The Fixed Stars and Constellations in Astrology Vivian Robson 2005-03 Ancient astrologers declared stars "fixed" to distinguish them from wandering stars, which they called planets. This book is the distillation of two thousand years of astrological research. It is a comprehensive survey of fixed stars in natal & mundane astrology, the stars & constellations of medieval magic, and fixed stars in astrometeorology. Robson gives their traditional meanings & their effects when combined with planets & angles. Convenient tables & a comprehensive index make this volume easy to use. Included are some 110 named stars, as well as 48 ancient constellations & 60 modern ones. Arabic, Chinese & Hindu lunar mansions are also discussed. Since its first publication in 1923, this book has been the classic on fixed stars, the one to which everyone since has referred. About the author: Vivian Erwood Robson, 1890 - 1942, was a librarian by trade. Like many librarians he had a natural bent for research, and, in his particular case, astrology. He studied ancient astrologers closely, including Ptolemy & William Lilly. His books on fixed stars, electional astrology & relationships are 20th century classics. ar
Fixed Stars and Their Interpretation Ebertin-Hoffmann 2009-12 The basis for this book was a publication by Elsbeth Ebertin entitled *Sternenwandel und Weltgeschehen*. It contained cases of her own investigations and records. Her son, Reinhold Ebertin, and Georg

Hoffman, Elsbeth's coworker, edited the text and added many new sources of information. Like Ptolemy's astronomical handbook, *Almagest*, this is the basis for much of the current information on fixed stars.

Modern astrologers recognized that fixed stars carry an influence into the horoscope if conjunction a natal planet by longitude and even more so if by latitude. A prominent star on the Ascendant or Midheaven is said to be an indication of recognition achieved in the lifetime. The character of the star indicates the kind of influence the aspect will have. This book contains 73 major stars and describes their essential nature.

The Fixed Stars Molly Wizenberg 2020-08-04 The New York Times-bestselling author's thoughtful and provocative memoir of changing identity, complex sexuality, and enduring family relationships. At age thirty-six, while serving on a jury, author Molly Wizenberg found herself drawn to a female attorney she hardly knew. Married to a man for nearly a decade and mother to a toddler, Wizenberg tried to return to her life as she knew it, but something inside her had changed irrevocably. Instead, she would discover that the trajectory of our lives is rarely as smooth or as logical as we'd like to believe. Like many of us, Wizenberg had long understood sexual orientation as a stable part of ourselves: we're "born this way." Suddenly she realized that her story

was more complicated. Who was she if something at her very core could change so radically? Wizenberg forges a new path: through separation and divorce, coming out to family and friends, learning to co-parent a young child, and realizing a new vision of love. *The Fixed Stars* is a "spirited, terrifyingly courageous" memoir exploring timely and timeless questions about desire, identity, and the limits and possibilities of family (Booklist).

Hellenistic Astrology Chris Brennan 2017-02-10 Hellenistic astrology is a tradition of horoscopic astrology that was practiced in the Mediterranean region from approximately the first century BCE until the seventh century CE. It is the source of many of the modern traditions of astrology that still flourish around the world today, although it is only recently that many of the surviving texts of this tradition have become available again for astrologers to study. *Hellenistic Astrology: The Study of Fate and Fortune* is one of the first comprehensive surveys of this tradition in modern times. The book covers the history, philosophy, and techniques of ancient astrology, with a special focus on demonstrating how many of the fundamental concepts underlying the practice of western astrology originated during the Hellenistic period.

EVERY MAN IS A STAR In search of our Mother Star: the identification of the stellar signifiers in a birth chart Giacomo Albano 2019-06-11

The constellations and the fixed stars are the true origin and the foundation of astrology. Paracelsus claimed that each of us is the manifestation of a star, but by this we mean a certain cosmic principle, one of the ideas; this idea is also typical of a certain star, but we have not derived it from the star, it is only that we are related to it and therefore we attract each other. Thus we understand the importance of the techniques shown in the first part of this book for identifying stellar and planetary signifiers in a birth chart. We will see how to identify the constellations, the fixed stars and also the planets with which the native is in particular "sympathy" and how to use them both in the common astrological practice, both in spiritual or magical astrology. In the following the book deals with the relevance of the heliacal phases in

world astrology. The last chapter focuses on the analysis of sympathetic attraction mechanisms between terrestrial and celestial realities.

