The Korean War Stanley Sandler 2021-09-15
The Korean War has been termed "The Forgotten War" or the "Unknown War." It is a conflict which never assumed the mythic character of the American Civil War or World War II. However, this book asserts, it would be impossible to understand the Cold War and indeed post 1945 global history without knowledge of the Korean War. Providing a history of the Korean peninsula before the war and including a detailed analysis of the fighting itself, *The Korean War* goes beyond the battlefield to deal with the war in the air, ground attack, and air evacuation. The study also evaluates the contributions of the UN naval forces, the impact of the war on various homefronts and issues such as defectors,

opposition to the war, racial segregation and integration, POWs and the media. Recently-released Soviet documents are used to assess the role of China, the Soviet Union, North and South Korea and the allied forces in the conflict. This fascinating work offers a unique analysis of the Korean War and will be invaluable to students of twentieth-century history, particularly those concerned with American and Pacific history.

Access Denied Ronald Deibert 2008-01-25
A study of Internet blocking and filtering around the world: analyses by leading researchers and survey results that document filtering practices in dozens of countries. Many countries around the world block or filter Internet content, denying access to information that they deem too sensitive for ordinary citizens—most often

about politics, but sometimes relating to sexuality, culture, or religion. Access Denied documents and analyzes Internet filtering practices in more than three dozen countries, offering the first rigorously conducted study of an accelerating trend. Internet filtering takes place in more than three dozen states worldwide, including many countries in Asia, the Middle East, and North Africa. Related Internet content-control mechanisms are also in place in Canada, the United States and a cluster of countries in Europe. Drawing on a just-completed survey of global Internet filtering undertaken by the OpenNet Initiative (a collaboration of the Berkman Center for Internet and Society at Harvard Law School, the Citizen Lab at the University of Toronto, the Oxford Internet Institute at Oxford University, and the University of Cambridge) and relying on work by regional experts and an extensive network of researchers, Access Denied examines the political, legal, social, and cultural contexts of

Internet filtering in these states from a variety of perspectives. Chapters discuss the mechanisms and politics of Internet filtering, the strengths and limitations of the technology that powers it, the relevance of international law, ethical considerations for corporations that supply states with the tools for blocking and filtering, and the implications of Internet filtering for activist communities that increasingly rely on Internet technologies for communicating their missions. Reports on Internet content regulation in forty different countries follow, with each two-page country profile outlining the types of content blocked by category and documenting key findings. Conflicted Antiquities Elliott Colla 2008-01-11
Conflicted Antiquities is a rich cultural history of

European and Egyptian interest in ancient Egypt and its material culture, from the early nineteenth century until the mid-twentieth. Consulting the relevant Arabic archives, Elliott Colla demonstrates that the emergence of Egyptology—the study of ancient Egypt and its material legacy—was as consequential for modern Egyptians as it was for Europeans. The values and practices introduced by the new science of archaeology played a key role in the formation of a new colonial regime in Egypt. This fact was not lost on Egyptian nationalists, who challenged colonial archaeologists with the claim that they were the direct heirs of the Pharaohs, and therefore the rightful owners and administrators of ancient Egypt’s historical sites and artifacts. As this dispute developed, nationalists invented the political and expressive culture of “Pharaonism”—Egypt’s response to Europe’s Egyptomania. In the process, a significant body of modern, Pharaonist poetry, sculpture, architecture, and film was created by

artists and authors who looked to the ancient past for inspiration. Colla draws on medieval and modern Arabic poetry, novels, and travel accounts; British and French travel writing; the history of archaeology; and the history of European and Egyptian museums and exhibits. The struggle over the ownership of Pharaonic Egypt did not simply pit Egyptian nationalists against European colonial administrators. Egyptian elites found arguments about the appreciation and preservation of ancient objects useful for exerting new forms of control over rural populations and for mobilizing new political parties. Finally, just as the political and expressive culture of Pharaonism proved critical to the formation of new concepts of nationalist identity, it also fueled Islamist opposition to the Egyptian state.

Middle East, North Africa, and southeastern Europe.

The Ardennes J. Mark Connell 2003 In December 1944, desperate to hold out for the new weaponry he expected and shocked by losing the port of Antwerp, Adolf Hitler embarked on an audacious counter-offensive that was intended to drive back the all-conquering Allied forces that had caused Germany to retreat from Normandy to its own borders. It was a foolhardy exercise but it had surprise on its side and for some days the fate of the war in Europe was in the hands of the commanders and men of a few American divisions and some supporting British forces. The Germans got within a few miles of their first objective - the River Meuse - but, by then, their own shortcomings had been found out and the Allies had regrouped. This avidly studied battle is given a fresh and all-embracing approach in this 55000 word account of the fluctuating fortunes of the combatants and the role in the

action of the leading generals, including Eisenhower, Patton, Montgomery, Model, Dietrich and von Rundstedt. Though Germany was destined for defeat, its industry produced remarkable amounts of weaponry for this offensive and an assortment of troops, many too young or too old, were assembled for Hitler's astonishing but ultimately futile final battlefield venture. The Battle of the Bulge is an example of a short action where almost every military tactic was deployed and is charted on a daily basis here.

