK Government should be prepared to negotiate. Structural funds should be focused on the 10 new member states, as well as the two applicant countries of Romania and Bulgaria, with the phasing out of EU regional development funds for all 'old' member states with the exception of Greece and Portugal.

**Europe** Rodney Leach 2000 Students of the European Union have needed a succinct and comprehensive description of its many institutions, policies, laws and personalities. This need was also felt among politically conscious readers and researchers eager to understand better what many sensed to be a period of upheaval and change, and among students and teachers of modern history, politics, economics and

international affairs who recognized the growing influence of the EU but lacked a general reference book on its activities and felt themselves unduly reliant on Community sources for information about controversial European questions. Now in its third edition, the Concise Encyclopedia of the European Union provides a thorough response to those needs - from Charlemagne's Aachen to Bismarck's Zollverein, via all the key modern-day institutions, people and ideas that anyone studying or dealing with the EU is likely to come across.

Topics covered include basic concepts, information on Council activities, and contacts and useful addresses.

*The Routledge Handbook of the Politics of Brexit* Patrick Diamond

2018-05-08 The surprise decision expressed by the British people in the referendum held in June 2016 to leave the European Union was remarkable. It also presents a "natural experiment" where the exposure of a society to an extraordinary event allows scholars to observe, in real time in the real world, the interaction of variables. The Routledge Handbook of the Politics of Brexit takes stock of what we know in the social science community about the Brexit phenomenon so far and looks to make sense of this remarkable process as it unfolds. The book asks simple questions across a range of areas and topics so as to frame the debate into a number of navigable "subdiscussions", providing structure and form to what is an evolving and potentially inchoate topic. As such, it provides a systematic account of the background for, the content of, and the possible implications of Brexit. The handbook therefore does not examine in detail the minutiae of Brexit as it unfolds on a day-to-day basis but raises its sights to consider both the broad contextual factors that shape and are shaped by Brexit and the deeper sources and implications of the British exit from the European Union. Importantly, as interest in Brexit reaches far beyond the shores of the United Kingdom, so an international team of contributors examines and reveals the global implications and the external face of Brexit. The Routledge Handbook of the Politics of Brexit will be essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in and actively concerned about research on Brexit, British politics, European Union politics, and comparative politics and international relations.

**The directory of EU information sources** Rebecca Bomford 2007 This is a new sixteenth edition of the Directory of EU Information Sources. It brings together a broad range of information sources, comprising not only the various constituent institutions of the European Union, their personnel, publications, information websites and representations in Europe and the rest of the world, but also diplomatic representation in Brussels, European-level trade and professional associations and NGOs, consultants and lawyers specializing in EU affairs, Press Agencies, EU grants and loans programmes, and universities offering courses in European integration. This is the most comprehensive compilation of contacts and published information on the European Union, providing access to over 12,500 information sources.

**Britain and the European Union** David Gowland 2022-04-07 This engaging and concise new edition offers the student and general reader a compact, readable treatment of British membership of the European Union (EU) from 1973 up until the present day and Brexit, with detailed analysis of the period 1945-1972 accounting for Britain's absence from the formation of the EU. It provides a highly distilled and accessible analysis and overview of some of the parameters and recurring features of Britain's membership of the European Union, touching on all the major facets of membership at this critical time in Britain's relationship with Europe. Key features of the new edition: examines the constant and changing character of British membership of the EU; discusses the problematical and often paradoxical features of EU membership; familiarises the reader with both academic and public debates about the subject; offers thematic treatment of all aspects of policy and attitudes towards the EU; significantly restructured and updated to include the origins of the decision to hold a referendum on UK membership of the EU, the campaign, explanations for its outcome, and the course, substance and implications of the UK-EU Brexit negotiations. This book will be of key interest to scholars, students and the generally interested reader in the areas of European Politics/Studies, British Politics, EU Politics/Studies, Area Studies and International Relations.

**Understanding European Union Law** Karen Davies 2022-12-30 Providing short, clear and accessible explanations of the main areas of EU law, *Understanding European Union Law* is both an ideal introduction for students new to EU law and an essential addition to revision for the more accomplished. This eighth edition has been fully revised and updated with the latest legislative changes and includes an in-depth discussion of 'Brexit' and its implications for EU-UK relations. The book provides readers with a clear understanding of the structures and rationale behind EU law, explaining how and why the law has developed as it has. In addition to discussing the core areas of EU law such as its sources, the role and powers of the EU's Institutions, the enforcement of EU law and the law of the internal market, this edition also includes a new chapter on three 'non-economic' areas of EU law: fundamental human rights, equality (non-discrimination) and the environment. This student-friendly text is both broad in scope and highly accessible. It will inspire students towards further study and show that understanding EU law can be an enjoyable and rewarding experience. As well as being essential reading for Law students, *Understanding European Union Law* is also suitable for students on other courses where basic knowledge of EU law is required or useful, such as business studies, political science, international relations or European studies programmes.

*Energy Sector in France and the UK* Thomas Leutbecher 2002-05-27 Seminar paper from the year 2002 in the subject Economy - Environment economics, grade: 4 pkt (1-6: 2), Helsinki School of Economics (Haaga Instituuti), course: Business in the EU, 12 entries in the bibliography, language: English, abstract: This course work deals with the energy sector of France and the United Kingdom, in context of the European Union. The first part concentrates on the analysis of the countries energy sector and their comparison. In the second part this analysis is brought

into perspective within the European Union. As for the sources of information and their validity and quality, we used primarily the youngest publications of the European Union, since this data is compared with others the most accurate and up to date. But we also took other international sources into consideration, newspapers as well as official energy sources.

**Information Sources in Law** J.R. Winterton 2012-06-21 The aim of each volume of this series *Guides to Information Sources* is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information. The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it. The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources.

**HM Customs Excise Overseas Trade Statistics: UK Trade with the European Community and the World**

*The European Communities* 1974

**The Institutional Framework of the European Communities** J. S. Davidson 2005-07-15 After more than a decade of British membership of the European Community, there is still a widespread lack of appreciation of what goes on within the Community institutions, and of its significance for UK political and legal processes. This book aims to provide a concise introduction to the institutions and law-making processes of the Community, and to set them in their proper perspective as part of UK public law. The prime focus is upon the Community institutions and their inter-relations, however, reference is also made as appropriate to the effects which Community decision-making has on Westminster and Whitehall and in the English courts. In particular, the book examines the sources of Community law, the organisation and composition of the main institutions after the accession of Portugal and Spain, and the decision-making processes involved in the enactment of the Community's legislation. There are also chapters on the budgetary process and on the role of the European Court of Justice. Despite the UK emphasis some comparative material is used to put the UK approach into perspective. To enhance its value to readers coming to the subject for the first time, the book also contains the text of selected articles of the Treaty of Rome.