The Fixed Stars and Constellations in Astrology - A Practical

Application Johan Ligteineigen 2019-09-26 The author takes you on a journey through the stars and constellations that have been present in the sky for thousands of years and that have been a subject of fascination for astrologers for centuries. In order to learn about the influences of the individual stars on a human in a calculated horoscope, a knowledge of the constellations to which they belong, is required. With many examples of birth charts of well-known people, it is shown how the constellations act when one or more planets from the birth chart are in conjunction with the individual stars of that constellation. How the individual fixed stars work in a horoscope is described in great detail by means of many examples, accompanied by numerous pictures. A "revelation" of the well-known "Via Combusta" from horary astrology is presented in one of the chapters. Also some room has been created for the significance of individual stars and constellations in mundane astrology, which tries to explain events in cities and countries.

Fixed Stars in the Chart Oscar Hofman 2019-10-10 Internationally renowned teacher Oscar Hofman uses 24 case studies to demonstrate how the rich symbolism and myths behind the fixed stars can add a deeper and more spiritual dimension to astrological chart delineation. Formula 1 driver Nikki Lauda had his notorious accident in which he suffered serious burns to his face, when the fixed star Achernar was activated by progression. This star is connected to the story of Phaeton who, overestimating his powers, tried to steer the solar chariot through the heavens, lost control and came down in flames. In the chart of Nicolai Tesla, unsurpassed genius in electrical design and invention, the Sun is on the fixed star Castor on the IC; Castor is the dying brother of the famous heavenly twins Castor and Pollux. One of the critical events in Tesla's youth was the death of his elder brother who was killed by a horse. The heavenly Twins, represented in the zodiac by the sign Gemini,

are known as horse tamers.

Fixed Stars and Judicial Astrology George Noonan 1990 Perhaps the least understood and most misused elements in astrology today are the fixed stars. Current practice is to consider the stars as no more than mini-manifestations of the planets whose nature they are presumed to hold. The locations of the stars projected onto the ecliptic are then considered valid points for aspectual relationships. No special significance is attributed to the non-zodiacal constellations; nor is a star's location within a constellation given any weight whatsoever. Finally, modern astrology places no distinction on the use of the stars and constellations in genethliacal astrology and the other branches of the ancient art. In this book the natures of the fixed stars and constellations as known by the classicists are discussed in detail. Methods of delineating the fixed stars are indicated, with special emphasis on the applications to judicial astrology. Included are chapters on the nature of the fixed stars; the northern, southern and zodiacal constellations; genethliacal applications of the fixed stars; judicial astrology; and three appendices with information on mathematics and rulership and a complete listing of the fixed stars.

The Witness of the Stars Ethelbert William Bullinger 1928 Some years ago it was my privilege to enjoy the acquaintance of Miss Frances Rolleston, of Keswick, and to carry on a correspondence with her with respect to her work, *Mazzaroth: or, the Constellations*. She was the first to create an interest in this important subject. Since then Dr. Seiss, of Philadelphia, has endeavoured to popularize her work on the other side of the Atlantic; and brief references have been made to the subject in such books as *Moses and Geology*, by Dr. Kinns, and in *Primeval Man*; but it was felt, for many reasons, that it was desirable to make another effort to set forth, in a more complete form, the witness of the stars to prophetic truth, so necessary in these last days. To the late Miss Rolleston, however, belongs the honour of collecting a mass of information bearing on this subject; but, published as it was, chiefly in the form of notes, unarranged and unindexed, it was suited only for, but was most valuable to, the student. She it was who performed the drudgery of collecting the facts presented by Albumazer, the Arab astronomer to the Caliphs of Grenada, 850 a.d.; and the Tables drawn up by Ulugh Beigh, the Tartar prince and astronomer, about 1650 a.d., who gives the Arabian Astronomy as it had come down from the earliest times. Modern astronomers have preserved, and still have in common use, the ancient names of over a hundred of the principal stars which have been handed down; but now these names are used merely as a convenience, and without any reference to their significance. This work is an attempt to popularize this ancient information, and to use it in the interests of truth. For the ancient astronomical facts and the names, with their signification, I am, from the very nature of the case, indebted, of course, to all who have preserved, collected, and handed them down; but for their interpretation I am alone responsible. It is for the readers to judge how far my conclusions are borne out by the evidence; and how far

the foundation of our hopes of coming glory are strengthened by the prophecies which have been written in the stars of heaven, as well as in the Scriptures of truth.