Building the American Republic, Volume 2 Harry L. Watson 2018-01-18 "Building the American Republic tells the story of United States with remarkable grace and skill, its fast moving narrative making the nation's struggles and accomplishments new and compelling. Weaving together stories of abroad range of Americans. Volume 1 starts at sea and ends on

the field. Beginning with the earliest Americans and the arrival of strangers on the eastern shore, it then moves through colonial society to the fight for independence and the construction of a federal republic. Vol 2 opens as America struggles to regain its footing, reeling from a presidential assassination and facing massive economic growth, rapid demographic change, and combusive politics.

Envy, Poison, and Death Esther Eidinow 2016

This volume explores three trials conducted in Athens in the fourth century BCE; the defendants were all women charged with undertaking ritual activities, but much of the evidence remains a mystery. The author reveals how these trials provide a vivid glimpse of the socio-political environment of Athens during the early-mid fourth century BCE.

The United Nations, Peace and Security Ramesh Thakur 2006-06-08 Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war.

In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

Historical Dictionary of Somalia Mohamed Haji Mukhtar 2003-02-25 The volume will cover all aspects of Somalia, providing useful information about the country in a comprehensive manner.

The book also reflects on the contributions of the Somali sources on history and culture. Arabic sources and other non-English colonial sources of great importance to the subject are also highlighted. A vital addition to reference collections supporting undergraduate and graduate programs on Africa and the Middle East, international relations, and economics_ and a useful fact-filled compendium for government and public libraries, NGO's, and other special libraries as well.

Conscripts and Deserters Alan I. Forrest 1989
Between the outbreak of war with Austria in 1792 and Napoleon's final debacle in 1814, France remained almost continuously at war, recruiting in the process some two to three million frenchmen--a level of recruitment unknown to previous generations and widely resented as an attack on the liberties of rural communities. Forrest challenges the notion of a nation heroically rushing to arms by examining the massive rates of desertion and avoidance of

service as well as their consequences on French society--on military campaigns and the morale of armies, on political opinion at home, on the social fabric of local villages, and on the Napoleonic dream of bringing about a coherent and centralized state.

Prologue to Conflict Holman Hamilton 2014-10-17
The crisis facing the United States in 1850 was a dramatic prologue to the conflict that came a decade later. The rapid opening of western lands demanded the speedy establishment of local civil administration for these vast regions. Outraged partisans, however, cried of coercion: Southerners saw a threat to the precarious sectional balance, and Northerners feared an extension of slavery. In this definitive study, Holman Hamilton analyzes the complex events of the anxious months from December, 1849, when the Senate debates

began, until September, 1850, when Congress passed the measures.

The Memoirs of Lady Hyegyong JaHyun Kim Haboush 2013-09-14 Lady Hyegyong's memoirs, which recount the chilling murder of her husband by his father, form one of the best known and most popular classics of Korean literature. From 1795 until 1805 Lady Hyegyong composed this masterpiece, depicting a court life Shakespearean in its pathos, drama, and grandeur. Presented in its social, cultural, and historical contexts, this first complete English translation opens a door into a world teeming with conflicting passions, political intrigue, and the daily preoccupations of a deeply intelligent and articulate woman. JaHyun Kim Haboush's accurate, fluid translation captures the intimate and expressive voice of this consummate storyteller. Reissued nearly twenty years after its initial publication with a new foreword by Dorothy Ko, *The Memoirs of Lady Hyegyong* is a

unique exploration of Korean selfhood and an extraordinary example of autobiography in the premodern era.

The History of Korea (Vol.1&2) Homer B.

Hulbert 2023-12-13 *The History of Korea* presents a chronological account of Korea from ancient days, over 2000 B. C, to modern 20th century Korea. Hulbert said that Korea and Japan have the same two racial types, but Japan is mostly Malay and Korea is mostly Manchu-Korean. He claimed that Korea is physically mostly of the northern type, but also said that the nation, being physically mostly of the northern type, did not disprove Hulbert's claim that the Malay element developed Korea's first civilization, although not necessarily originating Korea's first civilization, and the Malay element imposed its language in its main features in the entire peninsula.

