**Clarke's Universe** Arthur C. Clarke 2010-04-21  
The classic Clarke tales *The Lion of Comarre* and *A Fall of Moondust*, together for the first time! *A Fall of Moondust*: Time is running out for the passengers and crew of the tourist-cruiser *Selene*, incarcerated in a sea of choking lunar dust. On the surface, her rescuers find their resources stretched to the limit by the pitiless and unpredictable conditions of a totally alien environment. *The Lion of Comarre*: In the far-flung future, one city of extraordinary means was built on Earth, *Comarre*, and it is rumored to still exist. None but a few know of its location and they hold it secret afraid the knowledge would subvert society. A young man with great prospects and no worries in the world gives them all up to hunt for the fabled city, and what he finds is something mankind has only dreamed of. Sir Arthur C. Clarke is science fiction's most famous prognosticator of future technologies and one of the most prolific authors of the modern age in almost any genre. His works, including the seminal *2001: A Space Odyssey*, have inspired modern advances and an entire generation of writers, scientists, and astronauts. *Moondust and Madness* Janelle Taylor

This book works around big data visualizations and the challenges around visualizing big data and address characteristic challenges of visualizing like speed in accessing, understanding/adding context to, improving the quality of the data, displaying results, outliers, and so on. We focus on the most popular libraries to execute the tasks of big data visualization and explore "big data oriented" tools such as Hadoop and Tableau. We will show you how data changes with different variables and for different use cases with step-through topics such as: importing data to something like Hadoop, basic analytics. The choice of visualizations depends on the most suited techniques for big data, and we will show you the various options for big data visualizations based upon industry-proven techniques. You will then learn how to integrate popular visualization tools with graphing databases to see how huge amounts of certain data. Finally, you will find out how to display the integration of visual big data with BI using Cognos BI. Style and approach  
 With the help of insightful real-world use cases, we'll tackle data in the world of big data. The scalability and hugeness of the data makes big data visualizations different from normal data visualizations, and this book addresses all the difficulties encountered by professionals while visualizing their big data.

**The Deep Range** Arthur C. Clarke 2012-11-30  
 A man discovers the planet's destiny in the ocean's depths in this near-future novel by one of the twentieth century's greatest science fiction authors. In the very near future, humanity has fully harnessed the sea's immense potential, employing advanced sonar technology to control and harvest untold resources for human consumption. It is a world where gigantic whale herds are tended by submariners and vast plankton farms stave off the threat of hunger. Former space engineer Walter Franklin has been assigned to a submarine patrol. Initially indifferent to his new station, if not bored by his daily routines, Walter soon becomes fascinated by the sea's mysteries. The more his explorations deepen, the more he comes to understand man's true place in nature—and the unique role he will soon play in humanity's future. A lasting testament to Arthur C. Clarke's prescient and powerful imagination, *The Deep Range* is a classic work of science fiction that remains deeply relevant to our times.

**Rendezvous With Rama** Arthur Charles Clarke 1990  
 During the twenty-second century, a space probe's investigation of a mysterious, cylindrical asteroid brings man into contact with an extragalactic civilization

**Childhood's End** Arthur C. Clarke 2012-11-30  
 In the Retro Hugo Award-nominated novel that inspired the Syfy miniseries, alien invaders bring peace to Earth—at a grave price: "A first-rate tour de force" (The New York Times). In the near future, enormous silver spaceships appear without warning over mankind's largest cities. They belong to the Overlords, an alien race far superior to humanity in technological development. Their purpose is to dominate Earth. Their demands, however, are surprisingly benevolent: end war, poverty, and cruelty. Their presence, rather than signaling the end of humanity, ushers in a golden age . . . or so it seems. Without conflict, human culture and progress stagnate. As the years pass, it becomes clear that the Overlords have a hidden agenda for the evolution of the human race that may not be as benevolent as it seems. "Frighteningly logical, believable, and grimly prophetic . . .

