Flying High Tony Fernandes 2017-11-02 'What a life. Tony Fernandes has accomplished amazing things - and who's to say what he can go on to achieve?' Sir Richard Branson The inspiring story of business hero and Apprentice Asia star Tony Fernandes As a boy, Tony Fernandes wanted to be a pilot, a footballer or a racing driver. By 2011 he'd gone one better: founding his own airline and his own formula one team, and becoming Chairman of Queens Park Rangers, helping them reach the Premier League again after a 15-year absence from the top flight. Flying High is the memoir of an exceptional business leader; the man who created Asia's first budget airline, democratizing air travel in Asia and building AirAsia into a multi-billion-dollar company in the process.

Published as Tony returns as the face of the second series of Apprentice Asia, this inspiring personal story will be a major global publishing event. Tony Fernandes studied at Epsom College, UK, and the London School of Accountancy. He worked for Virgin Communications and Warner Music before acquiring AirAsia and relaunching it as Asia's first low-cost carrier in 2001/2. He is currently Group CEO of AirAsia, Chairman of QPR football club and owner of the Caterham F1 team. Tony has been awarded a CBE, titled twice by the King of Malaysia and awarded the Legion d'Honneur by the French government. He has also received awards from major business media outlets including the International Herald Tribune, Business Times, Business Week, Fast Company and Forbes.

That's Not Hockey! Andrée Poulin 2018-09-11
The legendary goalie who revolutionized the game of hockey Young Jacques Plante's way of playing hockey may look different from everyone else's. Instead of a puck, he uses a tennis ball, and his shin pads are made out of potato sacks and wooden slats. But that's not going to stop him. He loves the game. Jacques is drafted by the Montreal Canadiens in his mid-twenties. Fans love the unstoppable goalie as he leads his team to one victory after another. But there's a price to pay: pucks to the face result in a broken jaw, broken cheekbones, multiple stitches, and even a skull fracture. One day, Jacques has had enough. He goes on the ice wearing a fiberglass mask. The coach orders him to take it off. Finally, at a game against the Rangers, when yet another puck hits Jacques square in the face, he puts his foot down. He will not continue to play unless he's allowed to wear a mask. Young

hockey fans will enjoy this story of Jacques Plante, whose determination and love of the game brought about a revolutionary change to how it is played.

The Magical Hockey Stick Olusoji Osunbiyi 2023-04-16 "The Magical Hockey Stick" is a heartwarming story about a young boy named

Max who discovers a special hockey stick that grants him incredible powers on the ice. The book follows Max's journey as he becomes a star player and learns the importance of hard work and dedication, both on and off the ice. As Max grows older and becomes a successful coach, he passes on the lessons he learned to the next generation of young players. The book is a celebration of the sport of hockey and the values that make it great, such as perseverance, passion, and dedication. It is a must-read for anyone who loves the game and wants to be inspired to achieve their dreams.

The Science of Hockey Ryan Nagelhout
2015-07-15 Hockey players need speed, strength, and skill to become great. They also

need science. In this volume, readers explore the many ways science is put into action on the ice. Vibrant photographs of hockey players present science concepts in a real-life setting. Readers also explore the connection between science, technology, engineering, and math in the world of hockey. Detailed sidebars and graphic organizers help explain these STEM curriculum concepts in an accessible way. The next time readers play hockey or see a National Hockey League game, they'll have a new appreciation for the science that makes this sport possible.

The Science of Hockey with Max Axiom, Super Scientist Blake Hoena 2015-08-01 The slap of a hockey stick. A soaring puck. A quick-thinking goalie gets the save! What's behind it all? Science! Let Max Axiom, Super Scientist, explain the science behind the perfect slap shot, the right way to skate the ice, and much, much more.

Henry Holton Takes the Ice Sandra Bradley 2015-01-02 A lively hockey and ice dancing picture book in the tradition of Billy Elliot and The Sissy Duckling Henry Holton's whole family is hockey mad. Everyone, that is, except Henry. When he holds a hockey stick, Henry becomes a menace to the game—and an embarrassment to his sports-minded family. It's not until he sees his first ice dancing performance that Henry realizes there's something he can do on the ice that doesn't involve boarding and body checking. Henry is ready to hang up his gear and try on some figure skates, but first he has to convince his hockey-obsessed family to let him follow his own path.

The Science of a Slap Shot Ellen Labrecque 2015-08-01 This book discusses the science behind various elements of ice hockey,

particularly a slap shot. The chapters examine case studies of famous sports moments, explain how the athletes perform these actions, and document the history of how scientists, doctors, and coaches have been working to make these sports safer. Sidebars include thought-provoking trivia. Questions in the backmatter ask for text-dependent analysis. A timeline provides history, key developments, and advancements associated with the sport.

