The American Journal of Sociology Albion W. Small 1914 Established in 1895 as the first U.S. scholarly journal in its field, AJS remains a leading voice for analysis and research in the social sciences, presenting work on the theory, methods, practice, and history of sociology. AJS also seeks the application of perspectives from other social sciences and publishes papers by psychologists, anthropologists, statisticians, economists, educators, historians, and political scientists.

The Roth Family, Anthropology, and Colonial Administration Russell McDougall 2016-06-03

No family better represents the overlapping roles of administrator and scientist in the British empire than the Roths. Descended from a Hungarian emigrant to Australia, two generations of Roths served the empire on four continents and, at the same time, produced ethnographic, archaeological, and linguistic studies that form the basis for much modern research. This volume assesses the often-conflicting roles and contributions of the Roths as government servants and anthropologists. Most of the volume deals with Walter E. Roth, who developed foundational studies of both the Australian Aborigines—considered to be among the first systematic ethnographies anywhere—and South American tribes while serving as Chief Protector of Aborigines in Queensland and later medical officer,

magistrate, museum curator and indigenous relations officer in British Guyana. Henry Ling Roth's contributions to the anthropology of Tasmania, Benin, Sarawak, and New Zealand are also enumerated, as are the publications and administrative activities of the succeeding generation of Roths. This volume serves the reader as a family biography, a slice of the English colonial history, and an important introduction to the history of anthropology.

Going the Whiteman's Way David McKnight 2004
Modern anthropologists, unlike their classical predecessors, have observed Australian Aborigines in the field, rather than from the

study. None, however, has spent as long as David McKnight in a single community. During a period of 35 years, involving some 20 fieldtrips, he has lived with the Mornington Islanders of northern Queensland for over five years. This intellectual tour de force combines dense ethnography about Australian kinship and marriage - the heart of their world - with major anthropological debate about theories of kinship. It thereby provides a unique and important contribution to kinship studies. McKnight shows how young Aborigines became increasingly determined to marry according to their own inclinations, defying the authority of the elders, who accused them of 'going the Whiteman's Way'.

Aboriginal Family and the State Sally Babidge 2016-03-23
Aboriginal Family and the State examines the contemporary relations and history of Indigenous families in Australia,

specifically referencing issues of government control and recent official recognition of Aboriginal 'traditional owners'. Drawing on detailed empirical research, it develops a discussion of the anthropological issues of kinship and relatedness within colonial and 'postcolonial' contexts. This volume explores the conditions affecting the formation of 'family' among indigenous people in rural northern Australia, as well as the contingencies of 'family' in the legal and political context of contemporary indigenous claims to land. With a rich discussion of the production, practice and inscription of social relations, this volume examines everyday expressions of 'family', and events such as meetings and funerals, demonstrating that kinship is formed and reformed through a complicated social practice of competing demands on identity.

Arguments about Aborigines L. R. Hiatt 1996-06-27 In the debates which followed the publication of Darwin's book on the origin of species, Australian Aborigines were used as the ideal exemplars of early human forms by European scholars bent on discovering the origins of social institutions. The Aborigines have consequently featured as the crucial case-study for generations of social theorists, including Tylor, Frazer, Durkheim and Freud. *Arguments about Aborigines* reviews a range of controversies such as family life, religion and ritual, and land rights, which marked the formative period of British social anthropology.

Professor Hiatt also examines how changes in Aboriginal practices have affected scholarly debate. This elegant 1996 book will provide a valuable introduction to aboriginal ethnography for students, scholars and the general reader. It is also a shrewd and stimulating history of the great debates of anthropology, seen through the prism of Aboriginal studies.

Strengths of Australian Aboriginal Cultural Practices in Family Life and Child Rearing

Shaun Lohoar 2014 This paper explores some of the characteristics of traditional Aboriginal and Torres Strait Islander cultural practices that contribute to effective family functioning, and how these practices can have positive effects on

children and communities. The approach is to gather the views of Aboriginal families and compare these perspectives with supporting evidence drawn from the literature. The findings suggest that, provided the necessary social conditions are in place, culture can be a protective force for children, families and communities. [p.1]

Dark Emu Bruce Pascoe 2015-10-01 Dark Emu puts forward an argument for a reconsideration of the hunter-gatherer tag for pre-colonial Aboriginal Australians. The evidence insists that Aboriginal people right across the continent were using domesticated plants, sowing,

harvesting, irrigating and storing - behaviors inconsistent with the hunter-gatherer tag. Gerritsen and Gammage in their latest books support this premise but Pascoe takes this further and challenges the hunter-gatherer tag as a convenient lie. Almost all the evidence comes from the records and diaries of the Australian explorers, impeccable sources. The Passing of the Aborigines: A Lifetime Spent Among the Natives of Australia Daisy Bates 2010-01-08 Bates devoted more than 35 years of her life to studying Aboriginal life, history, culture, rites, beliefs and customs. Living in a tent in small settlements from Western Australia to the edges of the Nullarbor Plain. She researched and wrote millions of words on the subject. She also worked tirelessly for Aboriginal welfare, setting up camps to feed, clothe and nurse the transient population, drawing on her own income and inheritance to meet the needs of the aged. In spite of her fascination with their way of life, Bates was convinced that the

