Armoured Warfare in the British Army, 1914-1939 Richard Taylor 2022-04-06 This is the first volume in a three-volume illustrated history of the evolution of armored manoeuvre warfare in the British army, covering the period from 1914 until 1939. Author Dick Taylor's tour de force covers the evolution of the tank and armored cars in response to the specific conditions created by trench warfare, the history of the use of tanks during the war, as well as the critical period between the wars in which the tank was both refined and neglected. He also looks in detail at the amalgamations and mechanization of the horsed cavalry which led to the formation of the Royal armored Corps in 1939. His detailed and absorbing narrative covers the social and human aspects of the story

as well as the technology, and explains how the nation that invented and first fielded the tank in 1916 struggled to maintain the lead after the Armistice.

The First Infantry Division and the U.S. Army Transformed Gregory Fontenot 2017-06-30 This fast-paced and compelling read closes a significant gap in the historiography of the late Cold War U.S. Army and is crucial for understanding the current situation in the Middle East. From the author's introduction: "My purpose is a narrative history of the 1st Infantry Division from 1970 through the Operation Desert Storm celebration held 4th of

July 1991. This story is an account of the revolutionary changes in the late Cold War. The Army that overran Saddam Hussein's Legions in four days was the product of important changes stimulated both by social changes and institutional reform. The 1st Infantry Division reflected benefits of those changes, despite its low priority for troops and material. The Division was not an elite formation, but rather excelled in the context of the Army as an institution." This book begins with a preface by Gordon R. Sullivan, General, USA, Retired. In twelve chapters, author Gregory Fontenot explains the history of the 1st infantry Division from 1970 to 1991. In doing so, his fast-paced narrative includes elements to expand the knowledge of non-military readers. These elements include a glossary, a key to abbreviations, maps, nearly two dozen photographs, and thorough bibliography. The First infantry Division and the U.S. Army Transformed: Road to Victory in Desert Storm is published with support from the

First Division Museum at Cantigny.

In the Light of Evolution National Academy of Sciences 2009-12-30 Two Centuries of Darwin is the outgrowth of an Arthur M. Sackler Colloquium, sponsored by the National Academy of Sciences on January 16-17, 2009. In the chapters of this book, leading evolutionary biologists and science historians reflect on and commemorate the Darwinian Revolution. They canvass modern research approaches and current scientific thought on each of the three main categories of selection (natural, artificial, and sexual) that Darwin addressed during his career. Although Darwin's legacy is associated primarily with the illumination of natural selection in *The Origin*, he also contemplated and wrote extensively about what we now term artificial selection and sexual selection. In a concluding section of this book, several science historians comment on Darwin's seminal contributions. Two Centuries of Darwin is the third book of the In the Light of Evolution series.

Each installment in the series explores evolutionary perspectives on a particular biological topic that is scientifically intriguing but also has special relevance to contemporary societal issues or challenges. The ILE series aims to interpret phenomena in various areas of biology through the lens of evolution and address some of the most intellectually engaging, as well as pragmatically important societal issues of our times.

Evolutionary Essays Kyle Lance Proudfoot
2014-06-02 Evolutionary Essays Evolutionary Essays are essays which I started to write at York University in Toronto, Canada and finished the FREE Draft's on 05-02-2012. They are in the genres of Philosophy, Psychology, Politic's, Economic's, Religion, Culture, History and Evolution with a good dosage of Humor and Intellect. Evolutionary Essays is what I see as positive for this Planet and what is wrong

especially in the Modern Western Civilization's. This is not just pure optimism and will use sound, logical, argumentational and factual structures. This is also to dispel highly prevalent pessimisms and reveal realities, to regain constructive positivism which we have lost so many times nullifying our productivity; life is a sine wave, it is not about your success and failures but the fact you keep getting up again, it is not if you win or lose but how you fight your battles, it is not how you die but how you lived your life: Debts not paid in this one are incurred in the next one... This is to try and bring clarity and solutions from Observation and Experience, the distinct realm of Philosophy. This is a philosophical discourse, description and narration using logic, reason, reduction, deduction, facts and argumentation to provide a point of view with constructive criticism and suggestions for improvement which may be adopted and/or applied to Citizen's, Government's or Corporation's. A Philosopher's

position is to ask questions, not per se answer anything or be a Guide but rather point in the correct direction of the past, present and future giving no more than a Guideline for you can only find your own will and way. Where possible, though it is highly relative, one can try and reveal Truth. Like Light versus Shadow it will always win in the end... Truth is Commonality.

