Natural Fingering Jon Verbalis 2012-04-06 Though incomplete at the time of his death in 1849, Chopin's *Projet de méthode* was nonetheless revolutionary in many respects. But with his *Fundamental Pattern*, Chopin announced the recognition, if not discovery, of the keyboard's extraordinary topographical symmetry and postulated a core formulation for a new "pianistic" pedagogy. More than a hundred years later the now-legendary Heinrich Neuhaus would passionately plead for this pedagogy and a pianism rooted in it. *Natural Fingering* explores this remarkable symmetry, significantly as it sheds light on fingering matters for the now vast catalogue of repertoire. It also examines the revolutionary impact of equal temperament on compositional key choice as well as the liberating influence of Charles Eschmann-Dumur's unique discoveries regarding symmetrical inversion. Author Jon Verbalis develops principles for a topographically-based fingering strategy that reflect a surprising compatibility of this fixed symmetrical organization with the most efficient biokinetic capabilities of the pianist's playing mechanism. He addresses previously neglected or overlooked technical aspects of pianism as

they relate to movement in keyboard space generally as well as fingering specifically. Symmetrical fingerings for all the fundamental forms are presented in innovative, instructive format. The reader will also find an unusually extensive, in-depth discussion of double note challenges. Answering Neuhaus's call for the reappraisal of a certain pedagogical status quo, several chapters are devoted to the relevant implications of Chopin's *Fundamental Pattern*. The author also advances guidelines for a progressive implementation of natural fingering principles from the very start, as well as "retooling" for teachers and students alike. Of special note are the cross-hand major and minor scales for the earliest stages, in which the necessity of thumb under/hand over pivoting actions is eliminated. *Natural Fingering* is the first comprehensive discussion of fingering solutions for pianists since Hummel's monumental treatise of 1828. The book is complemented by a companion website, which serves as a supplement to the printed edition. The website features copious excerpts from the extant repertoire, extended discussions on relevant topics, and a comprehensive manual of the fundamental forms with symmetrically adjusted fingerings.

The Child's First Steps in Pianoforte Playing Tobias Matthay 2020-07-14 First published in 1920, this book contains a fantastic guide to teaching piano playing for music teachers, written by Tobias Matthay. Tobias Augustus Matthay (1858 - 1945) was an English pianist, composer, and teacher. He was taught composition while at the Royal Academy of Music by Arthur Sullivan and Sir William Sterndale Bennett, and he was instructed in the piano by William Dorrell and Walter Macfarren. Contents include: "Method in its Good and Its Bad Sense", "Fad-Methods to be Avoided", "Method in its Helpful Sense", "Cramming v. Teaching", "Method v. Teaching Devices",

"Example of Method in Teaching, Fore-am Rotation", "Repetition of Formulae Useless, Knowledge of Facts Essential", etc. This timeless handbook will be of considerable utility to piano teachers and students alike, and it would make for a worthy addition to allied collections. Other notable works by this author include: "The Act Of Touch In All Its Diversity" (1903), "The First Principles of Pianoforte Playing (1905)" and "Relaxation Studies" (1908). Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

The Pedagogical Writings of Marguerite Long John Ellis 2024-03-05 Marguerite Long,

the most important French female pianist of the 20th century, left her stamp on a whole epoch of musical life in Paris. The Pedagogical Writings of Marguerite Long presents English translations of the two major contributions of Marguerite Long to the literature of piano pedagogy. These translations of her pedagogical works, *Le Piano* and *La Petite Méthode de piano*, provide a window to the old French school of pianism as modernized by Long. *Le Piano* is a remarkable text offering piano playing techniques and pragmatic and philosophical musings and observations about life, musicians, careers, and more. *La Petite Méthode de piano* is a personal manifesto about how to introduce children to music. Both works are treasures revealing Long's lifelong commitment to teaching and they are still stunningly relevant. In addition, John Ellis analyzes each work and puts it in historical context. He places special emphasis on Long's illustrious international career, her teaching, her rivalry with Alfred Cortot, and the impact of sexism on her life and work. Ellis addresses the eclipse of Long's reputation by that of Cortot and fills a gap in the knowledge of Long's place in the history of pedagogical heritage.

No More Theories Please! L. K. Masao
2009-01-16 No More Theories Please!: A Guide for Elementary Teachers is a classroom management guide for current and prospective elementary classroom teachers. In the book Masao discuss the 3 Rs of management—rules, routines, and reinforcement—as well as behavior management plans and organization. Some chapters provide templates of management systems that the author created and implemented successfully in her own classroom. Unlike many other education texts, this book

does not speak in theoretical terms. Rather it provides a how-to guide that clearly defines each strategy and procedure. The book is divided into three sections: organization; routines, rules, and reinforcement; and classroom behavior management systems. Each section has three or four chapters and provides tangible and pragmatic steps that can be taken to create the structured environment desired. Masao writes with a conversational tone, guiding the reader through the process.

Mastery for Strings, Level 2 William Dick

Mastery for Strings presents a unique, efficient methodology for developing high levels of proficiency in string players in both classroom and private studio settings. Cornerstones of the Mastery for Strings approach are: a curriculum design for large heterogeneous string classes, technical skills organized in small, sequential steps, "how-to" pages with clear goals, explicit instructions, and recognizable evaluation criteria for each technical skill, a plan for developing problem-solving strategies and self-evaluation skills, music theory (fingerboard geography) taught without reference to the piano keyboard.

India and the South Asian Strategic

Triangle Ashok Kapur 2010-12-14 This book traces the triangular strategic relationship of India, Pakistan and China over the second half of

the twentieth century, and shows how two enmities – Sino-Indian and Indo-Pakistani – and one friendship – Sino-Pakistani – defined the distribution of power and the patterns of relationships in a major centre of gravity of international conflict and international change. The three powers are tied to each other and their actions reflect their view of strategic and cultural problems and geopolitics in a volatile area. The book considers internal debates within the three countries; zones of conflict, including northeast and northwest south Asia, the Himalayas and the Indian Ocean; and the impact of developments in nuclear weapons and missile technology. It examines the destructive consequences of China's harsh methods in Tibet, of China's encouragement of military rather than democratic regimes in Pakistan, and of China's delay in dealing with the border disputes with India. Ashok Kapur shows how the Nehru-Chou rhetoric about "peaceful co-existence" affected the relationship, and how the dynamics of the relationship have changed significantly in recent years as a range of new factors - including India's increasing closeness to the United States - have moved the relationship into a new phase.