Power and Knowledge in Southeast Asia

Rommel A. Curaming 2019-10-10 Examining two state-sponsored history writing projects in Indonesia and the Philippines in the 1970s, this book illuminates the contents and contexts of the two projects and, more importantly, provides a nuanced characterization of the relationship between embodiments of power (state, dictators, government officials) and knowledge (intellectuals, historians, history). Known respectively as Sejarah Nasional Indonesia (SNI) and the Tadhana project, these projects were initiated by the Suharto and Marcos authoritarian regimes against the backdrop of rising and competing nationalisms, as well as the regimes' efforts at political consolidation. The dialectics between actors and the politico-academic contexts determine whether scholarship and politics would clash, mutually support, or co-exist parallel with one another.

Rather than one side manipulating or co-opting the other, this study shows the mutual need or partnership between scholars and political actors in these projects. This book proposes the need to embrace rather than deny or transcend the entwined power/knowledge if the idea is for scholarship to realize its truly progressive visions. Analyzing the dynamics of state-scholar relations in the two countries, the book will be of interest to academics in the fields on Southeast Asian history and politics, nationalism, historiography, intellectual history, postcolonial studies, cultural studies, and the sociology of knowledge.

Technics and Civilization Lewis Mumford

2010-10-30 Technics and Civilization first

presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer,

and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, *Technics and Civilization* was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of *Technics and Civilization* still deserve our attention, nearly three quarters of a century after they were written.”—*Journal of Technology and Culture*

Kiss of Death John D. Bessler 2003 Documents the life stories of death-row prisoners and the author's experiences as a pro bono attorney on Texas death penalty cases to present arguments for the abolishment of state-sanctioned executions.

Africa from the Twelfth to the Sixteenth Century Unesco. International Scientific Committee for the Drafting of a General History of Africa 1984 The result of years of work by scholars from all over the world, The UNESCO General History of Africa reflects how the different peoples of Africa view their civilizations and shows the historical relationships between the various parts of the continent. Historical connections with other continents demonstrate

Africa's contribution to the development of human civilization. Each volume is lavishly illustrated and contains a comprehensive bibliography. The period covered in Volume IV constitutes a crucial phase in the continent's history, in which Africa developed its own culture and written records became more common. Major themes include the triumph of Islam; the extension of trading relations, cultural exchanges, and human contacts; and the development of kingdoms and empires.

The American Yawp Joseph L. Locke

2019-01-22 "I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," Leaves of Grass The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past.

Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of

American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Munich Robert Harris 2018-01-16 NEW YORK TIMES BESTSELLER • From the bestselling author of *V2* and *Fatherland*—a WWII-era spy thriller set against the backdrop of the fateful Munich Conference of September 1938. Now a Netflix film starring Jeremy Irons. With this electrifying novel about treason and conscience, loyalty and betrayal, "Harris has brought history

to life with exceptional skill" (The Washington Post). Hugh Legat is a rising star of the British diplomatic service, serving at 10 Downing Street as a private secretary to the Prime Minister, Neville Chamberlain. Paul von Hartmann is on the staff of the German Foreign Office--and secretly a member of the anti-Hitler resistance. The two men were friends at Oxford in the 1920s, but have not been in contact since. Now, when Hugh flies with Chamberlain from London to Munich, and Hartmann travels on Hitler's train overnight from Berlin, their paths are set on a disastrous collision course. And once again, Robert Harris gives us actual events of historical importance--here are Hitler, Chamberlain, Mussolini, Daladier--at the heart of an electrifying, unputdownable novel.

Pointing Our Thoughts Neil L. Rudenstine 2001
As president of Harvard University, Neil Rudenstine has enjoyed a unique perspective on the state of higher learning. This selection of Rudenstine's talks and writings illuminates many

of the ideas and issues that animate higher education today, from the educational importance of diversity to the teaching potential of new technologies.

The Ascent of Humanity Charles Eisenstein

2013-02-05 The author of *The More Beautiful World Our Hearts Know Is Possible* explores the history and potential future of civilization, tracing the converging crises of our age to the illusion of the separate self Our disconnection from one another and the natural world has mislaid the foundations of science, religion, money, technology, economics, medicine, and education as we know them. It has fired our near-pathological pursuit of technological Utopias even as we push ourselves and our planet to the brink of collapse. Fortunately, an Age of Reunion is emerging out of the birth pangs of an earth in crisis. Our journey of separation hasn't been a terrible mistake but an evolutionary process and an adventure in self-discovery. Even in our darkest hour, Eisenstein sees the possibility of a more beautiful world—not through the extension of millennia-old methods of management and control but by fundamentally reimagining ourselves and our systems. We must shift away from our Babelian

efforts to build ever-higher towers to heaven and instead turn out attention to creating a new kind of civilization—one designed for beauty rather than height.
