**The Fall of Eagles** Cyrus Leo Sulzberger 1977 Europe, 1848: three imperial dynasties rule over territories stretching from Germany south to the Adriatic Sea and east to the Bering Strait on the Pacific Coast. The Houses of Habsburg, Hohenzollern, and Romanov rule over lands more vast than the British Empire at its greatest extent. In their struggle for continental domination and for eternal guarantees for their rule by divine right, they nurture the weeds of reaction that are destined to choke European democracy and become part of the conflagration of 1914. World-renowned diplomatic correspondent and historian C.L. Sulzberger traces the rise and fall of the three dynasties from their emergence as feudal princelings to their coronation as absolute imperial lords, wielding vain, often foolish, often cruel, reactionary sovereignty over a degraded peasant population. - Jacket flap.

*Taranto 1940* Angus Konstam 2015-11-20 The Royal Navy's attack on Taranto in 1940 heralded a new age of warfare. It was the decisive moment in a struggle for dominance of the Mediterranean that had gone on for months, as the British and Italian navies both looked to

secure maritime supply routes for their colonies. With the enormous demands of a global war beginning to tell, the British capital ships were simply too thinly spread for a large fleet action against Taranto, where the bulk of the Italian fleet lay menacingly. How was the Royal Navy to eliminate the threat of the Regia Marina? This is the story of one of World War II's most devastating raids, recounting how a handful of obsolete Fairey Swordfish biplanes swooped in and destroyed an Italian battleship and badly damaged two more. With expert analysis, detailed colour illustrations and a gripping narrative, this book explains the origins of the attack, its planning and execution, and what happened in the aftermath.

The essays in this collection contain some important examples of Russian cultural semiotics and remain indispensable contributions to the history of Russian civilization.

In the Shadows of the American Century Alfred W. McCoy 2017-09-12 The award-winning historian delivers a "brilliant and deeply informed" analysis of American power from the Spanish-American War to the Trump Administration (New York Journal of Books). In this sweeping and incisive history of US foreign relations, historian Alfred McCoy explores America's rise as a world power from the 1890s through the Cold War, and its bid to extend its hegemony deep into the twenty-first century. Since American dominance reached its apex at the close of the Cold War, the nation has met new challenges that it is increasingly unequipped to handle. From the disastrous invasion of Iraq to the failure of the Trans-Pacific Partnership, fracturing military alliances, and the blundering nationalism of Donald Trump, McCoy traces US decline in the face of rising powers such as China. He also offers a critique of America's attempt to maintain its position through cyberwar, covert intervention, client elites, psychological torture, and worldwide surveillance.
