Learning How to Learn Barbara Oakley, PhD 2018-08-07 A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains:

- Why sometimes letting your mind wander is an important part of the learning process
- How to avoid "rut think" in order to think outside the box
- Why having a poor memory can be a good thing
- The value of metaphors in developing understanding
- A simple, yet powerful, way to stop procrastinating

Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Creative Acts for Curious People Sarah Stein Greenberg 2021-09-21
 WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • "A delightful, compelling book that offers a dazzling array of practical, thoughtful exercises designed to spark creativity, help solve problems, foster connection, and make our lives better."—Gretchen Rubin, New York Times bestselling author and host of the Happier podcast In an era of ambiguous, messy problems—as well as extraordinary opportunities for positive change—it's vital to have both an inquisitive mind and the ability to act with intention. *Creative Acts for Curious People* is filled with ways to build those skills with resilience, care, and confidence. At Stanford University's world-renowned Hasso Plattner Institute of Design, aka "the d.school," students and faculty, experts and seekers bring together diverse perspectives to tackle ambitious projects; this book contains the experiences designed to help them do it. A provocative and highly visual companion, it's a definitive resource for people who aim to draw on their curiosity and creativity in the face of uncertainty. Teeming with ideas about discovery, learning, and leading the way through unknown creative territory, *Creative Acts for Curious People* includes memorable stories and more than eighty innovative exercises. Curated by executive director Sarah Stein Greenberg, after being honed in the classrooms of the d.school, these exercises originated in some of the world's most inventive and unconventional minds, including those of d.school and IDEO founder David M. Kelley, *ReadyMade* magazine founder Grace Hawthorne, innovative choreographer Aleta Hayes, Google chief innovation evangelist Frederik G. Pferdt, and many more. To bring fresh approaches to any challenge—world changing or close to home—you can draw on exercises such as *Expert Eyes* to hone observation skills, *How to Talk to Strangers* to foster understanding, and *Designing Tools for Teams* to build creative leadership. The activities are at once lighthearted, surprising, tough, and impactful—and reveal how the hidden dynamics of design can drive more vibrant ways of making, feeling, exploring, experimenting, and collaborating at work and in life. This book will help you develop the behaviors and deepen the mindsets

that can turn your curiosity into ideas, and your ideas into action.

Look Who's Learning to Read Shelley Harwayne 2008-08 The activities in this book will help parents, teachers, babysitters, nannies, daycare workers, or grandparents spend joyous moments with the children in their care and help those children learn to read and write as naturally as they have been learning to walk and talk? Features fifty easy-to-use activities using common every day, inexpensive materials? Includes a glossary of common "literacy terms" and a bibliography of children's literature that the very young love best!

The Fun Habit Mike Rucker 2023-01-03 Discover the latest scientific evidence for the potent and revitalizing value of fun and how to make having fun a habitual and authentic part of your daily life with "this well-researched and impressive guide" (BookPage). Doesn't it seem that the more we seek happiness, the more elusive it becomes? There is an easy fix: fun is an action you can take here and now, practically anywhere, anytime. Through research and science, we know fun is enormously beneficial to our physical and psychological well-being, yet fun's absence from our modern lives is striking. Whether you're a frustrated high-achiever trying to find a better work-life balance or someone who is seeking relief from life's overwhelming challenges, it is time you gain access to the best medicine available. "A masterful distillation of science and personal experience" (Nir Eyal, author of *Hooked*), *The Fun Habit* explains how you can build having fun into an actionable and effortless habit and why doing so will help you become a healthier, more joyful, more productive person. In the vein of *Year of Yes*, *10% Happier*, and *Atomic Habits*, *The Fun Habit* features "practical tips, tools, and tactics for bringing fun into our lives starting now" (Dr. Olav Sorenson, UCLA professor of sociology).

Make It Stick Peter C. Brown 2014-04-14 Discusses the best methods of learning, describing how rereading and rote repetition are counterproductive and how such techniques as self-testing, spaced retrieval, and finding additional layers of information in new material can enhance learning.

Fun Learning Activities for Modern Foreign Languages Jake Hunton 2014-03-26 Students learning modern foreign languages often comment that it is just too hard to learn, and remember, all of vocabulary presented to them. Yes, there is a lot of content that needs to be covered, and a lot of vocabulary that needs to be learned. But there is a way of making this process engaging and motivating. Language lessons needn't be full of grammar worksheets, endless drilling and rote learning lists of vocabulary. Learning languages isn't always fun and games. But these aren't games; they are fun learning activities. And they can help revolutionise language teaching; enabling teachers to authoritatively impart knowledge while fostering a thirst for knowledge and love of learning in their students. First, the Vocab Fun Learning Activities (VFLAs) learn the vocabulary in ways which will improve recognition and recall. Then, the Fun Learning Activities use this vocabulary knowledge to build sentences and paragraphs; explore and use this language while keeping the whole class engaged and actively learning. The activities are designed to encourage all students to participate and learn more through enjoyment. Based on the author's extensive classroom experience, and underpinned by research into how students learn best, each activity comes complete with a detailed explanation and plenty of ideas for variations, differentiations and extensions. The activities come with example vocabulary lists in French, German and Spanish as a starting point, which are all available for download via a link provided in the book. However, the activities will work effectively in any language and with any vocabulary list of the teacher's choosing, and can be adapted to suit every topic, learning objective and age range. Discover ready to use activities which will make for outstanding lessons in every class and ensure engagement, motivation, rapport, progress and attainment over time.

How We Learn Benedict Carey 2014-09-09 In the tradition of *The Power of Habit* and *Thinking, Fast and Slow* comes a practical, playful, and endlessly fascinating guide to what we really know about learning and memory today—and how we can apply it to our own lives. From an early age, it is drilled into our heads: Restlessness, distraction, and ignorance are the enemies of success. We're told that learning is all self-discipline, that we must confine ourselves to designated study areas, turn off the music, and maintain a strict ritual if we want to ace that test, memorize that presentation, or nail that piano recital. But what if almost everything we were told about learning is wrong? And what if there was a way to achieve more with less effort? In *How We Learn*, award-winning science reporter Benedict Carey sifts through decades of education research and landmark studies to uncover the truth about how our brains absorb and retain information. What he discovers is that, from the moment we are born, we are all learning quickly, efficiently, and automatically; but in our zeal to systematize the process we have ignored valuable, naturally enjoyable learning tools like forgetting, sleeping, and daydreaming. Is a dedicated desk in a quiet room really the best way to study? Can altering your routine improve your recall? Are there times when distraction is good? Is repetition necessary? Carey's search for answers to these questions yields a wealth of strategies that make learning more a part of our everyday lives—and less of a chore. By road testing many of the counterintuitive techniques described in this book, Carey shows how we

can flex the neural muscles that make deep learning possible. Along the way he reveals why teachers should give final exams on the first day of class, why it's wise to interleave subjects and concepts when learning any new skill, and when it's smarter to stay up late prepping for that presentation than to rise early for one last cram session. And if this requires some suspension of disbelief, that's because the research defies what we've been told, throughout our lives, about how best to learn. The brain is not like a muscle, at least not in any straightforward sense. It is something else altogether, sensitive to mood, to timing, to circadian rhythms, as well as to location and environment. It doesn't take orders well, to put it mildly. If the brain is a learning machine, then it is an eccentric one. In *How We Learn*, Benedict Carey shows us how to exploit its quirks to our advantage.