We Ride Upon Sticks Quan Barry 2020-03-03 In the town of Danvers, Massachusetts, home of the original 1692 witch trials, the 1989 Danvers Falcons will do anything to make it to the state finals—even if it means tapping into some devilishly dark powers. Against a background of irresistible 1980s iconography, Quan Barry expertly weaves together the individual and collective progress of this enchanted team as they storm their way through an unforgettable season. Helmed by good-girl captain Abby Putnam (a descendant of the infamous Salem

accuser Ann Putnam) and her co-captain Jen Fiorenza (whose bleached blond “Claw” sees and knows all), the Falcons prove to be wily, original, and bold, flaunting society’s stale notions of femininity. Through the crucible of team sport and, more importantly, friendship, this comic tour de female force chronicles Barry’s glorious cast of characters as they charge past every obstacle on the path to finding their glorious true selves.

Goodnight, Hockey Fans Andrew Larsen

2017-10-03 A hockey fan’s best night ever. A young boy doesn’t want to go to bed. The hockey game is on! And he’s worried he won’t be able to fall asleep. After his parents have tucked him in and turned out the light, he decides he’ll listen to the hockey game on a radio placed under his pillow. With the familiar drone of the announcer’s voice for company, the boy drifts off to sleep. And there he is on the ice playing for his favorite team — and scoring the winning goal! “What a play! What a goal! What a game!”

What a beautiful dream!

50 Things to Make with a Broken Hockey

Stick Peter Manchester 2002 From the days when proto-humans lashed animal jawbones to sticks and whacked wildebeest-poop slapshots in Olduvai Arena to today’s super-high-tech computer-assisted extravaganzas, one by-

product of the hockey game has gone unnoticed and untapped. Until now . . . In *50 Things to Make with a Broken Hockey Stick*, Peter Manchester transforms the agony of a fractured stick into the thrill of creation. Instructions and explicit cartoons show woodworkers of all abilities how to fashion items for outdoors, items for indoors, and items without any purpose at all. No basement artiste will ever throw away a broken hockey stick again. The finished projects will delight friends and win the respect of detractors, even those in the maker's own household. Using broken hockey sticks as tomato stakes is elementary compared with crafting a Walking Stick or a Pi'ata Stick. But Manchester goes far beyond making a stick out of a stick; his inventions encompass the full potential of this free and almost infinite resource. Even in this age of miracle materials, ordinary recreational hockey sticks are a tough, flexible composite of resin and wood, and the broken pieces are just too good to throw away.

Truly practical designs include a modern Travois, a springy, long-range Catapult, and a Toilet Paper Holder for the well-appointed fishing camp. Science fair projects leap from the pages of *50 Things to Make with a Broken Hockey Stick*: a Wind Vane, a combination Sun Dial and Snow Depth Gauge, and a Geodesic Dome that requires plenty of duct tape. Accessories for the home include a Curtain Rod for the bedroom of a hockey-crazed kid and a Lamp that really works. Fathers and children can bond as they manufacture gifts and sporting goods: a Pot Rack, a Wind Sail, an Ice Croquet Set, and a Bathroom Occupancy Designator. The book's pièce de résistance is the Mock Moose, a trophy made from a skate and at least four stick blades.

Kids' Book of Figure Skating Rikki Samuels 2004
We all love to watch figure skaters as they glide across the ice and perform amazing spins and jumps. And now, one of the world's premier skaters and teachers has written a clear kid-

friendly book for boys and girls of all ages who want to master this popular sport. In this book she breaks down the basics of the sport for any skill level. With helpful drawings and a glossary of important terms this encouraging introduction to figure skating is lively, informative and fun - the perfect guide to making a child's skating dream a reality.

Beyond Flying Chris Watson 2014-03-06 Is flying an irreplaceable part of 21st-century life? Can businesses succeed in a globalised world without international air travel? What about 'love miles' - visiting friends and family overseas? Architect and writer Chris Watson grew up in an airline family, passionate about aviation and how it allows us to explore the world, share knowledge and create more diverse communities. But this freedom has come at a cost for the environment. Aviation is a significant factor in climate change - and one that's been steadily growing in both developed and undeveloped countries, burning fossil fuels and emitting harmful greenhouse

gases. Flying is never zero-carbon, so can we reduce it, or even do without it? Fourteen remarkable travellers from around the world share their stories with Chris about how they came to the conclusion that reducing their air travel was necessary to lower their personal emissions. From backgrounds as diverse as commercial, professional, academic, NGOs, literature and science, they have found easy and better ways of living and working, saving what few flights they do take for emergencies and 'love miles'. Their stories look at how our modern, globalised world offers more alternatives to keep in touch with people around the world without contributing to the aviation industry's ever-increasing emissions. Filled with success stories and practical guidance to help people make more informed decisions, this book is a must-read for any frequent flyer - or for anyone involved in a global business. *Beyond Flying* demonstrates that even the toughest of environmental challenges can be addressed.

The Hockey Stick and the Climate Wars Michael E. Mann 2012 A member of the Inter-governmental Panel on Climate Change examines the fossil-fuel industry's public relations campaign to discredit the science of climate change and deny the reality of global warming.

