Revolución tecnológica y reestructuración productiva

Ricardo Jordán 1990

Latin American

Neostructuralism Fernando Ignacio Leiva This landmark work is the first sustained critique of Latin American neostructuralism, the prevailing narrative that has sought to replace "market fundamentalism" and humanize the "savage capitalism" imposed by neoliberal dogmatism. Fernando Leiva analyzes neostructuralism and questions its credibility as the answer to the region's economic, political, and social woes. Recent electoral victories by progressive governments in Latin America promising economic growth, social equity, and political democracy raise a number of urgent questions, including: What are the key strengths and weaknesses of the emerging

paradigm? What kinds of transformations can this movement enact? Leiva addresses these issues and argues that the power relations embedded in local institutions, culture, and populations must be recognized when building alternatives to the present order. Considering the governments in countries such as Chile, Argentina, and Brazil, Leiva examines neostructuralism's impact on global politics and challenges whether this paradigm constitutes a genuine alternative to neoliberalism or is, rather, a more sophisticated form of consolidating existing systems.

Technological Revolutions and Financial Capital

C. Perez 2003-01-01

Technological Revolutions and Financial Capital presents a

novel interpretation of the good and bad times in the economy, taking a long-term perspective and linking technology and finance in an original and convincing way. *Geopolitics and Geoculture* Immanuel Maurice Wallerstein 1991-07-26 Written between 1982 and 1989, this collection contains the author's perspective on the events of this period. The book also charts the development of a challenge to the dominant "geoculture": the cultural framework within which the world-system operates.

El complejo oleaginoso

Mario J. Lattuada 1999
Contemporary Capitalism J. Rogers Hollingsworth 1997
This book argues that there is no single best institutional arrangement for organizing modern societies. Therefore, the market should not be considered the ideal and universal arrangement for coordinating economic activity. Instead, the editors argue, the economic institutions of capitalism exhibit a large variety of objectives and tools

that complement each other and can not work in isolation. The various chapters of the book ask what logics and functions institutions follow and why they emerge, mature and persist in the forms they do.

Industrialismo y nacionalidad en Argentina y el Brasil (1890-1950) Cristina Lucchini 2000

Anti-Systemic Movements Giovanni Arrighi 2020-05-05
Building on an analysis of the dissenting movements to have emerged since the rise of modern capitalism, *Anti-Systemic Movements* uncovers an international groundswell of resistance still vitally active at the end of the twentieth century. The authors suggest that the new assertiveness of the South, the development of class struggle in the East and the emergence of rainbow coalitions in various regions hold fresh promise for emancipatory politics. Taking the year 1968 as a symbolic turning point, the authors argue that new anti-systemic movements have arisen which

challenge the logic of the capitalist world-system.

Soft Power Joseph S. Nye, Jr. 2009-04-28 Joseph Nye coined the term "soft power" in the late 1980s. It is now used frequently—and often incorrectly—by political leaders, editorial writers, and academics around the world. So what is soft power? Soft power lies in the ability to attract and persuade. Whereas hard power—the ability to coerce—grows out of a country's military or economic might, soft power arises from the attractiveness of a country's culture, political ideals, and policies. Hard power remains crucial in a world of states trying to guard their independence and of non-state groups willing to turn to violence. It forms the core of the Bush administration's new national security strategy. But according to Nye, the neo-

conservatives who advise the president are making a major miscalculation: They focus too heavily on using America's military power to force other nations to do our will, and they pay too little heed to our soft power. It is soft power that will help prevent terrorists from recruiting supporters from among the moderate majority. And it is soft power that will help us deal with critical global issues that require multilateral cooperation among states. That is why it is so essential that America better understand and apply our soft power. This book is our guide.

Business Organization and the Myth of the Market Economy William Lazonick 1993-05-28

Explains the transitions in twentieth-century industrial leadership in terms of changing business investment strategies and organizational structures.

A Theory of Capitalist Regulation Michel Aglietta 2000

Aglietta's book is an attempt at a rigorous historical theory of the whole development of US capitalism, from the Civil War to the

Carter Presidency.