Clarke is a master.” —Los Angeles Times

**Moondust** Thomas Burnett Swann 2014-06-05  
Thomas Burnett Swann won a special place in the world of fantasy and science fiction for his marvelous evocations of forgotten ages and lost peoples. For he has taken the infinite range of the past for his province, and, bringing to it the learning of a scholar and the talent of a poet, he wove wonders. In MOONDUST, he takes as his setting the city of Jericho under the siege; yet it is not a Biblical story nor a tale of warfare, but rather a marvelous science-fiction novel about a non-human intelligent species hidden from the world's eye, a mesmerizing narrative about their human and humanoid subjects, wrapped in the wizardry of a science older than humanity.

**A Fall of Moondust** Arthur Charles Clarke  
1961 A story of the future, about a specially designed air vessel that sinks with its human cargo into a sea of dust in one of the craters of the moon.

**Lifelode** Jo Walton 2020-03-26 Lifelode is the Mythopoeic Award Winning novel from Hugo, Nebula and World Fantasy Award winning author Jo Walton. It was published in hardcover in 2009 by NESFA Press and is now available for

the first time as an ebook. At its heart, Lifelode is the story of a comfortable manor house family. The four adults of the household are happily polygamous, each fulfilling their 'lifelode' or life's purpose: Ferrand is the lord of the manor, his sweetmate Taveth runs the household, his wife Chayra makes ceramics, and Taveth's husband Ranal works the farm. Their children are a joyful bunch, running around in the sunshine days of the harvest and wondering what their own lifelodes will be. Their lives changed with the arrival of two visitors to Applekirk: Jankin the scholar and Hanethe, Ferrand's great grandmother and the former lord of the manor, who has been living for many generations in the East, a place where the gods walk and yeya (magic) is so powerful that those who wield it are not quite human.

**Planetfall** Emma Newman 2017-12-28 From Emma Newman, the award-nominated author of *Between Two Thorns*, comes a novel of how one secret withheld to protect humanity's future might be its undoing... Renata Ghali believed in Lee Suh-Mi's vision of a world far beyond Earth, calling to humanity. A planet promising to reveal the truth about our place in the cosmos, untainted by overpopulation, pollution, and war. Ren believed in that vision enough to give up everything to follow Suh-Mi into the unknown. More than twenty-two years have passed since Ren and the rest of the faithful braved the starry abyss and established a colony at the base of an enigmatic alien structure where Suh-Mi has since resided, alone. All that time, Ren has worked hard as the colony's 3-D printer engineer, creating the tools necessary for human survival in an alien environment, and harboring a devastating secret. Ren continues to perpetuate the lie forming the foundation of the colony for the good of her fellow colonists, despite the personal cost. Then a stranger appears, far too young to have been part of the first planetfall, a man who bears a remarkable resemblance to Suh-Mi. The truth Ren has concealed since planetfall can no longer be hidden. And its revelation might tear the colony apart...

**Glide Path** Arthur C. Clarke 2012-11-30 A gripping novel of human ingenuity during World War II, based on the visionary author's own wartime experiences as a radar control operator.

One of the most influential science fiction writers of the twentieth century, Arthur C. Clarke has consistently anticipated the actual achievements of science and technology. In *Glide Path*, he turns back the clock to tell a thrilling story about the groundbreaking exploration of radar during WWII. Clarke's only non-science fiction novel shines with the same qualities that made his award-winning space adventures timeless classics: topnotch suspense, fascinating science, and memorable characters. A hidden gem in Clarke's impressive body of work, *Glide Path* is an enthralling read for both science fiction fans and history aficionados.

*Earthlight* Arthur C. Clarke 2012-11-30 This "marvelous lunar espionage thriller" by the science fiction grandmaster and author of 2001: A Space Odyssey "packs plenty of punch" (SFReviews.net). Two hundred years after landing on the Moon, mankind has moved further out into the solar system. With permanent settlements now established on the Moon, Venus, and Mars, the inhabitants of these colonies have formed a political alliance called the Federation. On the Moon, a government agent from Earth is tracking a suspected spy at a prominent observatory. His mission is complicated by the rise in tensions between Earth's government and the Federation over access to rare heavy metals. As the agent finds himself locked in a battle for life and death on the eerie, lunar landscape, the larger conflict explodes across space, leaving mankind's future in doubt. First published in 1955, this suspense-filled space opera by the Science Fiction and Fantasy Hall of Fame inductee was a significant forerunner of television hits like *Star Trek* and *The Expanse*.

