Powerful Prose R. L. Victoria Pöhls 2021-10-31 What makes a reading experience »powerful«? This volume brings together literary scholars, linguists, and empirical researchers who tackle the question by investigating the effects and reader responses generated by selected extracts of literary prose. The twelve contributions theorize this widely-used, but to date insufficiently studied notion, and provide insights into the therefore still mysterious-seeming power of literary fiction. The collection explores a variety of stylistic as well as readerly and psychological features responsible for short- and long-term effects - topics of great interest to those interested or specialized in literary studies and narratology, (cognitive) stylistics, empirical literary studies and reader response theory.

The Architecture of Deconstruction Mark Wigley 1993 By locating the architecture already hidden within deconstructive discourse, Wigley opens up more radical possibilities for both architecture and deconstruction.

Language of the Snakes Andrew Ollett 2017-10-10 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Language of the Snakes traces the history of the Prakrit language as a literary phenomenon, starting from its cultivation in courts of the Deccan in the first centuries of the common era. Although little studied today, Prakrit was an important vector of the kavya movement and once joined Sanskrit at the apex of classical Indian literary culture. The opposition between Prakrit and Sanskrit was at the center of an enduring "language order" in India, a set of ways of thinking about, naming, classifying, representing, and ultimately using languages. As a language of classical literature that nevertheless retained its associations with more demotic language practices, Prakrit both embodies major cultural tensions—between high and low, transregional and regional, cosmopolitan and vernacular—and provides a unique perspective onto the history of literature and culture in South Asia.

Robot Ghosts and Wired Dreams Christopher Bolton 2007 Since the end of the Second World War—and particularly over the last decade—Japanese science fiction has strongly influenced global popular culture. Unlike American and British science fiction, its most popular examples have been visual—from Gojira (Godzilla) and Astro Boy in the 1950s and 1960s to the anime masterpieces Akira and Ghost in the Shell of the 1980s and 1990s—while little attention has been paid to a vibrant tradition of prose science fiction in Japan. Robot Ghosts and Wired Dreams remedies this neglect with a rich exploration of the genre that connects prose science fiction to contemporary anime. Bringing together Western scholars and leading Japanese critics, this groundbreaking work traces the beginnings, evolution, and future direction of science fiction in Japan, its major schools and authors, cultural origins and relationship to its Western counterparts, the role of the genre in the formation of Japan's national and political identity, and its unique fan culture. Covering a remarkable range of texts—from the 1930s fantastic detective fiction of Yumeno Kyūsaku to the cross-culturally produced and marketed film and video game franchise Final Fantasy—this book firmly establishes Japanese science fiction as a vital and exciting genre. Archive Fever Jacques Derrida 1996 As a depository of civic record and social history whose very name derives from the Greek word for town hall, the archive would seem to be a public entity, yet it is stocked

with the personal, even intimate, artifacts of private lives. It is this inherent tension between public and private which inaugurates, for Derrida, an inquiry into the human impulse to preserve, through technology as well as tradition, both a historical and a psychic past. What emerges is a marvelous expansive work, engaging at once Judaic mythos, Freudian psychoanalysis, and Marxist materialism in a profound reflection on the real, the unreal, and the virtual.

Psychiatry Konstantinos N. Fountoulakis 2021-11-26 This book was the end product of life experiences, thoughts and intellectual wanderings of the author, who through his career and for the last twenty years was always serving all the three aspects of a Psychiatrist: He is a clinician, a researcher and an academic teacher. The book includes a comprehensive history of Psychiatry since antiquity and until today, with an emphasis not only on main events but also specifically and with much detail and explanations, on the chain of events that led to a particular development. At the center of this work is the question 'What is mental illness?' and 'Does free will exist?'. These are questions which tantalize Psychiatrists, neuroscientists, psychologists, philosophers, patients and their families and the sensitive and educated lay persons alike. Thus, the book includes a comprehensive review and systematic elaboration on the definition and the concept of mental illness, a detailed discussion on the issue of free will as well as the state of the art of contemporary Psychiatry and the socio-political currents it has provoked. Finally the book includes a description of the academic, social and professional status of Psychiatry and Psychiatrists and a view of future needs and possible developments. A last moment addition was the chapter on conspiracy theories, as a consequence of the experience with the social media and the public response to the COVID-19 outbreak which coincided with the final stage of the preparation of the book. Their study is an excellent opportunity to dig deep into the relation among human psychology, mental health, the society and politics and to swim in intellectually dangerous waters.