The End of Work Jeremy Rifkin
2004 The most significant domestic issue of the 2004 elections is unemployment. The United States has lost nearly three million jobs in the last ten years, and real employment hovers around 9.1 percent. Only one political analyst foresaw the dark side of the technological revolution and understood its implications for global employment: Jeremy Rifkin. *The End of Work* is Jeremy Rifkin's most influential and important book. Now nearly ten years old, it has been updated for a new, post-New Economy era. Statistics and figures have been revised to take new trends into account. Rifkin offers a tough, compelling critique of the flaws in the techniques the government uses to compile employment statistics. *The End of Work* is the book our candidates and our country need to understand the employment challenges-and the hopes-facing us in the century ahead.

The Golden Age of Capitalism

Stephen A. Marglin 1991 This study seeks to understand the rise and fall of the "golden age" of monetarist capitalism enjoyed by Western countries from the end of World War II until the 1960s. Blending historical analysis with economic theory, it questions the basis of present policy-making and provides policy proposals.

The Economic Institutions of Capitalism Oliver E. Williamson
1985 This long-awaited sequel to the modern classic "Markets and Hierarchies" develops and extends Williamson's innovative use of transaction cost economics as an approach to studying economic organization by applying it to work and labor as well as the corporation itself. In addition, Williamson explores its growing implications for public policy, including its potential influence on antitrust and merger guidelines, labor policy, and SEC and public utility regulations.

The Web of Life Fritjof Capra
1997-09-15 The vitality and accessibility of Fritjof Capra's

ideas have made him perhaps the most eloquent spokesperson of the latest findings emerging at the frontiers of scientific, social, and philosophical thought. In his international bestsellers *The Tao of Physics* and *The Turning Point*, he juxtaposed physics and mysticism to define a new vision of reality. In *The Web of Life*, Capra takes yet another giant step, setting forth a new scientific language to describe interrelationships and interdependence of psychological, biological, physical, social, and cultural phenomena--the "web of life." During the past twenty-five years, scientists have challenged conventional views of evolution and the organization of living systems and have developed new theories with revolutionary philosophical and social implications. Fritjof Capra has been at the forefront of this revolution. In *The Web of Life*, Capra offers a brilliant synthesis of such recent scientific breakthroughs as the theory of complexity, Gaia

theory, chaos theory, and other explanations of the properties of organisms, social systems, and ecosystems. Capra's surprising findings stand in stark contrast to accepted paradigms of mechanism and Darwinism and provide an extraordinary new foundation for ecological policies that will allow us to build and sustain communities without diminishing the opportunities for future generations. Now available in paperback for the first time, *The Web of Life* is cutting-edge science writing in the tradition of James Gleick's *Chaos*, Gregory Bateson's *Mind and Matter*, and Ilya Prigogine's *Order Out of Chaos*.

Contradictions of the Welfare State Claus Offe

2018-07-20 Originally published in 1984, *Contradictions of the Welfare State* is the first collection of Claus Offe's essays to appear in a single volume in English. The political writings in this volume are primarily concerned with the origins of the present difficulties of

welfare capitalist states, and he indicates why in the present period, these states are no longer capable of fully managing the socio-political problems and conflicts generated by late capitalist societies. Offe discusses the viability of New Right, corporatist and democratic socialist proposals for restructuring the welfare state. He also offers fresh and penetrating insights into a range of other subjects, including social movements, political parties, law, social policy, and labour markets.

Take Your Pick Lyn Woolcott 1992-01 This is the third of three books in the Communication Games series. It offers a collection of 40 games, a variety of activities, including guessing, matching, searching, role-play and simulation, specific functional areas for each activity and photocopiable copy-masters. The book also covers the structures, functions and lexis required at the Cambridge First Certificate stage.

Towards a New Economic Order Alain Lipietz 1993-01-04 *Towards a New Economic Order* is a concise and critical introduction to what has become known as "regulation theory" in political economics. It makes a major contribution to the study of the political economy of Europe.

