From Formalism to Weak Form: The Architecture and Philosophy of Peter Eisenman Stefano Corbo 2016-04-15 Peter Eisenman is one of the most controversial protagonists of the architectural scene, who is known as much for his theoretical essays as he is for his architecture. While much has been written about his built works and his philosophies, most books focus on one or the other aspect. By structuring this volume around the concept of form, Stefano Corbo links together Eisenman's architecture with his theory. *From Formalism to Weak Form: The Architecture and Philosophy of Peter Eisenman* argues that form is the sphere of mediation between our body, our inner world and the exterior world and, as such, it enables connections to be made between philosophy and architecture. From the start of his career on, Eisenman has been deeply interested in the problem of form in architecture and has constantly challenged the classical concept of it. For him, form is not simply a cognitive tool that determines a physical structure, which discriminates all that is active from what is passive, what is inside from what is outside. He has always tried to connect his own work with the cultural manifestations of the time: firstly under the influence of Colin Rowe and his formalist studies; secondly, by re-interpreting Chomsky's linguistic theories; in the 80's, by collaborating with Derrida and his de-constructivist approach; more recently, by discovering Henri Bergson's idea of Time. These different moments underline different phases, different projects, different programmatic manifestos; and above all, an evolving notion of form. Taking a multi-disciplinary approach based on the intersections between architecture and philosophy, this book investigates all these definitions and, in doing so, provides new insights into and a deeper understanding of the complexity of Eisenman's work.

Looking Into the Earth Alan E. Mussett 2000-10-23 Looking Into the Earth comprehensively describes the principles and applications of both 'global' and 'exploration' geophysics. Mathematical and physical principles are introduced at an elementary level, and then developed as necessary. Student questions and exercises are included at the end of each chapter. The book is aimed primarily at introductory and intermediate university (and college) students taking courses in geology, earth science, environmental science, and engineering. It will also form an excellent introductory textbook in geophysics departments, and will help practising geologists, archaeologists and engineers understand geophysical principles.

Domesticidad a la Intemperie Ricardo Devesa 2022-02-04 Trees have been deliberately connected with houses since they were introduced as a prominent part of architectural design. The relationships of contiguity between houses and trees have existed since ancient times. However, at the end of the 19th century those links became explicit in the design process, as the house emerged as one of the fundamental architectural programs, and as the result of an increasing sensibility towards environmental aspects and the landscape. The first part of this publication is to present a collection of exemplary five houses that evinced explicit relationships with pre-existing trees. The five twentieth century projects are: La Casa (B. Rudofsky, 1969), Cottage Caesar (M. Breuer, 1951), Ville La Roche (Le Corbusier & P. Jeanneret, 1923), Villa Pepa (J. Navarro Baldeweg, 1994) and Hexenhaus (A. & P. Smithson, 1984-2002). The second part of the book contributes three theoretical concerns for the contemporary project, those ones which are established in the process, with respect to time, place and outdoor domesticity in modern western housing. One of these theoretical contributions establishes that any house located on a site finds a significant place in conjunction with the preexisting trees. The second contribution describes the effects in terms of time, in addition to spatial considerations, which trees can contribute to the architectural project. Finally, the establishment of these connections between architecture and trees enlarges the idea of the house: the tree serves to draw the surrounding environment into the house and, as a result, becomes an intrinsic part of the house itself.

An Architecture of Invitation Sarah Menin 2018-12-13 First published in 2005, *An Architecture of invitation: Colin St John Wilson* is a distinctive study of the life and architectural career of one of the most significant makers, theorists and teachers of architecture to have emerged in England in the second half of the twentieth century. Exceptionally in an architectural study, this book interweaves biography, critical analysis of the projects, and theory, in its aims of explicating the richness of Wilson's body of work, thought and teaching. Drawing on the specialisms of its authors, it also examines the creative and psychological impulses that have informed the making of the work - an oeuvre whose experiential depth is recognised by both users and critics.

