Using Computers in History M.J. Lewis 2005-11-23 Using Computers in History is designed to introduce students to historical computing through practical workshop

exercises. With topics such as the pattern of nineteenth century emigration from the UK, the performance of the American and German economies in the 1930s and the Lancashire cotton industry, Lloyd-Jones and Lewis explain and illustrate the possible uses of the computer for the historian. Using Computers in History: * raises awareness of the use of computers as an important tool for the historian * provides a practical introduction to basic computer terminology * includes high quality diagrams of the screen displays which should appear at each stage * examines the use of spreadsheets and how to design and work with them * discusses the different software packages available, concentrating on Microsoft Excel 4 * includes spreadsheet exercises based around a range of historical data sets * explores the use of

databases * shows how to construct them * gives guidelines for further study * prompts students to apply the skills they have learnt to a number of examples

A Mad, Bad, and Dangerous People? Boyd Hilton 2008-06-19 In a period scarred by apprehensions of revolution, war, invasion, poverty and disease, elite members of society lived in fear of revolt. Boyd Hilton examines the changes in society between 1783-1846 and the transformations from raffish and rakish behaviour to the new norms of Victorian respectability.

A Box of Sand Charles Stephenson 2014-12-19 This is the first book in the English language to offer an analysis of a conflict that, in so many ways, raised the curtain on the Great War. In September 1911, Italy declared war on the once mighty, transcontinental Ottoman Empire _ but it was an Empire in decline. The ambitious Italy decided to add to her growing African empire by attacking Ottoman-ruled Tripolitania (Libya).

The Italian action began the rapid fall of the Ottoman Empire, which would end with its disintegration at the end of the First World War. The day after Ottoman Turkey made peace with Italy in October 1912, the Balkan League attacked in the First Balkan War. The Italo-Ottoman War, as a prelude to the unprecedented hostilities that would follow, has so many firsts and pointers to the awful future: the first three-dimensional war with aerial reconnaissance and bombing, and the first use of armored vehicles, operating in concert with conventional ground and naval forces; war fever whipped up by the Italian press; military incompetence and stalemate; lessons in how not to fight a guerrilla war; mass death from disease and 10,000 more from reprisals and executions. Thirty thousand men would die in a struggle for what may be described as little more than a scatolone di sabbia _ a box of sand. As acclaimed historian Charles Stephenson portrays in this groundbreaking study, if there is an exemplar of the

futility of war, this is it. Apart from the loss of life and the huge cost to Italy (much higher than was originally envisaged), the main outcome was to halve the Libyan population through emigration, famine and casualties. The Italo-Ottoman War was a conflict overshadowed by the Great War _ but one which in many ways presaged the horrors to come. A Box of Sand will be of great interest to students of military history and those with an interest in the history of North Africa and the development of technology in war.

Flagship Hood Alan Coles 1988 Of the 1400 men on board HMS Hood on 24 May 1941, only 3 survived a German shell which blew Hood's reputation forever. The prestige ship of the Navy was overrated, her construction was flawed and out of date as soon as she was launched.

The Oxford History of British and Irish Catholicism, Volume V Alana Harris

2023-09-01 The fifth volume of The Oxford History of British & Irish Catholicism—covering the period from the Great War, through the Second World War and the Second Vatican Council—surveys the transformed ecclesial landscape between the papacies of Benedict XV and Pope Francis. It explores the efforts of bishops, priests and people in Ireland and Scotland, Wales and England to respond to modern challenges and reintegrate the experiences and expertise of the laity into the ministry of the Church. Alongside the twentieth century's designation as an era of technological innovation, war, peace, globalization, decolonization and liberation, this period has also been designated 'the People's Century'. Viewed through the lens of the Catholic church in Britain and Ireland, these same dynamics are explored within thematic, synoptic chapters by leading scholars. As a century characterized by

the rise, or better renewal of the apostolate of the laity, this edited collection traces the struggles to reconcile tradition, re-evaluate hierarchical authority, adapt to social and educational mobility, as well as to adjudicate serious challenges from outside and within—including inflammatory biopolitics and clerical sexual abuse—to religious belief and the legitimacy of the Church as an institution.

