**The Lumberjacks** Donald MacKay 2007-05-15 Short-listed for the 1978 Governor General's Award for Non-Fiction The 19th century spawned a unique breed of men who took pride in their woodsmen skills and rough codes of conduct. They called themselves lumberers, shantymen, timber beasts, les bucherons - and, more recently, lumberjacks, working in the vast forests of eastern Canada and British Columbia. Across the country, farm boys would go to the woods, lumbering being the only winter work

available. Immigrants - Swedes and Finns more often than not - resumed the trades they had learned so well in the forests of northern Europe.

They broke the cold, hard monotony of camp life with songs, tall tales and card games. Within these pages, author Donald MacKay allows us a glimpse into that moment in our heritage when men entered the virgin forest to carve out an industry from the seemingly endless array of pine, spruce, maple and balsam fir found there.

**For the Love of Flying** Danielle Metcalfe-Chenail 2009 This is the first book to tell the story of one of Canada's most innovative aviation companies, Laurentian Air Services, and thus fills an important gap in Canadian aviation history. Drawing on extensive research and interviews with Laurentian's presidents, pilots and ground crew, author Danielle Metcalfe-Chenail explores the company's 60-year history from its founding in 1936 in Ottawa with small biplanes through to the 1990s when it was operating scheduled flights with twin-engine Beech 99s and

Beech King Air 200s. During those 60 years, Laurentian was at the forefront of air tourism in the Ottawa region and the Laurentian Mountains of Quebec as well as fly-in hunting and fishing in Canada's north. It also pioneered the use of the Grumman G-21 Goose and de Havilland Beaver commercially and provided vital air support to survey and development work for such massive undertakings as the Churchill Falls and James Bay hydroelectric projects. This book brings Laurentian's history to life through first-hand stories and an exciting collection of colour and black and white photographs, the majority of which have not previously been published. This is a long-overdue book that appeals to armchair bush flyers and aviation historians alike.

**Dinomania** Ulrich Merkl 2015-11-25 Winsor McCay, the creator of Little Nemo in Slumberland, is internationally renowned as a pioneer in comics and animation. But author Ulrich Merkl's dedicated sleuthing has unearthed a never-published strip by McCay that was lost following the artist's untimely death. Titled simply Dino, it opens a surprising new window into McCay's life and work and showcases his exquisitely beautiful and delicate delineations (exactly reproduced from the original art). Merkl explores the influences McCay brought to the strip—including McCay's own Gertie the Dinosaur animated shorts, the animation in 1933's King Kong, and the growth of New York City from the Holland Tunnel to the Empire State Building—and traces our love of dinosaurs and monster movies down through the decades. Breathtakingly designed, each page of this deluxe oversize volume is overflowing with amazing imagery, with more than 650 photographs and illustrations (more than 250 in color) — most of them seen here for the first time in a century! An essential volume for everyone interested in the development of the comic strip — and our never-ending fascination with dinosaurs!
