Hearing, smelling, seeing, touching, tasting--our five senses allow us to experience the world in so many ways! With our ears we hear the birds sing; with our nose we smell the stinky cheese; with our eyes we see the moon and stars (and sometimes glasses help us see even better!); with our skin we feel the rain (and learn not to touch the hot stove!); and with our tongue we can taste our favorite foods. Isadora's lively art reveals the power and delight of each sense.

**The Five Senses** Michel Serres 2016-10-20 Marginalized by the scientific age the lessons of the senses have been overtaken by the dominance of language and the information revolution. With *The Five Senses* Serres traces a topology of human perception, writing against the Cartesian tradition and in praise of empiricism, he demonstrates repeatedly, and lyrically, the sterility of systems of knowledge divorced from bodily experience. The fragile empirical world, long resistant to our attempts to contain and catalog it, is disappearing beneath the relentless accumulations of late capitalist society and information technology. Data has replaced sensory pleasure, we are less interested in the taste of a fine wine than in the description on the bottle's label. What are we, and what do we really know, when we have forgotten that our senses can describe a taste more accurately than language ever could? The book won the inaugural Prix Médicis Essai in 1985. The Revelations edition includes an introduction by Steven Connor.
