*Ancient Egypt 39,000 BCE* Edward F. Malkowski 2010-05-14 A view into the sophisticated and highly advanced civilization that preceded the world of the pharaohs • Presents historical evidence of the civilization ruled by the “gods” that the Egyptians claimed preceded their own • Explains who these prehistoric people were, what happened to them, and why they built a series of pyramids along the west bank of the Nile River Traditional Egyptologists have long resisted the notion that the architectural achievements of the Ancient Egyptians required the existence of a much more sophisticated technology than would have existed at that time. Yet, no records exist explaining how, why, or who built Egypt's megalithic monuments and statues. The ancient Egyptians did, however, record that their civilization resided in the shadow of a kingdom of “gods” whose reign ended many thousands of years before their first dynasty. What was this Civilization X that antiquity's most accomplished people revered as gods? The recent discovery of a large stone at one of Egypt's oldest ruins presents physical evidence that clearly and distinctly shows the markings of a machining process far beyond the capabilities of the Ancient Egyptians. Likewise, experimental modeling of the Great Pyramid's subterranean chambers and passageways gives scientific evidence to further support the theory that the civilization responsible for such magnificent monuments is much older than presently believed. Ancient Egypt 39,000 BCE examines this evidence from historical and technical points of view, explaining who these prehistoric people were, what happened to them, why they built their civilization out of granite, and why they built a series of pyramids along the west bank of the Nile River.

ART THEFT AND FORGERY INVESTIGATION Robert E. Spiel 2000-01-01 The goal of this unique manual is to arm criminal investigators with tools and weapons that are suitable and effective against art theft and forgery. The author, with over 25 years' experience in the art theft investigation field, presents comprehensive techniques, tips, and ideas to help diminish the level of frustration experienced by criminal investigators required to handle the growing number and magnitude of art crimes. The structure of the manual is simple and direct. The first part guides the reader in the use of the text and introduces the art world environment. The second part discusses the investigator's interaction with the victim, including interviewing, crime scene investigation, and identifying and developing suspects. Part three deals with offenders and covers such topics as art theft methods, forgery techniques, methods of distribution, and investigative countermeasures. The final section presents a comprehensive review of solutions and recoveries, including chapters on legal weapons, insurance and rewards, the use of experts, universal and variable contact group classifications, object bulletins, art criminal photo albums, informant development, undercover methods, unidentified victims, and recovery and seizure of stolen or fake art.
