Digital Foundations xtine burrough 2008-12-11 Fuses design

fundamentals and software training into one cohesive book! The only book to teach Bauhaus design principles alongside basic digital tools of Adobe's Creative Suite, including the recently released Adobe CS4 Addresses the growing trend of compressing design fundamentals and design software into the same course in universities and design trade schools. Lessons are timed to be used in 50-minute class sessions. Digital Foundations uses formal exercises of the Bauhaus to teach the Adobe Creative Suite. All students of digital design and production—whether learning in a classroom or on their own—need to understand the basic principles of design in order to implement them using current software. Far too often design is left out of books that teach software.

Consequently, the design software training exercise is often a lost opportunity for visual learning. Digital Foundations reinvigorates software training by integrating Bauhaus design exercises into tutorials fusing design fundamentals and core Adobe Creative Suite methodologies. The result is a cohesive learning experience. Design topics and principles include: Composition; Symmetry and Asymmetry; Gestalt; Appropriation; The Bauhaus Basic Course Approach; Color Theory; The Grid; Scale, Hierarchy and Collage; Tonal Range; Elements of Motion. Digital Foundations is an AIGA Design Press book, published under Peachpit's New Riders imprint in partnership with AIGA, the professional association for design.

Photographs have been in fashion since they were known to the common man. People use photographs to capture and store their special moments. These photos help in reliving those precious moments that they spent with their loved ones, friends, or family. But, it is not the 1940s or 1980s now. With time, people have developed various methods of processing images. Today, they capture images not only to remember their moments, but to share them with people on social media platforms like Instagram, Pinterest, Facebook, Twitter, and many others. Capturing amazing images with the help of your camera is not enough. You need to produce some appealing images from those digital copies of yours as well. If you spend more than 30 seconds studying an image that you took, you will often notice that something is not presented the way you wanted it to be.
