The Family Nurse, Or, Companion of the Frugal Housewife L.M.F. Child

American Nursing Patricia D'Antonio 2010-07-11 First Place, History and Public Policy, 2010 American Journal of Nursing Book of the Year Awards This new interpretation of the history of nursing in the United States captures the many ways women reframed the most traditional of all gender expectations—that of caring for the sick—to create new possibilities for themselves, to renegotiate the terms of some of their life experiences, and to reshape their own sense of worth and power. For much of modern U.S. history, nursing was informal, often uncompensated, and almost wholly the province of female family and community members. This began to change at the end of the nineteenth century when the prospect of formal training opened for women doors that had been previously closed. Nurses became respected professionals, and becoming a formally trained nurse granted women a range of new social choices and opportunities that eventually translated into economic mobility and stability. Patricia D'Antonio looks closely at this history—using a new analytic framework and a rich trove of archival sources—and finds complex, multiple meanings in the individual choices of women who elected a nursing career. New relationships and social and professional options empowered nurses in constructing consequential lives, supporting their families, and participating both in their communities and in the health care system. Narrating the experiences of nurses, D'Antonio captures the possibilities, power, and problems inherent in the different ways women defined their work and lived their lives. Scholars in the history of medicine, nursing, and public policy, those interested in the intersections of identity, work, gender, education, and race, and nurses will find this a provocative book.

Family Nurse; Or, Companion of the Frugal Housewife 1837

*The Family Nurse* Child 2018-12-26 *The Family Nurse* is a great little work; a collection of various herbal and folk medicine alongside some simple (mostly health related) tips and tricks straight from the 1830s. Almost two centuries old, it is perhaps most notable how a few of the medical inclusions here are still accepted in some form today- leeches utilized for health purposes, etc. It is an early notable example of applause for deliberate exposure to cow-pox in order to prevent smallpox infection- a major contributor to human health in that era. While many of the cures and treatments here are strictly dated and should not be used, much of the lore is innocuous and herbal- the latter which comprises a fairly decent guide to the use of some common plants.

*The First Woman in the Republic* Carolyn L. Karcher 1994 This definitive biography restores to the public an eloquent writer and reformer who embodied the best of the American democratic heritage.

**The Family Nurse. 1837, by Lydia Maria Child** Lydia Maria Child 2016-05-03 Lydia Maria Francis Child (born Lydia Maria Francis) (February 11, 1802 - October 20, 1880), was an American abolitionist, women's rights activist, Native American rights activist, novelist, journalist, and opponent of American expansionism. Her journals, both fiction and domestic manuals reached wide audiences from the 1820s through the 1850s. At times she shocked her audience as she tried to take on issues of both male dominance and white supremacy in some of her stories. Despite these challenges, Child may be most remembered for her poem "Over the River and Through the Wood." Her grandparents' house, which she wrote about visiting, was restored by Tufts University in 1976 and stands near the Mystic River on South Street, in Medford, Massachusetts. She was born Lydia Maria Francis in Medford, Massachusetts, on February 11, 1802, to Susannah (nee Rand) and Convers Francis. Her older brother, Convers Francis, was educated at Harvard College and Seminary, and became a Unitarian minister. Child received her education at a local dame school and later at a women's seminary. Upon the death of her mother, she went to live with her older sister in Maine, where she studied to be a teacher. During this time, her brother Convers, by then a Unitarian minister, saw to his younger sister's education in literary masters such as Homer and Milton. Francis chanced to read an article in the *North American Review* discussing the field offered to the novelist by early New England history. Although she had never thought of becoming an author, she immediately wrote the first chapter of her novel *Hobomok*. Encouraged by her brother's commendation, she finished it in six weeks and had it published. From this time until her death, she wrote continually.[1] Francis taught for one year in a seminary in Medford, and in 1824 started a private school in Watertown, Massachusetts. In 1826, she founded the *Juvenile Miscellany*, the first monthly periodical for children published in the United States, and supervised its publication for eight years. In 1828, she married David Lee Child and moved to Boston"