Thinking the Problematic Oliver Leistert 2020-10-31 The notion of »the problematic« has changed its meaning within the history of power and knowledge since the early 20th century, leading up to today's performative, neocybernetic fascination with generalized management ideas and technocratic models of science. This book explores central scenes, conceptual elaborations, and practical affiliations of what historically has been called »the problem« or »the problematic«. By way of considering modes of problematization as modes of inhabitation, intervention, and transformation the contributions map its current conceptual-political uses as well as onto-epistemological challenges. Thus, »problematization« is positioned as a critical concept that links, often in intricate ways, several currents from speculative philosophy to the formation of interdisciplinary fields. The »problematic«, as it turns out, has been the source of change in philosophy and the sciences all along.

Modernity Disavowed Sibylle Fischer 2004-04-30 *Modernity Disavowed* is a pathbreaking study of the cultural, political, and philosophical significance of the Haitian Revolution (1791–1804). Revealing how the radical antislavery politics of this seminal event have been suppressed and ignored in historical and cultural records over the past two hundred years, Sibylle Fischer contends that revolutionary antislavery and its subsequent disavowal are central to the formation and understanding of Western modernity. She develops a powerful argument that the denial of revolutionary antislavery eventually became a crucial ingredient in a range of hegemonic thought, including Creole nationalism in the Caribbean and G. W. F. Hegel's master-slave dialectic. Fischer draws on history, literary scholarship, political theory, philosophy, and psychoanalytic theory to examine a range of material, including Haitian political and legal documents and nineteenth-century Cuban and Dominican literature and art. She demonstrates that at a time when racial taxonomies were beginning to mutate into scientific racism and racist biology, the Haitian revolutionaries recognized the question of race as political. Yet, as the cultural records of neighboring Cuba and the Dominican Republic show, the story of the Haitian Revolution has been told as one outside politics and beyond human language, as a tale of barbarism and unspeakable violence. From the time of the revolution

onward, the story has been confined to the margins of history: to rumors, oral histories, and confidential letters. Fischer maintains that without accounting for revolutionary antislavery and its subsequent disavowal, Western modernity—including its hierarchy of values, depoliticization of social goals having to do with racial differences, and privileging of claims of national sovereignty—cannot be fully understood.

Beginning Theory Peter Barry 2002-09-07 In this second edition of *Beginning Theory*, the variety of approaches, theorists, and technical language is lucidly and expertly unraveled and explained, and allows readers to develop their own ideas once first principles have been grasped. Expanded and updated from the original edition first published in 1995, Peter Barry has incorporated all of the recent developments in literary theory, adding two new chapters covering the emergent Eco-criticism and the re-emerging Narratology.

A Silvan Tomkins Handbook Adam J. Frank 2020-08-04 An accessible guide to the work of American psychologist and affect theorist Silvan Tomkins. The brilliant and complex theories of psychologist Silvan Tomkins (1911-1991) have inspired the turn to affect in the humanities, social sciences, and elsewhere. Nevertheless, these theories are not well understood. *A Silvan Tomkins Handbook* makes his theories portable across a range of interdisciplinary contexts and accessible to a wide variety of contemporary scholars and students of affect. *A Silvan Tomkins Handbook* provides readers with a clear outline of Tomkins's affect theory as he developed it in his four-volume masterwork *Affect Imagery Consciousness*. It shows how his key terms and conceptual innovations can be used to build robust frameworks for theorizing affect and emotion. In addition to clarifying his affect theory, the Handbook emphasizes Tomkins's other significant contributions, from his broad theories of imagery and consciousness to more focused concepts of scenes and scripts. With their extensive experience engaging and teaching Tomkins's work, Adam J. Frank and Elizabeth A. Wilson provide a user-friendly guide for readers who want to know more about the foundations of affect studies.

