Using WordPerfect 6.0 for DOS Verlene Leeburg 1994 This comprehensive software application tutorial introduces WordPerfect 6.0 for DOS word processing software for the IBM family of computers. It is intended for those at beginning to intermediate skill levels. The work can fit either a full semester course or the lab portion of an introduction to computers course. Each lesson begins with objectives, defines word processing functions and displays keystrokes and menu commands. The text's step-by-step instruction and screen displays aid student progress. A student data disk (3.5 ins IBM) and packaged with the instructor's manual allows students to complete the exercises without having to enter the data first.

The ABC's of Quattro Pro for Windows Alan Simpson 1998-12 This book is written for those

who are not familiar with computers, computer terminology or other spreadsheets. It is designed so that the user can start to use Quattro Pro immediately without having to wade through a 700 page manual of details and technical information. The book is written in scenario style, bringing in the different elements of the program as you would normally seek to use them. The first four chapters offer a step-by-step approach, in plain English, that introduces you to Quattro Pro's capabilities quickly and easily. Later chapters discuss ways to edit entries, manipulate data, and handle blocks of data elegantly and easily-as well as how to graph and print data and use them in a database.

First Look At-- Harvard Graphics 3.0 for DOS Alan Skinner 1993 This software application tutorial provides a brief, hands-on text, focusing on the most commonly used features of Harvard Graphics 3.0 for DOS presentation graphics software. Harvard Graphics combines advanced charting, drawing and presentation tools to allow users to choose the charting format. Step-by-step instructions explain each feature of software and screen displays and review exercises are included to monitor students' progress.

First Look At-- Paradox for Windows Bret R. Ellis 1994 This hands-on, step-by-step instruction text focuses on the most commonly used features of this database software, and teaches techniques that exploit the advantages of the software's

visual orientation. Students should gain fundamental proficiency in a short time, and their progress is monitored by screen displays, review exercises, and projects. A summary of commands, thorough index and trouble-shooting section are included for easy reference. It is intended to be used as a stand-alone text in a brief Paradox for Windows course or as a supplement in an introduction to computers or database management course.
