FE 2b/d vs Albatros Scouts James F. Miller 2014-01-20 In the spring of 1916 the deployment of the RFC's FE 2 - with its rotary engine 'pusher' configuration affording excellent visibility for its pilot and observer, and removing the need for synchronized machine guns - helped wrest aerial dominance from Imperial Germany's Fokker Eindecker monoplanes, and then contributed to retaining it throughout the Somme battles of that fateful summer. However, by autumn German reorganization saw the birth of the Jagdstaffeln (specialised fighter squadrons) and the arrival of the new Albatros D scout, a sleek inline-engined machine built for speed and twin-gun firepower. Thus, for the remainder of 1916 and well into the next year an epic struggle for aerial superiority raged above the horrors of the Somme and Passchendaele battlefields, pitting the FE 2 against the better-armed and faster Albatros scouts that were focused on attacking and destroying their two-seater opponents. In the end the Germans would regain air superiority, and hold it into the following summer with the employment of their new Jagdgeschwader (larger fighter groupings), but the FE 2 remained a tenacious foe that inflicted many casualties - some of whom were Germany's best aces (including 'The Red Baron').

Wings of Honor, American Airmen in World War I James J. Sloan 1994 Beretning om amerikanske flyvevåbenheders deltagelse i 1. verdenskrig. Selv om USA iværksatte en storstilet træning af piloter og jordpersonel, var det kun et begrænset antal af disse, som faktisk kom til at deltage i kamphandlingerne. Ca. 4000 man deltog i kamphandlingerne og ca 700 fly. Amerikanerne måtte låne materiel af sine allierede og indgik videre som en integreret del af de allierede styrker under den pågældende nations flag.

World War I Aviation Books in English James Philip Noffsinger 1987

Years of Combat Sholto Douglas (Baron Douglas of Kirtleside) 1963 "Because I have seen and known at first hand, both as a pilot and as commander, so much of the whole story of aviation, including the political background, I have been urged to give first of all a full account of my experiences as a fighter pilot during the period of the war of 1914-18. That conflict used to be called the Great War, and its extraordinary interest has never ceased to stir the imaginations of later generations. For those of us who flew in that war it was a time of exploration as well as fighting, and for us it meant years of combat. They were years that have since been described as the heroic age of flying"--Preface.

FLYING FURY: Five Years In The Royal Flying Corps [Illustrated Edition] James Thomas Byford McCudden VC DSO & Ba, MC & Bar MM 2014-06-13 Illustrated Edition - contains 30 photos The highest scoring British Air Ace reveals his daily life at the front, in the air and in combat with the Germans above the Western Front. In the muddy trenches of the Western front few rankers would have considered that they would achieve field rank of major and international celebrity. In the skies above the shell-torn landscape, any man with enough talent, daring and skill could hope to become a 'Flying Ace' by claiming five or more victories over enemy aviators. Such an adventurous warrior was James McCudden; born in 1895 in Kent, he enlisted in the Royal Engineers in 1910 as soon as he could. But he was smitten with the service in the air after a flight in his brothers plane in 1913 and transferred to the Royal Flying Corps. However he was only an engineer in 1914, but once in France despite his modest rank he was allowed to go up with his squadron and act as an observer in a two seater plane. After much good service as an observer his superiors put him forward for pilot training in 1916. McCudden's tally of the enemy over the next two years would rank him among the greatest of the World War One Aces; he claimed some 57 enemy aircraft even three in a single day in 1918. His exploits in the air were legendary, surviving an attack by the Red Baron himself, he pioneered new tactics that enabled him the edge of his enemy by using his engineering skill to fine tune his aircraft. He was awarded the Victoria Cross, DSO with Bar, MC with Bar and a Military Medal and the French Croix de Guerre for his daring, bravery and skill. It is with a sad irony that it was not

his German foe that eventually ended his outstanding military service but a flying accident in 1918. He was only 23 at the time. His own exploits, adventures, tactics and escapes are best left to him in his own words, but suffice to say despite his modest retelling of his life in a day-by-day fashion remains both dramatic and engaging.

