Speaking Truths with Film Bill Nichols 2016-04-05 "What issues, of both form and content, shape the documentary film? What role does visual evidence play in relation to a documentary's arguments about the world in which we live? Can a documentary be believed, and why or why not? How do documentaries abide by or subvert ethical expectations? Are mockumentaries a form of subversion? In what ways can the documentary be an aesthetic experience and at the same time have political or social impact? And how can such impacts be empirically measured? Pioneering film scholar Bill Nichols investigates the ways in which documentaries strive for accuracy and truthfulness, but simultaneously fabricate a form that shapes reality. Such films may rely on re-enactment to re-create the past, storytelling to provide satisfying narratives, and rhetorical figures such as metaphor and expressive forms such as irony to make a point. In many ways documentaries are a fiction unlike any other. With clarity and passion, Nichols offers close readings of several provocative documentaries including *Land without Bread*, *Restrepo*, *The Thin Blue Line*, *The Act of Killing*, and *Steve Jobs: The Man in the Machine* as part of an authoritative examination of the layered approaches and delicate ethical balance demanded of documentary filmmakers"--Provided by publisher.

Disclosing Intertextualities Martha Celeste Carpentier 2006 For the first time, this volume brings together essays by feminist, Americanist, and theater scholars who apply a variety of sophisticated critical approaches to Susan Glaspell's entire oeuvre. Glaspell's one-act play, "Trifles," and the short story that she constructed from it, "A Jury of Her Peers," have drawn the attention of many feminist critics, but the rest of her writing--the short stories, plays and novels--is largely unknown. The essays gathered here will allow students of literature, women's studies and theater studies an insight into the variety and scope of her oeuvre. Glaspell's political and literary thinking was radicalized by the turbulent Greenwich Village environment of the first decades of the twentieth century, by progressive-era social movements and by modernist literary and theatrical innovation. The focus of Glaspell studies has, till recently, been dominated by the feminist imperative to recover a canon of silenced women writers and, in particular, to restore Glaspell to her rightful place in American drama. Transcending the limitations generated by such a specific agenda, the contributors to this volume approach Glaspell's work as a dialogic intersection of genres, texts, and cultural phenomena--a method that is particularly apt for Glaspell, who moved between genres with a unique fluidity, creating such modernist masterpieces as *The Verge* or *Brook Evans*. This volume establishes Glaspell's work as an "intersection of textual surfaces," resulting for the first time in the complex aesthetic appreciation that her varied life's work merits.

Thought: A Philosophical History Panayiota Vassilopoulou 2021-05-03 Of all the topics in the history of philosophy, the history of different forms of thinking and contemplation is one of the most important, and yet is also relatively overlooked. What is it to think philosophically? How did different forms of thinking—reflection, contemplation, critique and analysis—emerge in different epochs? This collection offers a rich and diverse philosophical exploration of the history of contemplation, from the classical period to the twenty-first century. It covers canonical figures including Plato, Aristotle, Descartes and Kant, as well as debates in less well-known areas such as classical Indian and Islamic thought and the role of speculation in twentieth-century Russian philosophy. Comprising twenty-two chapters by an international team of contributors, the volume is divided into five parts: • Flourishing and Thinking from Homer to Hume • The Thinking of Thinking from Augustine to Gödel • Images and Thinking from Plotinus to Unger • Bodies of Thought and Habits of Thinking from Plato to Irigaray • The Efficacy of Thinking from Sextus to Bataille

Thought: A Philosophical History is the first comprehensive investigation of the history of philosophical thought and contemplation. As such, it is a landmark publication for anyone researching and teaching the history of philosophy, and a valuable resource for those studying the subject in related fields such as literature, religion, sociology and the history of ideas.

Choosing Leaders and Choosing to Lead Douglas Board 2016-05-23 Some of the worst selection practices to be found anywhere can be found at the top of organisations. Even when senior selection is not egregiously bad, rarely is it as good as it could be. Front-line staff and middle managers are selected with much more rigour today than 30 years ago - but not the chairmen, chief executives and chief officers who lead them. So says Douglas Board in *Choosing Leaders and Choosing to Lead*. Dr Board draws on his extensive experience in executive search and in leadership, coupled with his own academic research embracing the sociology and psychology of scholars such as Pierre Bourdieu and Karl Weick to offer ground-breaking insight into the value and limitations of established selection practice. This book illuminates ways in which senior roles differ from other positions and will help those charged with selecting individuals for senior positions, as well as potential candidates, those concerned with regulating selection policy, and researchers. Examining the classic mix of competency frameworks and selection tools such as psychological and skills assessments, simulations, reference-checking and interviews, the author concludes that senior selection choices are holding back organisations and individual careers, with implications for diversity, effectiveness, and social justice. He contends that while complacent, self-regarding elites will always need vigilant challenge, the scientific approach to selection has weaknesses as well as strengths. Those weaknesses become more pronounced at senior levels, posing particular questions about, amongst other things, the role of intuition and politics.

