**The Lachine Canal** Yvon Desloges 2002-10-02 Ideal for history buffs interested in inland navigation and industrial history, this volume reveals how the construction of the Lachine Canal starting in 1821 played a pivotal role in the industrial development of Montreal and all of Canada. Truly revolutionary, the canal ultimately allowed ships to bypass the previously insurmountable rapids and reach the Great Lakes, and its many consequences and benefits are described in detail.

**Canadian Railways 2-Book Bundle** David R.P. Guay 2016-07-16  
Transportation history buffs rejoice. Ride the rails and the waves in this special two-book collection on the great railways from Canada's past. *Passenger and Merchant Ships of the Grand Trunk Pacific and Canadian Northern Railways* The first detailed account of the rise and fall of the maritime branches of two of Canada's great transcontinental railways of the early twentieth century: the Grand Trunk Pacific and Canadian Northern. *Great Western Railway of Canada* It was one of the great railways that opened up Canada, and played a huge role in the

development of Hamilton, the site of its head offices. Yet the rise and fall of the Great Western Railway has been almost lost to memory. David R.P. Guay provides the authoritative book of a great Canadian railway that history forgot.

**The American Neptune** 2002 A quarterly journal of maritime history.

**Irish Eyes** Andrew M. Greeley 2001-03-15 In their investigation of strange vibrations from a place on Lake Michigan where a shipload of Irish Americans lost their lives a hundred years ago, Nuala Anne McGrail, her infant daughter Nelliecoyne, and her husband make some enemies, discover a murder, and find a buried treasure.

*International Handbook of Underwater Archaeology* Carol V. Ruppe 2013-11-11 Although underwater archaeology has assumed its rightful place as an important subdiscipline in the field, the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites. The editors have assembled an internationally distinguished roster of contributors to fill this gap. The book presents geographical and topical approaches, and focuses on technology, law, public and private institutional roles and goals, and the research and development of future technologies and public programs. *A Fully Accredited Ocean* Victoria Brehm 1998 Essays about the economic and industrial development of the Lakes that point out the uniqueness of the area.

**Michigan's Venice** Daniel F. Harrison 2024-04-16 Few maritime landscapes in the Great Lakes remain so deeply and clearly inscribed by successive cultures as the St. Clair system—a river, delta, and lake found between Lake Huron and the Detroit River. The St. Clair River and its environs are an age-old transportation nexus of land and water routes, a strategic point of access to maritime resources, and, in many ways, a natural impediment to the navigation of the Great Lakes. From

Indigenous peoples and European colonizers to the modern nations of Canada and the United States, this work traces the region's transformation through culturally driven practices and artifacts of shipbuilding, navigation, place naming, and mapmaking. In this novel approach to maritime landscape archaeology, author Daniel F. Harrison unifies historiography, linguistics, ethnohistory, geography, and literature through the analysis of primary sources, material culture, and ecological and geographic data in a technique he calls "evidence-based storytelling." Viewed over time, the region forms a microcosm of the interplay of environment, culture, and technology that characterized the gradual shift from nature to an industrial society and a built environment optimized for global waterborne transport.

*Fashioning the Canadian Landscape* J.I. Little 2018-01-01 In his book *Fashioning the Canadian Landscape*, J.I. Little examines how Canada, much like the United States, came to be identified with its natural landscape. Little argues that in contrast to America, Canada's image was strongly influenced by the picturesque convention favoured by British travel writers.

City of Lake and Prairie Kathleen A. Brosnan 2020-09-08 Known as the Windy City and the Hog Butcher to the World, Chicago has earned a more apt sobriquet—City of Lake and Prairie—with this compelling, innovative, and deeply researched environmental history. Sitting at the southwestern tip of Lake Michigan, one of the largest freshwater bodies in the world, and on the eastern edge of the tallgrass prairies that fill much of the North American interior, early residents in the land that Chicago now occupies enjoyed natural advantages, economic opportunities, and global connections over centuries, from the Native Americans who first inhabited the region to the urban dwellers who built a metropolis in the nineteenth and twentieth centuries. As one millennium ended and a new one began, these same features sparked a distinctive Midwestern environmentalism aimed at preserving local ecosystems. Drawing on its contributors' interdisciplinary talents, this

volume reveals a rich but often troubled landscape shaped by communities of color, workers, and activists as well as complex human relations with industry, waterways, animals, and disease.

**Studies in American Indian Literatures** 1998

**Nineteenth-century Literature Criticism** Laurie Lanzen Harris 1981 Excerpts from criticism of the works of novelists, poets, playwrights, short story writers and other creative writers who lived between 1800 and 1900, from the first published critical appraisals to current evaluations.

**Constance Fenimore Woolson's Nineteenth Century** Victoria Brehm 2001 "These essays explore topics crucial to understanding the period's literature and suggest new directions for scholarship. Together they constitute a collection that expands the available body of criticism about Woolson and her contemporaries. This book is indispensable reading for anyone interested in nineteenth-century women's fiction and travel writing."--Jacket.

