Curious Video Game Machines Lewis Packwood 2023-11-30 The story of video games is often told as the successive rise of computers and consoles from famous names like Atari, Commodore, Nintendo, Sega, Sony and Microsoft. But beyond this familiar tale, there's a whole world of weird and wonderful gaming machines that seldom get talked about. Curious Video Game Machines reveals the fascinating stories behind a bevy of rare and unusual consoles, computers and coin-ops - like Kimtanktics, a 1970s wargame computer made out of calculator parts, or the suite of Korea-exclusive consoles made by car manufacturer Daewoo. Then there's the Casio Loopy, a 1990s console that doubled up as a sticker printer, the RDI Halcyon, a 1985 LaserDisc-based machine that could recognize your voice, and the Interton VC 4000, a German console made by a hearing-aid company, as well as a range of bizarre arcade machines, from early attempts at virtual reality to pedal-powered flying contraptions. There are tales of missed opportunities, like the astonishingly powerful Enterprise 64 computer, which got caught in development hell and arrived too late to make an impact on the British microcomputer market. And there are tales of little-known triumphs, like the Galaksija DIY computer kit that introduced a whole generation of Yugoslavians to computing before the country became engulfed by war. Featuring exclusive interviews with creators, developers and collectors, Curious Video Game Machines finally shines a light on the forgotten corners of video-game history.

Unplugged Play: Preschool Bobbi Conner 2020-08-18 Unplug Your Preschooler with more than 200 screen-free games and activities! "Just plain fun!... Will help parents give their children the kind of childhood that more and more

children are missing.”--Mary Piper, PhD., author of *Reviving Ophelia Saving the Selves of Adolescent Girls From Animal Doctor to Lunch Bag Puppet, Letter Hunt to Life-Size Me*, here are more than 200 screen-free games and activities to help kids enjoy the wholesome, old-fashioned experience of playing creatively and freely...without technology. There are outdoor games and indoor games, games to play solo and games to play with others, arts and crafts, songs and rhymes, playdates and party favorites--even instant activities to do at the kitchen table while dinner's cooking. All games are preschooler-tested and approved. A note to parents: Play matters! Technology has its place, but these unplugged games are designed to stretch the imagination, spark creativity, build strong bodies, and forge deeper connections with family and friends.

Day Care and Early Education 1976
Transforming the Workforce for Children Birth Through Age 8 National Research Council 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these

systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Mobile Learning Applications in Early Childhood Education Papadakis, Stamatios 2019-11-29 Mobile technologies combined with an interdisciplinary approach to knowledge and organization of learning experiences that are meaningful to children could create a creative and interactive learning environment different from that of traditional teaching. Making good use of mobile learning with appropriate devices

will increase the learning motivations of the students and help them bring about positive performance. *Mobile Learning Applications in Early Childhood Education* is a collection of innovative research on the methods and applications of mobile learning techniques and strategies within diversified teaching settings. While highlighting topics including computational thinking, ubiquitous learning, and social development, this book is ideally designed for researchers, teachers, parents, curriculum developers, instructional designers, academicians, students, and practitioners seeking current research on the application of mobile technology within child education.

International Conference on Machine Learning and Big Data Analytics for IoT Security and Privacy (SPIoT-2020), held in Shanghai, China, on November 6, 2020. Due to the COVID-19 outbreak problem, SPIoT-2020 conference was held online by Tencent Meeting. It provides comprehensive coverage of the latest advances and trends in information technology, science and engineering, addressing a number of broad themes, including novel machine learning and big data analytics methods for IoT security, data mining and statistical modelling for the secure IoT and machine learning-based security detecting protocols, which inspire the development of IoT security and privacy technologies. The contributions cover a wide range of topics: analytics and machine learning applications to IoT security; data-based metrics and risk assessment approaches for IoT; data confidentiality and privacy in IoT; and authentication and access control for data usage in IoT. Outlining promising future research directions, the book is a valuable resource for students, researchers and professionals and provides a useful reference guide for newcomers to the IoT security and privacy field.