Quantum Nanosystems Mihai V. Putz
2014-09-19 The need for economically feasible and multifunctional materials becomes more acute as the natural physical and chemical resources reveal either their limits or reveal the difficulties and increasing costs in storage, transport, and conversion. This reference presents the work from contributors from various fields, of various ages and from different countries, creating a valuable collection of research that will advance the fundamental and innovative techniques of nanosystems and their interactions. The authors cover self-assembly, self-regenerating, storage, and directional

properties of intelligent materials. It helps readers respond to the challenges in this field.

Gravity's Shadow Harry Collins 2010-08-15
According to the theory of relativity, we are constantly bathed in gravitational radiation. When stars explode or collide, a portion of their mass becomes energy that disturbs the very fabric of the space-time continuum like ripples in a pond. But proving the existence of these waves has been difficult; the cosmic shudders are so weak that only the most sensitive instruments can be expected to observe them directly. Fifteen times during the last thirty years scientists have claimed to have detected gravitational waves, but so far none of those claims have survived the scrutiny of the scientific community. Gravity's Shadow chronicles the forty-year effort to detect gravitational waves, while exploring the meaning of scientific knowledge and the nature of expertise. Gravitational wave detection involves recording the collisions, explosions, and

trembling of stars and black holes by evaluating the smallest changes ever measured. Because gravitational waves are so faint, their detection will come not in an exuberant moment of discovery but through a chain of inference; for forty years, scientists have debated whether there is anything to detect and whether it has yet been detected. Sociologist Harry Collins has been tracking the progress of this research since 1972, interviewing key scientists and delineating the social process of the science of gravitational waves. Engagingly written and authoritatively comprehensive, *Gravity's Shadow* explores the people, institutions, and government organizations involved in the detection of gravitational waves. This sociological history will prove essential not only to sociologists and historians of science but to scientists themselves.

Against Odds Dominick Graham 1999-03-15
Professor Graham compares the performance of the British Army in the two world wars. He identifies as a source of failure in the First World War, Sir Douglas Haig's inability to adopt appropriate operations for his chosen strategy, or suitable tactics for the operations.

Montgomery usually avoided that mistake in the Second World War. Graham draws upon his own experience of combat to help the reader make a connection between the orders given to corps

and their effect on small units.

Light-Emitting Diodes (First Edition, 2003) E. Fred Schubert 2003-01-01 This book covers all aspects of the technology and physics of infrared, visible-spectrum, and white-light-emitting diodes (LEDs) made from III-V semiconductors. The book reviews elementary properties of LEDs such as the electrical and optical characteristics. The author also reviews advanced device physics including high-efficiency device designs, light extraction, radiative and non-radiative recombination dynamics, spontaneous recombination in resonant-cavity structures, and packaging. The reader is introduced to areas related to visible-spectrum and white LEDs such as human vision, photometry, colorimetry, and color rendering. Application of infrared and visible-spectrum LEDs in silica fiber, plastic fiber, and free-space communication is discussed. Extensive semiconductor material data, device design data, and analytic formulas governing the

operation of LEDs are provided. Exercises and illustrative examples are used to reinforce the topics discussed. An introductory chapter reviews the historical developments and milestones of LED research and development. This textbook will be of interest to scientists and engineers working on LEDs, notably in lighting, illumination and signage, and also to graduate students in electrical engineering, applied physics, and materials science.

With The 1st Marine Division In Iraq, 2003

Groen Michael S. 2018-11 With the 1st Marine Division in Iraq, 2003: No Greater Friend, No Worse Enemy"The events chronicled here capture the story of the Marines of the "Blue Diamond" as they prepared for war, conquered and army, and liberated a nation. From across America and beyond, they chose the demanding path, to become Marines. These Marines marched in the ranks of this national treasure that we call the 1st Marine Division. And, at a time when timid souls or cynical pundits grew

loudest, these men shouldered their weapons and moved without hesitation against the enemy. Our victory was not inevitable. It was the courage, unselfishness, and skill of the young men of Blue Diamond to whom we owe our victory."