The Late Foucault Marta Faustino 2022-06-30 "Marta Faustino and Gianfranco Ferraro present a collection of essays by esteemed academics on the ethical and political questions present in Michel Foucault's late work. As one of the most important and controversial thinkers of the twentieth century, the philosopher's last works are at the centre of much current academic research and debate. Comprising 15 essays written by specialists on Foucault's thought from 10 different countries, the perspectives offered by the contributors and the thinker himself can help us to unravel modernity and give us the tools to understand and ethically and politically transform our present"--

How to Stop Living and Start Worrying Simon Critchley 2013-04-18 The question of how to lead a happy and meaningful life has been at the heart of philosophical debate since time immemorial. Today, however, these questions seem to be addressed not by philosophers but self-help gurus, who frantically champion the individual's quest for self-expression and self-realization; the desire to become authentic. Against these new age sophistries, *How to Stop Living and Start Worrying* tackles the question of 'how to live' by forcing us to explore our troubling relationship with death. For Critchley, philosophy begins with the question of finitude and with his understanding of a key classical theme - that to philosophize is to learn how to die. Learning how to accept both our own and others' mortality as a part of life also raises the question of how to love. Critchley argues that the act of love requires us to give up something of ourselves, to lose control so as to be open to the demands of love. We will never be equal to this demand and so we are brought face to face with our own limitations - one form of which is what Critchley calls our 'originary inauthenticity'. By scrutinizing the very nature of humour, Critchley explores what we need to laugh at ourselves and presents the need to confront the inescapable ridiculousness of life. Reflecting on the work of over 20 years, this book provides a unique, witty and erudite introduction to the thought of Simon Critchley. It includes a revealing biographical conversation with Critchley and a fascinating debate with the critically acclaimed novelist Tom McCarthy about the nature of authenticity. Taken together the conversations give an intimate portrait of one of the most lucid, provocative and engaging philosophers writing today.

Manifestly Haraway Donna J. Haraway 2016-04-01 Electrifying, provocative, and controversial when first published thirty years ago, Donna Haraway's "Cyborg Manifesto" is even more relevant today, when the divisions that she so eloquently challenges—of human and machine but also of gender, class, race, ethnicity, sexuality, and location—are increasingly complex. The subsequent "Companion Species

Manifesto," which further questions the human-nonhuman disjunction, is no less urgently needed in our time of environmental crisis and profound polarization. Manifestly Haraway brings together these momentous manifestos to expose the continuity and ramifying force of Haraway's thought, whose significance emerges with engaging immediacy in a sustained conversation between the author and her long-term friend and colleague Cary Wolfe. Reading cyborgs and companion species through and with each other, Haraway and Wolfe join in a wide-ranging exchange on the history and meaning of the manifestos in the context of biopolitics, feminism, Marxism, human-nonhuman relationships, making kin, literary tropes, material semiotics, the negative way of knowing, secular Catholicism, and more. The conversation ends by revealing the early stages of Haraway's "Chthulucene Manifesto," in tension with the teleologies of the doleful Anthropocene and the exterminationist Capitalocene. Deeply dedicated to a diverse and robust earthly flourishing, Manifestly Haraway promises to reignite needed discussion in and out of the academy about biologies, technologies, histories, and still possible futures.

Archives Laura Millar 2010 Whether an institution has a collections orientation or whether it is primarily responsible for managing institutional archives in conjunction with an organizational records management programme, those responsible for its archives and records management need specialist advice and practical guidance in the successful establishment and operation of an archival facility built on sound principles. This authoritative handbook, written by an archival professional with over 25 years' experience, offers just that. Addressing the contextual, strategic and operational issues associated with archives, the text covers everything the archivist needs to know: establishing principles, policies and procedures; managing day-to-day operations; caring for different types of archival materials; enhancing outreach and public access; and ensuring the growth and sustainability of the institution and its services. The key chapters are: What are archives? Archival institutions: creatures of history and culture Archival service: a matter of trust Protecting archives Provenance, original order and respect des fonds Appraising and acquiring archives Arranging and describing archives Making archives available The challenge of digital archives. The final section of the book offers a glossary of terms and a wide range of specialist information including comprehensive lists of recommended further reading, national institutions, professional bodies and other sources of advice. Readership: This book is essential reading for anyone involved in managing archives. Its straightforward and approachable language ensures that fundamental principles and practices are outlined clearly for novice archivists and non-specialists; experienced professionals will also find the work of immense value in validating or updating their understanding of archival operations. The issues addressed are relevant to archival practice internationally, particularly in English-speaking countries, and concepts in place in different parts of the world are examined in order to provide a global context.