English History 1914-1945 A. J. P. Taylor

1965-10-21 During ten of the 31 years between 1914 and 1945 the English people were involved in world wars; for 19 of the years they lived in the shadow of mass unemployment. These themes and the politics which sprang from them shape the narrative of this book.

Navies in Modern World History Lawrence Sondhaus 2004-05-04 Navies in Modern World History traces the role of navies in history from the early nineteenth century, through both World Wars, to the dawn of the twenty-first century and beyond. In a series of case studies Lawrence Sondhaus examines the national fleets of Britain, France, Germany, the United States, Japan, Brazil, Chile and the Soviet Union, and demonstrates the variety of ways in which each country has made decisive use of naval power. In each case the author argues that the navy in question helped change the course of modern world history; he also systematically analyses the challenges navies faced in assembling matériel, training personnel and performing their mission. This book discusses the leading role of navies and shipbuilders in key technological innovations of the nineteenth and early twentieth centuries, including advances in

steam power, armor, artillery and torpedoes, and looks at aircraft carrier design and naval aviation in general in the second half of the twentieth century. It also explains how, today, technological breakthroughs are centered around naval stealth and maritime propulsion systems. Special attention is devoted to the evolving state of naval technology, and the book shows how the relative industrial capabilities of seafaring countries have been reflected in their maritime building programs, providing an important link between the evolution of modern national fleets and the broader history of the period.

The Ship that Changed the World Dan Van der Vat 2000 The exploits of the German battle cruiser Goeben at the outbreak of World War I changed the early course of the war and had a decisive impact on subsequent world history. Virtually alone in the Mediterranean, the Goeben eluded the French and British fleets and joined with Turkish forces, influencing Turkey to enter

the war on Germany's side. Ludendorff estimated that this prolonged World War I by two years.

The Routledge Companion to the History of Retailing Jon Stobart 2018-11-08 Retail history is a rich, cross-disciplinary field that demonstrates the centrality of retailing to many aspects of human experience, from the provisioning of everyday goods to the shaping of urban environments; from earning a living to the construction of identity. Over the last few decades, interest in the history of retail has increased greatly, spanning centuries, extending to all areas of the globe, and drawing on a range of disciplinary perspectives. By offering an up-to-date, comprehensive thematic, spatial and

chronological coverage of the history of retailing, this Companion goes beyond traditional narratives that are too simplistic and Euro-centric and offers a vibrant survey of this field. It is divided into four broad sections: 1) Contexts, 2) Spaces and places, 3) People, processes and practices and 4) Geographical variations. Chapters are written in an analytical and synthetic manner, accessible to the general reader as well as challenging for specialists, and with an international perspective. This volume is an important resource to a wide range of readers, including marketing and management specialists, historians, geographers, economists, sociologists and urban planners.

Flagship Marketing Tony Kent 2009-03-14 Flagships are the physical apogee of consumerism, places where brand experiences are most defined and interactions with consumers are highly refined. This book marks the first comprehensive study of the concept of the flagship, bringing together a range of

scholarly insights from the field, covering issues such as consumerism, areas of consumption and experimental marketing theory and practise. The ways in which flagship projects communicate brand values, both externally and internally, form an important part of this book, and provide new perspectives on late twentieth century commercial and cultural policy and practice. Kent and Brown offer a truly interdisciplinary approach to the concept, offering a variety of perspectives on the debates surrounding flagship function and its role as a place of consumption. Chapters focus on the development of prestigious stores, hotels and arts and cultural centres, as showcases for branded experiences and products and as demonstrations of commercial and public policy. Cases and examples include The Eden Project in the UK, automotive showrooms in Germany, hotels in Dubai and Las Vegas, and Vienna's cultural quarter. Theoretical discussion explores the tensions between costs and profitability,

conspicuous consumption and the sustainability of iconic forms. The book enables readers to explore the flagship concept from different perspectives, and while a marketing approach predominates, it provides a disciplinary challenge which will open up new ways of understanding the concept.