Globalization for Development Ian Goldin 2007-05-16 Globalization and its relation to poverty reduction and development is not well understood. The book identifies the ways in which globalization can overcome poverty or make it worse. The book defines the big historical trends, identifies main global flows - trade, finance, aid, migration, and ideas - and examines how each

can contribute to undermine economic development. By considering what helps and what does not, the book presents policy recommendations to make globalization more effective as a vehicle for shared growth and prosperity. It will be of interest to students, researchers and anyone interested in the effects of globalization in today's economy and in international development issues.

Postales urbanas del final del milenio Hilda María Herzer 1997

The New Imperialism David Harvey 2005-02-24 People around the world are confused and concerned. Is it a sign of strength or of weakness that the US has suddenly shifted from a politics of consensus to one of coercion on the world stage? What was really at stake in the war on Iraq? Was it all about oil and, if not, what else was involved? What role has a sagging economy played in pushing the US into foreign adventurism and what difference does it make that

neo-conservatives rather than neo-liberals are now in power? What exactly is the relationship between US militarism abroad and domestic politics? These are the questions taken up in this compelling and original book. Closely argued but clearly written, 'The New Imperialism' builds a conceptual framework to expose the underlying forces at work behind these momentous shifts in US policies and politics. The compulsions behind the projection of US power on the world as a 'new imperialism' are here, for the first time, laid bare for all to see. This new paperback edition contains an Afterword written to coincide with the result of the 2004 American presidential election.

The Production of Space

Henri Lefebvre 1992-04-08

Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the

experience of everyday life. The Production of Space is his major philosophical work and its translation has been long awaited by scholars in many different fields. The book is a search for a reconciliation between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's

wit and by anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures.

Empire Michael Hardt
2001-09-15 Imperialism as we knew it may be no more, but Empire is alive and well. It is, as Michael Hardt and Antonio Negri demonstrate in this bold work, the new political order of globalization. It is easy to recognize the contemporary economic, cultural, and legal transformations taking place across the globe but difficult to understand them. Hardt and Negri contend that they should be seen in line with our historical understanding of Empire as a universal order that accepts no boundaries or limits. Their book shows how this emerging Empire is fundamentally different from the imperialism of European dominance and capitalist expansion in previous eras. Rather, today's Empire draws on elements of U.S. constitutionalism, with its tradition of hybrid identities and expanding

frontiers. Empire identifies a radical shift in concepts that form the philosophical basis of modern politics, concepts such as sovereignty, nation, and people. Hardt and Negri link this philosophical transformation to cultural and economic changes in postmodern society—to new forms of racism, new conceptions of identity and difference, new networks of communication and control, and new paths of migration. They also show how the power of transnational corporations and the increasing predominance of postindustrial forms of labor and production help to define the new imperial global order. More than analysis, Empire is also an unabashedly utopian work of political philosophy, a new Communist Manifesto. Looking beyond the regimes of exploitation and control that characterize today's world order, it seeks an alternative political paradigm—the basis for a truly democratic global society.

Beautiful Flowers of the

Maquiladora Norma Iglesias Prieto 2010-07-05 Published originally as *La flor mas bella de la maquiladora*, this beautifully written book is based on interviews the author conducted with more than fifty Mexican women who work in the assembly plants along the U.S.-Mexico border. A descriptive analytic study conducted in the late 1970s, the book uses compelling testimonials to detail the struggles these women face. The experiences of women in maquiladoras are attracting increasing attention from scholars, especially in the context of ongoing Mexican migration to the country's northern frontier and in light of the North American Free Trade Agreement (NAFTA). This book is among the earliest accounts of the physical and psychological toll exacted from the women who labor in these plants. Iglesias Prieto captures the idioms of these working women so that they emerge as dynamic individuals, young and articulate personalities, inexorably engaged in the daily

struggle to change the fundamental conditions of their exploitation.

Contested Terrain Richards Edwards 1980-07-06 The controversial study by a young radical economist of the transformation of the workplace-- where today impersonal bureaucracies legitimate hierarchies and enhance the employer's control over the worker.
