The White Allies Handbook

Lecia Michelle 2022-07-26

You've read *White Fragility* and *How to Be an Antiracist*, but what comes next? The answer lies in this clear, actionable guide providing a vital 4-week program for becoming an ally who makes a real difference in the racial justice fight. Get the tools you need to get off the sidelines and onto the frontlines of allyship, combat racism while supporting Black women, and avoid common pitfalls white people fall into when they think about and discuss racism. "[T]his timely, no-nonsense handbook offers an important blueprint for White allies to carry out the often uncomfortable but necessary work of promoting racial equality among all marginalized people. Welcome straight talk for a new age in race relations." —Kirkus Reviews Black women have

always been the driving force behind real change in this country—especially when it comes to racial justice work. But they shouldn't have to do it alone. If you're ready to stop standing on the sidelines and become anti-racist instead of passively "not racist," then this book is what you need. You'll discover: How to have difficult conversations about white supremacy, racism, and white privilege How to listen to criticism without defensiveness Why it's harmful to ignore race or claim to be colorblind How to expand your racial justice circle by joining groups led by Black women and cultivating a group of like-minded allies Racism can only be defeated if white people educate themselves and actively engage in antiracism work, especially in their inner circles. With this book, you'll learn how to change from someone who defends and protects racism to someone who fights against it.

And you'll become an example to others that true allies are made, not born.

"Recommended for reading groups looking for active discussions of racism. This book will help readers learn more about racism and its lasting effects on society."

The Practice of Ally Work Jeffrey Raff 2006-04-20 Jeffrey Raff has written about the ally

(which has been called many different names in different traditions) in his books *Jung and the Alchemical Imagination*, *Healing the Wounded God*, and *The Wedding of Sophia*. Here, he shares with readers the techniques he has developed and taught in his workshops and lectures for achieving intimate contact with the divine. The ally is a divine being, a face of God, that is unique to every being. It appears in the imaginal realm to partner with a specific person/ but it has to wait for its human partner to seek it. The person has to learn how to enter the imaginal realm to meet and relate with the ally, and to that effect, Raff has designed a progressive series of exercises. Starting with imagination-building practices, he takes you through learning how to identify your ally, learning its name, and obtaining guidance from it. Intermediate and advanced exercises teach you how to deepen your relationship with the ally and bring it into

Becoming an Ally, 3rd Edition

Anne Bishop

2020-05-27T00:00:00Z

Becoming an Ally is a book for men who want to end sexism, white people who want to end racism, straight people who want to end heterosexism, able-bodied people who want to end ableism — for all people who recognize their privilege and want to move toward a more just world by learning to act as allies. Has oppression always been with us, just part of “human nature”? What does individual healing have to do with social justice? What does social justice have to do with individual healing? Why do members of the same oppressed group fight one another, sometimes more viciously than they fight their oppressors? Why do some who experience oppression develop a life-long commitment to fighting oppression, while

others turn around and oppress those with less power? In this accessible and enlightening book, now in its third edition, Anne Bishop examines history, economic and political structures, and individual psychology in a search for the origins of racism, sexism, heterosexism, ableism, ageism and all the other forms of oppression that divide us. Becoming an Ally looks for paths to justice and lays out guidelines for becoming allies of oppressed peoples when we are in the privileged role. A new chapter in this third edition offers a greatly expanded discussion of effective approaches to educating allies, which is meant for teachers of adults, particularly those who teach about diversity, equity and anti-oppression. In this chapter, Bishop examines the ways in which Western culture prevents us from recognizing our roles as members of privileged groups and explores how to challenge this with participatory exercises and group discussion.

One Hundred and Sixty Allied Families John Osborne
Austin 2009-06 This work is an exhaustive study of 160 families. For each family covered, a skeletal genealogy is given, showing births, marriages, and deaths in

successive generations of the 17th, 18th, and 19th centuries. This is then followed by a narrative detailing the known facts about each person and family according to existing records. The narratives commence with the first member of the family to come to New England, identifying his place of origin and occupation, the date and place of his arrival in New England, and his residence--all information that was accumulated from the author's extensive research in wills, inventories, deeds, land records, and church records. The narratives then turn to the children of the original settler, treating them in like manner, and to their children, and so on until the genealogy is fully developed.

A doctor in the psych ward was finally able to give her the answers her and her family had desperately been searching for, and the diagnosis that all the previous doctors had missed. She learned that she had Lyme disease-and finally had a breakthrough. What she didn't know was that this diagnosis would lead her down some of the most excruciating years of her life before beginning her journey to recovery from eleven years of misdiagnosis and physical pain. She would need to find her courage to heal physically, mentally, and emotionally, and become the survivor she is today. America's Allies and the Decline of US Hegemony

Justin Massie 2019-10-24 How do America's democratic allies perceive and respond to a relative decline in US power and influence and the simultaneous rise of China? Using the case-studies of Europe, the UK, Australia, Canada, Japan and South East Asian countries, this book offers a broad assessment of the perceptions of threat and the strategies used by these allies to cope with the relative decline of America's hegemonic power, the rise of China and the transforming

world order. In answering these central questions, contributors focus on two complementary analytical approaches. The first examines the perceptions of systemic changes by America's allies: how are US allies framing this issue and what kind of political discourse is emerging with regards to it? The second approach focuses on the concrete foreign policy and defence strategies put forward by these allies. The book explores the extent to which US allies are willing to support US hegemony and considers the democratic allies' understanding of the international structure, their relations to the United States, and their own aspirations in this changing world order. This book will be of interest to general readers as well as scholars and students of US foreign policy, foreign policy analysis and International Relations.