Ask an Astronaut Tim Peake 2017-10-17 Was it fun to do a space walk? How squashed were you in the capsule on the way back? What were your feelings as you looked down on Earth for the first time? Were you ever scared? Where to next -- the Moon, Mars, or beyond? Based on his historic mission to the International Space Station, *Ask an Astronaut* is Tim Peake's guide to life in space, and his answers to the thousands of questions he has been asked since his return to Earth. With explanations ranging from the mundane -- how do you wash your clothes or go to the bathroom while in orbit? -- to the profound -- what's the point? -- all written in Tim's characteristically warm style, Tim shares his

thoughts on every aspect of space exploration. From training for the mission to launch, to his historic spacewalk, to re-entry, he reveals for readers of all ages the cutting-edge science behind his groundbreaking experiments, and the wonders of daily life on board the International Space Station. The public was invited to submit questions using the hashtag #askanastronaut, and a selection are answered by Tim in the book, accompanied with illustrations, diagrams, and never-before-seen photos.

Wingman on Ice Matt Christopher 2009-12-19 Tod is sure his new hockey stick will improve his game. But when his team loses, he realizes that good stickhandling needs practice as well as good equipment. He vows not to use the stick until he deserves it, but will he earn that right this season?

SNAFU Situation Normal All F***ed Up Gordon

L. Rottman 2013-10-20 Military life has always been ruled by its own language, specific sets of terms and phrases that separate the serving man or woman from their civilian counterpart. There is the official version of ranks and acronyms, and the more unofficial, colloquial language of the barrack room and battlefield. This new title explores the language and slang of the major combatant powers, delving into their origins and explaining their uses. All of this will be illustrated with contemporary cartoons and other images showing the phrases in use. This title is designed specifically as a follow-up to 2007's FUBAR: Soldier Slang of World War II, and will differ from the original book in that it will cover the slang of sailors and airman, as well as soldiers. Detailed sections will be included for each of the major combatants of World War II, and additional appendices will detail the nicknames given to the major surface vessels and aircraft types of the war.

Hockey's Sticks and Stones Carl Johnson

2019-09-04 Hockey's Sticks and Stones is a memoir of Carl Johnson, Squire, "Star of Stage, Screen and Red Neck Bars". It is eminently invigorated with truthfulness, unflinching and absorbed in determination. The author's career in sports uniquely exposes the frailty of our brethren while assisting others to achieve new levels of insanity in the process. It is probable that some will judge the author's literary efforts as "supremely unconventional." When asked of his vision on present day sports..... the author responded, "PLEASE CRY FOR ME ARGENTINA!" The author is a sometimes hockey player, country music singer, inventor and entrepreneur - qualities of an endangered species. But he remains mindful of the Don Quixote of windmills and is a lover of nature and pretty girls. The author currently resides in Ontario's Niagara Region, but Cape Breton will always be his home.

The Stick Bruce Dowbiggin 2002-10 Pick up a hockey stick. You hold an iconic symbol of the

place that gave it birth, a tangible bit of Canadian culture, a link to Canada's past. From the earliest one-piece sticks, carved from tree roots by the Mi'kmaq of Nova Scotia, to the two—and three—piece models turned out in small towns in Ontario and Quebec, to the composite models now produced with scientific precision by Easton, the stick has always reflected something distinctly Canadian. Today it has become "cyber-product," globally sourced, anonymously produced, and expertly marketed. As sporting tool, as weapon, and as cultural artifact, the stick is a part of Canadian history. Consider the London schoolteacher whose basement is a treasure trove of old sticks. The Calgary handyman who turns broken sticks into kids' furniture. The NHL owner whose rec room floor is made of hockey sticks. The artist who sculpts oversized sticks out of granite. Dowbiggin introduces us to Stan Mikita, who invented the curved blade (or did he?); Jeremy Roenick, who lets no one else touch his stick;

Adam Oates, who uses a stubby, cut-off blade; and Eric Lindros, whose stick is so stiff most people can't even bend it. We discover how Carl Brewer helped bring European laminating expertise to North America and how Ken Dryden inadvertently changed the way sticks were marketed. Full of love and lore, *The Stick* is a celebration of our past that's destined to become as treasured as an autographed, game-used, Wayne Gretzky Titan 1002. From the Hardcover edition.

Shadows and Flight Nixo Hubbard Dalan Raymer is not a normal kid. He just wants to survive high school, but normal kids don't grow fangs, claws, and blue fur whenever they become overly upset or overwhelmed. Dalan must learn to control his uncanny powers, but can he do it in time to avoid hurting those he cares about? And can he use his powers to protect innocent people from a greater evil rising from Athallia's deep underbelly?
Flying Solo Leonard Kriegel 1999-06-01

Childhood polio left Leonard Kriegel without the use of his legs. In *Flying Solo*, he writes in a lyrical, uncompromising voice about the interlaced themes of courage and masculinity against the backdrop of loss. Tracing memories back to his coming of age in the 1940s and 1950s, he portrays an interior life partly sustained by traditional visions of manhood, partly raging at the impossibility of fully living them out. *Flying Solo* is beautiful personal writing that will change the way we think about manhood.