Great North Road Peter F. Hamilton 2013-01-01 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY PUBLISHERS WEEKLY New York Times bestselling author Peter F. Hamilton's riveting new thriller combines the nail-biting suspense of a serial-killer investigation with clear-eyed scientific and social extrapolation to create a future that seems not merely plausible but inevitable. A century from now, thanks to a technology allowing instantaneous travel across light-years, humanity has solved its energy shortages, cleaned up the environment, and created far-flung colony worlds. The keys to this empire belong to the powerful North family—composed of successive generations of clones. Yet these clones are not identical. For one thing, genetic errors have crept in with each generation. For another, the original three clone "brothers" have gone their separate ways, and the branches of the family are now friendly rivals more than allies. Or maybe not so friendly. At least that's what the murder of a North clone in the English city of Newcastle suggests to Detective Sidney Hurst. Sid is a solid investigator who'd like nothing better than to hand off this hot potato of a case. The way he figures it, whether he solves the crime or not, he'll make enough enemies to ruin his career. Yet Sid's case is about to take an unexpected turn: because the circumstances of the murder bear an uncanny resemblance to a killing that took place years ago on the planet St. Libra, where a North clone and his entire household were slaughtered in cold blood. The convicted slayer, Angela Tramel, has always claimed her innocence. And now it seems she may have been right. Because only the St. Libra killer could have committed the Newcastle crime. Problem is, Angela also claims that the murderer was an alien monster. Now Sid must navigate through a Byzantine minefield of competing interests within the police department and the world's political and economic elite

. . . all the while hunting down a brutal killer poised to strike again. And on St. Libra, Angela, newly released from prison, joins a mission to hunt down the elusive alien, only to learn that the line between hunter and hunted is a thin one. **BONUS:** This edition includes an excerpt from Peter F. Hamilton's *The Abyss Beyond Dreams*. Praise for *Great North Road* "A mesmerizing page-turner."—Publishers Weekly (starred review) "A gripping saga that blends wilderness survival, police procedural, political and social intrigue, and dynastic sf into a mammoth tale featuring believable characters and exceptionally skilled storytelling."—Library Journal (starred review) "A perfect introduction to [Hamilton's] gifts for character design, dialogue, and sheer, big-idea-driven storytelling."—Booklist (starred review) "Compelling and original . . . an awesome novel [with] plenty of action."—SFRevu "One very compelling and entertaining science fiction novel."—SF Site "Simply brilliant . . . an astonishing achievement."—Tor.com

The Mark and the Void Paul Murray 2015-10-20 What links the Investment Bank of Torabundo, www.myhotswaitress.com (yes, with an s, don't ask), an art heist, a novel called *For the Love of a Clown*, a six-year-old boy with the unfortunate name of Remington Steele, a lonely French banker, a tiny Pacific island, and a pest control business run by an ex-KGB agent? *The Mark and the Void* is Paul Murray's madcap new novel of institutional folly, following the success of his wildly original breakout hit, *Skippy Dies*. While marooned at his banking job in the bewilderingly damp and insular realm known as Ireland, Claude Martingale is approached by a down-on-his-luck author, Paul, looking for his next great subject. Claude finds that his life gets steadily more exciting under Paul's fictionalizing influence; he even falls in love with a beautiful waitress. But Paul's plan is not what it seems—and neither is Claude's employer, the Investment Bank of Torabundo, which swells through dodgy takeovers and derivatives trading until—well, you can probably guess how that shakes out. *The Mark and the Void* is the funniest novel ever written about the recent financial crisis, and a stirring examination of the deceptions carried out in the names of art and commerce.