**Healing the Republic** Joan Burbick 1994-08-26 In this study Joan Burbick interprets nineteenth-century narratives of health written by physicians, social reformers, lay healers, and literary artists in order to expose the conflicts underlying the creation of a national culture in America. These "fictions" of health include annual reports of mental asylums, home physician manuals, social reform books, and novels consumed by the middle class that functioned as cautionary tales of well-being. Read together these writings engage in a counterpoint of voices at once constructing and debating the hegemonic values of the emerging American nation. That political values flow from the daily exigencies of survival and enjoyment is one of the claims advanced by theorists of cultural hegemony. Broadening this assumption, the narratives of health presented here address the demands and desires of everyday life and construct a national discourse with directives on control, authority, and subordination. They articulate the wish for a healthy citizenry, freed of pain and saturated with well-being, and they insist upon specific ideologies and knowledges of the body in order to achieve this radiance of health. Divided into two parts, the work first examines the structures of authority found in health narratives and then studies the topology of the body found in a cross section of writings. The first part examines how the authority of "common sense" is pitted against that of physiological law and its transcendent "constitution" for the body. The second analyzes how specific knowledges about the brain, heart, nerves, and eye provide individual "keys" to health, indices that reveal the conflicts inherent in American nationalism. In studying these narratives of health, *Healing the Republic* confronts what Burbick sees as a certain fundamental uneasiness about democracy in America. Fearing the political freedom they hoped to embrace, Americans designed ways to control the body in the effort to create, impose, or encompass social order in a corporeal politics whose influences are felt to this day.

**Colonial Chesapeake** Debra Meyers 2006-04-07 *Colonial Chesapeake: New Perspectives* examines the Chesapeake region from historical, sociological, anthropological, archaeological, and literary perspectives. The anthology uses these perspectives to represent the multitude of experiences in the region and in doing so captures the essence of race, class, and ethnic and gender diversity that made up life in early Chesapeake Maryland and Virginia.

**A Social History of Wet Nursing in America** Janet Golden 2001 From the colonial period through to the 20th century, this text examines the intersection of medical science, social theory and cultural practices as they shaped relations among wet nurses, physicians and families. It explores how Americans used wet nursing to solve infant feeding problems, shows why wet nursing became controversial as motherhood slowly became medicalized, and elaborates how the development of scientific infant feeding eliminated wet nursing by the beginning of the 20th century. Janet Golden's study contributes to our understanding of the cultural authority of medical science, the role of physicians in shaping child rearing practices, the social construction of motherhood, and the profound dilemmas of class and culture that played out in the private space of the nursery.

**Mothers and Daughters in Nineteenth-Century America** Nancy M. Theriot 2021-05-11 The feminine script of early nineteenth century centered on women's role as patient, long-suffering mothers. By mid-century, however, their daughters faced a world very different in social and economic options and in the physical experiences surrounding their bodies. In this groundbreaking study, Nancy Theriot turns to social and medical history, developmental psychology, and feminist theory to explain the fundamental shift in women's concepts of femininity and gender identity during the course of the century—from an ideal suffering womanhood to emphasis on female control of physical self. Theriot's first chapter proposes a methodological shift that expands the interdisciplinary horizons of women's history. She argues that social psychological theories, recent work in literary criticism, and new philosophical work on subjectivities can provide helpful lenses for viewing mothers and children and for connecting socioeconomic change and ideological change. She recommends that women's historians take bolder steps to historicize the female body by making use of the theoretical insights of feminist philosophers, literary critics, and anthropologists. Within this methodological perspective, Theriot reads medical texts and woman-authored advice literature and autobiographies. She relates the early nineteenth-century notion of "true womanhood" to the socioeconomic and somatic realities of middle-class women's lives, particularly to their experience of the new male obstetrics. The generation of women born early in the century, in a close mother/daughter world, taught their daughters the feminine script by word and action. Their daughters, however, the first generation to benefit greatly from professional medicine, had less reason than their mothers to associate

womanhood with pain and suffering. The new concept of femininity they created incorporated maternal teaching but altered it to make meaningful their own very different experience. This provocative study applies interdisciplinary methodology to new and long-standing questions in women's history and invites women's historians to explore alternative explanatory frameworks.
