### **Tactical Aircraft Programs** Curt Weldon

1998-06 Hearing on the DoD's tactical aircraft programs, primarily the F-22, the F/A-18E/F, and the joint strike fighter. Desert Storm showed that an effective tactical air power component of the military is fundamental for our national military strategy. In the past, billions of dollars were spent developing aircraft we didn't procure or an aircraft we procured in quantities too little to justify the developmental costs. DoD faces an annual procurement shortfall of \$20 billion and a projected increase in infrastructure costs of \$26 billion between 1997 and 2001. Testimony from: DoD; Joint Chiefs of Staff; CBO, and the GAO. Includes schedules, and cost charts for aircraft.

#### Love at First Sight Wislawa Szymborska

2022-11-08 A poem by the winner of the Nobel Prize for Literature, illustrated for readers of all ages that will challenge assumptions about falling in love. They're both convinced / that a sudden passion joined them. Such certainty is beautiful, / but uncertainty is more beautiful still. *Love at First Sight* is a poem about love and chance and destiny by the 1996 Polish winner of the Nobel Prize for Literature. Illustrated by Italian artist Beatrice Gasca Queirazza, Szymborska's poem comes to life in entirely new ways for her readers and for lovers everywhere in this oversized book perfect for gift giving. Szymborska tells of two young lovers bound together in an instant—or were they? As the poem unfolds, the reader's assumptions—like those of the lovers themselves—about certainty and destiny are utterly upended, revealing the paradox and mystery of fate. Here is randomness, tricks of memory, and chance, where noticing the smallest details of our intertwined lives is more essential than asking, Are we meant for each other? "Every beginning / is only a sequel, after all..."

#### Target Costing and Value Engineering Robin

Cooper 2017-10-19 What would happen if everyone in your company followed a disciplined approach to cost reduction? Go ahead -- imagine

it. What would it look like? How can it be done? The answer -- smart cost management. Effective cost management must start at the design stage. As much as 90-95% of a product's costs are added in the design process. That is why effective cost management programs focus on design and manufacturing. The primary cost management method to control cost during design is a combination of target costing and value engineering. Target Costing Objectives: Identify the cost at which your product must be manufactured at if it is to earn its profit margin at its expected target selling price. Break the target cost down to its component level and have your suppliers find ways to deliver the components they sell you at the set target prices while still making adequate returns. Value Engineering: The connection to function: An organized effort and team based approach to analyze the functions of goods and services that the design stage, and find ways to achieve those functions in a manner that allows the firm to meet its target costs. The result: Added value for your company (development costs on-line with added value for your company; development costs on-line with selling prices) and added value for your customer (higher quality products that meet, possibly even exceed, customer expectations.)

Harper's New Monthly Magazine 1852 Harper's Magazine made its debut in June 1850, the brainchild of the prominent New York book-publishing firm Harper & Brothers. Harper's Magazine, the oldest general-interest monthly in America, explores the issues that drive our national conversation, through long-form narrative journalism and essays, and such celebrated features as the iconic Harper's Index. With its emphasis on fine writing and original

thought Harper's provides readers with a unique perspective on politics, society, the environment, and culture.

**Hegemony and Culture in the Origins of NATO Nuclear First-Use, 1945-1955** A.

Johnston 2005-11-18 Johnston argues that the preemptive first-use of nuclear weapons, long the foundation of American nuclear strategy, was not the carefully reasoned response to a growing Soviet conventional threat. Instead, it was part of a process of cultural 'socialization', by which the United States reconstituted the previously nationalist strategic cultures of the European allies into a seamless western community directed by Washington. Building a bridge between theory and practice, this book examines the usefulness of cultural theory in international history.

*The Airbus A380* Graham Simons 2014-08-13 Every 7 minutes, an A380 takes off or lands somewhere in the world...??The Airbus was initially designed and developed in order to provide a contender to the Boeing's growing monopoly of the skies in the biggest large-aircraft market in the world. Ambitious in design, the undertaking seemed mammoth. Yet scores of aviation engineers and pilots worked to get the design off the ground and the Airbus in our skies. This double-decker, wide-body, 4 engine jet airliner promised to redefine expectations when it came to commercial flight. Five years on from its launch, Graham Simons provides us with this, an impressively illustrated narrative history of the craft, its achievements, and the legacy it looks set to provide to a new generation of aviation engineers, enthusiasts and passengers.??Operated by airlines such as Emirates, Singapore Airlines, Quantas and Lufthansa, the story of the A380 could be said to represent the story of modern-day travel itself, characterised by major technological advances across the world that constantly push the boundaries of expectation. ??Sure to appeal

broadly across the market, this is very much a commemorative volume, preserving the history of this iconic craft in words and images.

Flying Fast Jets David G. Newman 2017-11-01

This book provides a detailed general overview of the human factors and performance limitations associated with flying fast jets, integrating all the latest available research literature on the demanding operational tasks faced by such pilots and aircrews. As such, it has a strong military focus, dealing with pilots of fighter aircraft, attack aircraft and lead-in fighter trainer aircraft that are traditionally only single or dual pilot operations. The book deals not only with the issue of G force, but discusses ejection and escape/survival, disorientation, high altitude physiology, pilot training and selection, helmet-mounted equipment, situational awareness, data fusion and multi-sensor integration, human machine interface issues and advanced cockpit design. It examines the human performance issues associated with the technological advances made in fast jets, such as increased manoeuvrability, increased use of the pilot's head as a mounting platform for sensor and weapons systems, and the complexities involved in the human-machine interface within these aircraft.

