The Greek Islands Paul Hetherington 2001 Aimed at travelers to the Greek Islands who are interested in the antiquities of the medieval and Byzantine periods. With maps, plans, and illustrations, the personal tours of the sites on each of the 47 islands plus the explanations and historical settings make this a definitive and scholarly companion.

The Sacred Architecture & Art of Four Byzantine Capitals Nicholas N. Patricios 2020 Byzantine churches are special. They are special as their architecture, art, and liturgy are integrated and imbued with symbolism, and they do so in so many different ways. The best have impressive architectural exteriors and striking iconographic interiors. This book is a photographic record of specially selected churches of four Byzantine capitals which an interested reader can likewise visit. The capitals of the Byzantine Empire were Constantinople (today Istanbul) on the Bosphorus the major capital city; Thessaloniki located in northern Greece the co-capital; Mystras in the central Peloponnese a medieval capital; and Mount Athos on a peninsula in northeast Greece still today the spiritual capital of Eastern Orthodox monasticism. The aim of this book is to illustrate visually in color, with mostly one-page readable written descriptions, the architecture and iconography of the important churches, sixty-nine in all, of the four capitals of the Byzantine Empire. Of these churches the author has visited all except five. Each church is depicted with a floor plan and color photographs, a total of 391 in color out of the 476 illustrations in the book. These churches of the Empire's heartland are most significant as they acted as models or prototypes for those built elsewhere in the Byzantine world. It is remarkable that the Byzantine-style church has continued to be built even after the Byzantine Empire ceased to exist in Greek and Eastern Orthodox communities throughout the world to the present day.

**Hellenic Temples and Christian Churches** Vasilios Makrides 2009-09-01 People, A Global Agenda discusses the social impact of global transformations. A collaborative effort of more than fifty thinkers from countries throughout the world, the book contains specific proposals intended to address several of the major problems afflicting virtually every country today. The crises confronted by the contributors include poverty, unemployment, and social disintegration. Part One examines the need for a shift in our understanding of security from a political to a human sense of the term. Contributors devise strategies for improving human living conditions, and propose new frameworks of development cooperation and new patterns of global governance in order to enhance human security. Part Two highlights the impact of poverty in political, economic, social, and environmental terms. The character of unemployment, under-employment, low-productive employment, and the new phenomenon of jobless growth at the turn of the 21st century forms the heart of Part Three. The selections seek to delineate measures, at both the state and market level, for the expansion of productive employment and sustainable livelihoods, and for the role of new technology in this endeavor. Part Four examines the causes and impacts of the world's social disintegration and inequality, and advocates means by which social cohesion and justice can be enhanced.

**Guide to the Literature of Art History 2** Max Marmor 2005 "This bibliography supplements the greatest of modern art bibliographies, Etta Arntzen and Robert Rainwater's *Guide to the literature of art history* (ALA, 1980)"--Preface.

*Eastern Medieval Architecture* Robert Ousterhout 2019-08-26 The rich and diverse architectural traditions of the Eastern Mediterranean and adjacent regions are the subject of this book. Representing the visual residues of a "forgotten" Middle Ages, the social and cultural developments of the Byzantine Empire, the Caucasus, the Balkans, Russia, and the Middle East parallel the more familiar architecture of Western Europe. The book offers an expansive view of the architectural developments of the Byzantine Empire and areas under its cultural influence, as well as the intellectual currents that lie behind their creation. The book alternates chapters that address chronological or regionally-based developments with thematic studies that focus on the larger cultural concerns, as they are expressed in architectural form.

Darling's entries combine an architectural reading with the larger context of the region's cultural history. An introductory essay, glossary, geographic index, and subject index add to this vastly interesting volume. The Architecture of

Greece is the first release from Greenwood's Reference Guide to National Architecture series.

**Viewing Greece** Sharon E. J. Gerstel 2016 "The essays in this volume derive from a series of events that took place in conjunction with the exhibitions in Washington, D.C. and Los Angeles. These conferences, classes, and lectures, in which a number of prominent Greek and American scholars participated, expanded the scope of the exhibition and invited listeners to consider new approaches to the study of Byzantine Greece"--Page 7.

*Cross-Cultural Interaction Between Byzantium and the West, 1204-1669*

Angeliki Lymberopoulou 2018-03-29 The early modern Mediterranean was an area where many different rich cultural traditions came in contact with each other, and were often forced to co-exist, frequently learning to reap the benefits of co-operation. Orthodox, Roman Catholics, Muslims, Jews, and their interactions all contributed significantly to the cultural development of modern Europe. The aim of this volume is to address, explore, re-examine and re-interpret one specific aspect of this cross-cultural interaction in the Mediterranean - that between the Byzantine East and the (mainly Italian) West. The investigation of this interaction has become increasingly popular in the past few decades, not least due to the relevance it has for cultural exchanges in our present-day society. The starting point is provided by the fall of Constantinople to the troops of the Fourth Crusade in 1204. In the aftermath of the fall, a number of Byzantine territories came under prolonged Latin occupation, an occupation that forced Greeks and Latins to adapt their life socially and religiously to the new status quo. Venetian Crete developed one of the most fertile 'bi-cultural' societies, which evolved over 458 years. Its fall to the Ottoman Turks in 1669 marked the end of an era and was hence chosen as the end point for the conference. By sampling case studies from the most representative areas where this interaction took place, the volume highlights the process as well as the significance of its cultural development.

**Mediterranean Voyages** Helen Dawson 2016-07-01 Islands are ideal case studies for exploring social connectivity, episodes of colonisation, abandonment, and alternating phases of cultural interaction and isolation. Their societies display different attitudes toward the land and the sea, which in turn cast light on group identities. This volume advances theoretical discussions of island archaeology by offering a comparative study of the archaeology of colonisation, abandonment, and resettlement of the Mediterranean islands in prehistory. This comparative and thematic study encourages anthropological reflections on the archaeology of the islands, ultimately focusing on people rather than geographical units, and specifically on the relations between islanders, mainlanders, and the creation of islander identities. This volume has significance for scholars interested in Mediterranean archaeology, as well as those interested more broadly in colonisation and abandonment.

**Mystras** Manolēs Chatzēdakēs 1981 Chatzidakis scrutinizes the first evidence for Mystras, before the Frankish Conquest of 1249; the city's acme, under the Franks (from 1249 to 1262), and subsequently, in the days of the Kantakouzenoi and the Palaiologoi; and again when, as capital of the Despotate of the Morea (from 1348 to 1460), Mystras became "the centre and very soul of the Peloponnese", a city in constant communication, politically and culturally, with the capital of the Byzantine Empire, Constantinople itself. And indeed the rich decoration of Mystras' churches - the Metropolis, the Apendiko, the Peribleptos, or the Pantanassa, for instance - is a brilliant example of Constantinople's art at its greatest. Chatzidakis also has a chapter about each of the monuments and its architecture, painting, and sculptured decoration, with notes on the minor chapels. The Castle, the walls, the palaces, and the houses - the indispensable framework for a better understanding of the art of Byzantine Mystras - are examined in the last part of the book. This new edition retains the author's original text in its original form, comprising a detailed study of the monuments and the city over the centuries. All that is new is the additions and adjustments made

necessary by recent findings, the result of conservation and restoration work on the archaeological site by the Fifth Ephorate of Byzantine Antiquities (Sparta). Essential additions have also been made to the chapter on the Museum: these are due to the recent new exhibition on display since 2001, and in particular to the conservation and study of the dress of the Byzantine princess. This edition also has the benefit of new photographs of the site and the monuments.