Diagramming the Big Idea Michael T. Swisher 2012-06-25 As a beginning design student, you need to learn to think like a designer, to visualize ideas and concepts, as well as objects. Written Into the Void: Selected Writings, 1990-2004 Peter Eisenman 2007

Almost Nothing Christian Bjone 2019 Ludwig Mies van der Rohe (1886-1969) undoubtedly is one of the most significant and influential architects ever. His designs and realized buildings, as well as his thinking and writings, until the present day continue to initiate many controversial debates on achievement and failure in modern architecture. Yet not only architects and urban designers have been

inspired or appalled by Mies van der Rohe. This new book demonstrates that his influence reaches far beyond the boundaries of the professional architecture world. *Almost Nothing* collects work by one-hundred painters, sculptors, photographers, film directors, designers, cartoonists, and architects that comment on or appropriate buildings, designs, and statements by or images of the legendary architect. The works also form a hundredfold re-interpretation of Mies van der Rohe's life and oeuvre. New York-based architect and writer Christian Bjone in his complementing text provides rich background information on the individual artists and the depicted art works. The books' title refers to a statement by Mies van der Rohe himself on one of his celebrated masterpieces, Crown Hall on IIT campus in Chicago, which combines ingeniously simplicity with complexity.

Lateness Peter Eisenman 2020-07-07 A provocative case for historical ambiguity in architecture by one of the field's leading theorists. Conceptions of modernity in architecture are often expressed in the idea of the zeitgeist, or "spirit of the age," an attitude toward architectural form that is embedded in a belief in progressive time. *Lateness* explores how architecture can work against these linear currents in startling and compelling ways. In this incisive book, internationally renowned architect Peter Eisenman, with Elisa Iturbe, proposes a different perspective on form and time in architecture, one that circumvents the temporal constraints on style that require it to be "of the times"—lateness. He focuses on three twentieth-century architects who exhibited the qualities of lateness in their designs: Adolf Loos, Aldo Rossi, and John Hejduk. Drawing on the critical theory of Theodor Adorno and his study of Beethoven's final works, Eisenman shows how the architecture of these canonical figures was temporally out of sync with conventions and expectations, and how lateness can serve as a form of release from the restraints of the moment. Bringing together architecture, music, and philosophy, and drawing on illuminating examples from the Renaissance and Baroque periods, *Lateness* demonstrates how today's architecture can use the concept of lateness to break free of stylistic limitations, expand architecture's critical capacity, and provide a new mode of analysis.

Urban Design: Ornament and Decoration Taner Oc 2007-06-07

'Urban Design: Ornament and Decoration' focuses on decorating the city and how ornament has been used to bring delight to the urban scene. The authors show how the pattern and distribution of street and square and other major elements in the city can be enhanced by the judicious use of decorative surface treatment and by the careful placing of hard and soft landscape features. This second edition, updated by Cliff Moughtin and now available in paperback, includes a new chapter on mud architecture. Case studies of city decoration are also outlined to bring together the ideas discussed and to show how ornament and decoration can be used to emphasize the five components of city form: the path, the node, the edge, the landmark and the district.

Kunst und Architektur Christian Bjone 2009 Since the beginning of the 20th century, artists and architects have often been in collaboration. Art and Architecture Christian Bjone 2009 Since the beginning of the 20th century, artists and architects have often been in collaboration. This relationship was not necessarily without conflict - on the contrary, a productive tension and friction can often be found at the basis of their common endeavors. However, wherever art and architecture establish a common territory in the public arena, highly integrated schemes may result that are of particular appeal and quality. In recent years, the barriers between art and architecture have come down even further; while many artists are attracted to the spatial presence of architecture and its language and scale, contemporary architects also seek the inspiration of art and include artistic concepts into their designs. Great works of art/architecture have resulted from these cooperations and this

book explores them in nine chapters from 1914 up to the present, highlighting the most striking examples of these interdisciplinary activities such as the LACMA scheme by Renzo Piano/Jeff Koons in Los Angeles, the Chichu Art Museum by Tadao Ando with its installation by Walter de Maria, the British Pavilion at the Venice Biennale by David Adjaye with artist Chris Ofili or the work by Keith Sonnier in the Munich Re Building by Baumschlager Eberle.