An Air Fighter's Scrapbook Ira Jones 2013-12-19 A classic memoir of the early days of aviation by a longtime Royal Air Force pilot, including his harrowing, exhilarating adventures in the Great War. Ira "Taffy" Jones was a well-known air fighter during the First World War, having scored about forty victories flying SE5 scouts in France with 74 Squadron. Familiar in flying circles, Jones recorded stories drawn from his own experiences during the war and wrote of the many personalities he had met or known by association, both during the war and in the postwar flying years. An Air Fighter's Scrapbook recreates the atmosphere of the days of the biplane, of wartime flying, of early peacetime adventures in the air, the development of civil aviation, and breathtaking record-beating flights—all evoking the sheer delight in flying that characterized those early years.

Flying Fury James McCudden 2009-10-19 The day-to-day insights of a brilliantly daring World War I ace that only ends with his death at the age of 23 . . . James McCudden was an outstanding British fighter ace of World War I, whose daring exploits earned him a tremendous reputation and, ultimately, an untimely end. Here, in this unique and gripping firsthand account, he brings to life some of aviation history's most dramatic episodes in a memoir completed at the age of twenty-three, just days before his tragic death. During his time in France with the Royal Flying Corps from 1914 to 1918, McCudden rose from mechanic to pilot and flight commander. Following his first kill in September 1916, McCudden shot down a total of fifty-seven enemy planes, including a remarkable three in a single minute in January 1918. A dashing patrol leader, he combined courage, loyalty, and judgment, studying the habits and psychology of enemy pilots and stalking them with patience and tenacity. Written with modesty and frankness, yet acutely perceptive, *Flying Fury* is both a valuable insight into the world of early aviation and a powerful account of courage and survival above the mud and trenches of Flanders. Fighter ace James McCudden died in July 1918, after engine failure caused his plane to crash just four months before the end of World War I. His success as one of Britain's deadliest pilots earned him the Victoria Cross.

Flight Testing to Win Tony Blackman 2005-09-01 No aircraft is absolutely safe. This book is about Aviation, from learning to fly, becoming a test pilot, flight testing, demonstrating on some of the third world's worst airfields, then specializing in Avionics and finally joining the Board of the UK Civil Aviation Authority, helping to formulate the regulations that the author had spent so many years living by. Many stories are told, including flying with the legendary Howard Hughes when the world thought him a mad recluse, and testing many aircraft including all three V Bombers, an almost unique experience. The book, very well illustrated, makes the point that flying is inherently risky, that regulations always try to quantify acceptable risk, that safety is a cost, and that test pilots have to sell their aircraft and should not try to make an aircraft safer than the rules require. It emphasizes the almost unbelievable changes in aviation in one working lifetime, whilst painting a picture of a much simpler world, now gone beyond recall

Marshal of the Royal Air Force Sir Charles Portal Richard Michael Milburn 2024-03-08 Charles

Frederick Algernon Portal was born in Hungerford, England, in 1893. One of seven brothers, Portal developed a fierce competitive streak and a steely determination from an early age. Known by all who knew him as "Peter", Portal enlisted in the Army at the outbreak of the First World War as a dispatch rider, being mentioned in General French's very first dispatch. Portal's abilities were quickly recognized, and he gained a commission in short order. It was in the air that Portal saw his future, and he subsequently transferred to the Royal Flying Corps, initially as an observer, before training as a pilot. In this latter role, Portal proved a courageous and instinctive leader, garnering the rare accolade of a DSO and Bar for his wartime service. His meteoric rise continued in the inter-war period, and when Hitler's forces invaded Poland, Portal had already ascended to the Air Force Board. He then took the RAF's top command post at Bomber Command during the battles of France and Britain, before replacing Cyril Newall as Chief of Air Staff, aged just 47, in October 1940. Charles Portal was, in General Eisenhower's words, "Britain's greatest wartime leader, including Churchill". Portal was a strategist, a diplomat and an outstanding leader of the RAF in the Second World War. He built productive and enduring relationships with the most powerful Allied leaders—some of which, including Churchill, Bomber Harris, and Hap Arnold, are explored here. Portal helped direct the UK's strategy from the darkest days of 1940 through to Allied victory in 1945. He never lost his calm, even under the most extreme pressure, and approached the war with a cool logic that defied the chaos of the day. Despite his enormous achievements, and being showered with post-war accolades, Portal is little known today. His historical anonymity is a reflection of his disinterest in his own legacy. He neither kept wartime diaries, nor penned an egotistical autobiography to cash in on his post-war fame. He retired as he had served, with dignity and humility, traits that made him particularly influential with American allies. As Wing Commander Rich Milburn reveals in this long-overdue second biography, Charles Portal was a hero in every sense; a heroic battlefield leader in one global conflict, and one of the men most directly responsible for Allied victory in a second.

