*The British Raid on Essex* Jerry Roberts

2014-04-30 This is the dynamic account of one of the most destructive maritime actions to take place in Connecticut history: the 1814 British attack on the privateers of Pettipaug, known today as the British Raid on Essex. During the height of the War of 1812, 136 Royal marines and sailors made their way up the Connecticut River from warships anchored in Long Island Sound. Guided by a well-paid American traitor the British navigated the Saybrook shoals and advanced up the river under cover of darkness. By the time it was over, the British had burned twenty-seven American vessels, including six newly built privateers. It was the largest single maritime loss of the war. Yet this story has been virtually left out of the history books—the

forgotten battle of the forgotten war. This new account from author and historian Jerry Roberts is the definitive overview of this event and includes a wealth of new information drawn from recent research and archaeological finds. Lavish illustrations and detailed maps bring the battle to life.

**Functional and Funded, Revised Edition**

2019-07-15 You're a staff member, board trustee, community volunteer or consultant doing the hard work to raise money so your nonprofit can keep going, keep pursuing its mission. Maybe you're thinking about chasing after grants, scattering proposals around, or trying to figure out whether you should set up

that crowdfunding campaign, or... Whatever you're up to, it's not getting any easier out there with all the other groups competing for attention and money. This is where Harvey Chess comes into your picture. His ongoing work is in and around nonprofits, including grant makers. He's best known as a seasoned trainer delivering highly regarded funding proposal development workshops for years. He fully understands the challenges you confront in trying to support your organization - and has distilled his experience into a one-of-a-kind book for you, *Functional and Funded, Securing Your Nonprofit's Assets From The Inside Out*. His book concentrates on helping you overcome resource development and sustainability challenges. You'll have the opportunity to front and center tactics that separate your nonprofit from the crowd by distinguishing it as substantial, enterprising and resilient. Putting aside much of what passes for conventional wisdom in fundraising, you're presented with a potent alternative - business as

unusual - when making the case for financially supporting your nonprofit. Everyone reading and then applying the uncommonly strong strategy at the heart of this book will upgrade skills to secure assets for their nonprofit while strengthening the organization at the same time. How? Still not convinced? Read on. First, the days of only seeking grants are over! The book's Nonprofit Engine contains the diversified components of financial assistance your organization must now seek out to keep running. You'll be offered the tools to develop absolute clarity in building the sharp core funding proposal to use and refine to tell your nonprofit's story every time you reach out for funding. At the same time, you will discover - or rediscover - that the characteristics of a strong nonprofit organization and a strong funding proposal share common ground. You'll come away from business as unusual with a strong nonprofit inside; a strong proposal outside. You want nothing less when it comes to competing for

resources. The book includes three real life funding proposal variations, along with comments about what makes sense and what doesn't in each. A chapter, The Funding Marketplace, details how and where to locate sources of potential financial support for your organization. You'll find external links to facilitate solid, detailed follow-up research. Finally, there's a Tool Kit - the components of which you can and should reproduce - intended to bring to life the book's sub-title, Securing Your Nonprofit's Resources From The Inside Out. "...what you get here is invaluable practical advice distilled from a distinguished career as a fundraiser, grant maker and trusted advisor to nonprofits of all types and sizes," along with "...delights in challenging conventional wisdom..." Tom David, consultant in the craft of grantmaking, philanthropic strategy, evaluation, and organizational learning

2023-05-09 Every one of Connecticut's 169 towns has a story shaped by its geography and its people--the first inhabited the state more than 10,000 years ago, the Dutch traders,

English settlers, and Africans--enslaved and free--who settled towns as one of the original 13 colonies, and successive waves of immigrants who moved its story forward. It's a small state with amazing variety that makes the 169 Club a fun and rewarding adventure. You'll experience historic town greens and new city centers, revitalized mills sprouting microbreweries and local farms offering local farm-to-table foods, and maritime villages and rural upland communities. Connecticut has it all! This guide, written by town historians and other local boosters, offers the backstory to your discovery of what makes Connecticut so special. - Elizabeth J. **Barbarians, Maps, and Historiography**