Architecture Francis D. K. Ching 2012-07-16 A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment. Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

Draw in Order to See Mark Alan Hewitt 2020-06 *Draw In Order to See* is the first book to survey the history of architectural design using the latest research in cognitive science and embodied cognition. Beginning with a primer on visual perception, cognitive science, design thinking, and modes of conception used by groups of architects in their practices, Mark Alan Hewitt surveys a 12,000-year period for specific information about the cognitive schemata used by Homo sapiens to make their buildings and habitats. The resulting history divides these modes of thinking into three large cognitive arcs: crafting, depicting, and assembling, within specific temporal frames. His analysis borrows from Merlin Donald's thesis about mimetic and symbolic cognition as critical to the emergence of the modern mind, and further employs theories of enactment and embodiment to clarify their relationship to architecture. Individual chapters treat the emergence of depiction during the Renaissance, the education of architects in the modern era, Baroque illusionism and scenography, the breakdown of artisanal literacy during the Enlightenment, and modern experiments with models, montage, and illusions of movement. The author concludes with a critique of contemporary design and education, and promotes design with embodiment as a tonic for a profession in crisis, facing the challenges of climate change, energy shortages, inequality, and housing a population of over seven billion in the coming decades. This groundbreaking and valuable study presents a clear view of current research in two related fields that have not heretofore been compared, and outlines a strategy for future research. An extensive bibliography offers readers an up-to-date reference to both the science and the architectural history behind the text.

The Void, The Grid & The Sign William L. Fox 2016-10-01 This is a story that few know, but those who do are its disciples. The story, of the highest and driest of all American deserts, the Great Basin, has no finer voice than that of William Fox. Fox's book is divided into the three sections of the title. In "The Void," he leads us through the Great Basin landscape, investigating our visual response to it—a pattern of mountains and valleys on a scale of such magnitude and emptiness and undifferentiated by shape, form, and color that the visual and cognitive expectations of the human mind are confounded and impaired. "The Grid" leads us on a journey through the evolution of cartography in the nineteenth century and the explorations of John Charles Frémont to the net of maps, section markers, railroads, telegraph lines, and highways that humans have thrown across the void throughout history. "The Sign" wends us through the metaphors and language we continue to place around and over the void, revealing the Great Basin as a palimpsest where, for example, the neon boulevards of Las Vegas interplay with ancient petroglyphs. In this one-of-a-kind travel book that allows us to travel within our own neurophysiological processes as well as out into

the arresting void of the Great Basin, Fox has created a dazzling new standard at the frontier of writing about the American West. His stunning and broad insight draws from the fields of natural history, cognitive psychology, art history, western history, archaeology, and anthropology, and will be of value to scholars and readers in all these subjects.

Eisenman Inside Out Peter Eisenman 2004-01-01 Essais sur l'architecture par l'architecte Eisenman.

Architecture Theory since 1968 K. Michael Hays 2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century. In the discussion of architecture, there is a prevailing sentiment that, since 1968, cultural production in its traditional sense can no longer be understood to rise spontaneously, as a matter of social course, but must now be constructed through ever more self-conscious theoretical procedures. The development of interpretive modes of various stripes—post-structuralist, Marxian, phenomenological, psychoanalytic, as well as others dissenting or eccentric—has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architecture's general importance in intellectual discourse. This anthology presents forty-seven of the primary texts of architecture theory, introducing each with an explication of the concepts and categories necessary for its understanding and evaluation. It also presents twelve documents of projects or events that had major theoretical repercussions for the period. Several of the essays appear here in English for the first time. Contributors Diana Agrest, Stanford Anderson, Archizoom, George Baird, Jennifer Bloomer, Massimo Cacciari, Jean-Louis Cohen, Beatriz Colomina, Alan Colquhoun, Maurice Culot, Jacques Derrida, Ignasi de Solà-Morales, Peter Eisenman, Robin Evans, Michel Foucault, Kenneth Frampton, Mario Gandelsonas, Frank Gehry, Jürgen Habermas, John Hejduk, Denis Hollier, Bernard Huet, Catherine Ingraham, Fredric Jameson, Charles A. Twelve by Twelve Bill Powers 2010 Why would a successful American physician choose to live in a twelve-foot-by-twelve-foot cabin without running water or electricity? To find out, writer and activist William Powers visited Dr. Jackie Benton in rural North Carolina. No Name Creek gurgled through Benton's permaculture farm, and she stroked honeybees' wings as she shared her wildcrafter philosophy of living on a planet in crisis. Powers, just back from a decade of international aid work, then accepted Benton's offer to stay at the cabin for a season while she traveled. There, he befriended her eclectic neighbors — organic farmers, biofuel brewers, eco-developers — and discovered a sustainable but imperiled way of life. In these pages, Powers not only explores this small patch of community but draws on his international experiences with other pockets of resistance. This engrossing tale of Powers's struggle for a meaningful life with a smaller footprint proposes a paradigm shift to an elusive "Soft World" with clues to personal happiness and global healing.