Flying Fury James Thomas Byford McCudden 1918 Den engelske flyverhelt fra 1. verdenskrig og modtager af Victoria Korset beretter om sit liv og oplevelser i Royal Flying Corps

Reckless Fellows Edward Bujak 2015-09-25 The Royal Flying Corps, later the Royal Air Force, was formed in 1912 and went to war in 1914 where it played a vital role in reconnaissance, supporting the British Expeditionary Force as 'air cavalry' and also in combat, establishing air superiority over the Imperial German Air Force. Edward Bujak here combines the history of the air war, including details of strategy, tactics, technical issues and combat, with a social and cultural history. The RFC was originally dominated by the landed elite, in Lloyd George's phrase 'from the stateliest houses in England', and its pilots were regarded as 'knights of the air'. Harlaxton Manor in Lincolnshire, seat of landed gentry, became their major training base. Bujak shows how, within the circle of the RFC, the class divide and unconscious superiority of Edwardian Britain disappeared - absorbed by common purpose, technical expertise and by an influx of pilots from Canada, Australia, New Zealand and South Africa. He thus provides an original and unusual take on the air war in World War I, combining military, social and cultural history.

Fly Navy Charles Manning 2000-03-07 This book tells the full story of flight from sea, discussing the dangers that naturally come with this seemingly unnatural mode of airbase, including the unfortunate losses of over 900 men during this period. It covers the development of new technology of the period and how changes in other areas such as the cold war and rise of nuclear power, meant that much of the abilities had to be changed and developed.

In Our Youth Angus Scully 2022-11-02 A fascinating, photo-rich exploration of early aviation in Canada, told through the backstories of pilots who flew, fought, and risked their lives in the First World War, through the interwar period, and beyond. In *Our Youth* explores the lives of thirty-two young Canadian military and civilian flyers, viewed through the medium of archival photography. All of these young men were pilots in the First World War, a time when flying was pure adventure and danger. Some of them were from humble origins, some from elite families, some became heroes, one was cowardly, and most have now faded from our attention. However, all embraced the romance of flight and the danger of war. Although much of the book is focused on military experiences—including the mental stress and injuries faced by pilots who had barely reached adulthood—the book looks beyond war, examining the fascinating world of civilian aviation from 1908 to 1941. Featuring long-hidden photography uncovered from provincial archives, confidential military records, and precious family collections, this book covers the lives of many young Canadians who made important contributions as they flew and fought in what seem today to be the flimsiest of machines.

Oswald Boelcke R.G. Head 2016-08-05 This biography of the pioneering WWI flying ace who mentored the Red Baron is "fascinating . . . [it] captures combat aviation at its inception" (*MiG Sweep: The Magazine of Aviation Warriors*). With a total of forty victories, Oswald Boelcke was Germany's first ace in World War I—and a century later he remains a towering figure in the history of air warfare, renowned for his character, inspirational leadership, organizational genius, development of air-to-air tactics, and impact on aerial doctrine. Paving the way for modern air forces across the world with his pioneering strategies, Boelcke had a dramatic effect on his contemporaries. The famed Red Baron's mentor, instructor, squadron commander, and friend, he exerted a tremendous influence upon the German air force. He was one of the first pilots to be awarded the famous Pour le Mérite, commonly recognized as the "Blue Max." All of this was achieved after overcoming medical obstacles in childhood and later life with willpower and determination. Boelcke even gained the admiration of his enemies: After his tragic death in a midair collision, Britain's Royal Flying Corps dropped a wreath on his funeral, and several of his captured foes sent another wreath from their German prison camp. His name and legacy live on, as seen in the Luftwaffe's designation of the Tactical Air Force Wing 31 "Boelcke." This definitive biography reveals his importance as a fighter pilot who set the standard in military aviation.
