Migration Histories of the Medieval Afroeurasian Transition Zone

2020-05-06 The transition zone between Africa, Asia and Europe was the most important intersection of human mobility in the medieval period. The present volume for the first time systematically covers migration histories of the regions between the Mediterranean and Central Asia and between Eastern Europe and the Indian Ocean in the centuries from Late Antiquity up to the early modern era. Within this framework, specialists from Byzantine, Islamic, Medieval and African history provide detailed analyses of specific regions and groups of migrants, both elites and non-elites as well as voluntary and involuntary. Thereby, also current debates of migration studies are enriched with a new dimension of deep historical time. Contributors are: Alexander Beihammer, Lutz Berger, Florin Curta, Charalampos Gasparis, George Hatke, Dirk Hoerder, Johannes Koder, Johannes Preiser-Kapeller, Lucian Reinfandt, Youval Rotman, Yannis Stouraitis, Panayiotis Theodoropoulos, and Myriam Wissa.

Hungary and the Hungarians Enikő Csukovits

2020-09-14T17:35:00+02:00 During the Middle Ages the majority of people in Western Europe never met any Hungarians. They didn't even hear about them, as news about Hungary only reached Western Europe

in times of extraordinary historical events— such as the adoption of Christianity at the turn of the 11th century, or the devastating Tatar invasion in 1241-1242. Obtaining information about the Hungarians from books was also difficult, as medieval Europe, even as late as in the 15th-16th centuries, lacked libraries that would have offered greater numbers of works on Hungary or on Hungarian topics. On top of it all, works that contained the most detailed and accurate information remained unknown, in their own period; posterity only found them in rare manuscript copies discovered much later. Yet once collected, we find that these sources, originating from distant parts of the continent and written for different purposes, contain information about Hungary and the Hungarians that most often reaffirm one another. This work examines these sources and sets out to answer four major questions: What did people in medieval Western Europe know, think, and believe about the Hungarians and Hungary? To what degree was this knowledge constant or fluid over the centuries that made up the medieval era, and were changes in knowledge followed by any changes in appreciation? Where was the country located in the hierarchy of European countries on the basis of the knowledge, suppositions, and beliefs relating to it? What were the most important elements in this image of the Hungarians and of Hungary, and which of them became the most enduring stereotypes?

International Business and Tourism Tim Coles 2008-02-13 Whether it's bungee jumping in Queenstown or visiting the Guinness factory in Dublin, where we travel – and what we do when we get there – has changed significantly in the past twenty years. This innovative textbook explores what is possibly the most unrecognized of international service industries, placing tourism in the context of contemporary globalization and trade-in services. It provides new perspectives on tourism as a form of international business, and the implications for firms, the state and individuals. Split into four separate sections, with introductions outlining the key themes in each, it examines important topics such as: the role of governance and regulation in tourism services the effects of increased global mobility on tourism entrepreneurship how tourism businesses are becoming internationalized why other business sectors are increasingly interested in tourism. Case studies are used throughout to highlight important issues, from developments in the aviation industry to the rise of working holidays. This book gets to the core of a crucial service industry, and is essential reading for any researcher or student of tourism or international business.

The Social Construction of Technological Systems, anniversary edition Wiebe E. Bijker 2012-05-18 An anniversary edition of an influential book that introduced a groundbreaking approach to the study of science, technology, and society. This pioneering book, first published in 1987, launched the new field of social studies of technology. It introduced a method of inquiry—social construction of technology, or SCOT—that became a key part of the wider discipline of science and technology studies. The book helped the MIT Press shape its STS list and inspired

the Inside Technology series. The thirteen essays in the book tell stories about such varied technologies as thirteenth-century galleys, eighteenth-century cooking stoves, and twentieth-century missile systems. Taken together, they affirm the fruitfulness of an approach to the study of technology that gives equal weight to technical, social, economic, and political questions, and they demonstrate the illuminating effects of the integration of empirics and theory. The approaches in this volume—collectively called SCOT (after the volume's title) have since broadened their scope, and twenty-five years after the publication of this book, it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way.

The Enemy at the Gate Andrew Wheatcroft 2009-11-10 In 1683, two empires - the Ottoman, based in Constantinople, and the Habsburg dynasty in Vienna - came face to face in the culmination of a 250-year power struggle: the Great Siege of Vienna. Within the city walls the choice of resistance over surrender to the largest army ever assembled by the Turks created an all-or-nothing scenario: every last survivor would be enslaved or ruthlessly slaughtered. The Turks had set their sights on taking Vienna, the city they had long called 'The Golden Apple' since their first siege of the city in 1529. Both sides remained resolute, sustained by hatred of their age-old enemy, certain that their victory would be won by the grace of God. Eastern invaders had always threatened the West: Huns, Mongols, Goths, Visigoths, Vandals and many others. The Western fears of the East were vivid and powerful and, in their new eyes, the Turks always appeared the sole aggressors. Andrew Wheatcroft's extraordinary book shows that this belief is a grievous oversimplification: during the 400 year struggle for domination, the West took the offensive just as often as the East. As modern Turkey seeks to re-orient its relationship with Europe, a new generation of politicians is exploiting the residual fears and tensions between East and West to hamper this change. *The Enemy at the Gate* provides a timely and masterful account of this most complex and epic of conflicts.

The Life of Ludwig Van Beethoven Alexander Wheelock Thayer 1921
Seeing Hitler's Germany K. Semmens 2005-03-23 Seeing Hitler's Germany is the first fully researched, wide-ranging study of commercial tourism under the swastika. The book demonstrates how effectively the Nazi regime coordinated all German tourism organizations. At the same time, it emphasizes the apparent 'normality' of many everyday tourist experiences after 1933. These certainly helped some Germans and many foreign visitors to overlook the regime's brutality. However, tourism also celebrated the most racist, chauvinist aspects of the 'new Germany', which in turn became a normal part of being a tourist under Hitler. While violence and terror have continued to dominate many recent studies of the Third Reich, this book takes a different view. By investigating a range of 'normal' experiences - such as taking a tour, visiting a popular sightseeing attraction, reading a guidebook or sending a postcard - Seeing Hitler's Germany deepens our understanding of the popular legitimization of Nazi rule.

Germany '98 Fodor's 1997 "A phone call at two thirty in the morning is never good news. Lucie Montgomery's semiestranged brother, Eli, calls her in France to tell her their father, Leland, has been killed in a hunting accident on the family's five-hundred-acre Virginia vineyard just as the fall harvest is about to begin. By the time he calls, Eli has already made funeral arrangements with what Lucie argues is indecent haste." "It is an emotional trip home - the first since an automobile accident two years ago, which left Lucie disabled and dependent on a cane. Her family's once elegant home and winery are now shabby and run-down, thanks to her father's penchant for fringy business deals. Eli, also cash-strapped and desperate to support his new wife's extravagant lifestyle, has already convinced their rebellious younger sister, Mia, to sell the debt-ridden estate and reap the profits from the valuable land it sits on, overruling Lucie's protests." "On the eve of the funeral Lucie's godfather, Fitz, a partner in the family business, tells her Leland's death was no accident. Whoever killed him was motivated by the potential sale of the vineyard.

It is the last conversation she will have with Fitz. Now the lone holdout preventing the vineyard sale, Lucie realizes she's next in line for another "accident." With her greedy brother, hell-raising sister, and a seemingly cut-rate vintner hired by Leland just before he died, all the suspects are disturbingly close to home. Unsure whom she can trust, Lucie must uncover the truth about the deaths of her father and godfather - and oversee a successful harvest to save the vineyard she loves."--BOOK JACKET.
