DIETZ 2024-09-10 The Complete Language of Trees is a comprehensive encyclopedia providing the meanings, powers, facts, and folklore for over 400 types of trees--now in a pocket-size edition for easy, on-the-go reference. Along with a stunning visual depiction, each entry provides the tree's scientific and common name, characteristics, and historic and hidden properties from mythology, legends, and folklore. Discover the lore of trees, including: Hackberry Tree - encourages someone to continuously do their best Manchineel Tree - it is so toxic that the smoke from a burning tree can cause blindness, and it is not even advised to inhale the air around the tree Bark from the Bird Cherry Tree was placed on doors during medieval times to ward off plague Washi paper is created from the inner bark of the Paper Mulberry Tree. Pando is a Quaking Aspen colony that is 108 acres wide (about the size of 83 football fields!). It is technically one tree. Imagine developing a spiritual connection with a tree in a way that exceeds visual perception; where learning its meaning and value simultaneously improves your own mental and physical wellness. Throughout history, floriographies--flower dictionaries--have gained notoriety for regulating human emotions and giving depth, symbolism, and meaning to extremely delicate aspects of nature. Following the success of The Complete Language of Herbs and its predecessor The Complete Language of Flowers, author S. Theresa Dietz continues this custom with The Complete Language of Trees. Coupled with two indexes, one for searching by common tree name and the other organized by meaning, Dietz cleverly connects quality time in nature with the overall improvement of mental health by developing a stunningly depicted dictionary for gardeners, environmentalists, and nature lovers alike.

**Under the Flamboyán** Zilka Rosa Molinar 2022-07-29 Under the Flamboyán: Debajo del Flamboyán By: Zilka Rosa Molinar The poetry in Under the Flamboyán is about love, of nature, of a yearning for visibility. There are poems on discrimination the latinx community faces once immigrated into the United States or any other country, politics that affect us as a community, and poems of God, of identity, and acculturation with the fear of being called assimilated by one's peers that creates a powerful feeling of loneliness and isolation. Many of these poems are from the heart (del corazón).

**Flowering Trees in Subtropical Gardens** G. Kunkel 2012-12-06 In 1969 volume I of 'Arboles Exóticos' appeared in Las Palmas de Gran Canaria, published in Spanish by the Island Council (Cabildo Insular). Volume II was to have dealt with a further 100 or so Dicotyledons, and volume III to have closed the cycle with Gymnosperms and the tree-like

Monocotyledons. Neither of the latter having been published it was suggested that a totally revised and enlarged version of the first book be prepared for Dr. W. Junk, Publishers, The Hague. We are most obliged to Mr. S. P. Bakker and the Board of Directors for their interest in the present work, hoping that it will fill a gap and help both residents and visitors to get to know the amazingly rich exotic flora that is to be encountered in Mediterranean and Canarian parks and gardens. A second volume is in preparation and will concentrate on the bushes and shrubby trees left out in this one. In Flowering Trees in Subtropical Gardens special attention is given to species found in Canary gardens. As, however, most trees described are widely distributed in other regions with a similar Mediterranean climate, it is hoped that this guide may be of use in gardens of the subtropics in general. Several of the species selected here are little known in gardens, hardly ever found illustrated in current reference books and have therefore been included for interest's sake.

*The Leguminosae, a Source Book of Characteristics, Uses, and Nodulation* Oscar Nelson Allen 1981 The volume contains a comprehensive taxonomic account of the family Leguminosae as a framework for the author's census report of the nodulating and non-

nodulating genera and species. The main body of the work consists of synopses of 750 leguminous genera arranged alphabetically. Each is described taxonomically within its proper tribe and subfamily, in accordance with accepted classification systems. All of the nodulation data from the survey are further summarized in tabular alphabetical listings of genera under each of the three subfamily categories.

**Hawaii Dye Plants and Dye Recipes** Val Krohn-Ching 1992-04-01 For those who work with FIBER in weaving, spinning, crocheting, knitting, macrame; for those who work with CLOTH in batik, tie-dyeing, quilting, applique, soft sculpture, sewing. With this book you can come one step closer to making it from "scratch" - increasing your involvement and satisfaction in your craft, while enhancing the beauty and value of your finished product. Rich, soft, subtle colors, not easily copied by synthetic man-made dyes, are commonly obtained from natural dye sources. The end reward is beautiful natural colors, but equally rewarding is the pleasure to be derived from collecting natural materials and from the dyeing process itself. The world around you becomes a treasure house of "hidden" possibilities, with common and readily available plant materials yielding colors that can be as surprising as they are special. Like the ancient Hawaiians who colored their tapa cloth with dyes from kukui, ferns, and other plants of their islands, you become more sensitive to your natural environment. A greater respect for craftspeople of the past and a deeper appreciation for the materials are every natural dyer's gain. Val Frieling Krohn-Ching is a distinguished weaving and textile design artist whose curiosity and desire for experimenting has also made her the authority on dyeing with plant materials in Hawaii using wool fibers. She now shares the results of her years of experimentation - and her enthusiasm - with others. Even beginners can use her basic principles and techniques successfully to achieve new results of their own. *Hawaii Dye Plants and Dye Recipes* is itself an artistic production, filled with charming, botanically accurate pen-and-ink drawings to aid in plant identification. Instructions are concise and easy to follow. Interesting information about each plant enlivens the text, as do personal comments about the author's experimentation and sources of natural materials. A color chart, photographed from actual wool samples prepared by the author, shows more than 300 beautiful results that the natural dyer can achieve using recipes in this book.

**English Dictionaries as Cultural Mines** Roberto Facchinetti

2012-11-16 Dictionaries are mines whose word-gems encapsulate centuries of language history and cultural traditions; they are store-houses of meanings and uses, 'lamp genies' to be set free at the very moment readers set their eyes on their entries. This book is an attempt to free such lamp genies, by discussing the role of dictionaries in the

identification and expression of cultural aspects in language, with special reference to English. As such, its eleven chapters have been arranged to focus on general, genre-specific, monolingual and bilingual lexicography, both from a diachronic and a synchronic perspective. The book will be of use to lexicographers and lexicologists, as well as to corpus linguists, historical and contemporary English scholars, students of English, and anybody interested in the juice of culture(s) that can be fruitfully extracted from dictionary entries.

*CRC World Dictionary of Medicinal and Poisonous Plants* Umberto

Quattrocchi 2016-04-19 "Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold." —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.

**The Architecture of Leisure** Susan R. Braden 2018-02-26 The books in the Florida and the Caribbean Open Books Series demonstrate the University Press of Florida's long history of publishing Latin American and Caribbean studies titles that connect in and through Florida, highlighting the connections between the Sunshine State and its neighboring islands. Books in this series show how early explorers found and settled Florida and the Caribbean. They tell the tales of early pioneers, both foreign and domestic. They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movement of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers the rich data available in these architectural, archaeological, cultural, and historical works, as well as the travelogues and naturalists' sketches of the area in prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program.