Australian Aborigines were a dying race and that her mission was to record as much as she could about them before they disappeared. Her personal life was unconventional. She was said to have worn pistols even in her old age and to have been quite prepared to use them to threaten police when she caught them mistreating 'her' Aborigines. She was also famed for her strict lifelong adherence to Edwardian fashion, including boots, gloves and a veil. Growing Up Aboriginal in Australia Anita Heiss 2018-04-16 Childhood stories of family, country and belonging What is it like to grow up Aboriginal in Australia? This anthology, compiled by award-winning author Anita Heiss, showcases many diverse voices, experiences and stories in order to answer that question. Accounts from well-known authors and high-profile identities sit alongside those from newly discovered writers of all ages. All of the contributors speak from the heart - sometimes calling for empathy, oftentimes challenging

stereotypes, always demanding respect. This groundbreaking collection will enlighten, inspire and educate about the lives of Aboriginal people in Australia today. Contributors include: Tony Birch, Deborah Cheetham, Adam Goodes, Terri Janke, Patrick Johnson, Ambelin Kwaymullina, Jack Latimore, Celeste Liddle, Amy McQuire, Kerry Reed-Gilbert, Miranda Tapsell, Jared Thomas, Aileen Walsh, Alexis West, Tara June Winch, and many, many more. The Lost Children Coral Edwards 1989 'I just remember coming home from school and Mum was at the door, and there was this car on the road outside. There was this white woman standing there and I can hear Mum saying, "Can't you give me time to get the kids ready?" And she said "No, they've got to go now"... We were whisked away really quickly and there was only Mum there. We were never told why we were taken.' JEAN CARTER
In Australia today there may be 100 000 people of Aboriginal descent who do not know their families or communities. They are the 'stolen generations'-- people who grew up in institutions or in white families, knowing nothing of their Aboriginal history or culture. THE LOST CHILDREN is a

powerful and disturbing oral history in which thirteen people describe their early memories of being removed from their parents, of institutions and foster families. In compelling first-hand accounts we learn of their agonising search for their families, their feelings before the first reunion, the problems of trying to love and become part of two families and of their struggle to recapture their Aboriginality. Coral Edwards is the founding co-ordinator of Link-Up (NSW) in Canberra, an organisation which has helped reunite the people feature in THE LOST CHILDREN with their natural families. Coral met her family for the first time when she was 30 years of age, having been removed from them as a baby. Peter Read is a Research Fellow at the Australian National University in Canberra, a former Link-Up worker and the author of DOWN THERE WITH ME ON THE COWRA MISSION and A HUNDRED YEARS OF WAR. 'We have to find a way of living together in this country, and that will only come when our hearts, minds and

wills are set towards reconciliation... For those with time to read and patience to listen, I commend this book.' SALLY MORGAN 'At long last the historians of Australia are beginning to look at Australian history through the eyes of the Aborigines... Coral Edwards and Peter Read have collected the stories of the victims in one of the many tragic moments in our history since 1788. This story is a message for our times.' MANNING CLARK

The Aborigines Charles River Charles River Editors 2018-10-03 *Includes pictures *Includes a bibliography and online resources for further reading "It is quite time that our children were taught a little more about their country, for shame's sake." - Henry Lawson, Australian poet A land of almost 3 million square miles has lain since time immemorial on the southern flank of the planet, so isolated that it remained almost entirely outside of European knowledge until 1770. From there, however, the subjugation of Australia would take place rapidly. Within 20 years of the first British settlements being established, the British presence in Terra Australis was secure, and no other major power was likely to mount a challenge. In 1815, Napoleon would be defeated at Waterloo, and soon afterwards would be standing on the barren cliffs of Saint Helena, staring across the limitless Atlantic. The French, without a fleet,

were out of the picture, the Germans were yet to establish a unified state, let alone an overseas empire of any significance, and the Dutch were no longer counted among the top tier of European powers. Australia lay at an enormous distance from London, and its administration was barely supervised. Thus, its development was slow in the beginning, and its function remained narrowly defined, but as the 19th century progressed and peace took hold over Europe, things began to change. Immigration was steady, and the small spores of European habitation on the continent steadily grew. At the same time, the Royal Navy found itself with enormous resources of men and ships at a time when there was no war to fight. British sailors were thus employed for survey and exploration work, and the great expanses of Australia attracted particular interest. It was an exciting time, and an exciting age - the world was slowly coming under European sway, and Britain was rapidly emerging as its leader. That said, the