The Neganthropocene Daniel Ross 2020-10-09 In the essays and lectures here titled *Neganthropocene*, Stiegler opens an entirely new front moving beyond the dead-end "banality" of the Anthropocene. Stiegler stakes out a battleplan to proceed beyond, indeed shrugging off, the fulfillment of nihilism that the era of climate chaos ushers in. A Reader's Guide to Contemporary Literary Theory Raman Selden 1989 Unsurpassed as a text for upper-division and beginning graduate students, Raman Selden's classic text is the liveliest, most readable and most reliable guide to contemporary literary theory. Includes applications of theory, cross-referenced to Selden's companion volume, *Practicing Theory and Reading Literature*.

Knowledge, Spirit, Law: Book 2: The Anti-capitalist Sublime Gavin Keeney 2017-12-24 *Knowledge, Spirit, Law, Book 2: The Anti-capitalist Sublime* takes up where *Knowledge, Spirit, Law, Book 1: Radical Scholarship* (2015) left off, foremost in terms of a critique of neo-liberal academia and its demotion of the book in favor of various mediatic practices that substitute, arguably, for the one form of critical inquiry that might safeguard speculative intellectual inquiry as long-form and long-term project, especially in relationship to the archive or library (otherwise known as the "public domain"). This ongoing critique of neo-liberal academia is a necessary corrective to processes underway today toward the further marginalization of radical critique, with many of the traditional forms of sustained analysis being replaced by pseudo-empirical studies that abandon themes only presentable in the Arts and Humanities through the

"arcanian closure" that the book as long-form inquisition represents (whether as novel, non-fictional critique, or something in-between). As a tomb for thought, this privileging of the shadowy recesses of the book preserves, through the very apparatuses of long- and slow-form scholarship, the premises presented here as indicative of an anti-capitalist project embedded in works that might otherwise shun such a characterization. The perverse capitalist capture of knowledge through mass digitalization is - paradoxically - the negative corollary for the reduction by abstraction of everyday works to a philosophical and moral inquest against Capital. The latter actually constitutes a transversal reduction for works (across works) toward the age-old antithesis to instrumentalized socio-cultural production - Spirit. For similar reasons, the anti-capitalist sublime as presented here is primarily a product of the imaginative, magical-realist regimes of thought in service to "no capital" - to no capitalization of thought. This book seeks to re-establish paradigmatic, a-historical, and universalizing practices in humanistic scholarship associated with speculative inquiry as a form of art, utilizing in passing forms of art and exemplary paradigmatic practices that are also first-order forms of speculative inquiry - suggesting that first-order works in the Arts and Humanities are those works that may "suffer" second-order incorporations without the attendant loss of the impress of sublimity (Spirit).

The Humanist Controversy and Other Writings François Matheron 2020-05-05 There can be little doubt that Louis Althusser was one of the most influential philosophers of the twentieth century, and his influence subsists in many of the concepts currently deployed in disciplines such as cultural studies, social theory and literary criticism. Yet Althusser was also a leading intellectual in the French Communist Party and a foremost participant in the debates in the human sciences that are marked by the names of Claude Lvi-Strauss, Jacques Lacan and Georges Canguilhem. His writings were major interventions in a specific political and theoretical conjuncture and it is this aspect of his work that this new collection of previously untranslated texts seeks to reflect. Consisting of writings from the very height of Althusser's intellectual powers, during the period 1966-67, this book covers, among other things, the critique of Lvi-Strauss's structuralism, the theory of discourse and its relationship to psychoanalysis, the place of Ludwig Feuerbach, the tasks of Marxist philosophy, and the famous "humanist controversy."