*The Martian* Andy Weir 2014-02-11 Nominated as one of America's best-loved novels by PBS's The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive—and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death.

The damaged machinery, unforgiving environment, or plain-old "human error" are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

*Falling to Earth* Al Worden 2011-07-26 As command module pilot for the Apollo 15 mission to the moon in 1971, Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted. He spent six days orbiting the moon, including three days completely alone, the most isolated human in existence. During the return from the moon to earth he also conducted the first spacewalk in deep space, becoming the first human ever to see both the entire earth and moon simply by turning his head. The Apollo 15 flight capped an already-impressive career as an astronaut, including important work on the pioneering Apollo 9 and Apollo 12 missions, as well as the perilous flight of Apollo 13. Nine months after his return from the moon, Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week. He refused to leave. What happened in those nine months, from being honored with parades and meetings with world leaders to being unceremoniously fired, has been a source of much speculation for four decades. Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career. Readers will learn them here for the first time, along with the exhilarating account of what it is like to journey to the moon and back. It's an unprecedentedly candid account of what it was like to be an Apollo astronaut, with all its glory but also its pitfalls.

**The Trigger** Arthur C. Clarke 2012-11-30 A "thought-provoking, suspenseful" political sci-fi thriller from the authors of 2001: A Space Odyssey and *Star Wars: The Black Fleet Crisis* (Library Journal). In the near future, a team of scientists who intend to create an anti-gravity device inadvertently develop something far more powerful—a mechanism that can render guns and bombs virtually harmless. Their creation, "The Trigger," causes nitrate-based bombs and

explosives to detonate automatically. The idealistic scientists who envision the benevolent use of their great invention soon discover that even protective weaponry comes with its own moral trade-offs. Soon, every faction of the gun industry is involved—politicians, manufacturers, lobbyist, military—and the scientists must fight to keep the weapon out of violent hands. While negotiating this tricky territory, they realize that not even those with the best intentions can be trusted. There are no easy answers in this thriller that “lend[s] the familiar issue of gun control new urgency and excitement” (Publishers Weekly).

*The Nine Billion Names of God* Arthur Charles Clarke 1987 A selection of what he considers to be his best short stories is presented by this leading science fiction writer

Moondust Andrew Smith 2006-04-04 In 1999, Andrew Smith was interviewing Charlie Duke, astronaut and moon walker, for the Sunday Times. During the course of the interview, which took place at Duke's Texan home, the telephone rang and Charlie left the room to answer it. When he returned, some twenty minutes later, he seemed visibly upset. It seemed that he'd just heard that, the previous day, one of his fellow moon walkers, the astronaut Pete Conrad, had died. The more Charlie spoke the more Andrew realised that his grief was something more than the mere fact of losing a friend. 'Now theres only nine of us,' he said. Only nine. Which meant that, one day not long from now, there would be none, and when that day came, no one on earth would have known the giddy thrill of gazing back at us from the surface of the moon. The thought shocked Andrew, and still does. Moondust is his attempt to understand why. The Apollo moon programme has been called the last optimistic act of the 20th Century. Over a strange three year period between 1969 and 1972, twelve men made the longest and most eccentric of all journeys, and all were indelibly marked by it. In Moondust Andrew sets out to interview all the remaining astronauts who walked on the moon, and to find out how their lives were changed for ever by what had happened. 'Where do you go after you've been to the moon?' In addition to this question that would prove hugely troubling to many of the returned astronauts, they also had to deal with the fantasies of faceless millions

at their backs, for this was the first truly global media event. The walkers would forever be caught between the gravitational pull of the moon and the earth's collective dreaming. *Lest Darkness Fall* Lyon Sprague De Camp 1949 "Martin Padway was a smart enough young man, with a scientific education, but no universal genius. He had the misfortune to be dropped back suddenly into a former time, and a very alarming time at that -- sixth-century Rome, when the Goths ruled Italy and civilization in the West was collapsing. To make a living, and to try to shore up civilization, Padway undertook to introduce inventions ... . Some worked and some didn't ..."--Jacket, back inside flap.