19th century certainly wasn't exciting for the people who already lived in Australia. The history of the indigenous inhabitants of Australia, known in contemporary anthropology as the "Aboriginal and Torres Strait Islander people of Australia," is a complex and continually evolving field of study, and it has been colored by politics. For generations after the arrival of whites in Australia, the Aboriginal people were disregarded and marginalized, largely because they offered little in the way of a labor resource, and they occupied land required for European settlement. At the same time, it is a misconception that indigenous Australians meekly accepted the invasion of their country by the British, for they did not. They certainly resisted, but as far as colonial wars during that era went, the frontier conflicts of Australia did not warrant a great deal of attention. Indigenous Australians were hardly a warlike people, and without central organization, or political cohesion beyond scattered family groups, they

succumbed to the orchestrated advance of white settlement with passionate, but futile resistance. In many instances, aggressive clashes between the two groups simply gave the white colonists reasonable cause to inflict a style of genocide on the Aborigines that stood in the way of progress. In any case, their fate had largely been sealed by the first European sneeze in the Terra Australis, which preceded the importation of the two signature mediums of social destruction. The first was a collection of alien diseases, chief among smallpox, but also cholera, influenza, measles, tuberculosis, syphilis and the common cold. The second was alcohol. Smallpox alone killed more than 50% of the aboriginal population, and once the fabric of indigenous society had crumbled, alcohol provided emotional relief, but relegated huge numbers of Aborigines to the margins of a robust and emerging colonial society.

Aboriginal Children, History and Health John Boulton 2016-04-28 This volume traces the

complex reasons behind the disturbing discrepancy between the health and well-being of children in mainstream Australia and those in remote Indigenous communities. Invaluably informed by Boulton's close working knowledge of Aboriginal communities, the book addresses growth faltering as a crisis of Aboriginal parenting and a continued problem for the Australian nation. The high rate and root causes of ill-health amongst Aboriginal children are explored through a unique synthesis of historical, anthropological, biological and medical analyses. Through this fresh approach, which includes the insights of specialists from a range of disciplines, *Aboriginal Children, History and Health* provides a thoughtful and innovative framework for considering Indigenous health.

Fighters and Singers Isobel White 2020-07-31

The literature on Australian Aborigines is vast, but much of it is strangely silent about the experiences and activities of women. This collection of stories of the eventful lives and strong characters of a number of Aboriginal women offers a more intimate and personal view. Their lives span a century of history in fifteen communities scattered from Cape York Peninsula, Arnhem Land and East Kimberley to the Western Desert, the Centre, South Australia,

Victoria and New South Wales. One of these stories is an autobiography and each of the others contains transcriptions or translations of a woman's own reminiscences, with additional details given by the author. Some women recall the first time they saw a European in their land, others tell how Europeans had influenced their communities generations before they were born. While the authors lived in Aboriginal communities in order to study some particular aspect of the society, the women they describe here became their close friends, companions and helpers, and this book is a record of friendships formed against differences of background, experiences and age. Allegiance to family and familiar territory shapes the personal histories of Aborigines in ways scarcely appreciated by people reared in nuclear family households in cities. The strength of family and community ties can be better understood through reading about the women who contribute so much to the maintenance of these communities.

The Family Among the Australian Aborigines Bronislaw Malinowski 2015-06-15
Excerpt from *The Family Among the Australian Aborigines: A Sociological Study* The importance of the subject treated in this study, as well as the prominent part played by the Australian evidence in the problem of kinship, will, it is believed, amply justify a detailed inquiry into the institution of the family in Australia. It is, however, always desirable for a monograph like the present one, besides being a mere collection and description of facts, to have a sufficiently wide theoretical scope. It ought to demonstrate some general principle upon the particular example treated, and to approach the problem from a new standpoint. I wish here shortly to indicate how far a slight and imperfect attempt in this direction has been made. In describing the facts of family life in Australia I have tried to show that even if the problems of origins and development of an institution be put aside and the inquiry be limited to the actual facts (in this

case to the actual working of the aboriginal kinship organization), there are plenty of subjects of great theoretical importance, some of which, as yet not fully considered by sociologists. On the other hand, I have tried to show that in dealing with purely sociological problems it is necessary, in order to do justice to the complexity and fulness of social phenomena, to draw into the field of inquiry a series of facts often hitherto partially or completely neglected. The Passing of the Aborigines Daisy Bates 2022-08-28 Daisy May Bates, CBE (born Margaret Dwyer; 16 October 1859 - 18 April 1951) was an Irish-Australian journalist, welfare worker and lifelong student of Australian Aboriginal culture and society. She was known among the native people as "Kabbarli" (a kin term found in a number of Australian languages which means "grandmother" or "granddaughter"). Daisy Bates conducted fieldwork amongst several Indigenous nations in western and southern Australia. She supported herself largely by writing articles for urban newspapers on such topics as 'native cannibalism' and the 'doomed' fate of Indigenous peoples. Bates also published her work on Indigenous kinship systems, marriage laws, language and religion in books and articles. She

was appointed a Commander of the Order of the British Empire (CBE) for Aboriginal welfare work in 1934. (wikipedia.org)