The Posthuman Rosi Braidotti 2013-07-11 The Posthuman offers both an introduction and major contribution to contemporary debates on the posthuman. Digital 'second life', genetically modified food, advanced prosthetics, robotics and reproductive technologies are familiar facets of our globally linked and technologically mediated societies. This has blurred the traditional distinction between the human and its others, exposing the non-naturalistic structure of the human. The Posthuman starts by exploring the extent to which a post-humanist move displaces the traditional humanistic unity of the subject. Rather than perceiving this situation as a loss of cognitive and moral self-mastery, Braidotti argues that the posthuman helps us make sense of our flexible and multiple identities. Braidotti then analyzes the escalating effects of post-anthropocentric thought, which encompass not only other species, but also the sustainability of our planet as a whole. Because contemporary market economies profit from the control and commodification of all that lives, they result in hybridization, erasing categorical distinctions between the human and other species, seeds, plants, animals and bacteria. These dislocations induced by globalized cultures and economies enable a critique of anthropocentrism, but how reliable are they as indicators of a sustainable future? The Posthuman concludes by considering the implications of these shifts for the institutional practice of the humanities. Braidotti outlines new forms of cosmopolitan neo-humanism that emerge from the spectrum of post-colonial and race studies, as well as gender analysis and environmentalism. The challenge of the posthuman condition consists in seizing the opportunities for new social bonding and community building, while pursuing sustainability and empowerment.

Photography and Surrealism David Bate 2020-08-12 David Bate examines automatism and the photographic image, the Surrealist passion for insanity, ambivalent use of Orientalism, use of Sadean philosophy and the effect of fascism of the Surrealists. The book is illustrated with a wide range of surrealist photographs.

The Biopolitics of Development Sandro Mezzadra 2013-12-27 This book offers an original analysis and theorization of the biopolitics of development in the postcolonial present, and draws significantly from the

later works of Michel Foucault on biopolitics. Foucault's works have had a massive influence on postcolonial literatures, particularly in political science and international relations, and several authors of this book have themselves made significant contributions to that influence. While Foucault's thought has been inspirational for understanding colonial biopolitics as well as governmental rationalities concerned with development, his works have too often failed to inspire studies of political subjectivity. Instead, they have been used to stoke the myth of the inevitability of the decline of collective political subjects, often describing an increasingly limited horizon of political possibilities, and provoking a disenchantment with the political itself in postcolonial works and studies. Working against the grain of current Foucauldian scholarship, this book underlines the importance of Foucault's work for the capacity to recognize how this degraded view of political subjectivity came about, particularly within the framework of the discourses and politics of 'development', and with particular attention to the predicaments of postcolonial peoples. It explores how we can use Foucault's ideas to recover the vital capacity to think and act politically at a time when fundamentally human capacities to think, know and to act purposively in the world are being pathologized as expressions of the hubris and 'underdevelopment' of postcolonial peoples. Why and how it is that life in postcolonial settings has been depoliticized to such dramatic effect? The immediacy of these themes will be obvious to anyone living in the South of the world. But within the academy they remain heavily under-addressed. In thinking about what it means to read Michel Foucault today, this book tackles some significant questions and problems: Not simply that of how to explain the ways in which postcolonial regimes of governance have achieved the debasements of political subjectivity they have; nor that of how we might better equip them with the means to suborn the life of postcolonial peoples more fully; but that of how such peoples, in their subjection to governance, can and do resist, subvert, escape and defy the imposition of modes of governance which seek to remove their lives of those very capacities for resistance, subversion, flight, and defiance.

Blackening Europe Heike Raphael-Hernandez 2012-11-12 Traditional Scholars have often looked at African American studies through the lens of European theories, resulting in the secondarization of the African American presence in Europe and its contributions to European culture. Blackening Europe reverses this pattern by using African American culture as the starting point for a discussion of its influences over traditional European structures. Evidence of Europe's blackening abound, from French ministers of Hip-hop and British incarnations of "Shaft" to slavery memorial in the Netherlands and German youth sporting dreadlocks. Collecting essays by scholars from both sides of the Atlantic and fields as diverse as history, literature, politics, social studies, art, film and music, Blackening Europe explores the implications of these cultural hybrids and extends the growing dialogues about Europe's fascination with African America.

