The Last Lecture Randy Pausch 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. "We cannot change the cards we are dealt, just how we play the hand." —Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—"Really Achieving Your Childhood Dreams"—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have . . . and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture

such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

The Boston Girl Anita Diamant 2015-02-12 When Addie Baum's 22-year old granddaughter asks her about her childhood, Addie realises the moment has come to relive the full history that shaped her. Addie Baum was a Boston Girl, born in 1900 to immigrant Jewish parents who lived a very modest life. But Addie's intelligence and curiosity propelled her to a more modern path. Addie wanted to finish high school and to go to college. She wanted a career, to find true love. She wanted to escape the confines of her family. And she did. Told against the backdrop of World War I, and written with the same immense emotional impact that has made Diamant's previous novels bestsellers, *The Boston Girl* is a moving portrait of one woman's complicated life in the early 20th Century, and a window into the lives of all women seeking to understand the world around them.

Physician Communication Terry L. Schraeder 2019 Communication skills determine how the world perceives us - and how we perceive the world. Communication is at the heart of who we are and all that we do. As a clinician, your communication impacts how you take care of patients, work with colleagues, teach trainees, and engage audiences

and the public. Communication encompasses all aspects of human skills, from listening and clearly articulating thoughts to an awareness of physical gestures, specific word choice, tone, and volume. Whether engaging with patients, peers, care teams, family members, residents, researchers, insurance agencies, management, or journalists, successful communication requires focusing on the importance of the relationship and the mission of each interaction. Today, due to the rise of digital technologies including electronic medical records, online forums, and video conferences, the content of information, the platform, and the audience are continuously changing and expanding for physicians. There is a great need in the physician community to learn how to facilitate the exchange of information, provide psychosocial support, partake in shared-decision making, translate complex information, and resolve controversies with sound science in a variety of settings. Addressing physicians at every level of training and practice, *Physician Communication: Connecting with Patients, Peers, and the Public* will enable providers to examine, analyse, and improve their skills in the art and science of communication. Divided into four sections: Face-to-face Communications; Digital Communications; Public Speaking; and Traditional Media, this book will help physicians navigate various situations using different methods and modes of communication. **Drawing Futures** Bob Sheil 2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Long Way Down Jason Reynolds 2017-10-24 "An intense snapshot of the chain reaction caused by pulling a trigger." —Booklist (starred review) "Astonishing." —Kirkus Reviews (starred review) "A tour de force." —Publishers Weekly (starred review) A Newbery Honor Book A Coretta Scott King Honor Book A Printz Honor Book A Time Best YA Book of All Time (2021) A Los Angeles Times Book Prize Winner for Young Adult Literature Longlisted for the National Book Award for Young People's Literature Winner of the Walter Dean Myers Award An Edgar Award Winner for Best Young Adult Fiction Parents' Choice Gold Award Winner An Entertainment Weekly Best YA Book of 2017 A Vulture Best YA Book of 2017 A BuzzFeed Best YA Book of 2017 An ode to Put the Damn Guns Down, this is New York Times bestselling author Jason Reynolds's electrifying novel that takes place in sixty potent seconds—the time it takes a kid to decide whether or not he's going to murder the guy who killed his brother. A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That's what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun

before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, *Long Way Down* is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

Backable Suneel Gupta 2021-02-23 A groundbreaking book that boldly claims the key to success is not talent, connections, or ideas, but the ability to persuade people to take a chance on your potential. "The most exceptional people aren't just brilliant...they're backable." —Daniel Pink, #1 New York Times bestselling author of *When, Drive and To Sell is Human* No one makes it alone. But there's a reason some people can get investors or bosses to believe in them while others cannot. And that reason has little to do with experience, pedigree, or a polished business plan. *Backable* people seem to have a hidden quality that inspires others to take action. We often chalk this up to natural talent or charisma...either you have "it" or you don't. After getting rejected by every investor he pitched, Suneel Gupta had a burning question: Could "it" be learned? Drawing lessons from hundreds of the world's biggest thinkers, Gupta discovered how to pitch new ideas in a way that has raised millions of dollars, influenced large-scale change inside massive corporations, and even convinced his eight-year-old daughter to clean her room. Inside *Backable* are long-held secrets from producers of Oscar-winning films, members of Congress, military leaders, culinary stars, venture capitalists, founders of unicorn-status startups, and executives at iconic companies like Lego, Method, and Pixar. *Backable* reveals how the key to success is not charisma, connections, or even your résumé, but rather your ability to persuade others to take a chance on you. This original book will show you how.