Walter Goffart 2023-05-31 To complement his first collection of articles (Rome's Fall and After, 1989), Walter Goffart presents here a further set of essays, all but two published between 1988 and 2007. They mainly focus on two types of historiography: early medieval narratives, with special attention to Bede's *Historia ecclesiastica*; and printed maps designed to portray and teach history, with special attention to the ubiquitous 'map of the barbarian invasions'. The wide-ranging concerns represented extend from the underside of the Life of St Severinus of Noricum, and further evidence for dating Beowulf, to the questions whether the barbarian invasions period was a 'heroic age' and how Charlemagne shaped his own succession. Attention is also paid

to the earliest map illustrating the Anglo-Saxon Heptarchy and to the historical vignettes of the Vatican Galleria delle carte geografiche. The collection opens with the appraisal of certain writings dealing with what is now called 'ethnogenesis theory'. To conclude, Professor Goffart adds brief second thoughts about each of these essays and supplies an annotated list of his articles that have not been reprinted.

**Moby-Duck** Donovan Hohn 2012-02-01 DIV When Donovan Hohn first heard the remarkable story of how 28,904 bath toys spilled into the Pacific en route to the US from China and have been washing up along beaches throughout the world ever since, he decided to find out more and assumed he would interview a few oceanographers, talk to some beachcombers and read up on Arctic science and geography. 'But questions can be like ocean currents: wade in too far, and they carry you away.' Setting out on a series of journeys to track the renegade rubber ducks, Moby-Duck is an adventure into the heart

of the sea through science, myth, the global economy and some of the worst weather imaginable, and the riveting story of an accidental odyssey which pulled Hohn into the secretive world of shipping conglomerates, the daring terrain of Arctic researchers, the lunatic risks of maverick sailors, and the shadowy domain of Chinese toy factories. With each new discovery, Hohn learns of another loose thread, and with each successive chase he comes closer to understanding where his castaway quarry comes from (and where it is heading...). In the grand tradition of Tony Horwitz and David Quammen, *Moby-Duck* is a compulsively readable narrative of whimsy and curiosity for anyone who is interested in obsession, travel, plastic, and that great American novel, *Moby-Dick*. /div

*Vietnam Beyond* Gerald E. Augustine 2021-12-07

*Vietnam Beyond* By: Gerald E. Augustine

"Vietnam Beyond" is not only a photographic accounting of a soldier's time while serving in a

front-line unit in the infantry; it is a study of human nature. When rank has its' privileges, not only in the military, but in civilian life as well, you will learn how a person with "power' will use this power to his advantage over someone at his most vulnerable time in their life. You will read how officers and sergeants use their rank to their benefit. You will also learn how attorneys and even a senator used the legal system to their advantage when having control over someone when he is most vulnerable. "Vietnam Beyond" is also a study of the criminal act of the spraying of herbicides by our government not only on the jungles of Vietnam, but on the civilians and our servicemen as well. The result tells of the after effects on the author and his family to this day. And most of all, "Vietnam Beyond" tells how a combat soldier endured traumatizing events that he brought home with him. Those events drive him to be the best that he can be at whatever he encounters and to continuously defeat those demons.

*Address to the People of Connecticut* Democratic

Party Connecticut 2015-07-14 Excerpt from Address to the People of Connecticut: Adopted at the State Convention, Held at Middletown, August 7, 1828 Let it not be said that because most of his predecessors were elected the second time, that it will be a public censure on Mr. Adams, not to r'e-elect him. The evils and the dangers of the practice have not before been developed; an evil from a different source, was discovered at the election of Mr. Jefferson, which came near defeating the will of the people, and a remedy was immediately applied, although it required an amendment of the constitution. Whenever an evil is discovered in the practice of government, the people should be bold and prompt to correct it. If the respect due to Mr. Adams, is to prevent the correction of a dangerous precedent, the same reason will apply to his successor, and with more force. So that the consequence will be, the evil can never be removed. Whilst public officers should be treated with justice, it ought not to be forgotten,

that offices are not created for the incumbents, but for the public good; and it should be particularly borne in mind, by every freeman in the union, that no man has any claims to the presidency, whatever may be his talents, and services - the incumbent no more than any other individual. It is deeply to be deprecated that there should be under any circumstances, a prevailing sentiment to disregard principles, and even the public interest, from a mistaken or interested attachment to men.