Archives in Liquid Times Frans Smit 2017 Archives in Liquid Times aims to broaden and deepen the thinking about archives in today's digital environment. It is a book that tries to fuel the debate about archives in different fields of research. It shows that in these liquid times, archives need and deserve to be considered from different angles. Archives in Liquid Times is a publication in which archival science is linked to philosophy (of information) and data science. Not only do the contributors try to open windows to new concepts and perspectives, but also to new uses of existing concepts concerning archives. The articles in this book contain philosophical reflections, speculative essays and presentations of new models and concepts alongside well-known topics in archival theory. Among the contributors are scholars from different fields of research, like Anne Gilliland, Wolfgang Ernst, Geoffrey Yeo, Martijn van Otterlo, Charles Jeurgens and Geert-Jan van Bussel. This book includes interviews with Luciano Floridi and Eric Ketelaar, in which they reflect on key issues arising from the contributions. The editors are Frans Smit, Arnoud Glaudemans and Rienk Jonker.

Law, Memory, Violence Stewart Motha 2016-02-22 The demand for recognition, responsibility, and reparations is regularly invoked in the wake of colonialism, genocide, and mass violence: there can be no victims without recognition, no perpetrators without responsibility, and no justice without reparations. Or so it seems from law's limited repertoire for assembling the archive after 'the disaster'. Archival and memorial practices are central to contexts where transitional justice, addressing historical wrongs, or reparations are at stake. The archive serves as a repository or 'storehouse' of what needs to be gathered and recognised so that it can be left behind in order to inaugurate the future. The archive manifests law's

authority and its troubled conscience. It is an indispensable part of the liberal legal response to biopolitical violence. This collection challenges established approaches to transitional justice by opening up new dialogues about the problem of assembling law's archive. The volume presents research drawn from multiple jurisdictions that address the following questions. What resists being archived? What spaces and practices of memory - conscious and unconscious - undo legal and sovereign alibis and confessions? And what narrative forms expose the limits of responsibility, recognition, and reparations? By treating the law as an 'archive', this book traces the failure of universalised categories such as 'perpetrator', 'victim', 'responsibility', and 'innocence,' posited by the liberal legal state. It thereby uncovers law's counter-archive as a challenge to established forms of representing and responding to violence.

The Work of Mourning Jacques Derrida 2003-09-15 Jacques Derrida is, in the words of the New York Times, "perhaps the world's most famous philosopher—if not the only famous philosopher." He often provokes controversy as soon as his name is mentioned. But he also inspires the respect that comes from an illustrious career, and, among many who were his colleagues and peers, he inspired friendship. The Work of Mourning is a collection that honors those friendships in the wake of passing. Gathered here are texts—letters of condolence, memorial essays, eulogies, funeral orations—written after the deaths of well-known figures: Roland Barthes, Paul de Man, Michel Foucault, Louis Althusser, Edmond Jabès, Louis Marin, Sarah Kofman, Gilles Deleuze, Emmanuel Levinas, Jean-François Lyotard, Max Loreau, Jean-Marie Benoist, Joseph Riddel, and Michel Servière. With his words, Derrida bears witness to the singularity of a friendship and to the absolute uniqueness of each relationship. In each case, he is acutely aware of the questions of tact, taste, and ethical responsibility involved in speaking of the dead—the risks of using the occasion for one's own purposes, political calculation, personal vendetta, and the expiation of guilt. More than a collection of memorial addresses, this volume sheds light not only on Derrida's relation to some of the most prominent French thinkers of the past quarter century but also on some of the most important themes of Derrida's entire oeuvre—mourning, the "gift of death," time, memory, and friendship itself. "In his rapt attention to his subjects' work and their influence upon him, the book also offers a hesitant and tangential retelling of Derrida's own life in French philosophical history. There are illuminating and playful anecdotes—how Lyotard led Derrida to begin using a word-processor; how Paul de Man talked knowledgeably of jazz with Derrida's son. Anyone who still thinks that Derrida is a facetious punster will find such resentful prejudice unable to survive a reading of this beautiful work."—Steven Poole, Guardian "Strikingly simple meditations on friendship, on shared vocations and avocations and on philosophy and history."—Publishers Weekly