Psychoanalysis, Catastrophe & Social Action Robin McCoy Brooks 2021-09-28 This fascinating volume uses psychoanalytic theory to explore how political subjectivity comes about within the context of global catastrophe, via the emergence of collective individuations through trans-subjectivity. Serving as a jumping-off point to address the structural linkage between collective catastrophe, subject, group, and political transformation, trans-subjectivity is the central tenet of the book, conceptualized as a psyche-social dynamic that initiates social transformation and which may be enhanced in the clinical setting. Each chapter investigates a distinct manifestation of trans-subjectivity in relation to various real-world events as they manifest clinically in the analytic couple and within group processes. The author builds her conceptual arguments through a psyche/social reading of Kristeva's theory of signifiante (sublimation), Lacan's 1945 essay on collective logic, Heidegger's secular reading of the apostle Paul's Christian revolution, and Žižek, Badiou and Jung's conception of the neighbor within a differentiated humanity. The book features clinical illustrations, an auto-ethnographic study of the emergence of an AIDS clinic, an accounting of trans-subjectivity in Black revolutionary events in the U.S., and an examination of some expressions of care that arose in response to the COVID-19 pandemic. *Psychoanalysis, Catastrophe & Social Action* is important reading for psychoanalysts, psycho-dynamic based therapists, psychologists, group therapists, philosophers and political activists.

The Oxford Handbook of Wittgenstein Oskari Kuusela 2011-10-27 Since the middle of the 20th century Ludwig Wittgenstein has been an exceptionally influential and controversial figure wherever philosophy is studied. This is the most comprehensive volume ever published on Wittgenstein: thirty-five leading scholars explore the whole range of his thought, offering critical engagement and original interpretation, and

tracing his philosophical development. Topics discussed include logic and mathematics, language and mind, epistemology, philosophical methodology, religion, ethics, and aesthetics. Wittgenstein's relation to other founders of analytic philosophy such as Gottlob Frege, Bertrand Russell, and G. E. Moore is explored. This Handbook is the place to look for a full understanding of Wittgenstein's special importance to modern philosophy.

Toward a New World: Articles and Essays, 1901-1906 Alexander Aleksandrovich Bogdanov 2022-06-20 Alexander Bogdanov (1873–1928) wrote the articles in this volume in the years before and during the Revolution of 1905 when he was co-leader, with V.I. Lenin, of the Bolshevik faction of the Russian Social-Democratic Labour Party, and was active in the revolution and the struggle against Marxist revisionism. In these pieces, Bogdanov defends the principles of revolutionary Social-Democracy on the basis of a neutral monist philosophy (empiriomonism), the idea of the invariable regularity of nature, and the use of the principle of selection to explain social development. The articles in *On the Psychology of Society* (1904/06) discredit the neo-Kantian philosophy of Russia's Marxist revisionists, rebut their critique of historical materialism, and develop the idea that labour technology determines social consciousness. *New World* (1905) envisions how humankind will develop under socialism, and Bogdanov's contributions to *Studies in the Realist Worldview* (1904/05) defend the labour theory of value and criticise neo-Kantian sociology.

Truth and Error Zondervan, 2016-09-06 This book is not only an introduction to the entire Zondervan Guide to Cults and Religious Movements series, but also a quick-reference guide to the groups and movements discussed in the series. *Truth and Error* brings together in one volume the charts from the various guides that show how the groups and movements differ theologically from historic orthodox Christianity. Each chart is introduced by the general editor, Alan Gomes. The books in the series that do not have comparison charts are introduced and summarized. Each book in the series includes - A concise introduction to the group or topic - An overview of the group's or movement's theology -- in their own words - A biblical response - Tips for witnessing effectively to members of the group - A bibliography with sources for further study -- Most books also include a comparison chart that shows the essential differences between biblical Christianity and the group. The charts from these books are reproduced in *Truth & Error*.

A History of the Bible as Literature: From antiquity to 1700 David Norton 1993 It is regarded as a truism that the King James Bible is one of the finest pieces of English prose. Yet few people are aware that the King James Bible was generally scorned or ignored as English writing for a century and a half after its publication. The reputation of this Bible is the central, most fascinating, element in a larger history, that of literary ideas of the Bible as they have come into and developed in English culture; and the first volume of David Norton's magisterial two-volume work surveys and analyses a comprehensive range of these ideas from biblical times to the end of the seventeenth century, providing a unique view of the Bible and translation.

