**The Flyers** Noah Adams 2003 “It takes only nineteen seconds to walk the distance of the first powered flight. But when I was there the wind was up and cold on my face, and I felt as if I’d entered the black-and-white photograph I’d been seeing all my life. The sand is light gray, there’s a spill of surf in the distance. Wilbur, running at the right of the plane, and Orville, the pilot, are in dark suits. The propellers blur against the sky as the machine rises. . . .” So begins Noah Adams’s adventure in search of Wilbur and Orville Wright, a journey that takes him across the country as he follows in the footsteps of the famous brothers in an attempt to know them

more deeply, not just as inventors and pilots but as individuals as well. Adams, one of our most distinctive and talented storytellers, traveled thousands of miles and interviewed scores of experts and individuals to piece together his story. He finds a local boat captain to ferry him to Kitty Hawk, along the same route that Wilbur took in 1900, and spends several days talking with descendants of the families who first welcomed the Wright brothers a century ago and helped them conduct their gliding experiments. To experience first-hand the thrill of being in the air, Adams himself goes hang-gliding in the Outer Banks. To understand the aerodynamics of lift and drag and how the famous 1903 plane was constructed, he visits Ken Hyde, a Virginia pilot and vintage aircraft builder who is creating the world’s most accurate reproduction of the

1903 Wright Flyer. Adams goes to the prop shop and handles the tools and materials that the Wrights used to build their gliders and planes, and later he visits the wind tunnel at Langley Air Force Base where Hyde's reproduction was tested for the first time. He also travels to France to visit the old racetrack at Le Mans where Wilbur startled the European aviation community with his demonstration flights in 1908, and he spends a few days at Wisconsin's Oshkosh Fly-in, where builders of experimental aircraft and owners of vintage planes gather every year to dazzle the crowds. Adams himself takes to the air in a restored Ford Tri-Motor, America's first airliner, which took its maiden flight seventy years ago. In Adams's book we encounter the Wright brothers in a way that no writer has introduced them before. Through the lens of his own experiences as well as original reporting, letters, diaries, and other primary source material, he helps us understand the talent and intensity of the brothers and their

family, including the fascinating, deeply complex, and at times tragic bond between Orville and Katharine, his younger sister. The Flyers is a wonderfully rich narrative that brings an unprecedented spirit of immediacy to one of history's most dramatic stories. From the Hardcover edition.

**Home Sweet Home Front** Curt Dalton  
2013-09-16 Over the years many books have been written on World War II, especially about the battles overseas. This book was written, in part, to honor those that helped fight the war, not on the battlefields, but also in Dayton, Ohio. By focusing on the home front, the military aspect of the war has been somewhat diminished compared to other books about the era. Wright, Patterson and McCook Field, although of utmost importance in the United States effort to win the war, takes more of a backseat here. Instead, the changes that occurred in the everyday lives of those who were left behind are discussed. It may seem strange to compare the men and women

who served in the armed forces with those who stayed behind, but the truth is that both made sacrifices for the greater good, including the supreme sacrifice of giving up their lives. During the war 292,000 American soldiers died, with another 671,000 wounded. On the home front, nearly 300,000 war workers died while on the job, with more than one million disabled and three million injured. Many "soldiers" on the home front gave freely of their time, working 48 hour a week, volunteering as civil defense wardens or making bandages for the Red Cross in the evenings and on weekends. Many types of food were rationed, as was gasoline, tires, automobiles, and even safety razors. Scrap drives were held in an effort to collect metals to make new weapons, hosiery to make parachutes and fat to make glycerin for gunpowder. Even the children got into the act, being trained as "defense messengers", earning money for the purchase of war bonds, and forming clubs like the Dayton Junior Commandos, all in an effort to

help shorten the war. The citizens of Dayton who lived during the war were, and still are, extraordinary people who helped shape the way our city and our nation is today. It is to them that this book is dedicated.

Italians of Stark County J. A. Musacchia 2013  
Images of America: Italians of Stark County focuses on Italian immigration into Stark County beginning in the late 1800s. In the late 1800s, Stark County's urban hub of Canton and the surrounding communities were in the middle of a thriving expansion driven by industry, transportation, and manufacturing. Along with this growth came the need for labor, with immigration filling many of those needs. Italians came to Stark County to work in the steel mills, in the coal mines, and on the railroad, as well as to start their own small businesses. Once established, Italian families began to replicate the community foundations from their native land, and in turn these foundations reinforced embedded values: family, food, religion, music, and freedom. This photographic history illustrates these values while bringing to life the

character, work ethic, determination, and love of life of the Italian people of Stark County. Local author and Italian American J.A. Musacchia was born and raised in Stark County and is a member of the Sugarcreek Township Historical Society and the William McKinley Presidential Library and Museum.