**Critical Care and Hospitalist Medicine Made Ridiculously Simple** Michael Donahoe, M.D.

2022-03-15 COVID-19 EDITION! \*The major update to this book is the addition of a brand new chapter on the SARS-COV-2 Virus and COVID-19 disease. This chapter delves into the nature of the virus and clinical management of COVID-19 in the ICU such as: - SARS-COV-2 Virus genetic makeup - SARS-COV-2 Virus structural components - Infectivity within the body - Transmission between individuals - Timeline of infectivity - Symptoms - Risk factors -

Different laboratory testing methods - Radiology findings in the infected - Different PPE and their usefulness - Names and method of actions of all vaccines approved - Therapeutics for COVID-19 such as: antiviral therapies, plasma treatment, monoclonal antibody therapy, anticoagulation and anti-inflammatory therapy

A fundamental and thorough guide to the treatment of hospitalized patients in critical care situations, *Critical Care and Hospitalist Medicine Made Ridiculously Simple* provides both introductory information as well as a complete base of knowledge that will be useful from medical student, to resident, to fellow, to practicing intensivist, hospitalist, internist, and specialists all charged with caring for patients in the ICU and Emergency Department, as well as the wards, as critical care situations arise throughout the hospital, wherever the hospitalist practices. The current and practical content is organized in a logical conceptual manner, using plain English for rapid assimilation of information, and focusing on critical care facts and approaches required to keep the critically ill patient alive and thriving. Topics include: The Art of Patient Presentation, Approach to Acute Care Chest Radiology with the Top Ten X-ray Bad Guys, goals and findings of Point of Care Ultrasound, Sepsis and Resuscitation, Management of Tachyarrhythmias, Running a Code, Hemodynamic Monitoring, Acute Coronary Syndromes, Acute Decompensated Heart Failure, High Systemic Arterial Blood Pressure, Pulmonary Thromboembolic Disease, Basic Airway Management, Acute Respiratory Failure, Mechanics of Respiratory Failure, Mechanical Ventilation, Acute Respiratory Distress Syndrome, Obstructive Lung Disease and Respiratory Failure, Weaning From Mechanical Ventilation, Bleeding Clotting and Hematological Emergencies, Transfusion Medicine, Acute Kidney Injury, GI Bleeding, Acid-Base Disorders, Drug Overdose, and Neurologic Emergencies. Despite its in-depth treatment of Critical Care, the book is written in the reader-friendly and often humorous style of other *Made Ridiculously Simple* publications.

**The Vaulted Sky** Richard Moffa 2009-09-28 The flying business seizes Patrick Montalto at an early age. A young, Italian-American from New York, his earliest memories of a fragile biplane avoiding a disastrous end on a summers day in the country provide the single-minded impetus to an improbable journey. It starts when his father and a friend chip in for a harmless airplane ride from a small grass airstrip in the Westchester hills. It is a coming of age journey as Patrick learns to fly on that field during a Depression that doesnt allow for many dreams. As the Second World War engulfs Europe, it takes Patrick to a barely clandestine British operation to recruit American flyers, where he has to choose between one dream of the sky and another of a college education.

[Issues in Science and Theology: What is Life?](#) Dirk Evers 2015-06-03 This book explores the concept of Life from a range of perspectives. Divided into three parts, it first examines the concept of Life from physics to biology. It then presents insights on the concept from the perspectives of philosophy, theology, and ethics. The book concludes with chapters on the hermeneutics of Life, and pays special attention to the Biosemiotics approach to the concept. The question 'What is Life?' has been deliberated by the greatest minds throughout human history. Life as we know it is not a substance or fundamental property, but a complex process. It is not an easy task to develop an unequivocal approach towards Life combining scientific, semiotic, philosophical, theological, and ethical perspectives. In its combination of these perspectives, and its wide-ranging scope, this book opens up levels and identifies issues which can serve as intersections for meaningful interdisciplinary discussions of Life in its different aspects. The book includes the four plenary lectures and selected, revised and extended papers from workshops of the 14th European Conference on Science and Theology (ECST XIV) held in Tartu, Estonia, April 2012.

Mission Road Theodore Iliff 2021-09-21 Mission Road: A Journalist's Life from Kansas to Kandahar By: Theodore Iliff In the intimidating and breathtaking Black Forest in Germany, six-year-old Ted Iliff came to a conclusion that would shape his entire adult life: He wants to explore as much of the world as he possibly can. In his gripping and highly entertaining memoir Mission Road: A Journalist's Life from Kansas to Kandahar, Iliff shares his journey from being a young and reckless student-journalist at the University of Kansas to joining CNN during its critical developing stages. After reaching his personal goals in both print and broadcast journalism, Ted made the leap to the unlikely path of consulting and teaching, leading him to every corner of the world, from Kosova to Baghdad. Alongside the arc of his own career, Iliff gives a unique insight into the transformation of journalism at the dawn of the twenty-first century, and how it changed through major events like 9/11 and the Iraq and Afghanistan wars.
