**Drawing on America's Past** 2002 This book presents watercolor renderings along with a selection of the artifacts in the Index of American Design, a visual archive of decorative, folk, and popular arts made in America from the colonial period to about 1900. Three essays explore the history, operation, and ambitions of the Index of American Design, examine folk art collecting in America during the early decades of the twentieth century, and consider the Index's role in the search for a national cultural identity in the early twentieth-century United States.

**At Home in Exile** Helga M Griffin 2021-02-16 This is a story of a girl's construction of her identity, and of her family's search for a place in the world, for the Heimat that is so resonant for those of German background. We follow Helga through an adventurous childhood in Iran, whose vast open spaces her mother called 'my spiritual home'. Her engineer father worked on a grand scale, designing and laying roads and railways, and tunnelling through mountain ranges. Then came the invasions of World War II, and the family, half-German, half-Austrian, found themselves on a long voyage to Australia, designated enemy aliens. They were interned for nearly five years in the dusty Victorian countryside. On their release at the end of the War, stranded in Melbourne, they sought another home. The children were dispatched to convents, and at the Academy of Mary Immaculate, Helga found a temporary homeland, in faith. Everyday life in the Australia of the late 1940s and early 1950s is freshly seen by this feisty, loving migrant family. Through their eyes, we encounter a strange place, Australia, as if for the first time. Helga's development from a thoughtful, sensitive child to a self-possessed young woman, wrestling with her faith and with how to live a decent life, is vividly recounted.

*Copper and Copper Mining* R. L. Atkinson 1987 Man has won copper from the earth for about 10,000 years. As pure metal it could be hammered into weapons or tools, and the accidental discovery of smelting and alloying led to harder and more durable materials such as bronze and brass. Copper is found in almost two hundred minerals, many of them beautifully coloured and highly prized by collectors. Today copper is mined all over the world in underground mines and vast open pits. It is a very versatile metal; it resists corrosion, is malleable and ductile and is an excellent conductor of heat and electricity. In the British Isles copper has been mined since pre-Roman times. Two areas dominated copper production during the eighteenth and nineteenth centuries: Devon and Cornwall, in south-west England, and Parys Mountain, in Anglesey, were the greatest copper producers in the world. The spectacular ruins - and the scars - can still be seen.

**Black Swan Green** David Mitchell 2007-02-27 By the New York Times bestselling author of *The Bone Clocks* and *Cloud Atlas* | Longlisted for the Man Booker Prize Selected by Time as One of the Ten Best Books of the Year | A New York Times Notable Book | Named One of the Best Books of the Year by The Washington Post Book World, The Christian Science Monitor, Rocky Mountain News, and Kirkus Reviews | A Los Angeles Times Book Prize Finalist | Winner of the ALA Alex Award | Finalist for the Costa Novel Award From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. *Black Swan Green* tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepest village in muddiest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys' games on a frozen lake; of "nightcreeping" through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an

elderly bohemian emigré who is both more and less than she appears; of Jason's search to replace his dead grandfather's irreplaceable smashed watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher's recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-motion divorce in four seasons. Pointed, funny, profound, left-field, elegiac, and painted with the stuff of life, *Black Swan Green* is David Mitchell's subtlest and most effective achievement to date. Praise for *Black Swan Green* "[David Mitchell has created] one of the most endearing, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like."—The Boston Globe "[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon and Herman Melville, one feels the roof of the narrative lifted off and oneself in thrall."—Time

**Quarries and Quarrying** Peter Stanier 2009-10-20 Whether they are still operational or long abandoned, quarries are often dismissed as eyesores. Despite this, they can be fascinating to visit, and provide an interesting link to a once powerful and necessary industry. Although the Romans worked quarries, it was not until the middle-ages that the industry became established on a large scale. It then achieved its height during the nineteenth century in response to industrialization and the associated demand for stone. The book deals with the extraction methods of various types of stone and the rise and slow decline of quarrying across the UK. While telling the history of quarrying it also covers some of the most famous and notable quarrying sites.
