Training Foreign and Second Language Teachers Carmen Avram 2016-06-22 This book provides a comparative perspective on foreign language teacher training in France, Germany, Russia, Ukraine and Uzbekistan. The training process of state secondary school foreign language teachers is considered from two perspectives for each country. The current training routes through which necessary teaching qualifications are obtained are described with respect to national policy for foreign language learning, the nature of providers, and training programme organization and contents, with details of any practice. These descriptive dimensions are accompanied by an evaluation of the degree to which the training fits the purpose of teaching foreign languages in state secondary schools. The descriptive and evaluative approaches to FL teacher training provide a novel overview of the current successes and challenges in the field, giving an understanding of terrains not easily accessible to the general English-language readership. The book highlights elements of good practice found across nations, and contributes to shedding light on the enduring mystery of why certain nations seem to be managing multilingualism better than others. As such, it provides a reference for interdisciplinary discussions between applied linguists, education researchers and practitioners, and policymakers.

Beyond Training Jack C. Richards 1998-02-13 Beyond Training examines the nature of second language teacher development and how teachers' practices are influenced by their beliefs and principles. It seeks to move discussion of language teacher development beyond the level of "training," which reflects a technical view of specific teaching practices. Instead, it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker. The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques, but in an exploration of the knowledge, beliefs, and attitudes that underly their teaching practices.

New ideas keep emerging as the growing complexity of the means of communication and the opportunities created by technology put language skills to new uses. In addition, the political, social and economic impact of globalisation, the new demands of the labour market that result from it, the pursuit of competitiveness, the challenges of intercultural communication and the diversification of culture have opened new perspectives on the central role that foreign languages have come to play in the development of contemporary societies. This book provides an insight into the latest developments in the field and discusses the new trends in foreign language teaching in four major areas, namely methods and approaches, teacher training, innovation in the classroom, and evaluation and assessment.

New Methodological Approaches to Foreign Language Teaching Thomas H. Schmidt 2017-06-23

This volume explores how the traditional academic disciplines of linguistics, translation, literature and cultural studies can contribute to, or be integrated into, the teaching of a foreign language by means of innovative methodologies, techniques and

instruments. The book begins with a selection of essays on applied linguistics that share some significant findings in the context of second or foreign language acquisition. It then examines the ways in which linguistics, translation theory, literature and cultural studies are brought into the foreign language classroom not just as objects of study but also as vehicles for language-learning. By presenting studies on four main foreign languages, English, Spanish, French and German, the collection offers, to the foreign language profession, an opportunity for the sharing and comparison of strategies across languages at both the secondary and higher education level. The text is a valuable resource for language teachers with a more philologically-oriented background who would like to learn how to apply their research knowledge and experience to the design and implementation of new methodological approaches.

Second and Foreign Language Learning Through Classroom Interaction

Joan Kelly Hall 2000-06-01 This volume brings together the current theoretical interest in reconceptualizing second and foreign language learning from a sociocultural perspective on language and learning, with practical concerns about second and foreign language pedagogy. It presents a set of studies whose focus is on the empirical description of particular practices constructed in classroom interaction that promote the learning of a second or foreign language. The authors examine in detail the processes by which the learning of additional languages is accomplished in the interaction of a variety of classrooms and in a variety of languages. Not only will the findings from the studies reported in this volume help to lay a foundation for the development of a more expansive, sociocultural model of second and foreign language learning, but on a more practical level they will help language educators in creating a set of principles for identifying and sustaining classroom interactional practices that foster additional language development. The volume is distinguished in three ways: * Following a Vygotskian perspective on development, the studies assume that language learning is a fundamentally pragmatic enterprise, intrinsically linked to language use. This breaks from a more traditional understanding of second and foreign language learning, which has viewed learning and use as two distinct phenomena. The importance of classroom interaction to additional language development is foregrounded. * The investigations reported in this book are distinguished by their methodological approach. Because language learning is assumed to be a situated, context-sensitive, and dynamic process, the studies do not rely on traditional experimental methods for collecting and analyzing data, but rather, they involve primarily the use of ethnographic and discourse analytic methods. * The studies focus on interactional practices that promote second and foreign language learning. Although a great deal of research has examined first language learning in classrooms from a sociocultural perspective, little has looked at second and foreign language classrooms from such a perspective. Thus there is a strong need for this volume of studies addressing this area of research.

Researchers, teacher educators, and graduate students across the fields of second and foreign language learning, applied linguistics, and language education will find this book informative and relevant. Because of the programmatic implications arising from the studies, it will also appeal to teacher educators and teachers of second and foreign languages from the elementary to the university levels.