Military Review 1992

Michael Balz John Chilton 2023-06-03 This book presents a review of the work of the architect Michael Balz, pioneer of concrete-shell architecture. It discusses his projects, both realized and unbuilt, many being designed in collaboration with the renowned Swiss engineer Heinz Isler. Profusely illustrated with original drawings and photographs, *Michael Balz: Shells and Visions* caters to the increasing interest in the design and construction of free-form reinforced concrete shells consequent on the advent of 3D modelling and form-finding software. The book describes architectural designs and practical construction issues to

motivate contemporary shell designers. Balz's experience of dealing with such difficulties as incompatibility with non-structural features and the insertion of windows into shells, and the assessment of buildings' long-term performance allow readers to learn more easily how to cope with such issues in their own work. The book introduces Michael Balz, his early work with other architects, including his work on pneumatic forms with Frei Otto, and his evolution into an exponent of organic architecture. It then discusses completed projects, including the outdoor Theater unter den Kuppeln (1976), Ballettsaal (1979) and Balz House (1981). Competitions Balz entered and unrealized shell projects also receive attention, as does his work on the urban scale, highlighting conceptual designs of mega-cities. His visionary megastructures encourage the exploration of innovative solutions for city spaces by architects faced with today's increased urbanization. Michael Balz: Shells and Visions will be of

interest to students and professionals in the fields of architecture, structural engineering, building and urban design. It's reflections on the cultural and contextual aspects of Balz's work will help the architectural historian to appreciate its long-term significance.

At First Light Walt Larimore 2022-04-19 What makes 2nd Lieutenant Phil Larimore's story special is what happened in World War II's closing days and the people—and horses—he interacted with in this Forrest Gump-like tale that is emotional, heartbreaking, and inspiring. Growing up in the 1930s in Memphis, Tennessee, Phil Larimore is the ultimate Boy Scout—able to read maps, put a compass to good use, and traverse wild swamps and desolate canyons. His other great skill is riding horses. Phil does poorly in school, however, leading his parents send to him to a military academy. After Pearl Harbor, Phil realizes he is destined for war. Three weeks before his eighteenth birthday, he becomes the youngest candidate to

ever graduate from Officer Candidate School (OCS) at Fort Benning, Georgia. Landing on the Anzio beachhead in February 1944, Phil is put in charge of an Ammunition Pioneer Platoon in the 3rd Infantry Division. Their job: deliver ammunition to the frontline foxholes—a dangerous assignment involving regular forays into No Man's Land. As Phil fights his way up the Italian boot, into Southern France and across the Rhine River into Germany, he is caught up in some of the most intense combat ever. But it's what happens in the final stages of the war and his homecoming that makes Phil's story incredibly special and heartwarming. An emotional tale of courage, daring, and heroism, *At First Light* will remind you of the indomitable human spirit that lives in all of us.

True at First Light Ernest Hemingway
2014-05-22 Both revealing self-portrait and dramatic fictional chronicle of his final African safari, Ernest Hemingway's last unpublished work was written when he returned from Kenya in 1953. Edited by his son Patrick, who accompanied his father on the safari, *True at First Light* offers rare insights into the legendary American writer. A blend of autobiography and fiction, the book opens on the day his close friend Pop, a celebrated hunter, leaves Ernest in charge of the safari camp and news arrives of a potential attack from a hostile tribe. Drama continues to build as his wife, Mary pursues the great black-maned lion that has become her obsession. Spicing his depictions of human longings with sharp humor, Hemingway

captures the excitement of big-game hunting and the unparalleled beauty of the scenery—the green plains covered with gray mist, zebra and gazelle traversing the horizon, cool dark nights broken by the sounds of the hyena's cry. As the group at camp help Mary track her prize, she and Ernest suffer the “incalculable casualties of marriage,” and their attempts to love each other well are marred by cruelty, competition and infidelity. Ernest has become involved with Debba, an African girl whom he supposedly plans to take as a second bride. Increasingly enchanted by the local African community, he struggles between the attraction of these two women and the wildly different cultures they represent. In True at First Light, Hemingway also chronicles his exploits—sometimes hilarious and sometimes poignant—among the African men with whom he has become very close, reminisces about encounters with other writers and his days in Paris and Spain and satirizes, among other things, the role of organized

religion in Africa. He also muses on the act of writing itself and the author's role in determining the truth. What is fact and what is fiction? This is a question that was posed by Hemingway's readers throughout his career and is one of his principal subjects here. Equally adept at evoking the singular textures of the landscape, the thrill of the hunt and the complexities of married life, Hemingway weaves a tale that is rich in laughter, beauty and profound insight. True at First Light is an extraordinary publishing event—a breathtaking final work from one of this nation's most beloved and important writers.