**The Mariner's Mirror** Leonard George Carr Laughton 2002

**Le canal de Lachine** Yvon Desloges 2002 Sans le canal de Lachine, Montréal ne serait pas devenue aussi rapidement la métropole commerciale et industrielle qu'elle est devenue. Interface entre l'Atlantique et les Grands Lacs, le canal verra voguer au fil de l'eau une flotte de navires en tous genres. De même, par sa seule présence, l'eau du canal suscitera l'implantation de l'industrie manufacturière le long de ses berges, les uns voulant s'approvisionner en énergie hydraulique, les autres tirant le maximum de cette ressource mésestimée. Avec une telle activité, de rase campagne, les berges du canal se métamorphosent en frange urbaine. Le canal n'est plus seulement un lieu où l'on travaille, mais devient aussi un milieu de vie. Pour rendre compte de l'importance et de la particularité de ce canal, un album-photo comme celui-ci ne cherche pas seulement à offrir le splendide. Les photographies servent surtout d'appuis formidables au propos des auteurs. Car, ce livre ne se veut pas seulement un beau livre mais aussi un document où des points essentiels de l'histoire du canal, de sa construction à la navigation, en

passant par les usines et les hommes, sont mis en scène. Bref, où la mise en perspective historique prime sur la seule esthétique des photos.

**Constance Fenimore Woolson** Sharon L. Dean 1995 Dean (English, Rivier College, New Hampshire) examines Woolson's (1840-1894) novels and short stories, focusing on how her work illustrates late 19th century attitudes about a variety of cultural issues including art, women's rights, and the nexus of social class, race relations, and ethnicity. Also examined are how Woolson's transient lifestyle and progressive deafness isolated her from family and friends and Woolson's friendship with Henry James and his family. **The Frances Smith** Scott L. Cameron 2005-08-26 The Frances Smith was not only the first steamboat to be built in Owen Sound, but also the largest vessel on Georgian Bay at that time. By far the most luxurious vessel to sail the Upper Great Lakes from a Canadian port, she was known as a "palace steamer." In the mid-to-late-19th century, the Frances Smith set the standard for speed, spacious accommodation and quality service on Georgian Bay and Lake Superior. The story of the Frances Smith, full of adventure and courageous actions, and even including disreputable behaviour, is a genuine story of life on the Great Lakes in the latter part of the 1800s. Meticulously researched and documented by Scott L. Cameron, this book is an exploration of a special part of our past that will be of great interest to history buffs in general, and maritime historians in particular.

**Great Western Railway of Canada** David R.P. Guay 2015-12-05 It was one of the great railways that opened up Canada, and played a huge role in the development of Hamilton, the site of its head offices. Yet the rise and fall of the Great Western Railway has been almost lost to memory. David R.P. Guay provides the authoritative book of a great Canadian railway that history forgot.

**Mastering the Inland Seas** Theodore J. Karamanski 2020-04-21 Theodore J. Karamanski's sweeping maritime history demonstrates the far-ranging impact that the tools and infrastructure developed for navigating the

Great Lakes had on the national economies, politics, and environment of continental North America. Synthesizing popular as well as original historical scholarship, Karamanski weaves a colorful narrative illustrating how disparate private and government interests transformed these vast and dangerous waters into the largest inland water transportation system in the world. Karamanski explores both the navigational and sailing tools of First Nations peoples and the dismissive and foolhardy attitude of early European maritime sailors. He investigates the role played by commercial boats in the Underground Railroad, as well as how the federal development of crucial navigational resources exacerbated sectionalism in the antebellum United States. Ultimately Mastering the Inland Sea shows the undeniable environmental impact of technologies used by the modern commercial maritime industry. This expansive story illuminates the symbiotic relationship between infrastructure investment in the region's interconnected waterways and North America's lasting economic and political development.

*Shaped by the West Wind* Claire Elizabeth Campbell 2005 "Claire Campbell draws from recent work in cultural history, landscape studies in geography and art history, and environmental history to explore what happens when external agendas confront local realities - a story central to the Canadian experience. Explorers, fishers, artists, and park planners

all were forced to respond to the unique contours of this inland sea; their encounters defined a regional identity even as they constructed a popular image for the Bay in the national imagination."--Jacket.

**The Midwest** Joseph W. Slade 2004-12-30 From architecture to food to music, this volume provides a textured examination of the many ways in which the Midwest has served as an undeniable cross-section of American culture. Includes the states of Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin.

**Fish for All** Michael J. Chiarappa 2003 The contentious claims of groups seeking to use Lake Michigan's fisheries resources were at the center of modern America's emerging environmental politics in the middle of the twentieth century. Going beyond the chronicling of past events, Fish for All contextualizes the shared experiences that shape each group's collective memory and presents their historical narratives as discourse that legitimizes their current claims to the resource. Fish for All highlights the historically charged consciousness of fishing communities and points to the evolving communication that will take place between them, fisheries historians, fisheries anthropologists, scientists, and policymakers.