The Craft of Scientific Presentations Michael Alley 2006-05-17 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

Amusing Ourselves to Death Neil Postman 2005-12-27 What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one."

—Jonathan Yardley, *The Washington Post Book World*
Slides for Students Gary D. Fisk 2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. *Slides for Students* does just that. *Slides for Students* is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, *Slides for Students* discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design

slides to best suit educational needs and engage with students to avoid the dreaded "death by powerpoint."

Do You Talk Funny? David Nihill 2016-03-08 Public speaking can be terrifying. For David Nihill, the idea of standing in front of an audience was scarier than cliff jumping into a thorny pit of spiders and mothers-in-law. Without a parachute or advanced weaponry. Something had to change. In what doesn't sound like the best plan ever, David decided to overcome his fears by pretending to be an accomplished comedian called "Irish Dave" for one full year, crashing as many comedy clubs, festivals, and shows as possible. One part of the plan was at least logical: he was already Irish and already called Dave. In one year, David went from being deathly afraid of public speaking to hosting a business conference, regularly performing stand-up comedy and winning storytelling competitions in front of packed houses. And he did it by learning from some of the best public speakers in the world: stand-up comedians. *Do You Talk Funny?: 7 Comedy Habits to Become a Better (and Funnier) Public Speaker* shows how the key principles of stand-up comedy can be applied to your speaking engagements and presentations to make you funnier, more interesting, and better looking. (Or at least two of the three.) Whether you are preparing for a business presentation, giving a wedding toast, defending your thesis, raising money from investors, or simply want to take on something you're afraid of, this book will take you from sweaty to stage-ready. You'll learn how to: - Craft a story and content that your audience will want to listen to - Find the funniest parts of your material and how to get to them faster - Deal with stage fright - Master the two most important parts of your performance: timing and delivery Ten percent of the author's proceeds from this book will go to Arash Bayatmakou via Help Hope Live until he is fully back on his feet and thereafter to one of the many facing the same challenges after suffering a severe spinal cord injury.

Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are

knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Rise Above Greg Little 2011-09-01 *Rise Above* is a detailed description of one man's journey of conquering adversity. You will read how the writer survived a near-fatal motor vehicle accident, which resulted in three skull fractures, a bruised brain, an eight-day coma and having to relearn how to walk and talk - made all the more challenging by a lingering speech impediment acquired in childhood. Stuttering is an awful burden for a person to carry throughout life. Children can be cruel. The writer's utmost fear, speaking in public, would one day be an ally and allow him to present programs extensively throughout the United States. This book is not about surviving adversity. It's about thriving beyond adversity. Greg Little, a nationally renowned speaker and motivator, has presented to diverse groups, including health care, business and professional organizations, and educational institutions. His programs emphasize active involvement by participants. Whether teaching professionals to cope with stress, bond as a productive group or realize their hidden strengths, his seminars and keynote addresses are hard hitting and memorable. During one of Greg's presentations, I was laughing so hard that tears were literally streaming down my face. - Dr. Ed Kesgen; Sylva, NC One of the most energized, creative and innovate presentations I have ever experienced.- Jim Brennan, National Consultant; Wilbraham, MA Dr. Greg Little is superb speaker. This is an excellent investment in continuing education - Nancy DeBolt; Torrington, WY
