Commonwealth of Independent States. The Review begins with an overview chapter, followed by analysis of government and industry policies and market-based implements affecting forest products markets. The third chapter is on innovation in the forest sector. Five chapters are based on annual country-supplied statistics, describing: wood raw materials, sawn softwood, sawn hardwood, wood-based panels, and paper, paperboard and wood pulp. Additional chapters discuss markets for wood energy, value-added wood products, and housing. In each chapter, production, trade and consumption are analyzed and relevant material on specific markets is included. Tables and graphs provided throughout the text present summary information.

Forest Products Annual

Market Review 2018-2019

UNECE & FAO 2019-11-04
Achieving the UN Sustainable Development Goals by 2030 will, to a great degree, depend on implementing a “circular economy”. In the forest sector, this relates to how we manage forests and use forest products. The Forest Products Annual Market Review covers recent trends, policies and market intelligence on forest products along with production, consumption and trade statistics for the UNECE region; all of which are critical to the role of forests in creating a more circular economy.

Agriculture Organization (Fao) 2010-07-31 This is the 62nd issue of the FAO Yearbook of Forest Products, a compilation of statistical data on basic forest products for all countries and territories of the world. It contains annual data on the production and trade in forest products for the years 2004-2008 and on directions of trade in 2007 and 2008. The tables are arranged in three parts: the first part contains information about the most important countries in terms of production, consumption and trade of forest products in 2008. The second part contains the main tables reporting the volume of production, consumption and trade, as well as total and unit values of trade, for every country and type of forest products. The third part contains table showing the bilateral directions of trade for major product categories. A useful tool for statisticians, economists, policy makers, and the private sector.