World War I Stewart Ross 2012-12-01 World War I describes how the major power struggles of Europe (supported by various colonial holdings and the British alliance with Japan) erupted into a global war that was marked by new forms of combat that included trench warfare, strategies of attrition, and the first use of airpower.

The Conway History of Seafaring in the Twentieth Century Alastair Dougal Couper 2000 This book presents a look at developments in ships and shipping over the last hundred years by drawing together all the events and achievements, triumphs in design and seamanship and the naval battles and marine

disasters, with eyewitness accounts, biographies and literary extracts to create a chronicle of life at sea.

Britain's Historic Ships Paul Brown

2016-10-06 The British Isles have a long, rich and celebrated seafaring history stretching from the earliest times through the victories of Drake and Nelson, the voyages of discovery of Cabot and Cook and the defence of the realm by vessels of all types in the present century. Much of this history is recorded in literature and in museums but reaches its most tangible form in the large number of historical ships that have been preserved and are continually restored as

monuments to a proud past. This lavish book explores 20 of the most celebrated and accessible ships and offers a comprehensive history of each vessel's design, construction, active service and subsequent restoration and preservation. Presented in order of each ship's launch date, each entry is written by the acknowledged expert on a particular vessel, gives full specification details and is sumptuously illustrated with contemporary photographs, historical illustrations and a full set of scale plans. In addition to the featured entries, an appendix presents all of the necessary contact details and opening times where applicable. The appendix also lists (and provides details for) other vessels of historical importance including a small number of working replicas such as the *Matthew* and the recently commissioned eighteenth-century frigate *The Grand Turk*, featured in the recent *Hornblower* television series. Principal vessels include: *Mary Rose*, *HMS Victory*, *HMS Trincomalee*, *SS Great*

Britain, Cutty Sark, RRS Discovery, HMS Warrior, HMS Belfast, HMY Britannia, HMS Alliance, HMS Cavalier, Gypsy Moth IV and HMS Plymouth.

into conflict periods, each chapter includes a detailed chronology, reference-entry sidebars, statistical information, primary-source documents, and a bibliography.

Libraries of Light Alistair Black 2016-10-04 For the first hundred years or so of their history, public libraries in Britain were built in an array of revivalist architectural styles. This backward-looking tradition was decisively broken in the 1960s as many new libraries were erected up and down the country. In this new Routledge book, Alistair Black argues that the architectural modernism of the post-war years was symptomatic of the age's spirit of renewal. In the 1960s, public libraries truly became 'libraries of light', and Black further explains how this phrase not only describes the shining new library designs - with their open-plan, decluttered, Scandinavian-inspired designs - but also serves as a metaphor for the public library's role as a beacon of social egalitarianism and cultural universalism. A sequel to Books,

Buildings and Social Engineering (2009), Black's new book takes his fascinating story of the design of British public libraries into the era of architectural modernism.

The British Working Class and Enthusiasm for War, 1914-1916 David Silbey 2005-01 "This book gives the answers in the words of the men who were there. Young and old, from cities and the country, single and married, they went to war willingly and then carried their experiences with them for a lifetime."--BOOK JACKET.

Conquer We Must Robin Prior 2022 A major new account of Britain's military strategy between 1914-1945, including the two world wars and everything between The First and Second World Wars were separated by a mere two decades, making the period 1914-1945 an unprecedentedly intense and violent era of history. But how did Britain develop its complex military strategy during these wars, and how were decisions made by those at the top? Robin Prior examines the influence politicians had on

military operations, in the first history to assess both world wars together. Drawing uniquely on both military and political archives and previously unexamined sources Prior explores the fraught relationships between civilian and military leaders: from Lloyd George's remarkably interventionist stance on military tactics during the First World War to Churchill's near-constant arguments with American leaders during the Second. Conquer We Must tells the complex story of this military decision-making, revealing how politicians attempted to control strategy--but had little influence on how the army, navy, and air force actually fought.