Making Haste from Babylon Nick Bunker 2010-04-13 At the end of 1618, a blazing green star soared across the night sky over the northern hemisphere. From the Philippines to the Arctic, the comet became a sensation and a symbol, a warning of doom or a promise of salvation. Two years later, as the Pilgrims prepared to sail across the Atlantic on board the *Mayflower*, the atmosphere remained charged with fear and expectation. Men and women readied themselves for war, pestilence, or divine retribution. Against this background, and amid deep economic depression, the Pilgrims conceived their enterprise of exile. Within a decade, despite crisis and catastrophe, they built a thriving settlement at New Plymouth, based on beaver fur, corn, and cattle. In doing so, they laid the foundations for Massachusetts, New England, and a new nation. Using a wealth of new evidence from landscape, archaeology, and hundreds of overlooked or neglected documents, Nick Bunker gives a vivid and strikingly original account of the *Mayflower* project and the first decade of the Plymouth Colony. From mercantile London and the rural England of Queen Elizabeth I and King James I to the mountains and rivers of Maine, he weaves a rich narrative that combines religion, politics, money, science, and the sea. The Pilgrims were entrepreneurs as well as evangelicals, political radicals as well as Christian idealists. *Making Haste from Babylon* tells their story in unrivaled depth, from their roots in religious conflict and village strife at home to their final

creation of a permanent foothold in America.

La forma de la casa como idea de proyecto Javier Blanco Martin

2021-06-17 La forma tradicional de la casa fue proscrita por la modernidad. A mediados del siglo XX comienza a definirse conceptualmente el poliedro de las siete caras significándose como hogar identitario de lo humano y, por excelencia, como el arquetipo de la arquitectura, intemporal y universal, que no proviene de ninguna cultura en particular, sino de todas. Está en el imaginario individual y el colectivo. Al referirnos a la forma icónica de la casa como idea de proyecto: ¿nos encontramos ante un problema específicamente disciplinar?; ¿es una forma o es una imagen, en cualquier caso, recuperada de la tradición de lo vernáculo o lo clásico a la que se le han incorporado las nuevas tecnologías constructivas?; ¿es su uso actual una tipología nueva que encuentra sus raíces en la historia, en la tradición, en lo vernáculo, en lo popular, etcétera?; o, incluso, ¿es un mero formalismo como los muchos a los que nos tiene acostumbrados la arquitectura contemporánea o es una nueva reinterpretación o una relectura historicista, derivada de la postmodernidad?; ¿por qué ahora se está dando un mayor reconocimiento a esta forma?; ¿es una moda y como tal pasajera?; ¿qué hizo que se denostara a partir del primer tercio del siglo XX?; ¿cuál ha sido su influencia en los movimientos del siglo XX?; ¿cuáles han sido sus interferencias con otras disciplinas artísticas?; ¿qué han aportado los avances tecnológicos y científicos de la construcción en la recuperación de una forma básicamente tradicional?; ¿cuáles han sido las diversas reacciones de la sociedad a lo largo del siglo XX hacia las distintas tendencias arquitectónicas?; ¿de qué manera, desde las ideologías, se ha utilizado esta forma icónica por los poderes político y económico?; si hasta hace menos de un siglo era una forma reservada a la casa del hombre y a la casa de los dioses, del mismo modo ¿por qué esta forma se utiliza a menudo como dispositivo proyectual en los edificios destinados a guarderías, centros de asistencia psicológica o asilos?
