Medical Histories for the MRCP and Final MB Iqbal Khan 2018-05-08

Taking a patient's medical history is a vital skill often overlooked by junior doctors and medical students, leading to a worryingly high failure rate in the PACES and OSCE exams. Don't be caught out! This book has been specifically designed to give you invaluable guidance and practice for taking medical histories. It features 50 complete case studies, including referral letters, medical histories, suggested data gathering methods, points to consider, warning signs, management of uncomfortable topics and differential diagnosis. With a focus on the importance and benefits of role-play in revision, this concise and easy to read format provides the study aid for Membership of the Royal College of Physicians (MRCP) candidates sitting their Objective Structured Clinical Examination (OSCE) and Practical Assessment of Clinical Examination Skills (PACES) examinations. It is also of great benefit to undergraduates approaching their final year examinations.

Final MB Harry Richard Dalton 1997 This is a text to help final-year medical students prepare for their final clinical exam in general medicine. It covers the long case and the viva, but focuses on the major section, the short case, in which the student has to carry out a clinical examination in front of two examiners. As well as giving examples of how to carry out the clinical examination, the book lists descriptions of typical cases in each medical speciality. At the end of each chapter the author lists key questions which are most frequently asked.

Catheter-Based Cardiovascular Interventions Peter Lanzer

2012-08-01 Operator skills, and in particular decision-making and strategic skills, are the most critical factor for the outcome of catheter-based cardiovascular interventions. Currently, such skills are commonly developed by the empirical trial and error method only. In this textbook, for the first time, an explicit teaching, training, and learning approach is set out that will enable interventional operators, whether cardiologists, vascular surgeons, vascular specialists, or radiologists, to learn about and to develop the cognitive skills required in order to achieve consistent expert-level catheter-based interventions. It is anticipated that adoption of this approach will allow catheter-based interventions to become a domain of excellence, with rapid transfer of knowledge, steep learning curves, and highly efficient acquisition of complex skills by individual operators — all of which are essential to meet successfully the challenges of modern cardiovascular care.