Constructing Allied Cooperation Marina E. Henke
2019-10-15 How do states overcome problems of

collective action in the face of human atrocities, terrorism and the threat of weapons of mass destruction? How does international burden-sharing in this context look like: between the rich and the poor; the big and the small? These are the questions Marina E. Henke addresses in her new book Constructing Allied Cooperation. Through qualitative and quantitative analysis of 80 multilateral military coalitions, Henke demonstrates that coalitions do not emerge naturally. Rather, pivotal states deliberately build them. They develop operational plans and bargain suitable third parties into the coalition, purposefully using their bilateral and multilateral diplomatic connections—what Henke terms diplomatic embeddedness—as a resource. As Constructing Allied Cooperation shows, these ties constitute an invaluable state capability to engage others in collective action: they are tools to construct cooperation. Pulling apart the strategy behind multilateral military

coalition-building, Henke looks at the ramifications and side effects as well. As she notes, via these ties, pivotal states have access to private information on the deployment preferences of potential coalition participants. Moreover, they facilitate issue-linkages and side-payments and allow states to overcome problems of credible commitments. Finally, pivotal states can use common institutional contacts (IO officials) as cooperation brokers, and they can convert common institutional venues into fora for negotiating coalitions. The theory and evidence presented by Henke force us to revisit the conventional wisdom on how cooperation in multilateral military operations comes about. The author generates new insights with respect to who is most likely to join a given multilateral intervention, what factors influence the strength and capacity of individual coalitions, and what diplomacy and diplomatic ties are good for. Moreover, as the

Trump administration promotes an "America First" policy and withdraws from international agreements and the United Kingdom completes Brexit, Constructing Allied Cooperation is an important reminder that international security cannot be delinked from more mundane forms of cooperation; multilateral military coalitions thrive or fail depending on the breadth and depth of existing social and diplomatic networks.

2013-08-22 Why are allies so unpredictable? In *American Allies in Times of War*, Stéfanie von Hlatky tackles this question by examining military cooperation between the United States and its allies. First, this book demonstrates that alliance demands in times of war cannot always be met by

democratic allies due to domestic political constraints. Second, concerns over the delivery of military assets can further curtail the ability of governments to commit resources to war. The author convincingly argues that it is essential to account for these factors to understand the varying levels of military cooperation observed between the US and its closest partners. This book offers an original comparative analysis of the United Kingdom, Canada, and Australia's response to the wars in Afghanistan and Iraq. The case studies highlight that decisions involving the use of force must address both domestic-level constraints and the importance of the bilateral relationship with the United States. This book explains how American allies can manage requests for political and military support by resorting to effective negotiation strategies to influence the terms of cooperation. *American Allies in Times of War* offers a comprehensive analysis of why and how allies go to war

together and dispels some myths and misconceptions about the politics behind military cooperation. It is intended for policymakers, academics, and students who want to gain insight into how foreign and defence policy is made and how domestic pressures and operational constraints impact contemporary military engagements.

decades, fascism had fallen without any advance warning. As festive events marked the incredible outcome and reminders of the past were destroyed, an uncontainable joy seemed to pervade Italians. But what did people actually celebrate? How did they understand the bygone dictatorship, which was soon to be reincarnated in the Italian Social Republic (RSI)? Drawing on more than one hundred diaries written by ordinary citizens (and some prominent figures as well) and inspired by Raymond Williams's concept of structures of feeling, the book examines Italians' perspectives on fascism at a very critical moment in their history. With the country mired in a devastating war further complicated by the September 8, 1943 armistice with the Allies and subsequent German occupation—followed by the eruption of an Italian-against-Italian conflict, the switching of alliances, and the declaration of war against Germany on October 13, 1943—the fast pace of history seemed to

deflect Italians' attention from their immediate past. Amidst the daily experience of bombings, hunger, displacement, and death, coming to terms with twenty years of dictatorship turned out to be an arduous enterprise. Whether those who had lived under the fascist regime wished 'not to think of it and not to speak any more about it' as philosopher Benedetto Croce maintained, it is hard to ascertain. In truth, little is known of what Italians felt and thought about fascism after its precipitous demise. This book remedies the gap in historical scholarship by assessing how Italians confronted their present and negotiated their past during the two years from the fall of the regime to the definitive defeat of the RSI and the end of the world war in May 1945. By bringing to life the cultural imaginaries and practices of the past, the book raises ostensibly intractable questions on the epochal impact of what often appears as inconsequential: the typically unseen and seemingly

banal power of everyday experiences.

Most have heard of the French Resistance during World War Two. Few are aware of the Belgian Resistance movements during the First World War and the enormous role they played in the defeat of the enemy. This book tells the story of those underground organisations in Belgium during the Great War and in particular the 'Prisoner Help Network'. A very large proportion of the network were women. Other resistance organisations were 'Assistance Discrete' (The Discreet Assistance) and La Dame Blanche (The White Lady). The author's in-depth research using as a base, the recollections of New Zealand soldier Bert Hansen in particular and other Allied soldiers, allowed the details to be revealed for the first time. Finding Allies and Making Revolution

Tony Saich
2020-02-17 What does a Dutchman have to do with the rise of the Chinese Communist Party? Finding Allies and Making Revolution by Tony Saich reveals how Henk Sneevliet (alias Maring), arriving as Lenin's choice for China work, provided the communists with two of their most enduring legacies: the idea of a Leninist party and the tactic of the united front. Sneevliet strived to instill discipline and structure for the left-leaning intellectuals searching for a solution to China's humiliation. He was not an easy man and clashed with the Chinese comrades and his masters in Moscow. This new analysis is based on Sneevliet's diaries and reports, together with contemporary materials from key Chinese figures, and important documents held in the Comintern's China archive.