Companion Spider Clayton Eshleman 2012-08-22 *Companion Spider* is the accumulated work of a poet and translator who goes more deeply into the art and its process and demands than anyone since Robert Duncan. Clayton Eshleman is one of our most admired and controversial poets, the translator of such great international poets as César Vallejo, Aimé Césaire and Antonin Artaud, and founder and editor of two important literary magazines, *Sulfur* and *Caterpillar*. As such, Eshleman writes about the vocation of poet and of the poet as translator as no one else in America today; he believes adamantly that art must concern itself with vision, and that poets learn best by an apprenticeship that is a kind of immersion in the work of other poets. *Companion Spider* opens with a unique eighty page essay called "Novices: A Study of Poetic Apprenticeship" addressed to the poet who is just starting out. Subsequent sections take up the art of translation, poets and their work, and literary magazine editing. The title is drawn from an extraordinary visionary experience which the author had, which becomes a potent metaphor for the creative process. Through the variety of poets and artists to whom he pays homage, Eshleman suggests a community which is not of a single place or time; rather, there is mutual recognition and responsiveness, so that the reader becomes aware of a range of artistic practices s/he might explore

The Annual Register, Or, A View of the History and Politics of the Year ... 1850 Continuation of the reference work that originated with Robert Dodsley, written and published each year, which records and analyzes the year's major events, developments and trends in Great Britain and throughout the world. After 1815 the usual form became a number of chapters on Great Britain, paying particular attention to the proceedings of Parliament, followed by chapters covering other countries in turn, no longer limited to Europe. The expansion of the History came at the expense of the sketches, reviews and other essays so that the nineteenth-century publication ceased to have the miscellaneous character of its eighteenth-century forebear, although poems continued to be included until 1862, and a small number of official papers and other important texts continue to be reproduced.

From Comparison to World Literature Longxi Zhang 2014-11-19 Reintroduces the concept of [world literature] in a truly global context, transcending past Eurocentrism. The study of world literature is on the rise. Until recently, the term [world literature] was a misnomer in comparative literature scholarship, which typically focused on Western literature in European languages. In an increasingly globalized era, this is beginning to change. In this collection of essays, Zhang Longxi discusses how we can transcend Eurocentrism or any other ethnocentrism and revisit the concept of world literature from a truly global perspective. Zhang considers literary works and critical insights from Chinese and other non-Western traditions, drawing on scholarship from a wide range of disciplines in the humanities, and integrating a variety of approaches and perspectives from both East and West. The rise of world literature emerges as an exciting new approach to literary studies as Zhang argues for the validity of cross-cultural understanding, particularly from the perspective of East-West comparative studies.

The Passions of John Addington Symonds Shane Butler 2023-02-16 John Addington Symonds (Bristol 1840 - Rome 1893) was one of Victorian Britain's most prolific authors, with works that included poems, translations, travel essays, and scholarly studies on topics ranging from classical literature to the Renaissance to the poetry of his contemporaries. Today, however, he is usually remembered for his long unpublished *Memoirs*, a major early monument of queer life-writing, and for two privately printed, secretly

circulated essays, one of which includes the earliest printed appearance in English of the word homosexual. This new word, first coined in German, has long provided a useful milestone for historians of sexuality charting the emergence not only of new typologies but of whole new regimes of knowledge. But what of the rest of Symonds's vast body of work? This book returns to Symonds, not as the origin of a now familiar history, but as a far more complex thinker, with an ambitious vision of the queerness of the world itself--and of what it means to live in it. This is the first monograph, other than biographies and editions, devoted entirely to Symonds and the first critical analysis to embrace a representative selection of his varied oeuvre. Additionally, it explores Symonds's place in the aesthetic and philosophical movements of his century, as well as his important relationships to predecessors such as Winckelmann, Byron, and Hegel, and contemporaries like Benjamin Jowett, Edward Carpenter, Frederic Myers, Robert Louis Stevenson, Oscar Wilde, Walter Pater, and Henry James, and successors like Sigmund Freud. Engagingly written and meticulously researched, including thorough consultation of unpublished archival materials, *The Passions of John Addington Symonds* brings this neglected protagonist of nineteenth-century thought vividly to life, unsettling conventional genealogies of how we think today.

The Truth of History C. Behan McCullagh 2002-11 Modern relativism and postmodern thought in culture and language challenge the 'truth' of history. This book considers how all historians, confined by the concepts and forms of argument of their own cultures, can still discover truths about the past. *The Truth of History* presents a study of various historical explanations and interpretations and evaluates their success as accounts of the past. C. Behan McCullagh contests that the variety of historical interpretations and subjectivity does not exclude the possibility of their truth. Through an examination of the constraints of history, the author argues that although historical descriptions do not mirror the past they can correlate with it in a regular and definable way. Far from debating in the abstract and philosophical only, the author beds his argument in numerous illuminating concrete historical examples. *The Truth of History* explores a new position between the two extremes of believing that history perfectly represents the past and that history can tell us nothing true of the past.