*Moondust* Gemma Fowler 2017-03-02

**Half a Crown** Jo Walton 2010-04-01 In 1941 the European war ended in the Farthing Peace, a rapprochement between Britain and Nazi Germany. The balls and banquets of Britain's upper class never faltered, while British ships ferried "undesirables" across the Channel to board the cattle cars headed east. Peter Carmichael is commander of the Watch, Britain's distinctly British secret police. It's his job to warn the Prime Minister of treason, to arrest plotters, and to discover Jews. The midnight knock of a Watchman is the most dreaded sound in the realm. Now, in 1960, a global peace conference is convening in London, where Britain, Germany, and Japan will oversee the final partition of the world. Hitler is once again on British soil. So is the long exiled Duke of Windsor—and the rising gangs of "British Power" streetfighters, who consider the Government "soft," may be the former king's bid to stage a coup d'état. Amidst all this, two of the most unlikely persons in the realm will join forces to oppose the fascists: a debutante whose greatest worry until now has been where to find the right string of pearls, and the Watch Commander himself. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*The Mark and the Void* Paul Murray 2015-10-20 What links the Investment Bank of Torabundo, [www.myhotswaitress.com](http://www.myhotswaitress.com) (yes, with an s, don't ask), an art heist, a novel called For the Love of a Clown, a six-year-old boy with the unfortunate name of Remington Steele, a lonely French

banker, a tiny Pacific island, and a pest control business run by an ex-KGB agent? The Mark and the Void is Paul Murray's madcap new novel of institutional folly, following the success of his wildly original breakout hit, *Skippy Dies*. While marooned at his banking job in the bewilderingly damp and insular realm known as Ireland, Claude Martingale is approached by a down-on-his-luck author, Paul, looking for his next great subject. Claude finds that his life gets steadily more exciting under Paul's fictionalizing influence; he even falls in love with a beautiful waitress. But Paul's plan is not what it seems—and neither is Claude's employer, the Investment Bank of Torabundo, which swells through dodgy takeovers and derivatives trading until—well, you can probably guess how that shakes out. *The Mark and the Void* is the funniest novel ever written about the recent financial crisis, and a stirring examination of the deceptions carried out in the names of art and commerce.

*Totally Wired* Andrew Smith 2019-03-12 "The Social Network meets Hammer of the Gods" in this story of a 1990s web titan who made a fortune and lost it all—and what happened afterward (*The Independent*). One day in February 2001, Josh Harris woke to certain knowledge that he was about to lose everything. The man *Time* magazine called "The Warhol of the Web" was reduced to a helpless spectator as his fortune dwindled from 85 million dollars to nothing, all in the space of a week. Harris had been a maverick genius preternaturally adapted to the new online world. He founded New York's first dotcom, Pseudo.com, and paved the way for a cadre of twentysomethings to follow, riding a wave of tech euphoria to unimagined wealth and fame for five years—before the great dotcom crash, in which Web 1.0 was wiped from the face of the earth. Long before then, though, Harris's view of the web had darkened, and he began a series of lurid social experiments aimed at illustrating his worst fear: that the internet would soon alter the very fabric of society—cognitive, social, political, and

otherwise. In *Totally Wired*, journalist Andrew Smith seeks to unravel the opaque and mysterious episodes of the early dotcom craze, in which the seeds of our current reality were sown. Drawing on in-depth interviews with Harris and those who worked alongside him in downtown Manhattan's "Silicon Alley," the tale moves from a compound in Ethiopia through New York, San Francisco, Las Vegas, London, and Salt Lake City, Utah; from the dawn of the web to the present, taking in the rise of alternative facts, troll society, and the unexpected origins of the net itself, as our world has grown uncannily to resemble the one Harris predicted—and urged us to evade. "Raucous, whimsical, sad and very funny...a fascinating account of what could have been, what briefly was, what almost lasted." —*The Wall Street Journal* "Told with verve and style...A valuable history." —*Kirkus Reviews* "A brilliant exploration of madness and genius in the early days of the web." —*The Guardian* "Dark and compelling." —*Daily Mail* "This is a book whose time has come." —*Sunday Times*