Functions of the Derrida Archive Richard J. Lane 2003 This dissertation examines the early philosophical receptions to the work of Jacques Derrida, structuring the receptions in the form of an archive. The monograph is composed of three main sections: The Non-Locus of the Archive, The Derrida Archive, and Conclusion: The Margins of Philosophy. The Non-Locus of the Archive examines three ways of conceptualizing the archive: the archaeological or Foucauldian concept as a reaction to the traditional history of ideas, the traditional archive model Foucault attempts to replace, and a deconstructive model which is the first stage in critiquing this traditional/archaeological binary opposition. The Functions of the Derrida Archive are briefly introduced, and the whole issue of the philosophical receptions is related to Derrida's comments on "Colleges and Philosophy" and the essay "The Principle of Reason." The Derrida Archive is divided into Critical and Supporting Receptions. This is an analysis of the Functions that the monograph finds working

Undoing Gender Judith Butler 2004-10-22 Undoing Gender constitutes Judith Butler's recent reflections on gender and sexuality, focusing on new kinship, psychoanalysis and the incest taboo, transgender, intersex, diagnostic categories, social violence, and the tasks of social transformation. In terms that draw from feminist and queer theory, Butler considers the norms that govern—and fail to govern—gender and sexuality as they relate to the constraints on recognizable personhood. The book constitutes a reconsideration of her earlier view on gender performativity from Gender Trouble. In this work, the critique of gender norms is clearly situated within the framework of human persistence and survival. And to "do" one's gender in certain ways sometimes implies "undoing" dominant notions of personhood. She writes about the "New Gender Politics" that has emerged in recent years, a combination of movements concerned with

transgender, transsexuality, intersex, and their complex relations to feminist and queer theory.

Bodies That Matter Judith Butler 2014-09-03 In Bodies That Matter, Judith Butler further develops her distinctive theory of gender by examining the workings of power at the most "material" dimensions of sex and sexuality. Deepening the inquiries she began in Gender Trouble, Butler offers an original reformulation of the materiality of bodies, examining how the power of heterosexual hegemony forms the "matter" of bodies, sex, and gender. Butler argues that power operates to constrain "sex" from the start, delimiting what counts as a viable sex. She offers a clarification of the notion of "performativity" introduced in Gender Trouble and explores the meaning of a citational politics. The text includes readings of Plato, Irigaray, Lacan, and Freud on the formation of materiality and bodily boundaries; "Paris is Burning," Nella Larsen's "Passing," and short stories by Willa Cather; along with a reconsideration of "performativity" and politics in feminist, queer, and radical democratic theory.

International Relations Theory for the Twenty-First Century Martin Griffiths 2007-10-24 International relations theory has been the site of intense debate in recent years. A decade ago it was still possible to divide the field between three main perspectives - Realism, Liberalism, and Marxism. Not only have these approaches evolved in new directions, they have been joined by a number of new 'isms' vying for attention, including feminism and constructivism. International Relations Theory for the Twenty-First Century is the first comprehensive textbook to provide an overview of all the most important theories within international relations. Written by an international team of experts in the field, the book covers both traditional approaches, such as realism and liberal internationalism, as well as new developments such as constructivism, poststructuralism and postcolonialism. The book's comprehensive coverage of IR theory makes it the ideal textbook for teachers and students who want an up-to-date survey of the rich variety of theoretical work and for readers with no prior exposure to the subject.

The Oxford Handbook of Material Culture Studies Dan Hicks 2010-09-02 Written by an international team of experts, the Handbook makes accessible a full range of theoretical and applied approaches to the study of material culture, and the place of materiality in social theory, presenting current thinking about material culture from the fields of archaeology, anthropology, geography, and science and technology studies.

Midnight's Orphans Glenn D'Cruz 2006 'This book is the first detailed study of Anglo-Indians in literature. Rather than simply dismissing the representation of Anglo-Indians in literary texts as offensive stereotypes, the book identifies the conditions for the emergence of these stereotypes through close readings of key novels, such as Bhowani Junction, Midnight's Children and The Impressionist. It also examines the work of contemporary Anglo-Indian writers such as Allan Sealy and Christopher Cyril'.
