The Architect in Practice David Chappell 2015-12-02 Throughout its many editions, *The Architect in Practice* has remained a leading textbook used in the education of architects. While the content of the book has developed, the message and philosophy has remained constant: to provide students of architecture and young practitioners with a readable guide to the profession, outlining an architect's duties to their client and contractor, the key aspects of running a building contract, and the essentials of management, finance and drawing office procedure. The eleventh edition follows in that tradition. The text has been brought up to date to ensure it follows the new RIBA Plan of Work 2013 as the guide to the architect's workflow. In addition, a number of changes to standard forms of contract were made with the publication of the JCT 2011 suite of contracts, and the RIBA Standard Form for the Appointment of an Architect 2010 (2012 Revision). These new forms are fully covered. In addition, the opportunity has been taken to reorganise the layout so that the content flows in a way that is more consistent with current architectural practice, and to deal with the increasing use of BIM. The eleventh edition of *The Architect in Practice* continues to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession.

Project Finance for Construction Anthony Higham 2016-12-08 The world of construction is intrinsically linked with that of finance, from the procurement and tendering stage of projects right through to valuation of buildings. In addition to this, things like administrations, liquidations, mergers, take-overs, buy-outs and floatations affect construction firms as they do all other companies. This book is a rare explanation of common construction management activities from a financial point of view. While the practical side of the industry is illustrated here with case studies, the authors also take the time to build up an understanding of balance sheets and P&L accounts before explaining how common tasks like estimating or valuation work from this perspective. Readers of this book will not only learn how to carry out the tasks of a construction cost manager, quantity surveyor or estimator, they will also understand the financial logic behind them, and the motivations that drive senior management. This is an essential book for students of quantity surveying or construction management, and all ambitious practitioners.

Dry Bones That Dream Peter Robinson 2009-08-21 'The Alan Banks mystery-suspense novels are the best series on the market. Try one and tell me I'm wrong' – Stephen King *Dry Bones That Dream* is the seventh novel in Peter Robinson's Inspector Banks series, following on from *Wednesday's Child*. A contract killing. A secret past. Banks is pushed to his limit. 2.47 a.m. Chief Inspector Alan Banks sees the body of Keith Rothwell for the first time. Only hours earlier two masked men had walked the mild-mannered accountant out of his farmhouse to the barn. They then clinically executed him with a shotgun. Clearly this is a professional hit – but Keith was hardly the sort of person to make deadly enemies. Or was he? The police investigation soon raises more questions than answers. The more Banks scratches the surface, the more he wonders what lies beneath the veneer of the apparently happy Rothwell family. And when his old sparring partner Detective Superintendent Richard Burgess arrives from Scotland Yard, the case takes yet another unexpected twist . . . Now a major British ITV drama *DCI Banks*, this novel is followed by the eighth book in this Yorkshire-based crime series, *Innocent Graves*.

Final Accounting Barbara Ley Toffler 2004-04-13 A withering exposé of the unethical practices that triggered the indictment and collapse of the legendary accounting firm. Arthur Andersen's conviction on obstruction of justice charges related to the Enron debacle spelled the abrupt end of the 88-year-old accounting firm. Until recently, the venerable firm had been regarded as the accounting profession's conscience. In *Final Accounting*, Barbara Ley Toffler, former Andersen partner-in-charge of Andersen's Ethics & Responsible Business Practices consulting services, reveals that the symptoms of Andersen's fatal disease were evident long before Enron. Drawing on her expertise as a social scientist and her experience as an Andersen insider, Toffler chronicles how a culture of

arrogance and greed infected her company and led to enormous lapses in judgment among her peers. Final Accounting exposes the slow deterioration of values that led not only to Enron but also to the earlier financial scandals of other Andersen clients, including Sunbeam and Waste Management, and illustrates the practices that paved the way for the accounting fiascos at WorldCom and other major companies. Chronicling the inner workings of Andersen at the height of its success, Toffler reveals "the making of an Android," the peculiar process of employee indoctrination into the Andersen culture; how Androids—both accountants and consultants—lived the mantra "keep the client happy"; and how internal infighting and "billing your brains out" rather than quality work became the all-important goals. Toffler was in a position to know when something was wrong. In her earlier role as ethics consultant, she worked with over 60 major companies and was an internationally renowned expert at spotting and correcting ethical lapses. Toffler traces the roots of Andersen's ethical missteps, and shows the gradual decay of a once-proud culture. Uniquely qualified to discuss the personalities and principles behind one of the greatest shake-ups in United States history, Toffler delivers a chilling report with important ramifications for CEOs and individual investors alike.
